Vocational Qualification in Social and Health Care

Vocational skills and competences required for completion of the qualification

Holders of the vocational qualification in social and health care have wide-ranging basic capabilities for the different tasks in their occupational field and more specialised competence and the vocational skills required in the world of work in at least one competence area in working life activities. Practical nurses or emergency practical nurses (BLS) who have completed a vocational upper secondary qualification are able to carry out their work following the regulations, operating practices, values, and occupational ethics of their field. They are able to work in professional interaction and in multiprofessional and multicultural operating environments. They know how to plan, implement, and assess nursing and care that promotes the client's or patient's health, wellbeing, functional capacity, growth, and social inclusion in different social and health care or educational operating environments. They are able to provide client-oriented guidance on how to use the services, are able to use wellbeing technologies diversely, and develop their professional competence according to the principles of lifelong learning. They are able to take care of patient and client safety, work aseptically and ergonomically, and take care of their occupational safety and wellbeing at work.

In the competence area in children's and youth education and care, they know how to promote the child's growth, wellbeing, and learning in early childhood education and care and are able to promote the child's, the adolescent's, and the family's health and wellbeing. In the competence area in mental health and substance abuse work, they are able to do mental health and substance abuse work and work with the clients and networks in that field. In the competence area in care and rehabilitation of the elderly, they are able to work in home care in a manner that enhances the client's functional capacity and promotes the social inclusion of the elderly. In the competence area in nursing and care, they know how to promote the client's health and are able to work in home care and nursing. In the competence area in care for the disabled, they know how to enhance the social inclusion of individuals with disabilities and to maintain and enhance their functional capacity. In the competence area in podiatric care, they know how to promote the podiatric health of their clients and are able to work in podiatric care. In the competence area in oral health care, they are able to work in oral health care and know how to promote oral health. In the competence area in basic life support (BLS), they are able to enhance health, safety, wellbeing and the functional capacity and are able to work in emergency and acute care.

The optional units provide practical nurses or emergency practical nurses (BLS) with competence required for profiling themselves in the different sectors of activities in social and health care. These sectors include the use of wellbeing technology in the maintenance of functional capacity, terminal care, taking samples, supporting living at home and life management, mental health and substance abuse work for different client groups, patient immobilisation, perioperative care, acting in situations with multiple patients and in disasters, terminal care, use of functional methods, enhancing children and adolescents' mental health skills, oral health care, and podiatric care.

Range of occupations accessible to the holder of the certificate

Holders of vocational qualification in social and health care can work in different tasks in nursing and care, services for the elderly and persons with disabilities, mental health and substance abuse work, home care, early childhood education and care, child welfare, families with children, and in different tasks in outpatient and institutional care in social and health care. They may work in basic health care and specialised medical care, for example, on inpatient wards, in outpatient clinics, oral health care, basic life support, perioperative units, terminal care, home care, or hospital services at home. Their jobs may be found in the public, private, or third sector. Qualification holders may also work as entrepreneurs, for example, as providers of podiatric care. Emergency

practical nurses (BLS) with a qualification in the competence area in basic life support have a diverse set of specialisation options open to them in the world of work, and also work in other fields than emergency and acute care. They cannot, however, work in early childhood education and care.

1. Composition of the qualification

The Vocational Qualification in Social and Health Care is composed of vocational units (145 competence points) and common units (35 competence points). The scope of a vocational qualification is 180 competence points.

The Vocational Qualification in Social and Health Care comprises eight competence areas:

- competence area of care and rehabilitation for elderly people, practical nurse
- competence area of podiatric care, practical nurse
- competence area of children's and youth education and care, practical nurse
- competence area of mental health and substance abuse work, practical nurse
- competence area of nursing and care, practical nurse
- competence area of oral health care, practical nurse
- competence area of care for the disabled, practical nurse
- competence area of basic life support (BLS), emergency practical nurse (BLS).

The competence areas include four compulsory units, of which the first two compulsory units, Promotion of growth and social inclusion and Promotion of wellbeing and functional capacity, are included in all but the Competence area in basic life support, in which the compulsory units are Promotion of health, safety and wellbeing and Maintenance and promotion of functional capacity. The first two of the above-mentioned compulsory units must be passed acceptably in a demonstration of knowledge and skills before the demonstrations of the other two compulsory units included in the competence area.

The common units are: Communication and interaction skills, Competence in mathematics and natural sciences, and Society and working life skills

The scope of the optional studies students must include in their qualification is 15 competence points.

2.1. Promoting growth and participation, 25 Competence point (106233)

Competence requirements

Students know how to

- work in compliance with the statutes, regulations, operating principles, values and ethical principles applicable to working in the field of education and social and health care
- plan their work and work together with a team
- plan, implement and evaluate the promotion of growth and participation
- interact with clients
- promote growth and participation using the working methods, tools and materials of the field
- guide and assist clients in their daily activities
- take care of clients' wellbeing, health and safety
- provide information about services
- maintain safety as well as their work ability and wellbeing at work
- assess and develop their activities.

Assessment

Students work in compliance with the statutes, regulations, operating principles, values and ethical principles applicable to working in the field of education and social and health care.

Students promote growth and participation using the working methods, tools and materials of the field.

Guiding growth and learning	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • draw on their knowledge of the physical, mental and social aspects of human development in different life stages in their work • recognise strengths and needs for support in the areas of physical, cognitive, skills, emotional and social development • recognise psychological factors that affect human behaviour • enable clients to have experiences of success and give positive feedback • use action-based methods in promoting growth and learning • use the opportunities provided by the environment in their work, paying attention to clients' preferences • encourage learning in everyday situations • work together with their team, following the principles of early support and preventive work
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • diversely draw on their knowledge of the physical, mental and social aspects of human development in different life stages in their work • recognise strengths and needs for support in the areas of physical, cognitive, skills, emotional and social development and apply this information in their work • recognise psychological factors that affect human behaviour and use this knowledge in their work • enable clients to have experiences of success and support clients' positive self-image • use action-based methods with a resource-oriented approach in promoting growth and learning • use the opportunities provided by the environment in their work in a client-oriented manner • create opportunities for learning in everyday situations and encourage learning • follow the principles of early support and preventive work
Good 4	
Excellent 5	<ul style="list-style-type: none"> • diversely draw on their knowledge of the physical, mental and social aspects of human development in different life stages in their work, applying this knowledge to individual situations • recognise strengths and needs for support in the areas of physical, cognitive, skills, emotional and social development and apply this knowledge on an individual basis in their work • recognise psychological factors that affect human behaviour and use this knowledge in their work, justifying their actions • enable clients to have diverse experiences of success and support clients' positive self-image in different situations • use action-based methods with a resource-oriented and client-oriented approach in promoting growth and learning • use the opportunities provided by the environment in their work diversely and in a client-oriented manner

	<ul style="list-style-type: none"> • create diverse opportunities for learning and strengthening skills in everyday situations and encourage learning • follow the principles of early support and preventive work, justifying their actions.
--	---

Promoting participation and working together	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • support clients' agency in different situations • guide working together and the activities of a group • ensure that clients have the opportunity to participate in the activities, paying attention to their capacities to participate • use action-based methods and pay attention to the opportunities provided by art and culture for promoting participation • act in challenging situations and conflicts with the support of their team
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • support clients' agency and choices in different situations, drawing on their knowledge of participation • guide working together and the activities of a group in a goal-oriented manner, recognising group phenomena • ensure that clients have the opportunity to participate in the activities according to their capacities and interests • use action-based methods with a client-oriented approach and take advantage of the opportunities provided by art and culture for promoting participation • act in challenging situations and conflicts constructively and in a manner that promotes working together
Good 4	
Excellent 5	<ul style="list-style-type: none"> • support clients' agency and choices diversely in different situations, drawing diversely on their knowledge of participation • guide working together and the activities of a group in a goal-oriented manner, taking into account group phenomena and the strengths of group members • ensure that clients have the opportunity to participate in the activities according to their capacities and interests and justify their actions • use action-based methods with a client-oriented approach and take advantage of the opportunities provided by art and culture for promoting participation in a variety of ways • anticipate challenging situations and conflicts and, act in them constructively, promote working together.

Students guide and assist clients in their daily activities.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • guide and assist clients in daily activities, drawing on their knowledge about the clients' resources and needs for support • take the effects of the operating environment and accessibility on clients' independence into account in their work • guide clients in safe daily physical activity • use aids and technology safely
Satisfactory 2	

Good 3	<ul style="list-style-type: none"> • guide and assist clients in daily activities with a resource-oriented approach, promoting clients' independence • organise the operating environment so that it is accessible and promotes independence • guide and create opportunities for safe and regular physical activity • use aids and technology safely and with a client-oriented approach
Good 4	
Excellent 5	<ul style="list-style-type: none"> • guide and assist clients in daily activities with a resource-oriented approach, promoting clients' independence, and justify their actions • together with clients, organise the operating environment so that it is accessible and motivates and promotes independence • guide and create diverse opportunities for safe and regular physical activity • use aids and technology safely and with a client-oriented approach, justifying their actions.

Students take care of clients' wellbeing, health and safety.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • observe clients' wellbeing and state of health and act as required by the situation with their team, using evidence-based knowledge • take care of client safety following instructions and anticipate safety risks and hazardous situations • see to the cleanliness, comfort and functional aspects of the environment, paying attention to clients' wishes • support clients' positive mental health • promote clients' ability to take care of themselves, paying attention to clients' right to self-determination • guide and assist clients with eating, paying attention to oral health, nutrition recommendations, special diets as well as diets based on religious and ethical grounds
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • observe clients' wellbeing and state of health and act as required by the situation, using evidence-based knowledge • recognise factors that affect client safety, anticipate safety risks and hazardous situations, and take care of safety together with clients • together with clients, see to the cleanliness, comfort and functional aspects of the environment, paying attention to clients' wishes and needs • support clients' positive mental health and guide them to observe factors that contribute to wellbeing • promote clients' ability to take care of themselves and support clients' choices and decision-making, paying attention to clients' right to self-determination • guide and assist clients with eating, justifying their actions by their knowledge of oral health, nutrition recommendations, special diets as well as diets based on religious and ethical grounds
Good 4	

Excellent 5	<ul style="list-style-type: none"> • observe clients' wellbeing and state of health diversely and act as required by the situation, using evidence-based knowledge • recognise diverse factors that affect client safety, anticipate safety risks and hazardous situations, and take care of safety together with clients • together with clients, see to and guide clients to look after the cleanliness, comfort and functional aspects of the environment, paying attention to clients' wishes and needs • support clients' positive mental health diversely and guide them in observing factors that promote wellbeing • promote clients' ability to take care of themselves and support clients' choices and decision-making with a client-oriented approach, paying attention to clients' right to self-determination • guide and assist clients with eating, justifying their actions diversely by their knowledge of oral health, nutrition recommendations, special diets as well as diets based on religious and ethical grounds.
-------------	---

Students provide information about services.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • with their team, provide clients and their close networks with information about services and benefits in the fields of education and social and health care • together with their team, guide clients in using services • as team members, participate in fulfilling the duty of providing guidance, making contact and reporting in social and health care
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • provide clients and their close networks with information about services and benefits in the fields of education and social and health care • guide clients and their close ones in using services • as team members, participate in fulfilling the duty of providing guidance, making contact and reporting in social and health care
Good 4	
Excellent 5	<ul style="list-style-type: none"> • provide clients and their close networks with diverse information about the services and benefits in the fields of education and social and health care • guide and support clients and their close ones in making decisions about and using the services • as team members, participate in fulfilling the duty of providing guidance, making contact and reporting in social and health care.

Students maintain safety as well as their functional capacity and wellbeing at work.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • follow occupational safety instructions • follow instructions on hygiene and aseptic practice • recognise factors that affect their work ability and effects of their choices on their work ability • recognise factors that contribute to a positive work atmosphere • recognise risk and stress factors in their work

	<ul style="list-style-type: none"> • follow the principles of ergonomics in familiar work situations
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • follow occupational safety instructions • follow instructions on hygiene and aseptic practices • take care of their work ability and recognise effects of their choices on their work ability • promote a positive work atmosphere • pay attention to risk and stress factors in their work • follow the principles of ergonomics in varying situations at work
Good 4	
Excellent 5	<ul style="list-style-type: none"> • follow occupational safety instructions • follow instructions on hygiene and aseptic practices • take care of their work ability and recognise the effects of their choices on their work ability, justifying their actions • actively promote a positive work atmosphere • pay attention to risk and stress factors in their work and justify their working methods • follow the principles of ergonomics in varying work situations, justifying their actions.

Students assess and develop their activities.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • evaluate their learning and competence • recognise their strengths and development areas • receive feedback and modify their activities following instructions issued to them • in problem situations, ask for guidance showing initiative • maintain and develop the knowledge and skills required in their occupation
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • assess their learning and competence realistically • recognise their strengths and development areas and set goals for their professional growth • assess their work and use the feedback they receive to modify their activities • make choices and solve problems in their work as team members • maintain and develop the knowledge and skills required in their occupation, showing initiative
Good 4	
Excellent 5	<ul style="list-style-type: none"> • assess their learning and competence realistically and diversely • recognise their strengths and development areas and set goals for their professional growth, diversely making use of the learning opportunities offered by the workplace • assess and develop their work with initiative based on the feedback they receive • make choices in their work and solve problems flexibly in different situations as team members • actively maintain and improve the knowledge and skills required in their occupation.

Methods of demonstrating competence

Students demonstrate their competence in practical tasks in which they promote a client's growth and participation while working in an education or health and social care environment or in the client's home, performing a practical nurse's tasks. To the extent that the vocational competence required in the unit cannot be assessed on the basis of the demonstration, the competence demonstration is to be supplemented in other ways on an individual basis.

2.2. Promoting wellbeing and functional capacity, 30 Competence point (106226)

Competence requirements

Students know how to

- work in compliance with the legislation and instructions applicable to the work of a practical nurse
- plan their work
- interact with clients
- work with a resource-oriented approach that promotes clients' functional capacity
- motivate clients in self-care that promotes health and wellbeing and in risk prevention
- guide clients to being active
- use the working methods, tools and materials of the field in basic nursing and care, terminal care and pharmaceutical treatment
- provide information about services
- provide guidance in the use and maintenance of aids and wellbeing technology
- maintain safety as well as their work ability and wellbeing at work
- develop their activities and justify their decisions with professional knowledge.

Assessment

Students work in compliance with the legislation and instructions applicable to the work of a practical nurse.

Students	
Satisfactory 1	<ul style="list-style-type: none">• comply with the legislation, provisions, regulations and ethical principles of the social and health care field in recurring situations• follow the principles of sustainable development
Satisfactory 2	
Good 3	<ul style="list-style-type: none">• comply with the legislation, provisions, regulations and ethical principles of the social and health care field in changing situations• follow the principles of sustainable development and justify their actions
Good 4	
Excellent 5	<ul style="list-style-type: none">• comply with the legislation, provisions, regulations and ethical principles of the social and health care field, justifying their decisions with these statutes and principles• follow the principles of sustainable development, justify their actions and propose improvements.

Students plan their work.

Working systematically	
Students	
Satisfactory 1	<ul style="list-style-type: none"> plan and set objectives for their work with a needs-based approach together with some clients work with a client-oriented approach with some clients plan their daily tasks as team members
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> plan and set objectives for their work, taking clients' needs and culture into account, together with the clients work with a client-oriented and culturally sensitive approach plan their daily tasks, taking into account the workplace's weekly plans work as members of a multiprofessional team in a practical nurse's area of responsibility
Good 4	
Excellent 5	<ul style="list-style-type: none"> set goals for their work with a needs-based and culturally sensitive approach together with clients and plan their work on this basis suggest alternative practices and work with a client-oriented approach, justifying their actions plan their daily and weekly tasks and take into account any other plans for the workplace's activities work as members of a multiprofessional team in a practical nurse's area of responsibility.

Drawing up a client-oriented plan	
Students	
Satisfactory 1	<ul style="list-style-type: none"> participate in drawing up plans made for clients to promote their health and wellbeing together with the clients and their close ones implement the plan together with their team
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> draw up plans for clients to promote their health and wellbeing together with the clients and their close ones, using the Finnish Care Classification implement and evaluate the plan as team members
Good 4	
Excellent 5	<ul style="list-style-type: none"> draw up plans for clients to promote their health and wellbeing together with the clients and their close ones, using the Finnish Care Classification using the Finnish Care Classification, implement and evaluate the plan made for clients, negotiating with the clients and their networks and other professional groups when preparing the plan.

Self-monitoring	
Students	
Satisfactory 1	<ul style="list-style-type: none"> familiarise themselves with different self-monitoring plans in the workplace and implement self-monitoring in the unit as team members

	<ul style="list-style-type: none"> work in compliance with self-monitoring regulations
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> implement self-monitoring in the unit and familiarise themselves with different self-monitoring plans in the workplace work in compliance with self-monitoring regulations
Good 4	
Excellent 5	<ul style="list-style-type: none"> implement self-monitoring in the unit and familiarise themselves actively with self-monitoring plans in the workplace from the perspective of a practical nurse's work work in compliance with self-monitoring regulations and propose improvements.

Students interact with clients.

Students	
Satisfactory 1	<ul style="list-style-type: none"> act professionally in interactive situations as team members pay attention to the effects of their behaviour in interactive situations guide clients in recurring daily situations, using plain language and communication methods that support and compensate for speech as team members, encounter clients and their close networks pay attention to clients' gestures and facial expressions use touch to support interaction
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> act professionally in interactive situations pay attention to the effects of their behaviour in interactive situations guide clients using plain language and communication methods that support and compensate for speech encounter clients, their close ones and close networks in a caring manner pay attention to clients' gestures and facial expressions use touch to support interaction
Good 4	
Excellent 5	<ul style="list-style-type: none"> act professionally in changing interactive situations pay attention to the effects of their behaviour in interactive situations guide clients using plain language and communication methods that support and compensate for speech diversely in different situations encounter clients, their close ones and close networks in a caring manner, paying attention to changing situations pay attention to clients' gestures and facial expressions use touch to support interaction.

Students work with a resource-oriented approach that promotes clients' functional capacity.

Students	
Satisfactory 1	<ul style="list-style-type: none"> assess clients' resources through observation and by interviewing clients and their close ones

	<ul style="list-style-type: none"> • work with a resource-oriented approach that supports clients' functional capacity • as team members, listen to clients' opinions and preferences, supporting their participation and enhancing the meaningfulness of their lives
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • assess clients' resources through observation and by interviewing clients and their close ones • work systematically and with a resource-oriented approach that promotes clients' functional capacity • listen to clients' opinions and preferences, supporting their participation and enhancing the meaningfulness of their lives
Good 4	
Excellent 5	<ul style="list-style-type: none"> • assess clients' resources through observation and by interviewing clients and their close ones • work systematically, flexibly and in a goal-oriented way, using resource-oriented approach that promotes clients' functional capacity • listen to clients' opinions and preferences, supporting diversely their participation and enhancing the meaningfulness of their lives • pay attention to clients' close ones and social wellbeing networks.

Students motivate clients in self-care that promotes health and wellbeing and in risk prevention.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • motivate clients in self-care that promotes health and wellbeing and in risk prevention • recognise the threat of abuse and domestic violence, following the agreed practices of the workplace in these situations • determine and prevent public health risks and accidents as team members • promote the physical and mental health, safety and wellbeing of familiar clients
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • motivate clients in self-care that promotes health and wellbeing and in lifestyle changes • recognise abuse the threat of and domestic violence and make their team aware of it • recognise and prevent public health risks and accidents • promote the physical and mental health, safety and wellbeing of different clients of varying ages
Good 4	
Excellent 5	<ul style="list-style-type: none"> • independently motivate clients in self-care that promotes health and wellbeing and in lifestyle changes • diversely promote the physical and mental health, safety and wellbeing of clients with different backgrounds and of different ages in changing situations • recognise the threat of abuse and domestic violence and bring it up in their team • recognise and prevent public health risks and accidents and guide clients in avoiding them

	<ul style="list-style-type: none"> provide clients with opportunities to manage their daily activities, making use of the clients' networks and the possibilities offered by the environment.
--	--

Students guide clients in being active.

Students	
Satisfactory 1	<ul style="list-style-type: none"> guide clients and encourage them to be active in their daily routines enable clients to participate in suitable physical and outdoor activity offer activities to clients using different action-based methods take into account clients' interests when guiding them to social activities and offer new opportunities for participation
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> guide clients and encourage them to be active, supporting participation guide clients to suitable physical activity and enable them to participate in outdoor activity as part of care actively offer clients activities using different action-based methods take into account clients' interests when guiding them to social activities and offer new opportunities for participation
Good 4	
Excellent 5	<ul style="list-style-type: none"> guide clients and encourage them diversely to be active, supporting participation and taking into account their close ones and other networks actively offer clients opportunities for suitable physical and outdoor activity and implement them as part of care actively and creatively offer clients activities using different action-based methods take into account clients' interests when guiding them to social activities and offer new opportunities for participation.

Students use the working methods, tools and materials of the field in basic care and attention of clients, terminal care and pharmaceutical treatment.

Basic care and attention	
Students	
Satisfactory 1	<ul style="list-style-type: none"> provide basic care and attention with a client-oriented and needs-based approach apply evidence-based practices in their work follow the principles of aseptic working methods are familiar with the structure and bodily functions of a healthy person and the principles of assisting clients with basic mobility are familiar with the changes caused by diseases in the normal structure and functions of the human body as team members, observe clients' vital functions and functional capacity, record their observations and pass on information about them as agreed provide basic care for people suffering from memory disorders and chronic diseases and promote these clients' functional capacity following their team's instructions promote oral health and provide basic oral care provide basic podiatric care

	<ul style="list-style-type: none"> • provide care for people suffering from mental health and substance abuse disorders and promote these clients' functional capacity following their team's instructions • implement pain management using different pain relief methods as team members
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • provide basic care and attention with a client-oriented and needs-based approach • apply evidence-based practices in their work • follow the principles of aseptic working methods • are familiar with the structure and bodily functions of a healthy person and the principles of assisting clients with basic mobility • are familiar with the changes caused by diseases in the normal structure and functions of the human body • observe clients' vital functions, symptoms and functional capacity, record their observations and pass on information about them • provide basic care for people suffering from memory disorders and chronic diseases and promote these clients' functional capacity in a goal-oriented manner and with initiative • provide care for people suffering from mental health and substance abuse disorders and promote their functional capacity with a goal-oriented approach and with initiative • promote oral health and provide basic oral care, recognising some of the challenges of basic oral care • provide basic podiatric care and recognise some of its challenges • monitor clients' pain and implement pain management using different pain relief methods
Good 4	
Excellent 5	<ul style="list-style-type: none"> • provide basic care and attention with a client-oriented and needs-based approach in multiprofessional cooperation • apply evidence-based practices in their work • follow the principles of aseptic working methods • are familiar with the structure and bodily functions of a healthy person and the principles of assisting clients with basic mobility • are familiar with the changes caused by diseases in the normal structure and functions of the human body • observe clients' vital functions, symptoms and functional capacity, record their observations, pass on information about them, and act independently in changing situations • showing initiative and with a client-oriented approach, provide care for clients suffering from memory disorders and chronic diseases and promote their functional capacity, and evaluate the working methods they use • showing initiative and with a client-oriented approach, provide care for people suffering from mental health and substance abuse disorders and promote clients' functional capacity, taking networks into account • promote oral health and provide basic oral care individually, recognise some of the challenges in basic oral care and work together with specialists • provide basic podiatric care individually, recognise some of its challenges and work together with specialists • monitor clients' pain, implement pain management using different pain relief methods, and pay attention to changes in a client's conditions and functional capacity.

Providing guidance in daily activities	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • support, guide and motivate clients in managing daily activities with a resource-oriented approach in recurring situations at work • observe some of the clients' problems or needs for social support and inform their teams about them • pay attention to clients' sexual and reproductive health • as team members, take into account the diversity of clients' sexual orientation • as team members, are aware of clients' cultures • pay attention to clients' needs for sleep and rest
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • support, guide and motivate clients in managing daily activities with a resource-oriented approach • recognise social problems and the state of clients' wellbeing and take them into account following their team's instructions • pay attention to clients' sexual and reproductive health • take into account the diversity of clients' sexual orientation • are aware of clients' cultures • take into account clients' needs to sleep and rest and offer some methods for intervening in lack of sleep and rest
Good 4	
Excellent 5	<ul style="list-style-type: none"> • support, guide and motivate clients in managing daily activities with a resource-oriented approach in changing situations • find out about client's social networks, state of wellbeing, need for support and problems supporting their functional capacity • guide clients in finding help • pay attention to clients' sexual and reproductive health on an individual basis • take into account the diversity of clients' sexual orientation • are aware of clients' cultures and provide basic care with a culturally sensitive approach in changing situations • take into account clients' needs to sleep and rest, offer different treatment options for lack of sleep and rest, and understand the meaning of sleep and rest for clients' functional capacity and wellbeing.

Working in terminal care	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • draw on their knowledge of terminal care and caring for a dying patient in their work • pay attention to clients and their close ones in terminal care • as team members, participate in terminal care and caring for a dying patient
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • justify their decisions with their knowledge of caring for a dying patient • take into account clients' cultures and their close ones in terminal care • as team members, participate in terminal care and caring for a dying patient
Good 4	

Excellent 5	<ul style="list-style-type: none"> diversely justify their decisions regarding the care of a dying patient take into account clients' cultures and their close ones in terminal care as team members, participate in terminal care and caring for a dying patient.
-------------	---

Providing pharmaceutical treatment	
Students	
Satisfactory 1	<ul style="list-style-type: none"> work safely and as indicated by their area of responsibility, following the unit's and clients' pharmaceutical treatment plans are familiar with the operating principles of the most common pharmaceutical databases and, together with their team, draw on these principles in their work recognise clients' needs for pharmaceutical treatment, check that a client's list of medications is up to date, and determine possible risks, such as drug allergies, as team members handle and dispense pharmaceuticals aseptically, safely and without errors calculate dosages and unit conversions without errors following instructions, administer pharmaceuticals through natural routes of administration, by subcutaneous and intramuscular injection and by inhalation observe the actions and interactions of the most common pharmaceuticals used for memory disorders, chronic diseases and mental health and substance abuse disorders as well as polypharmacy, recognise the most common adverse and side effects, pay attention to possible drug abuse phenomena and inform their team about them following instructions issued to the unit, guide clients in interpreting an electronic prescription and its period of validity as well as using, storing and disposing of pharmaceuticals, and are familiar with the pharmaceutical treatment of the most common memory disorders, chronic diseases and mental health and substance abuse disorders are familiar with the work unit's system for reporting medication errors
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> work safely and as indicated by their area of responsibility, following the unit's and clients' pharmaceutical treatment plans are familiar with the operating principles of the most common pharmaceutical databases and draw on these principles in their work handle and dispense pharmaceuticals aseptically, safely and without errors calculate dosages and unit conversions without errors recognise clients' needs for pharmaceutical treatment and needs to change it, check that a client's list of medications is up to date, and determine possible risks, such as drug allergies following instructions, administer pharmaceuticals through natural routes of administration, by subcutaneous and intramuscular injection and by inhalation know and observe the actions and interactions of the most common pharmaceuticals used for memory disorders, chronic diseases and mental health and substance abuse disorders as well as polypharmacy, recognise the most common

	<p>adverse and side effects, pay attention to possible drug abuse phenomena and inform their teams about them</p> <ul style="list-style-type: none"> • guide clients and the clients' close networks following the unit's instructions in interpreting an electronic prescription and its period of validity as well as using, storing and disposing of pharmaceuticals, and master the pharmaceutical treatment of the most common memory disorders, chronic diseases and mental health and substance abuse disorders • are familiar with the work unit's system for reporting medication errors, follow the instructions and report any medication errors
Good 4	
Excellent 5	<ul style="list-style-type: none"> • work safely and as indicated by their area of responsibility, following the unit's and clients' pharmaceutical treatment plans • are familiar with the operating principles of the most common pharmaceutical databases and draw on these principles actively in their work • handle and dispense pharmaceuticals aseptically, safely and without errors • calculate dosages and unit conversions without errors • recognise clients' needs for pharmaceutical treatment and needs to change it, check that a client's list of medications is up to date, and determine possible risks, such as drug allergies • administer pharmaceuticals through natural routes of administration, by subcutaneous and intramuscular injection and by inhalation following instructions and as required by the situation • know, observe and justify the actions and interactions of the most common pharmaceuticals used for memory disorders, chronic diseases disorders and mental health and substance abuse as well as polypharmacy, recognise the most common adverse and side effects, pay attention to possible drug abuse phenomena, and inform their teams about them and prevent such phenomena • actively guide clients and the clients' close networks following instructions issued to the unit in interpreting an electronic prescription and its period of validity as well as using, storing and disposing of pharmaceuticals, and master the pharmaceutical treatment of the most common memory disorders, chronic diseases and mental health and substance abuse disorders • are familiar with the work unit's system for reporting medication errors, follow the instructions and report any medication errors.

Guiding clients in nutrition and purchasing food	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • assess and pay attention to clients' nutritional needs, food situation and oral health • pay attention to nutrition recommendations, special diets, religious and ethical diets and oral health when guiding clients in nutrition • implement clients' nutritional treatments
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • assess and pay attention to clients' nutritional needs, food situation and oral health comprehensively

	<ul style="list-style-type: none"> • motivate and guide clients in nutrition, paying attention to nutrition recommendations, special diets, religious and ethical diets and oral health • implement clients' nutritional treatments • pay attention to aesthetics in nutrition
Good 4	
Excellent 5	<ul style="list-style-type: none"> • assess and pay attention to clients' nutritional needs, food situation and oral health comprehensively and, in multiprofessional cooperation, ensure that clients have access to food • diversely motivate and guide clients in nutrition, paying attention to nutritional recommendations, special diets, religious and ethical diets and oral health • implement clients' nutritional treatments • pay attention to aesthetics in nutrition diversely

Students provide information about services.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • with their team, provide clients and their close networks with information about the services and benefits in the field of social and health care
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • are familiar with the process of service guidance and provide clients and their close networks with information about the services and benefits in the field of social and health care • bring up some services and options that could support a client • support clients and their close networks in decision-making
Good 4	
Excellent 5	<ul style="list-style-type: none"> • are familiar with the process of service guidance and provide clients and their close networks with versatile information about the services and benefits in the field of social and health care • guide clients to the required services, taking into account clients' and close networks needs, and justify their actions • bring up different services that could support a client and offer options to clients and their close networks • support clients and their close networks in decision-making.

Students provide guidance on the use and maintenance of aids and wellbeing technology.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • use aids and technology that supports wellbeing and functional capacity • guide clients in using aids • guide clients in using and use clients' mobility and transfer aids safely
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • guide clients in the use and maintenance of technology that supports wellbeing and functional capacity and take advantage of the possibilities provided by wellbeing technology in their work • guide clients in the use and maintenance of aids

	<ul style="list-style-type: none"> • guide clients in using and use clients' mobility and transfer aids safely
Good 4	
Excellent 5	<ul style="list-style-type: none"> • diversely guide clients in the use of technology that supports wellbeing and functional capacity • survey clients' need for aids and use the distribution channels of aids and wellbeing technology • guide clients diversely in the use and maintenance of aids and prevent hazardous situations associated with the aids • guide clients in using and use clients' mobility and transfer aids safely.

Students maintain safety as well as their functional capacity and wellbeing at work.

Addressing workplace wellbeing and safety	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • comply with instructions and regulations on wellbeing at work and occupational safety • are familiar with the safety plan of the workplace • are familiar with practices for reporting hazardous situations and act as required by the situation as team members • maintain their work ability and coping at work • make use of health-enhancing physical activity and prevent accidents at work • work safely, applying the principles of ergonomics and occupational safety as team members and preventing accidents and harms caused by their work • assess and pay attention to physical and mental factors causing stress in care work • understand the meaning of ergonomics and maintaining clients' functional capacity for the prevention of musculoskeletal problems and for quality of care • assess clients' functional capacity and choose methods of assistance and aids that support it
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • comply with instructions and regulations on wellbeing at work and occupational safety and prevent harms caused by their work • are familiar with the safety plan of the workplace • are familiar with practices for reporting hazardous situations and act as required by the situation • maintain their work ability and coping at work • make use of health-enhancing physical activity and prevent accidents at work • work safely, applying the principles of ergonomics and occupational safety as team members and preventing accidents and harms caused by their work • assess, address and prevent physical and mental factors causing stress in care work • understand the meaning of ergonomics and maintaining clients' functional capacity for the prevention of musculoskeletal problems and for quality of care and justify their actions • assess clients' functional capacity and choose methods of assistance and aids that support it
Good 4	

Excellent 5	<ul style="list-style-type: none"> • comply with instructions and regulations on wellbeing at work and occupational safety, preventing risk factors caused by their work • are familiar with the safety plan of the workplace • are familiar with practices for reporting hazardous situations and act as required by the situation, justifying their actions • maintain their work ability and coping at work • make use of health-enhancing physical activity and prevent accidents at work • work safely, applying the principles of ergonomics and occupational safety as team members and preventing accidents and harms caused by their work • assess, address and prevent physical and mental factors causing stress in care work and justify their actions • understand the meaning of ergonomics and maintaining clients' functional capacity for the prevention of musculoskeletal problems and for quality of care and diversely justify their actions • assess clients' functional capacity and choose methods of assistance and aids that support it.
-------------	---

Addressing client safety	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • pay attention to information security and confidentiality related to handling patient documents • follow the principles of aseptic working methods • pay attention to legislation on the prevention of communicable diseases and prevent the spread of infections • use aids safely when providing assistance • work as team members in the care of clients, also paying attention to clients with challenging behaviours
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • pay attention to information security related to handling patient documents and comply with confidentiality instructions • follow the principles of aseptic working methods • pay attention to legislation on the prevention of communicable diseases and prevent the spread of infections • use aids safely and adeptly when providing assistance • encounter clients with challenging behaviours and pay attention to the workplace's safety practices
Good 4	
Excellent 5	<ul style="list-style-type: none"> • handle patient documents following instructions, pay attention to information security and confidentiality, and comply with confidentiality instructions • follow the principles of aseptic working methods • pay attention to legislation on the prevention of communicable diseases and prevent the spread of infections • use aids safely and adeptly when providing assistance and justify their actions • prevent challenging situations, encounter clients with challenging behaviours and apply the workplace's safety practices.

Students develop their activities and justify their decisions with professional knowledge.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • assess their activities and professional development and modify their activities according to the feedback they receive • maintain and develop the knowledge and skills required in their occupation • draw on evidence-based knowledge in their work and, as team members, search for information in reliable sources • make decisions with their teams in a practical nurse's area of responsibility • notice development areas in the promotion of clients' health and wellbeing
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • assess their activities and professional development, give feedback and utilise the feedback they receive • maintain and develop the knowledge and skills required in their occupation • justify decisions related to their work with evidence-based knowledge and search for information in reliable sources • make independent decisions in a practical nurse's area of responsibility • propose improvements to enhance clients' health and wellbeing
Good 4	
Excellent 5	<ul style="list-style-type: none"> • assess their activities and professional development, give feedback and utilise the feedback they receive diversely • maintain and develop the knowledge and skills required in their occupation • diversely justify decisions related to their work with evidence-based knowledge and search for information in reliable sources • make independent decisions in a practical nurse's area of responsibility together with clients as well as clients' close ones and networks • propose realistic improvements to enhance clients' health and wellbeing and actively work to promote wellbeing.

Methods of demonstrating competence

Students demonstrate their competence by working in practical tasks where they promote clients' wellbeing and functional capacity in social and health care environments, performing a practical nurse's tasks. To the extent that the vocational competence required in the unit cannot be assessed on the basis of the demonstration, the competence demonstration is to be supplemented in other ways on an individual basis.

2.3. Working in home care, 40 Competence point (106234)

Competence requirements

Students know how to

- work in compliance with the statutes, operating principles, values and ethical principles applicable to the social and health care field
- plan their work and work together with their teams and networks
- plan, implement and assess their work with clients living at home
- interact with clients and clients' close ones

- use the working methods, tools and materials of the vocational field to promote the functional capacity of home care clients
- implement pharmaceutical care in clients' homes
- provide terminal care in clients' homes
- provide guidance in using services
- maintain and promote safety as well as their work ability and wellbeing at work
- assess and develop their activities
- assess their possibilities of working as welfare sector entrepreneurs.

Assessment

Students work in compliance with the legislation, operating principles, values and ethical principles applicable to the social and health care field.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • comply with the legislation, provisions, regulations and ethical principles of the social and health care field in recurring situations • respect the privacy, customs, habits and property of clients living in their own homes • comply with data protection, secrecy obligation and the principles of the Administrative Procedure Act and the Act on the Openness of Government Activities • know about the different self-monitoring plans in home care and implement self-monitoring in the unit • work in compliance with regulations and quality recommendations applicable to self-monitoring • follow the principles of sustainable development
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • comply with the legislation, provisions, regulations and ethical principles of the social and health care field, justifying their actions • respect the privacy, customs, habits and property of clients living in their own homes • comply with data protection, secrecy obligation and the principles of the Administrative Procedure Act and the Act on the Openness of Government Activities • carry out self-monitoring in home care and have familiarised themselves with the different self-monitoring plans of the workplace • work in compliance with regulations and quality recommendations applicable to self-monitoring • follow the principles of sustainable development and justify their actions
Good 4	
Excellent 5	<ul style="list-style-type: none"> • comply with the legislation, provisions, regulations and ethical principles of the social and health care field, justifying their actions diversely • respect the privacy, customs, habits and property of clients living in their own homes • comply with data protection, secrecy obligation and the principles of the Administrative Procedure Act and the Act on the Openness of Government Activities • apply the self-monitoring plans of home care in their work from a practical nurse's perspective

	<ul style="list-style-type: none"> • work in compliance with regulations and quality recommendations applicable to self-monitoring and propose improvements • follow the principles of sustainable development, justify their actions and propose improvements.
--	---

Students plan their work and work together with their teams and networks.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • plan their daily and weekly tasks and schedules according to clients' needs and circumstances, working together with a team • use virtual services and the opportunities provided by remote guidance in their work • make choices and decisions related to their work together with a team • work in multidisciplinary cooperation and are familiar with some of the tasks and areas of responsibility of certain occupational groups • make a positive contribution to the social atmosphere of their work community • are familiar with their workplace's instructions on the employees' communication, use of social media and image marketing and follow netiquette
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • plan their daily and weekly tasks and schedules flexibly according to clients' needs and circumstances, working together with a team • actively use virtual services and the opportunities provided by remote guidance in their work • make choices and decisions related to their work and solve problems cooperatively and responsibly as team members • work in multidisciplinary cooperation and are familiar with some of the tasks and areas of responsibility of different occupational groups • make a positive contribution to the social atmosphere of their work community and observe it • are familiar with their workplace's instructions on the employees' communication, use of social media and image marketing and follow netiquette
Good 4	
Excellent 5	<ul style="list-style-type: none"> • plan their daily and weekly tasks and schedules flexibly and actively according to clients' needs and circumstances, working together with a team • use virtual services and the opportunities provided by remote guidance actively and diversely in their work and justify the need for using them if necessary • make choices and decisions related to their work independently and solve problems • actively work in multidisciplinary cooperation and are diversely familiar with the tasks and areas of responsibility of different occupational groups • make a positive contribution to the social atmosphere of their work community, observe it and justify the importance of a good work atmosphere in workplace wellbeing • are familiar with their workplace's instructions on the employees' communication, use of social media and image marketing and follow netiquette.

Students plan, implement and assess their work with clients living at home.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • assess a client's need for care and rehabilitation and its urgency and work together with different actors • observe and assess clients' functional capacity and resources at home using appropriate indicators of functional capacity • take into account clients' physical, cognitive, psychological, spiritual, social and legal functional capacity • take into account clients' individual life situations, living environments, life histories, cultures and sexuality when planning their work • in cooperation with clients, draw up client-oriented plans that support wellbeing • follow the plan and evaluate its realisation • report on and record observations regarding clients' condition and functional capacity comprehensively without putting client safety at risk • use the client information systems of their work community and social and health care databases in a practical nurse's area of responsibility • understand the importance of passing on client information in the critical path
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • assess a client's need for care and rehabilitation and its urgency, plan their work accordingly, and work together with different actors • observe and assess clients' functional capacity and resources at home using appropriate indicators of functional capacity • take into account clients' physical, cognitive, psychological, spiritual, social and legal functional capacity and understand its significance for clients' wellbeing • take into account and survey clients' individual life situations, living environments, life histories, cultures and sexuality and understand the importance of these aspects when planning the work • draw up client-oriented plans to promote clients' wellbeing in cooperation with the clients and their close ones • follow the plan, evaluate its implementation, and bring up any needs for changes related to a client's functional capacity • adeptly report on and record observations regarding clients' condition and functional capacity without putting client safety at risk • adeptly use the client information systems of their work community and social and health care databases in a practical nurse's area of responsibility • pay attention to and understand the importance of passing on client information in the critical path
Good 4	
Excellent 5	<ul style="list-style-type: none"> • assess a client's need for care and rehabilitation and its urgency independently, plan their work accordingly, and work together with different actors • together with clients, observe and assess clients' functional capacity and resources at home diversely, using a versatile selection of different appropriate indicators of functional capacity and justifying their choices

	<ul style="list-style-type: none"> • take into account clients' physical, cognitive, psychological, spiritual, social and legal functional capacity, understand its significance for clients' wellbeing, and are able to justify their choices and actions diversely • take into account and survey clients' individual life situations, living environments, life histories, cultures and sexuality and justify their decisions when planning their work • draw up versatile and client-oriented plans to promote clients' wellbeing together with clients and their close ones and networks • work with a goal-oriented approach following the plan, modifying and complementing it as indicated by the client's functional capacity and targets, and evaluate its realisation • actively and diversely report on and record observations related to clients' condition and functional capacity together with clients • use the client information systems of the work community and social and health care databases diversely in a practical nurse's area of responsibility • pay attention to the importance of passing on client information in the critical path in their work and justify their actions.
--	---

Students interact with clients and their close ones

Students	
Satisfactory 1	<ul style="list-style-type: none"> • encounter clients and their close ones professionally • listen to the opinions of clients and their close ones, and take into account individual preferences • work with people from different cultural backgrounds • act professionally in interactive situations with clients' families, support networks and informal carers • use touching clients, humour and their presence in a manner that is appropriate for the situation when caring for clients • use plain language, modifying their expression as necessary • to support interaction, use some possibilities provided by digital devices and ICT that are appropriate for the situation • make use of communication methods and tools that support and compensate for speech
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • encounter clients and their close ones naturally and professionally • listen to the opinions and preferences of clients and their close ones and support clients' participation and agency • work with people from different cultural backgrounds, improving their cultural awareness • act with clients' families, support networks and informal carers in a professional and cooperative manner • use touching clients, humour and their presence naturally and in a manner that is appropriate for the situation when caring for clients • use plain language and modify their expression to match clients' communication skills • to support interaction, use the possibilities provided by digital devices and ICT appropriate for the situation • fluently use communication methods and tools that support and compensate for speech
Good 4	

Excellent 5	<ul style="list-style-type: none"> • encounter clients and their close ones naturally and professionally, paying attention to clients' individual needs • listen to the opinions and preferences of clients and their close ones, and support clients' participation and agency and the meaningfulness of their lives • work with people from different cultural backgrounds, actively improving their cultural awareness, and justify their practices • act in cooperation with clients' families, support networks and informal carers actively and professionally, supporting informal carers' work • use touching clients, humour and their presence actively and naturally in a manner appropriate for the situation when caring for clients • use plain language naturally and modify their expression to match clients' communication skills, encouraging clients in self-expression • to support interaction, use diversely the possibilities provided by digital devices and ICT appropriate for the situation • use communication methods and tools that support and compensate for speech and are appropriate for the situation and justify their choices.
-------------	---

Students use the working methods, tools and materials of the vocational field to promote the functional capacity of home care clients.

Care and guidance of home care clients	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • care for clients drawing on evidence-based knowledge, recommendations and methods • recognise and observe changes caused by ageing in the normal structure and functions of the human body • recognise the most common illnesses in older people, their special features and the effects they have on clients' functional capacity and need for care • recognise the effects of multiple diseases and memory disorders on functional capacity and need for care • in their work, recognise and pay attention to the effect of mental health and substance abuse problems on ageing clients' functional capacity and need for care • support clients' positive mental health and recovery orientation • observe clients' vital functions and functional capacity, record their observations and pass this information on in the agreed manner • provide symptomatic care, taking into account the special features of illnesses • assist with and carry out care procedures • use the guidance methods of care work
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • care for clients drawing on evidence-based knowledge, recommendations and methods, paying attention to clients' participation and agency • recognise and observe changes caused by ageing in the normal structure and functions of the human body • recognise the most common illnesses in older people, their special features and the effects they have on clients' functional capacity and need for care

	<ul style="list-style-type: none"> • recognise the effects of multiple diseases and memory disorders on functional capacity and need for care • in their work, recognise and pay attention to the effect of mental health and substance abuse problems on functional capacity and need for care • support clients' positive mental health and recovery orientation • observe clients' vital functions and functional capacity, record their observations and pass this information on in the agreed manner • provide symptomatic care, paying attention to the special features of illnesses and any changes, and pass on information on changes in the agreed manner • assist with and carry out care procedures, justifying their actions • use diversely the guidance methods of care work
Good 4	
Excellent 5	<ul style="list-style-type: none"> • care for clients using diverse evidence-based knowledge, recommendations and methods, paying attention to clients' participation and agency • recognise and observe changes caused by ageing in the normal structure and functions of the human body, justifying their actions • recognise the most common illnesses in older people, their special features and the effects they have on clients' functional capacity and need for care • recognise the effects of multiple diseases and memory disorders on an older client's functional capacity and need for care, justifying their actions • in their work, recognise and pay attention to the effect of mental health and substance abuse problems on ageing clients' functional capacity and need for care, justifying their actions • support clients' positive mental health and recovery orientation • observe clients' vital functions and functional capacity, record their observations and pass this information on in the agreed manner • provide symptomatic care, diversely paying attention to the special features of illnesses and any changes and act as required by the situation, justifying their actions • use the guidance methods of care work actively and diversely.

Promoting functional capacity at home

Students

Satisfactory 1

- guide clients with a resource-oriented approach in daily activities, taking into account the effect of clients' life situations, pain, sleep and stress on functional capacity
- guide and assist clients in daily activities, paying attention to skin care and podiatric health
- guide and assist clients in personal hygiene, paying attention to secretory function
- assess and relieve clients' pain with the help of different methods
- pay attention to the safety and accessibility of the surroundings, and recognise and intervene in risk factors of accidents at home and during leisure time
- guide clients and their close ones in the use of aids, home remote control devices, safety technology and technology that supports wellbeing and, with the support of a team, manage the purchases of these aids and devices

	<ul style="list-style-type: none"> • guide clients in daily physical activity and in maintaining and promoting their physical functional capacity • guide clients and their close ones in health-promoting self-care • guide clients to meaningful social interactive situations and activities that alleviate and prevent loneliness
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • guide clients actively and with a resource-oriented approach in daily activities, taking into account the effect of clients' life situations, pain, sleep and stress on their functional capacity • guide and assist clients in daily activities, paying attention to skin care and podiatric health, and recognise special problems • guide and assist clients in caring for their personal hygiene, paying attention to secretory function, and recognise special problems • assess and relieve clients' pain using different methods and understand how pain affects clients' quality of life • pay attention to the safety and accessibility of the surroundings, and recognise diversely and intervene in risk factors of accidents at home and during leisure time • guide clients and their close ones in the use, maintenance and purchases of aids, home remote control devices, safety technology and technology that supports wellbeing • encourage and guide clients in daily physical activity and in maintaining and promoting their physical functional capacity • guide clients and their close ones in health-promoting self-care and in risk prevention • guide and motivate clients to meaningful social interactive situations and activities that alleviate and prevent loneliness
Good 4	
Excellent 5	<ul style="list-style-type: none"> • guide clients actively, creatively and with a resource-oriented approach in daily activities, taking into account the effect of clients' life situations, pain, sleep and stress on their functional capacity • guide and assist clients in daily activities, paying attention to skin care and podiatric health, and recognise and solve special problems • guide and assist clients in caring for their personal hygiene, paying attention to secretory function, and recognise and solve special problems • assess and relieve clients' pain using different methods and understand how pain affects clients' quality of life, justifying their actions • pay attention to the safety and accessibility of the environment, recognise risk factors of accidents at home and during leisure time, and work to prevent them • guide and motivate clients and their close ones in the use, maintenance and purchases of aids, home remote control devices, safety technology and technology that supports wellbeing • actively encourage and guide clients in daily physical activity and in maintaining and promoting physical functional capacity • motivate and guide clients and their close ones in health-promoting self-care and risk prevention • guide and motivate clients to meaningful social interactive situations and activities that alleviate and prevent loneliness.

Assisting and guiding clients in daily life

Students	
Satisfactory 1	<ul style="list-style-type: none"> • take care, or guide clients in taking care, of keeping their homes tidy on a daily basis, cleaning, sorting of waste and clothing care • handle and sort wastes, paying attention to dangerous and hazardous waste • assist clients with using services or use services on their behalf outside the home
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • take care, or guide clients in taking care, of keeping their homes tidy on a daily basis, cleaning, sorting of waste and clothing care as indicated by their individual needs • handle and sort wastes, paying attention to dangerous and hazardous waste • assist clients with using services or use services on their behalf outside the home, encouraging them to embrace agency and participation in matters that concern them
Good 4	
Excellent 5	<ul style="list-style-type: none"> • take care, or guide and encourage clients in taking care, of keeping their homes tidy on a daily basis, cleaning, sorting of waste and clothing care as indicated by their individual needs • handle and sort wastes, paying attention to dangerous and hazardous waste, and propose improvements as necessary • assist clients with using services and use services on their behalf outside the home, encouraging them to embrace active agency and participation in matters that concern them.

Providing guidance in nutrition and oral care

Students	
Satisfactory 1	<ul style="list-style-type: none"> • take into account to nutrition recommendations for older people • assess and monitor clients' nutritional state and fluid balance • guide clients and, as necessary, clients' close ones in looking after health-promoting nutrition and paying attention to purchasing and preparing food as well as to special diets • assess clients' oral health and take into account the effect of oral health on wellbeing • draw on their knowledge of oral health care in their work • help and guide clients in oral health care
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • take into account nutrition recommendations and diet therapy instructions for older people • assess and monitor clients' nutritional state and fluid balance • guide and motivate clients and, as necessary, clients' close ones in looking after health-promoting nutrition and paying attention to purchasing and preparing food as well as to special diets • assess clients' oral health, take into account the effect of oral health on wellbeing, and guide clients in maintaining oral health • draw on their knowledge of oral health care and special problems in their work • help and guide clients in oral health care and recognise special problems
Good 4	

Excellent 5	<ul style="list-style-type: none"> • take into account nutrition recommendations and diet therapy instructions for older people, justifying their actions • diversely assess and monitor clients' nutritional state and fluid balance • guide and motivate clients and, as necessary, clients' close ones in looking after health-promoting nutrition and paying attention to purchasing and preparing food as well as to special diets, justifying their actions • assess clients' oral health, take into account the effect of oral health on wellbeing and guide clients in maintaining oral health, justifying their actions • draw on their knowledge of the basics of oral health care and special problems in their work and justify their actions • help and guide clients in taking care of their oral health care, recognise special problems and solve problem situations.
-------------	---

Students provide pharmaceutical treatment in clients' homes.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • work safely and as indicated by their area of responsibility, following the unit's and clients' pharmaceutical treatment plans • are familiar with the operating principles of the most common pharmaceutical databases and make use of these principles in their work • handle, dispense and administer pharmaceuticals to the client aseptically, safely and without errors • calculate dosages and unit conversions without errors • guide clients following the work unit's instructions in interpreting an electronic prescription and its period of validity as well as using, storing and disposing of pharmaceuticals, and are familiar with the pharmaceutical treatment of the most common memory disorders, chronic diseases and mental health disorders • determine what self-medication and prescription drugs, vitamin and micronutrient products and natural products clients use and take into account their effects and potential risks in association with pharmaceutical treatment • recognise risks related to clients' pharmaceutical treatment, changes in metabolism due to ageing and polypharmacy, and inform the team about them • are familiar with and monitor the effects of the most common pharmaceutical products and the combined effects of drugs and polypharmacy, recognise pharmaceuticals with potential risks and the most common adverse and side effects, pay attention to possible drug abuse phenomena, and inform their team of such phenomena
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • work safely and as indicated by their area of responsibility, following the unit's and clients' pharmaceutical treatment plans • use the most common pharmaceutical databases, understand their operating principles and make use of the information in their work • handle, dispense and administer pharmaceuticals to the client aseptically, safely and without errors • calculate dosages and unit conversions without errors • guide clients and the clients' close networks following the work unit's instructions in interpreting an electronic prescription and understanding its period of validity as well as using, storing and

	<p>disposing of pharmaceuticals, and master the pharmaceutical treatment of the most common memory disorders, chronic diseases and mental health disorders</p> <ul style="list-style-type: none"> • actively determine what self-medication and prescription drugs, vitamin and micronutrient products and natural products clients use and take into account their effects and potential risks in association with pharmaceutical treatment • recognise risks related to clients' pharmaceutical treatment and changes in metabolism due to ageing and polypharmacy, inform the team about them, and prevent them • are familiar with and monitor the effects of the most common pharmaceutical products and the combined effects of drugs and polypharmacy, recognise pharmaceuticals with potential risks and the most common adverse and side effects, pay attention to possible drug abuse phenomena, and inform their team of such phenomena
Good 4	
Excellent 5	<ul style="list-style-type: none"> • work safely and as indicated by their area of responsibility, following the unit's and clients' pharmaceutical treatment plans • master the operating principles of the most common pharmaceutical databases and make use of them actively in their area of responsibility • handle, dispense and administer pharmaceuticals to the client aseptically, safely and without errors • calculate dosages and unit conversions without errors • following the work unit's instructions, actively guide clients and clients' close networks in interpreting an electronic prescription and its period of validity as well as using, storing and disposing of pharmaceuticals, and master the pharmaceutical treatment of the most common memory disorders, chronic diseases and mental health disorders, justifying their actions • actively determine what self-medication and prescription drugs, vitamin and micronutrient products and natural products clients use and take into account their effects and potential risks associated with pharmaceutical treatment, justifying their actions • recognise and actively justify risks related to clients' pharmaceutical treatment, changes in metabolism due to ageing and polypharmacy, inform the team about them and prevent them • are familiar with, monitor and justify the effects of the most common pharmaceutical products used by clients and the combined effects of drugs and polypharmacy, recognise pharmaceuticals with potential risks and the most common adverse and side effects, pay attention to possible drug abuse phenomena, and inform the team about such phenomena.

Students provide terminal care in clients' homes.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • comply with the client's living will • know the principles of terminal care and follow them as members of a multiprofessional team • accept death as a natural part of life and, with support from their team, discuss matters related to death with clients and their close ones • recognise clients' suffering and pain and provide palliative care and good terminal care as team members

Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • comply with the client's living will • know the principles of terminal care and follow them, justifying their actions as part of a multiprofessional team • accept death as a natural part of life and discuss matters related to death with clients and their close ones • recognise clients' suffering and pain and provide palliative care and good terminal care, paying attention to the needs of dying clients and their close ones
Good 4	
Excellent 5	<ul style="list-style-type: none"> • comply with the client's living will • listen to and are able to discuss the wishes and needs clients and their close ones have regarding terminal care • know the principles of terminal care, follow them and diversely justify their actions by their knowledge as part of a multiprofessional team • accept death as a natural part of life and discuss matters related to death naturally with clients and their close ones • recognise clients' suffering and pain and provide comprehensive palliative care and good terminal care, paying attention to the needs of dying clients and their close ones.

Students guide clients in using services.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • are familiar with the service and benefit system and the service guidance process, and update their competence related to the service system • are familiar with clients' care and service chains and draw on this knowledge in their work • guide clients and their close networks in using services and propose alternatives to clients in an appropriate way • guide clients and their close ones in using electronic services • as team members, participate in fulfilling the duty of providing guidance, making contact and reporting in social and health care
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • are familiar with the service and benefit system and the service guidance process and actively update their competence related to the service system • are familiar with clients' care and service chains and draw on this knowledge with a client-oriented approach in their work • guide clients and their close networks in using services and propose alternatives to clients in an appropriate way • guide clients and their close ones in using electronic services • as team members, participate in fulfilling the duty of providing guidance, making contact and reporting in social and health care
Good 4	
Excellent 5	<ul style="list-style-type: none"> • are diversely familiar with the service and benefit system and the service guidance process and actively update their competence related to the service system • are familiar with clients' care and service chains and use this knowledge diversely in their work with a client-oriented approach and taking clients' close networks into account

	<ul style="list-style-type: none"> • guide clients and their close networks in using services and propose alternatives to clients in an appropriate way, supporting them in making decisions • guide clients and their close ones in using electronic services • as team members, participate in fulfilling the duty of providing guidance, making contact and reporting in social and health care.
--	--

Students maintain and promote safety as well as their work ability and wellbeing at work.

Maintaining workplace wellbeing and safety	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • are familiar with the safety plan for work carried out in clients' homes and with the practices of reporting hazardous situations and act as required by the situation • comply with instructions and regulations on wellbeing at work and occupational safety and with electrical and fire safety regulations • take responsibility for their wellbeing at work, occupational safety and work ability • contribute to the wellbeing of their work community and understand that its atmosphere affects client satisfaction • recognise situations that cause physical and mental strain in their work • use the body's natural movement patterns and control their body when assisting clients with mobility and transfers • follow ergonomic guidelines when transferring clients • recognise clients' resources when transferring • use transfer aids appropriately
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • are familiar with the safety plan for work carried out in clients' homes and with the practices of reporting hazardous situations and act as required by the situation, preventing risks • comply with instructions and regulations on wellbeing at work and occupational safety and with electrical and fire safety regulations • take responsibility for their wellbeing at work, occupational safety and work ability and work to prevent potential harms • contribute to taking care of and promoting the wellbeing of their work community and understand its effects on client satisfaction • recognise factors that cause physical and mental strain in their work and strive to reduce them • appropriately use the body's natural movement patterns in their work and control their body when assisting clients with mobility and transfers • apply ergonomic guidelines when transferring clients • activate clients' resources with mobility and when transferring • use transfer aids appropriately and adeptly
Good 4	
Excellent 5	<ul style="list-style-type: none"> • are familiar with the safety plan for work carried out in clients' homes and with the practices of reporting hazardous situations and actively work as required by the situation, preventing risks • comply with instructions and regulations on wellbeing at work and occupational safety and with electrical and fire safety regulations

	<ul style="list-style-type: none"> actively take responsibility for their wellbeing at work, occupational safety and work ability and strive to prevent potential harms contribute to taking care of and promoting the wellbeing of their work community and understand its effects on client satisfaction, justifying its impacts recognise factors that cause physical and mental strain in their work and reduce them, justifying their actions actively use the body's natural movement patterns and control their body when assisting clients with mobility and transfers apply and justify ergonomic guidelines when transferring clients assess clients' resources and activate clients to use them for mobility and transfers use transfer aids appropriately and adeptly and justify their actions.
--	---

Addressing client safety	
Students	
Satisfactory 1	<ul style="list-style-type: none"> pay attention to client safety in their work follow the principles of aseptic working methods as team members, recognise clients' difficulties in coping at home, the possible safety risks related to clients' homes and the need for alterations in their homes recognise abuse and the threat of domestic violence and, with their teams, guide clients in finding help recognise clients with challenging behaviours in their work and, with their teams, act as required by the situation
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> pay extensive attention to client safety in their work and justify their actions follow the principles of aseptic working methods recognise clients' difficulties in coping at home, the possible safety risks related to clients' homes and the need for alterations in their homes recognise abuse and the threat of domestic violence, guide clients in finding help and inform their team recognise clients with challenging behaviours in their work and act as required in the situation
Good 4	
Excellent 5	<ul style="list-style-type: none"> pay extensive attention to client safety in their work, justifying their actions, and propose improvements follow the principles of aseptic working methods recognise clients' difficulties in coping at home, the possible safety risks related to clients' homes and the need for alterations in their homes, and propose improvements recognise abuse and the threat of domestic violence, actively guide clients in finding help and inform the team recognise clients with challenging behaviours in their work, act as required by the situation, and prevent the occurrence of challenging situations.

Students assess and develop their activities.

Students	
Satisfactory 1	<ul style="list-style-type: none"> assess their learning and competence and request feedback

	<ul style="list-style-type: none"> • recognise some of their strengths and development areas • receive and give feedback appropriately and use the feedback they receive in their activities • maintain and develop the knowledge and skills required in their occupation • make use of their professional knowledge in customer situations and, as team members, search for information in reliable sources • use evidence-based information and recommendations in their work
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • assess their learning and competence realistically and request feedback • recognise their strengths and development areas • receive and give feedback appropriately, develop their activities on the basis of the feedback they receive and ask for guidance as necessary • maintain and develop the knowledge and skills required in their occupation • justify the decisions related to their work by theoretical knowledge when guiding clients and search for information in reliable sources • actively use evidence-based information and recommendations in their work
Good 4	
Excellent 5	<ul style="list-style-type: none"> • assess their learning and competence realistically and diversely • recognise their strengths and development areas and are motivated to develop themselves and their competence • receive and give feedback appropriately, develop their work actively and ask for guidance as necessary • actively maintain and improve the knowledge and skills required in their occupation • diversely justify the decisions related to their work by theoretical knowledge when guiding clients and search for information in reliable sources • actively use evidence-based information and recommendations and justify their actions by them.

Students assess their possibilities of working as wellbeing sector entrepreneurs.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • plan the productisation of their expertise • work responsibly and understand the effect of their work on the activities of the workplace and the quality of the services in daily work with customers • work to promote the achievement of objectives • assess their possibilities of working as wellbeing sector entrepreneurs
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • plan and find out about possibilities of productising their competence in their work • work responsibly and pay attention to the effect of their work on the activities of the workplace and the quality of services in daily work with clients • work to promote the achievement of objectives and scale their work according to the objectives

	<ul style="list-style-type: none"> • assess their possibilities of working as wellbeing sector entrepreneurs
Good 4	
Excellent 5	<ul style="list-style-type: none"> • actively plan and develop their capacities to work as entrepreneurs and realistically assess the possibilities of productising their competence • work responsibly and flexibly and pay attention to the effect of their work on the activities of the workplace and the quality of services in daily work with clients • modify their activities as required by the situation • work to promote the achievement of objectives and scale their work according to the objectives • assess their possibilities of working as wellbeing sector entrepreneurs.

Methods of demonstrating competence

Students demonstrate their competence in practical tasks where they work in home care or short-term care environments or in a client's home, performing a practical nurse's tasks. To the extent that the vocational competence required in the unit cannot be assessed on the basis of the demonstration, the competence demonstration is to be supplemented in other ways on an individual basis.

2.4. Promoting the participation of older people, 35 Competence point (106228)

Competence requirements

Students know how to

- work in compliance with the statutes, operating principles, values and ethical principles applicable to the social and health care field
- plan, carry out and assess their work
- interact with clients
- use the working methods, tools and materials of the field in promoting clients' participation
- use the working methods, tools and materials of the field for promoting humane life in terminal care
- guide clients in using services and making choices
- act as members of their work community
- maintain and promote safety as well as their work ability and wellbeing at work
- assess and develop their activities
- assess their possibilities of working as welfare sector entrepreneurs.

Assessment

Students work in compliance with the legislation, operating principles, values and ethical principles applicable to the social and health care field.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • respect clients' fundamental and human rights • comply with the legislation, provisions, regulations and ethical principles of the social and health care field • comply with data protection and secrecy obligation in their work • follow the principles of sustainable development

Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • respect clients' fundamental and human rights • comply with the legislation, provisions, regulations and ethical principles of social and health care, justifying their actions • comply with data protection and secrecy obligation in their work • follow the principles of sustainable development and justify their actions
Good 4	
Excellent 5	<ul style="list-style-type: none"> • respect clients' fundamental and human rights • comply with the legislation, provisions, regulations and ethical principles of the social and health care field, justifying their actions diversely • comply with data protection and secrecy obligation in their work • follow the principles of sustainable development, diversely justify their actions and propose improvements.

Self-monitoring	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • monitor and develop their activities • improve quality and client safety through self-monitoring • draw on quality recommendations in their work • are aware of the workplace's self-monitoring plan and carry out self-monitoring in the unit • work in compliance with self-monitoring regulations
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • monitor and develop their activities and bring up proposals for improving quality • improve quality and client safety through self-monitoring • draw on quality recommendations in their work • are aware of the workplace's self-monitoring plan and carry out self-monitoring in the unit • work in compliance with self-monitoring regulations
Good 4	
Excellent 5	<ul style="list-style-type: none"> • monitor and develop their activities, bring up proposals for improving quality and apply self-monitoring plans from a practical nurse's perspective • improve quality and client safety through self-monitoring • draw on quality recommendations in their work • are aware of the workplace's self-monitoring plan and carry out self-monitoring in the unit • work in compliance with self-monitoring regulations.

Students plan, carry out and assess their work.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • observe and assess different areas of clients' functional capacity and needs for support • pay attention to clients' life histories, living environments and quality of life when planning activities • pay attention to the daily plans of the workplace when planning activities

	<ul style="list-style-type: none"> • in cooperation with clients, draw up plans that support a meaningful everyday life, implement them and evaluate their realisation • pay attention to matters that promote rehabilitation and support social networks in their work together with their team • act as members of multiprofessional teams and networks, following plans and agreements • report on and record observations regarding clients' condition and functional capacity comprehensively without putting client safety at risk • use the client information systems of their work community and social and health care databases in a practical nurse's area of responsibility
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • observe and assess different areas of clients' functional capacity and needs for support using functional capacity indicators • pay attention to clients' life histories, living environments and quality of life diversely when planning activities, supporting clients' self-esteem • pay attention to the daily and weekly plans of the workplace when planning activities • in cooperation with clients, draw up plans that support a meaningful everyday life and take into account clients' social networks, implement the plans and evaluate their realisation • pay attention to matters that enhance rehabilitation and support social networks in their work • act responsibly as members of multiprofessional teams and networks, following plans and agreements • adeptly report on and record observations regarding clients' condition and functional capacity without putting client safety at risk • adeptly use the client information systems of their work community and social and health care databases in a practical nurse's area of responsibility
Good 4	
Excellent 5	<ul style="list-style-type: none"> • observe and assess different areas of clients' functional capacity and needs for support using diversely different functional capacity indicators and justify their choices • pay attention to clients' life histories, living environments and quality of life diversely when planning activities, supporting clients' self-esteem • pay attention to the daily and weekly plans of the workplace when planning activities, justifying their actions • in cooperation with clients, draw up versatile plans that support a meaningful everyday life, taking into account clients' social networks, implement the plans and evaluate their realisation • pay attention diversely to matters that maintain and promote rehabilitation and maintain social networks in their work • act actively and responsibly as members of multiprofessional teams and networks, following plans and agreements • report on and record observations regarding clients' condition and functional capacity actively and diversely without risking client safety • use the client information systems of their work community and social and health care databases diversely in a practical nurse's area of responsibility.

Students interact with clients.

Professional interaction	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • encounter clients in an appreciative and respectful manner and as equals • notice clients' initiatives in interaction and respond to them • listen to the opinions of clients and their close ones, and take into account individual preferences • support clients' life management and interaction with the help of different methods and operating models • use plain language, adapting their expression as necessary • use communication methods that support and compensate for speech • act professionally in interactive situations with clients' families, support networks and informal carers • serve clients responsibly in different situations, also over the telephone and using electronic means of communication, paying attention to data security and confidentiality
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • encounter clients and their close networks in an appreciative and respectful manner and as equals • notice even the smallest attempts to interact made by clients and respond to them • listen to the opinions and wishes of clients and their close ones and support clients' participation • support clients' life management and interaction with the help of different methods and operating models • use plain language and modify their expression to match a clients' and a groups' communication skills • fluently use communication methods that support and compensate for speech • act with clients' families, support networks and informal carers in a professional and cooperative manner • serve clients responsibly in different situations, also over the telephone and using electronic means of communication, paying attention to data security and confidentiality
Good 4	
Excellent 5	<ul style="list-style-type: none"> • encounter clients and their close networks in an appreciative and respectful manner and as equals • notice even the smallest attempts to interact made by clients and respond to them, making sure they have understood the client • listen to the opinions and wishes of clients and their close ones, supporting clients' participation and the meaningfulness of their lives • support clients' life management and interaction with the help of different methods and operating models • use plain language naturally and modify their expression to match clients' and groups' communication skills, encouraging clients in self-expression • use communication methods that support and compensate for speech and are appropriate for the situation, justifying their choices • act in cooperation with clients' families, support networks and informal carers actively and professionally, supporting informal carers' work

	<ul style="list-style-type: none"> • serve clients responsibly in different situations, also over the telephone and using electronic means of communication, paying attention to data security and confidentiality.

Good 4	
Excellent 5	<ul style="list-style-type: none"> • follow the work community's rules and operating principles, justifying their actions diversely • communicate and act in a professional and appropriate manner • have problem-solving skills and bring up justified alternative solutions • act cooperatively and responsibly as work community members and propose versatile improvements • make a positive contribution to the social atmosphere of their work community.

Students maintain and promote safety as well as their work ability and wellbeing at work.

Paying attention to wellbeing at work and occupational safety	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • are familiar with the workplace's safety plan and practices for reporting hazardous situations and act as required by the situation with their team • comply with instructions and regulations on wellbeing at work and occupational safety and with electrical and fire safety regulations • take responsibility for their wellbeing at work, occupational safety and work ability • participate in taking care of the work community's wellbeing • understand some of the effects of the atmosphere in the work community on client satisfaction
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • are familiar with the workplace's safety plan and practices for reporting hazardous situations and act as required by the situation • comply with instructions and regulations on wellbeing at work and occupational safety and with electrical and fire safety regulations • take responsibility for their own wellbeing, safety at work and work ability and prevent potential harms • contribute to maintaining and are willing to promote a good atmosphere in the work community • understand some of the effects of the atmosphere in the work community on client satisfaction
Good 4	
Excellent 5	<ul style="list-style-type: none"> • are familiar with the workplace's safety plan and practices for reporting hazardous situations and act as required by the situation, preventing risks

	<ul style="list-style-type: none"> • comply with instructions and regulations on wellbeing at work and occupational safety and with electrical and fire safety regulations • actively take responsibility for their wellbeing at work, occupational safety and work ability and prevent potential harms • contribute to maintaining and are willing to promote a good atmosphere in the work community and propose improvements • understand some of the effects of the atmosphere in the work community on client satisfaction and propose improvements.
--	---

Working ergonomically	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • follow the principles of ergonomics • recognise clients' resources and take into account the effect of the life situation, sleep, stress and health on functional capacity • recognise situations that cause physical strain in their work • use the body's natural movement patterns and control their body when assisting clients with mobility and transfers • assess clients' functional capacity and needs for aids • use aids when transferring clients
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • follow the principles of ergonomics • activate clients' resources and take into account the effect of the life situation, sleep, stress and health on functional capacity • recognise factors that cause physical strain in their work and strive to prevent them • use the body's natural movement patterns appropriately and control their body when assisting clients with mobility and transfers • assess clients' functional capacity and needs for aids appropriately • use aids adeptly when transferring clients and assess their competence in providing guidance and assistance
Good 4	
Excellent 5	<ul style="list-style-type: none"> • follow the principles of ergonomics, justifying their actions • activate clients' resources and take into account the effect of the life situation, sleep, stress and health on functional capacity, justifying their actions • recognise factors that cause physical strain in their work and strive to prevent them, justifying their actions • actively use the body's natural movement patterns and control their body when assisting clients with mobility and transfers • assess clients' functional capacity and needs for aids appropriately, justifying their actions • use aids adeptly when transferring clients, use the body's natural movement patterns and working postures when providing assistance, and assess their competence in providing guidance and assistance.

Addressing client safety	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • pay attention to client safety when working • follow the principles of aseptic working methods

	<ul style="list-style-type: none"> • recognise abuse and the threat of domestic violence • recognise in their work clients with challenging behaviours and, as part of their teams, act as required by the situation • prevent accidents and falls at home
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • pay extensive attention to client safety when working and justify their actions • follow the principles of aseptic working methods • recognise abuse and the threat of domestic violence and bring it up in their team • recognise clients with challenging behaviours in their work and act as required in the situation • prevent accidents and falls at home
Good 4	
Excellent 5	<ul style="list-style-type: none"> • pay extensive attention to client safety when working, justifying their actions, and propose improvements • follow the principles of aseptic working methods • recognise abuse and the threat of domestic violence, guide clients in getting help, and bring it up in their team • recognise clients with challenging behaviours in their work, act as required by the situation, and prevent the occurrence of challenging situations • prevent accidents and falls at home.

Students assess and develop their activities.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • evaluate their learning and competence • maintain and develop the knowledge and skills required in their occupation • receive and give feedback appropriately and use the feedback they receive in their activities • recognise some of their strengths and development needs • justify their actions with evidence-based information and search for information in reliable sources as team members • make choices and decisions related to their work with the support of their teams
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • assess their learning and competence realistically • maintain and develop the knowledge and skills required in their occupation • receive and give feedback appropriately, develop their activities on the basis of the feedback they receive and ask for guidance as necessary • recognise their strengths and development areas • justify their actions with evidence-based information and search for information in reliable sources • make choices and decisions related to their work and solve problems as team members
Good 4	
Excellent 5	<ul style="list-style-type: none"> • assess their learning and competence realistically and diversely • maintain and develop the knowledge and skills required in their occupation • receive and give feedback appropriately and actively develop their activities

	<ul style="list-style-type: none"> • recognise their strengths and development areas and are motivated to develop themselves and their competence • justify their actions diversely with evidence-based information and actively search for information in reliable sources • independently make choices and decisions related to their work and solve problems.
--	---

Students assess their possibilities of working as wellbeing sector entrepreneurs.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • plan the productisation of their expertise • work responsibly and understand the effect of their work on the activities of the workplace and the quality of the services in daily work with customers • work to promote the achievement of objectives • assess their possibilities of working as wellbeing sector entrepreneurs
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • plan and find out about possibilities of productising their competence in their work • work responsibly and pay attention to the effect of their work on the activities of the workplace and the quality of services in daily work with clients • work to promote the achievement of objectives and scale their work according to the objectives • assess their possibilities of working as wellbeing sector entrepreneurs
Good 4	
Excellent 5	<ul style="list-style-type: none"> • actively plan and develop their capacities to work as entrepreneurs and realistically assess the possibilities of productising their competence • work responsibly and flexibly and pay attention to the effect of their work on the activities of the workplace and the quality of services in daily work with clients • modify their activities as required by the situation • work to promote the achievement of objectives and scale their work according to the objectives • assess their possibilities of working as wellbeing sector entrepreneurs.

Methods of demonstrating competence

Students demonstrate their competence in a practical nurse's tasks, in which they promote older people's participation by working in environments where older people live, are cared for or rehabilitated, or use services. To the extent that the vocational competence required in the unit cannot be assessed on the basis of the demonstration, the competence demonstration is to be supplemented in other ways on an individual basis.

2.5. Wellbeing technology in promoting functional capacity, 15 Competence point (106227)

Competence requirements

Students know how to

- plan the use of wellbeing technology in work with clients
- use the working methods, tools and materials of wellbeing technology in promoting and assessing clients' functional capacity
- use interaction skills in work with clients
- guide clients in using services related to purchasing and using wellbeing technology
- maintain and promote safety as well as their work ability and wellbeing at work
- assess and develop their work.

Assessment

Students plan the use of wellbeing technology in work with clients.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • recognise clients' needs related to physical, cognitive, psychological, social and legal functional capacity that can be responded to through technology use • are familiar with the offer of wellbeing technology and know where to find more information about aids and devices • draw up a plan for using wellbeing technology for clients • evaluate the suitability of the plan together with a team and a client • bring up some clients' needs related to purchasing wellbeing technology in a multiprofessional team • follow the principles of ethics and sustainable development • assess the benefits of technology in proportion to risks and costs with a team
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • with a client-oriented approach, recognise clients' needs related to physical, cognitive, psychological, social and legal functional capacity and wellbeing that can be responded to through technology use • have diverse knowledge of the offer of wellbeing technology, monitor the development of this field and find more information about the devices and possibilities • draw up a plan for using wellbeing technology for clients, diversely paying attention to the possibilities of the technology and clients' individual needs • evaluate the suitability of the plan comprehensively together with their team and the client • bring up clients' key needs related to purchasing wellbeing technology and their plan for wellbeing technology use in a multiprofessional team • recognise ethical questions related to wellbeing technology, work with a client-oriented approach, and follow the principles of ethics and sustainable development • assess the benefits of technology in proportion to risks and costs
Good 4	
Excellent 5	<ul style="list-style-type: none"> • diversely and with a client-oriented approach, recognise clients' needs related to physical, cognitive, psychological, social and legal functional capacity and wellbeing that can be responded to through technology use • are familiar with the diversity of the offer of wellbeing technology, monitor the development of this field and find more information about the devices and possibilities with a client-oriented approach

	<ul style="list-style-type: none"> • draw up a plan for using wellbeing technology for clients, taking into account the diverse possibilities of the technology, clients' individual needs and cost-efficiency • evaluate the suitability of the plan comprehensively together with their team and the clients, justifying their decisions • in a multiprofessional team, bring up clients' individual needs related to purchases of wellbeing technology • recognise ethical questions related to wellbeing technology, work responsibly and with a client-oriented approach, and follow the principles of ethics and sustainable development • diversely assess the benefits of technology in proportion to risks and costs.
--	---

Students use the working methods, tools and materials of wellbeing technology in promoting and assessing clients' functional capacity.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • use technology safely and appropriately in work with clients • guide clients and their close networks in using wellbeing technology, taking a client's functional capacity and state of health into account • support clients' independence and feeling of safety through wellbeing technology • guide clients in social interaction and participation using wellbeing technology • in the selection of wellbeing technology, take into account the possibility for accessible use • assess the impacts of using wellbeing technology on clients' health and functional capacity
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • use technology safely, appropriately and systematically in work with clients • encouragingly guide clients and their close networks in using wellbeing technology, taking a client's functional capacity and state of health into account • support and promote clients' independence and feeling of safety through wellbeing technology • guide clients in social interaction and participation using the potential of wellbeing technology diversely • in the selection of wellbeing technology, take into account aesthetics and the possibility for accessible use • assess the benefits of wellbeing technology and its impacts on clients' health and functional capacity, using different information collection methods
Good 4	
Excellent 5	<ul style="list-style-type: none"> • use technology in work with clients with a client-oriented approach, safely, appropriately and systematically, taking into account changes in a client's functional capacity • naturally and encouragingly guide clients and their close networks in using wellbeing technology, taking a client's functional capacity and state of health into account • support and promote clients' independence and feeling of safety through wellbeing technology with a client-oriented and systematic approach • guide clients in social interaction and participation using the potential of wellbeing technology diversely and with a client-oriented approach

	<ul style="list-style-type: none"> • in the selection of wellbeing technology, take into account aesthetics and the possibility for accessible and ergonomic use • assess the benefits of wellbeing technology and its impacts on clients' health and functional capacity, using different information collection methods and systematically observing changes in functional capacity.
--	--

Students use interaction skills in work with clients.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • discuss the need for and potential of wellbeing technology with clients and their close networks • modify their expression to match clients' communication skills and take clients' cultural backgrounds and values into account in interaction • carry out multiprofessional cooperation in the context of purchasing, using, maintaining and evaluating technology, using the possibilities of remote guidance • document and inform the network of the experiences clients and their close ones have of using wellbeing technology
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • discuss the need for and potential of wellbeing technology with clients and their close networks and motivate clients in purchasing the necessary wellbeing technology • modify their expression to match clients' communication skills and needs and take clients' cultural backgrounds and values into account in interaction • carry out multiprofessional cooperation in the context of purchasing, using, maintaining and evaluating technology responsibly and with a client-oriented approach, using the possibilities of remote guidance • document and inform the network of their observations and the experiences clients and their close ones have of using wellbeing technology
Good 4	
Excellent 5	<ul style="list-style-type: none"> • discuss the need for and potential of wellbeing technology with clients and their close networks and motivate clients in purchasing the necessary wellbeing technology, justifying it with their knowledge of the benefits of technology • modify their expression to match clients' communication skills and needs, and take clients' cultural backgrounds and values into account in interaction naturally • carry out multiprofessional cooperation in the context of purchasing, using, maintaining and evaluating technology responsibly and with a client-oriented approach, using the possibilities of remote guidance and justifying their actions with evidence-based knowledge • document and inform the network of their observations and the experiences clients and their close ones have of using wellbeing technology and propose improvements.

Students guide clients in using services related to purchasing and using wellbeing technology.

Students

Satisfactory 1	<ul style="list-style-type: none"> • together with their team, guide clients and their close ones in the purchasing process of wellbeing technology • together with their team, inform customers of the purchasing and payment arrangements of wellbeing technology devices and equipment • ensure that clients receive the services they need and work with cost and quality awareness in the clients' best interests
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • guide clients and their close ones in the purchasing process of wellbeing technology as members of a multiprofessional network • inform customers of the purchasing and payment arrangements of wellbeing technology devices and equipment • ensure that clients receive the services they need and work with cost and quality awareness in the clients' best interests
Good 4	
Excellent 5	<ul style="list-style-type: none"> • diversely guide clients and their close ones in the purchasing process of wellbeing technology as members of a multiprofessional network • inform customers of the purchasing and payment arrangements of wellbeing technology devices and equipment as required • ensure that clients receive the services they need and work with cost and quality awareness in the clients' best interests.

Students maintain and promote safety as well as their work ability and wellbeing at work.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • use wellbeing technology devices and equipment in compliance with safety instructions, taking ergonomics and aseptic practices into account • guide clients in safe use of wellbeing technology devices and equipment, taking into account clients' resources, functional capacity and condition • look after the operation and user safety of wellbeing technology devices and equipment and inform clients with their team if problems related to user safety occur
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • use wellbeing technology devices and equipment in compliance with safety instructions in changing situations, taking ergonomics and aseptic practices into account • guide clients in safe use of wellbeing technology devices and equipment, taking into account clients' resources, functional capacity and condition • look after the operation and user safety of wellbeing technology devices and equipment and inform others if problems related to user safety occur
Good 4	
Excellent 5	<ul style="list-style-type: none"> • use wellbeing technology devices and equipment in compliance with safety instructions in changing situations, taking ergonomics and aseptic practices into account • guide clients in safe use of wellbeing technology devices and equipment, taking into account clients' resources, functional capacity and condition

- | | |
|--|---|
| | <ul style="list-style-type: none"> • look after the operation and user safety of wellbeing technology devices and equipment and inform others if problems related to user safety occur, contacting experts if necessary. |
|--|---|

Students assess and develop their work.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • receive feedback and assess and their work based on it • recognise their strengths and development areas in using wellbeing technology • follow the development of the wellbeing technology sector
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • assess their actions and develop their work drawing on feedback received by them • recognise their strengths and develop their competence in using wellbeing technology and providing guidance in its use • follow the development of the wellbeing technology sector and make their knowledge available for the work community
Good 4	
Excellent 5	<ul style="list-style-type: none"> • assess their actions and develop their work drawing on self-assessment and the feedback received by them • recognise their strengths and develop their competence in using wellbeing technology and providing guidance, encouragement and motivation in its use • follow the development of the wellbeing technology sector, are innovative and make evidence-based knowledge available for the work community.

Methods of demonstrating competence

Students demonstrate their competence in practical tasks where they use wellbeing technology to promote a client's functional capacity while working in a practical nurse's tasks in the operating environments of education or health and social care. To the extent that the vocational competence required in the unit cannot be assessed on the basis of the demonstration, the competence demonstration is to be supplemented in other ways on an individual basis.

2.6. Podiatric care for different client groups, 15 Competence point (106231)

Competence requirements

Students know how to

- plan podiatric care work in different operating environments
- use the working methods, tools and materials of the vocational field to promote the functional capacity of clients
- use interaction skills in work with clients
- guide clients in using services and making choices related to them
- maintain and promote safety as well as their work ability and wellbeing at work
- assess and develop their work.

Assessment

Students plan podiatric care work in different operating environments.

Students	
Satisfactory 1	<ul style="list-style-type: none"> plan their daily tasks, taking the workplace's other plans into account make choices and decisions related to their work examine, recognise and assess clients' podiatric care needs, drawing on their knowledge of podiatric care needs in persons of different ages follow a care plan prepare a podiatric self-care plan use client information systems with their team, taking information security and confidentiality provisions into account
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> plan their daily and weekly tasks, taking the workplace's other plans into account make choices and decisions related to their work examine, recognise and assess clients' podiatric care needs with a client-oriented approach, drawing on their knowledge of podiatric care needs in persons of different ages follow a care plan in a goal-oriented manner prepare a podiatric self-care plan together with a client use client information systems, taking information security and confidentiality provisions into account
Good 4	
Excellent 5	<ul style="list-style-type: none"> plan their daily and weekly tasks, taking the workplace's other plans into account, and modify their activities as required by the situation make choices and decisions related to their work and justify their actions examine, recognise and assess clients' podiatric care needs with a client-oriented approach, take clients' preferences into account, and draw on their knowledge of podiatric care needs in persons of different ages follow a care plan in a goal-oriented and comprehensive manner prepare a podiatric self-care plan together with a client and update it use client information systems, taking information security and confidentiality provisions into account, justifying their actions.

Students use the working methods, tools and materials of the field to promote clients' functional capacity.

Students	
Satisfactory 1	<ul style="list-style-type: none"> recognise changes in clients' functional capacity and take into account the effects of illnesses on it guide clients or clients' close networks in carrying out podiatric self-care prepare well-functioning facilities for podiatric care according to given instructions in different operating environments select the equipment and products needed in podiatric care and use them safely

	<ul style="list-style-type: none"> • plan and carry out podiatric care, following an aseptic work order • treat skin changes in feet and legs and cut nails • guide clients in foot and leg exercises and massage their feet and legs • select a ready-made cushioning product that is suitable for an individual client • guide different groups in foot and leg welfare
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • recognise changes in clients' functional capacity, take into account the effects of illnesses on it, and promote clients' functional capacity • guide and advise clients or clients' close networks in carrying out podiatric self-care • prepare well-functioning facilities for podiatric care in different operating environments, taking clients' functional capacity into account • select the equipment and products needed in podiatric care with a client-oriented approach and use them safely • plan and carry out podiatric care, following an aseptic work order • treat changes in the skin and nails of clients' feet and legs with a client-oriented approach and cut nails • guide clients in individual foot and leg exercises and massage their feet and legs with a client-oriented approach • select a ready-made cushioning product that is suitable for an individual client and guide the client in its use • guide different groups in foot and leg welfare with a client-oriented approach
Good 4	
Excellent 5	<ul style="list-style-type: none"> • recognise changes in clients' functional capacity, take into account the effects of illnesses on it, and promote clients' functional capacity • guide, advise and motivate clients or clients' close networks in carrying out podiatric self-care • recognise clients with challenging behaviours in their work, prevent the occurrence of challenging situations, and see to their personal safety • prepare well-functioning facilities for podiatric care in different operating environments, taking clients' needs and functional capacity into account • plan and carry out podiatric care, following an aseptic work order • with a client-oriented approach, treat changes in the skin and nails of clients' feet and legs and cut nails, taking into account the impacts that treatment has on clients' functional capacity • guide clients in functional foot and leg exercises and massage their feet and legs with a client-oriented approach • select a ready-made cushioning product that is suitable for an individual client and guide a client in using it, monitoring its use and maintaining it • guide different groups in foot and leg welfare with a client-oriented approach and creatively.

Students use interaction skills in work with clients.

Students

Satisfactory 1	<ul style="list-style-type: none"> • act professionally in interactive situations • pay attention to the effects of their behaviour in interactive situations • fluently use plain language and methods that support and compensate for speech in interactive situations • serve clients responsibly and equally with their team, taking information security and confidentiality into account • use information and communication technology in their work
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • act professionally and with a client-oriented approach in interactive situations • pay attention to the effects of their behaviour in interactive situations • use plain language and methods that support and compensate for speech in interactive situations with a client-oriented approach • serve clients responsibly and equally, taking information security and confidentiality into account • use information and communication technology in their work with a client-oriented approach
Good 4	
Excellent 5	<ul style="list-style-type: none"> • act professionally and with a client-oriented approach in changing interactive situations • pay attention to the effects of their behaviour in interactive situations • use plain language and methods that support and compensate for speech in interactive situations diversely and with a client-oriented approach • serve clients responsibly and equally, taking information security and confidentiality into account • use information and communication technology in their work diversely and with a client-oriented approach.

Students guide clients in using services and making choices related to them.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • are familiar with clients' critical paths and service chains • guide clients and their close networks in using services • guide clients in using electronic services
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • are familiar with clients' critical path and service chains and draw on this knowledge in their work • guide clients and their close networks in using services and propose alternatives to clients • guide clients in using electronic services
Good 4	
Excellent 5	<ul style="list-style-type: none"> • are familiar with clients' critical path and service chains and draw on this knowledge in their work with a client-oriented approach • guide clients and their close networks in using services and propose appropriate alternatives to clients • guide clients in using electronic services.

Students maintain and promote safety as well as their work ability and wellbeing at work.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • see to the hygiene of clients' podiatric care environments, ensuring that the spread of microbes is prevented • ensure that podiatric care equipment and devices are functional and safe to use • see to their hygiene and ergonomics and the cleanliness of their protective clothing, and use appropriate personal protective equipment • take responsibility for their wellbeing at work, occupational safety and work ability
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • see to the hygiene of clients' podiatric care environments, ensuring that the spread of microbes is prevented and justify their actions • ensure that podiatric care equipment and devices are functional and safe to use and inform others if problems related to user safety occur • see to their hygiene and ergonomics and the cleanliness of their protective clothing, and use appropriate personal protective equipment • take responsibility for their wellbeing at work, occupational safety and work ability, justifying their actions
Good 4	
Excellent 5	<ul style="list-style-type: none"> • see to the hygiene of clients' podiatric care environments, ensuring that the spread of microbes is prevented and justify their actions diversely • ensure that podiatric care equipment and devices are functional and safe to use and inform others if problems related to user safety occur, contacting the service organisation if necessary • see to their hygiene and ergonomics and the cleanliness of their protective clothing, and use appropriate personal protective equipment • take responsibility for their wellbeing at work, occupational safety and work ability, justifying their actions diversely.

Students assess and develop their work.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • receive feedback and assess and their work based on it • recognise their strengths and development areas in podiatric care • follow the development of the podiatric care field
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • assess their actions and develop their work drawing on feedback received by them • recognise their strengths and development areas and improve their competence in podiatric care • follow the development of the podiatric care field and make their knowledge available for the work community
Good 4	
Excellent 5	<ul style="list-style-type: none"> • assess their actions and develop their work drawing on self-assessment and the feedback received by them

- recognise their strengths and development areas and improve their competence in podiatric care through evidence-based knowledge
- follow the development of the podiatric care field and make their evidence-based knowledge available for the work community.

Methods of demonstrating competence

Students demonstrate their competence in practical tasks by caring for clients' feet and legs in an education or health and social care environment or in the client's home, performing a practical nurse's tasks. To the extent that the vocational competence required in the unit cannot be assessed on the basis of the demonstration, the competence demonstration is to be supplemented in other ways on an individual basis.

2.7. Supporting living at home and life management, 15 Competence point (106235)

Competence requirements

Students know how to

- support clients who are living or going to live at home
- plan and assess their work
- use the working methods, tools and materials of the field to support clients' living at home and life management
- guide clients in using services and making choices
- maintain and promote safety as well as their work ability and wellbeing at work
- assess and develop their work.

Assessment

Students support clients who are living or going to live at home.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • are familiar with and inform clients of housing options, the obligation to organise housing services and the duties referred to in the Non-discrimination Act as well as the services in support of living at home • contribute to assessing the suitability of a form of housing for a client together with the client and their network • take into account lifestyle continuity and some of the meanings that home has for clients and their families and friends • assess clients' functional capacity and resources, recognise challenges, risks and support needs associated with living at home, and find solutions for them supported by their team and together with clients • report service needs observed by them • advise and guide in changing life situations
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • are extensively familiar with and inform clients of different housing options, the obligation to organise housing services and the duties referred to in the Non-discrimination Act as well as the services in support of living at home • diversely assess the suitability of a form of housing for a client together with the client and their network

	<ul style="list-style-type: none"> • take into account the meanings that lifestyle continuity and the home have for clients and their families and friends • diversely assess clients' functional capacity and resources, recognise challenges, risks and support needs associated with living at home, and find solutions for them together with clients • report service needs observed by them • advise and guide in changing life situations, reinforcing the life management of clients and their close ones
Good 4	
Excellent 5	<ul style="list-style-type: none"> • are extensively familiar with and, with a client-oriented approach, inform clients about different housing options, the obligation to organise housing services and the duties referred to in the Non-discrimination Act as well as the services in support of living at home • diversely assess the suitability of a housing option for a client together with the client and their network, justifying their actions • secure lifestyle continuity with a client-oriented approach and take into account the meanings that the home has for clients and their families and friends • diversely assess clients' functional capacity and resources together with a client and their close ones, taking individual situations into account, and find solutions suitable for a client together with the client • report service needs observed by them • advise and guide in changing life situations with a client-oriented approach, diversely reinforcing the life management of clients and their close ones.

Students plan and assess their work.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • set targets and plan their tasks together with clients and their team, drawing on information about clients' preferences, resources and functional capacity • work in a goal-oriented manner • evaluate the realisation of the work and target achievement together with clients and their close ones
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • set targets and plan their tasks flexibly together with clients and their team, drawing diversely on information about clients' preferences, resources and functional capacity • work in a goal- and resource-oriented manner • evaluate the realisation of the work and target achievement together with clients and their close ones with a client-oriented approach
Good 4	
Excellent 5	<ul style="list-style-type: none"> • set targets and plan their tasks flexibly together with clients and their team, safeguarding a client's possibilities of planning their life and making decisions on it • work in a goal- and resource-oriented manner, justifying their actions • evaluate the realisation of the work and target achievement with a client-oriented approach, promoting the participation of clients and their close ones.

Students use the working methods, tools and materials of the field to support clients' living at home and life management.

Providing guidance in daily activities and life management	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • take into account clients' right to privacy • guide clients in looking after themselves, their daily routines and their homes • assess clients' capacities and promote accessibility and participation • enable clients to make independent choices in their daily lives • support clients' positive mental health • use the possibilities of remote guidance and make situation-specific decisions with their team • with their team, guide clients in purchasing, using and maintaining technologies and aids that support living at home • recognise insecurity, show caring and find solutions with their team • recognise safety risks and see to clients' safety • support clients in different crises and problems, drawing on their knowledge and the team's competence related to helping people in a crisis
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • take into account clients' right to privacy in different situations • guide and support clients in looking after themselves, their daily routines and their homes • diversely assess clients' capacities together with clients and promote accessibility and participation • guide and support clients in making independent choices in their daily lives • support clients' positive mental health, drawing on clients' resources and interests and reinforcing clients' psychological functional capacity • use remote guidance and advice with a client-oriented approach, taking into account the suitability of the service for a client • guide clients in purchasing, using and maintaining technologies and aids that support living at home • recognise insecurity, show caring and find solutions that reinforce safety together with clients • recognise safety risks and guide clients in looking after safety in their homes • diversely support clients in different crises and problems, drawing on their knowledge and the team's competence related to helping people and supporting life management
Good 4	
Excellent 5	<ul style="list-style-type: none"> • consistently take into account clients' right to privacy in different situations • guide, support and motivate clients in looking after themselves, their daily routines and their homes • extensively assess clients' capacities together with clients and promote accessibility and participation diversely • guide and support clients systematically and diversely in making independent choices in their daily lives • support clients' positive mental health, drawing diversely on clients' resources and interests and reinforcing clients' psychological functional capacity

	<ul style="list-style-type: none"> • use remote guidance and advice with a client-oriented and motivating approach, ensuring the suitability of the service for a client • guide clients in purchasing, using and maintaining technologies and aids that support living at home, bringing up alternatives • recognise insecurity, show caring and find diverse solutions that reinforce safety together with clients • recognise safety risks and guide clients in looking after safety in their homes comprehensively • diversely support clients in different crises and problems, extensively drawing on their knowledge and the team's competence related to helping people and supporting life management.
--	--

Guiding clients in social interaction	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • recognise needs for social support, provide support and direct clients to services • find out about a client's social network together with the client and their close ones and guide the client in recognising their communal resources in daily life • guide and support clients appropriately in establishing and maintaining social relations, taking clients' expectations and preferences into account • guide and support clients in establishing and maintaining social relations
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • recognise needs for social support, provide support and direct clients to services, drawing on their knowledge of the forms of social support and services • find out about a client's social network together with the client and their close ones and guide the client in drawing on their communal resources in daily life • recognise the experience of loneliness and its impacts on clients' functional capacity and health and seek ways of alleviating loneliness together with clients • guide and support clients in establishing and maintaining social relations, taking clients' some expectations and preferences into account
Good 4	
Excellent 5	<ul style="list-style-type: none"> • recognise needs for social support, provide support and direct clients to services, drawing diversely on their knowledge of the forms of social support and services • find out about a client's social network together with the client and their close ones and guide the client in a goal-oriented manner to recognise and draw on their communal resources in daily life • recognise the experience of loneliness and its impacts on clients' functional capacity and health and seek appropriate ways of alleviating loneliness together with clients • guide and support clients appropriately in establishing and maintaining social relations, taking clients' expectations and preferences into account.

Supporting informal and family care

Students	
Satisfactory 1	<ul style="list-style-type: none"> • are familiar with some of the different forms of informal and family care and inform clients and their close ones about them • are familiar with the legislation, services and support measures related to informal and family care and provide guidance in these matters • assist and care for clients in cooperation with informal carers, appreciating informal carers' expertise • recognise informal carers' needs for support and guidance and support their wellbeing
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • are familiar with the different forms of informal and family care and inform clients and their close ones about them diversely • are familiar with the legislation, services and support measures related to informal and family care and provide guidance in these matters, bringing up different alternatives • assist and care for clients in cooperation with informal carers, appreciating informal carers' expertise • discuss informal carers' needs for support and support their wellbeing, taking individual needs and situations into account
Good 4	
Excellent 5	<ul style="list-style-type: none"> • are familiar with the different forms of informal and family care, inform clients and their close ones about them diversely, and support them in making decisions • are familiar with the legislation, services and support measures related to informal and family care and provide guidance in relation to these services, bringing up different alternatives and paying attention to changes in service needs and freedom of choice • assist and care for clients in cooperation with informal carers, appreciating informal carers' expertise • discuss informal carers' needs for support and support their wellbeing, taking individual needs and situations into account diversely.

Students guide clients in using services and making choices.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • provide guidance in service use and choices, drawing on their knowledge of the service system • guide and advise clients in applying for services and benefits and filling in applications related to them • inform clients and their close networks about legal anticipation • carry out multidisciplinary cooperation to secure clients' ability to live at home
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • provide guidance in service use and choices, extensively drawing on their knowledge of the service system • guide and advise clients in finding information, accessing services and benefits and completing applications related to them • guide clients and their close networks in legal anticipation and the expression on clients' will • carry out multidisciplinary cooperation with a client-oriented approach to secure clients' ability to live at home

Good 4	
Excellent 5	<ul style="list-style-type: none"> • provide guidance in service use and choices, extensively drawing on their knowledge of the service system with a client-oriented approach • guide and advise clients extensively in finding information, accessing services and benefits and completing applications related to them • guide clients and their close networks in legal anticipation and the expression on clients' will, justifying their actions • carry out multidisciplinary cooperation with a client-oriented approach to secure clients' ability to live at home, paying attention to changing situations.

Students maintain and promote safety as well as their work ability and wellbeing at work.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • comply with occupational safety instructions and regulations • take care of hygiene and follow aseptic principles • follow the principles of ergonomics • recognise key stress and risk factors and address them in their work
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • comply with occupational safety instructions and regulations, justifying their actions • take care of hygiene and follow aseptic principles • follow the principles of ergonomics in varying situations • recognise key stress and risk factors and use guidance to promote their wellbeing at work and vocational competence
Good 4	
Excellent 5	<ul style="list-style-type: none"> • comply with occupational safety instructions and regulations, justifying and developing their actions • take care of hygiene and follow aseptic principles • follow the principles of ergonomics in varying situations, justifying and developing their actions • recognise key stress and risk factors and use guidance to promote their wellbeing at work and vocational competence.

Students assess and develop their work.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • assess their work drawing on self-assessment and the feedback received by them • follow the development of the social and health care field and make topical information available for the work community
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • assess their actions and develop their work drawing on self-assessment and the feedback received by them • diversely follow the development of the social and health care field and make topical information available for the work community as well as for clients and their close networks
Good 4	

Excellent 5	<ul style="list-style-type: none"> diversely assess their actions and develop their work drawing on self-assessment and the feedback received by them, justifying their actions diversely follow the development of the social and health care field and make topical information available for the work community as well as for clients and their close networks, drawing on this information in their work.
-------------	--

Methods of demonstrating competence

Students demonstrate their competence in practical tasks where they support clients with living at home and life management by working in home care or service housing environments, in clients' homes or in short-term care environments, performing a practical nurse's tasks. To the extent that the vocational competence required in the unit cannot be assessed on the basis of the demonstration, the competence demonstration is to be supplemented in other ways on an individual basis.

2.8. Enhancing children and young people's mental health skills, 15 Competence point (106236)

Competence requirements

Students know how to

- promote children and young people's mental health
- plan, implement and assess activities aiming to enhance children or young people's mental health skills
- interact with children, young people and their close ones
- use the working methods, tools and materials of the vocational field when guiding children or young people
- guide families in using services
- maintain and promote safety as well as their work ability and wellbeing at work
- assess and develop their activities.

Assessment

Students promote children and young people's mental health.

Students	
Satisfactory 1	<ul style="list-style-type: none"> recognise factors that protect mental health and risk factors recognise some of the most common symptoms of mental health problems in children and young people guide a child or a young person in finding their strengths create an accepting and safe atmosphere encourage clients in doing things together and finding meaningful activities
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> recognise factors that protect children and young people's mental health and risk factors individually recognise some of the symptoms of mental health problems in children and young people guide a child or a young person in finding their strengths and support the development of their self-esteem create an appreciating, accepting and safe atmosphere

	<ul style="list-style-type: none"> encourage clients in doing things together and finding meaningful activities, promoting participation
Good 4	
Excellent 5	<ul style="list-style-type: none"> recognise and individually enhance factors that protect children and young people's mental health, recognising and preventing risk factors recognise some of the symptoms of mental health problems in children and young people and draw on evidence-based information on them guide a child or a young person in finding their strengths and actively support the development of their self-esteem and positive self-image encounter children or young people as unique individuals and create an appreciating, accepting and safe atmosphere encourage clients in doing things together and finding meaningful activities, actively promoting participation.

Students plan, implement and assess activities aiming to enhance children or young people's mental health skills.

Students	
Satisfactory 1	<ul style="list-style-type: none"> plan activities aiming to enhance mental health skills together with children or young people and their team address children or young people's individual needs in their work evaluate the implementation of activities together with children or young people and their team document their work
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> plan versatile activities aiming to enhance mental health skills together with children or young people and their team address children or young people's individual needs and strengths in their work evaluate the implementation of activities diversely together with children or young people and their team document their work with a client-oriented approach
Good 4	
Excellent 5	<ul style="list-style-type: none"> plan versatile activities aiming to enhance mental health skills with a goal-oriented approach and together with children or young people and their team address children or young people's individual needs and strengths in their work with a systematic and goal-oriented approach evaluate the implementation of activities diversely together with children or young people and their team, understanding the importance of continuous evaluation document their work with a systematic and client-oriented approach.

Students interact with children, young people and their close ones.

Students	
Satisfactory 1	<ul style="list-style-type: none"> encounter children or young people and their close ones appreciatively and equally

	<ul style="list-style-type: none"> • work in cooperation with children or young people and their close ones • respect diversity and take into account families' diversity and different life situations in their work • modify their interaction, taking a child's or young person's stage of development into account • give encouraging feedback • act professionally in challenging situations with their team
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • encounter children or young people and their close ones appreciatively and equally and build a trustful interactive relationship • work in cooperation with children or young people and their close ones, reinforcing the family's agency and participation • respect diversity and take into account families' diversity and different life situations in their work with a client-oriented approach • modify their interaction, taking a child's or young person's stage of development and needs into account individually • give encouraging feedback that supports the development of a positive self-image in children or young people • act professionally in challenging situations
Good 4	
Excellent 5	<ul style="list-style-type: none"> • encounter children or young people and their close ones appreciatively and equally and actively build a trustful interactive relationship • work in cooperation with children or young people and their close ones, reinforcing the family's agency and participation and justifying their actions • respect diversity and take into account families' diversity and different life situations in their work with a client-oriented approach, justifying their actions • modify their interaction, taking a child's or young person's stage of development, needs, feelings and the situation into account individually • give encouraging and constructive feedback that supports the development of self-esteem and a positive self-image in children or young people • act professionally and with anticipation in challenging situations.

Students use the working methods, tools and materials of the vocational field when guiding children or young people.

Guiding clients in emotional and social skills	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • serve as a model for expressing feelings and support children or young people in recognising and expressing their feelings • verbalise and accept feelings • guide guardians in accepting children and young people's feelings • guide children or young people in doing things together • support clients in making and keeping friends and ensure that no child or young person is repeatedly excluded from the group • recognise different forms of bullying, intervene in them and resolve conflicts

Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • serve as a safe model for expressing feelings and support children or young people in recognising and expressing their feelings • verbalise and accept feelings and discuss them • guide guardians in accepting and processing children and young people's feelings • actively guide children or young people in doing things together • actively support clients in making and keeping friends and ensure that no child or young person is repeatedly excluded from the group • recognise different forms of bullying, intervene in them and guide children or young people in resolving and settling conflicts
Good 4	
Excellent 5	<ul style="list-style-type: none"> • serve as a safe model for expressing feelings, support children or young people in expressing their feelings and support the development of self-regulation • verbalise and understand feelings and discuss them with empathy • guide guardians individually and with a client-oriented approach in accepting and processing children and young people's feelings • actively guide children or young people in doing things together, reinforcing positive interaction • actively support clients in making friends, promote the feeling of togetherness within a group and ensure that no child or young person is repeatedly excluded from the group • recognise different forms of bullying, intervene in and prevent bullying, and guide children and young people in resolving and settling conflicts.

Building up the skills of taking care of oneself	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • support children or young people in making sure that they get sufficient rest, sleep and time to calm down • guide children or young people in nutrition that promotes their wellbeing, taking care of peaceful mealtimes and eating together • guide children, young people and guardians in taking care of a regular daily rhythm and routines • guide children or young people in daily physical activity and finding the joy of exercise • guide children or young people in improving their safety skills
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • support children or young people in making sure that they get sufficient rest, sleep and time to calm down, justifying the importance of sleep and rest for growth and wellbeing • guide children or young people in nutrition that promotes their wellbeing and, together with children or young people, take care of peaceful and pleasant mealtimes and eating together • guide and motivate children, young people and guardians in taking care of a regular daily rhythm and routines • guide and encourage children or young people in daily physical activity and finding the joy of exercise

	<ul style="list-style-type: none"> • guide children or young people in improving their safety skills and behaving safely in difficult situations
Good 4	
Excellent 5	<ul style="list-style-type: none"> • support children or young people in making sure that they get sufficient rest, sleep and time to calm down, justifying the importance of sleep and rest for growth and wellbeing and teaching children or young people the skills of calming themselves • diversely guide children or young people in nutrition that promotes their wellbeing and, together with children or young people, take care of peaceful and pleasant mealtimes and eating together, justifying their importance • guide and motivate children, young people and guardians in taking care of a regular daily rhythm and routines and making daily choices that support mental wellbeing • guide children or young people in daily physical activity and finding the joy of exercise, offering them different opportunities for diverse physical activity • guide children or young people in improving their safety skills and behaving safely in difficult situations, sensitively taking into account a child's or young person's experiences.

Using action-based methods and equipment	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • guide children in expressing their feelings and creativity and practising interaction skills through play or action-based methods • guide children or young people in processing and expressing their feelings, using action-based methods • teach self-calming and relaxation methods
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • diversely guide children in expressing their feelings and creativity and practising interaction skills through play or action-based methods • guide children or young people in processing and expressing their feelings, using action-based methods diversely • guide children or young people in recognising the messages of their bodies and minds and teach them self-calming and relaxation methods
Good 4	
Excellent 5	<ul style="list-style-type: none"> • diversely guide children in expressing their feelings and creativity and practising interaction skills through play or action-based methods, drawing on their knowledge of the significance of play or action-based methods for mental wellbeing • guide children or young people in processing and expressing their feelings, using action-based methods diversely and building up their ability to express their feelings and experiences and find their strengths • guide children or young people in recognising the messages of their bodies and minds and teach them self-calming and relaxation methods, drawing on their knowledge of different relaxation methods.

Students guide families in using services.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • recognise a family's service needs, drawing on their knowledge of factors that protect mental health and risk factors • are familiar with mental health services for children and young people and guide clients in using services • guide clients in using services provided by the third sector and NGOs • comply with the principles of preventive child protection and the reporting obligation
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • recognise a family's service needs, drawing diversely on their knowledge of factors that protect mental health and risk factors • are familiar with mental health services for children and young people and guide clients individually in using services • guide clients in using services provided by the third sector and NGOs as needed • comply with the principles of preventive child protection and the reporting obligation
Good 4	
Excellent 5	<ul style="list-style-type: none"> • recognise a family's service needs, drawing diversely on their knowledge of factors that protect mental health and risk factors, supporting the family's resources • are diversely familiar with mental health services for children and young people and guide clients individually in using services • guide clients in using services provided by the third sector and NGOs individually and as needed • comply with the principles of preventive child protection and the reporting obligation.

Students maintain and promote safety as well as their work ability and wellbeing at work.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • comply with occupational safety instructions and take care of children or young people's safety • recognise key stress and risk factors and take them into account their work • recognise feelings evoked by their work and seek peer support and guidance
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • comply with occupational safety instructions, anticipate and prevent hazardous situations, and take care of children and young people's safety • recognise key stress and risk factors and look after their wellbeing at work • recognise feelings evoked by their work and actively seek peer support and guidance
Good 4	
Excellent 5	<ul style="list-style-type: none"> • comply with occupational safety instructions, anticipate and prevent hazardous situations, and take care of children or young people's safety comprehensively • recognise key stress and risk factors, look after their wellbeing at work and maintain a positive work atmosphere

	<ul style="list-style-type: none"> recognise feelings evoked by their work, process them professionally, and actively seek peer support and guidance.
--	--

Students assess and develop their activities.

Students	
Satisfactory 1	<ul style="list-style-type: none"> assess their activities and recognise their strengths and development areas receive feedback and modify their activities based on the feedback received by them improve their vocational knowledge and skills related to enhancing children and young people's mental health skills
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> assess their activities diversely and recognise their strengths and development areas develop their activities based on feedback and the requirements of the work diversely improve their vocational knowledge and skills related to enhancing children and young people's mental health skills

Excellent 5	<ul style="list-style-type: none"> assess their activities diversely and actively and recognise their strengths and development areas develop their activities based on feedback and the requirements of the work, justifying their actions diversely improve their vocational knowledge and skills related to enhancing children and young people's mental health skills, justifying their decisions related to the activities.

Methods of demonstrating competence

Students demonstrate their competence in practical tasks where they enhance children or young people's mental health skills by working in a practical nurse's tasks in service environments for children, young people or families.

To the extent that the vocational competence required in the unit cannot be assessed on the basis of the demonstration, the competence demonstration is to be supplemented in other ways on an individual basis.

2.9. Mental health and substance abuse welfare work with different client groups, 15 Competence point (106240)

Competence requirements

Students know how to

- promote clients' mental wellbeing, mental health and abstinence from substance abuse and to prevent problems
- plan their work
- use interaction skills in work with clients
- use the methods, tools and materials of mental health and substance abuse welfare work in work with clients
- direct clients to services
- maintain and improve their wellbeing at work and occupational safety

- assess and develop their work.

Assessment

Students promote clients' mental wellbeing, mental health and abstinence from substance abuse and to prevent problems.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • support clients in looking after their mental wellbeing, drawing on their knowledge of factors that promote and support mental wellbeing • recognise protective factors and risks related to clients' mental health and substance abuse • plan activities that promote mental health and abstinence from substance abuse together with clients and their team
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • with a resource-oriented approach, support clients in looking after their mental wellbeing, drawing on their knowledge of factors that promote and support mental wellbeing • diversely recognise some protective factors and risks related to clients' mental health and substance abuse • plan activities that promote mental health and abstinence from substance abuse together with clients
Good 4	
Excellent 5	<ul style="list-style-type: none"> • with a resource-oriented approach, support clients in looking after their mental wellbeing, diversely drawing on their knowledge of factors that promote and support mental wellbeing • diversely recognise protective factors and risks related to clients' mental health and substance abuse, and take into account the importance of clients' close networks • plan activities that promote mental health and abstinence from substance abuse diversely together with clients.

Students plan their work.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • with their team, plan their tasks as indicated by client needs • recognise clients' need for treatment and support and assess their urgency • follow the plan and keep records with a client-oriented approach • work in cooperation with clients' networks • evaluate plan implementation with their team
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • plan their tasks as indicated by client needs as members of a multiprofessional team • recognise clients' needs for treatment and support as well as resources and assess their urgency • actively and flexibly follow the plan and keep records with a client-oriented approach • actively work in cooperation with clients' networks • evaluate plan implementation as members of a multiprofessional team
Good 4	

Excellent 5	<ul style="list-style-type: none"> • plan their tasks as indicated by client needs together with clients, networks and a multiprofessional team • recognise clients' needs for treatment and support as well as resources, assess their urgency and act as required by the situation • actively and flexibly follow the plan and keep records with a client-oriented approach, taking note of changing situations • actively work in cooperation with clients' networks, justifying their actions • evaluate plan implementation with clients and as members of a multiprofessional team.
-------------	--

Students use interaction skills in work with clients.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • encounter clients professionally and create a safe interactive relationship • rely on active listening and understand the significance of a dialogical approach in a cooperation relationship with a client • recognise some defence mechanisms in an interactive relationship • take into account the effects of language, culture and world view in interactive situations • take into account the effects of facial expressions, gestures and their own actions in an interactive situation
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • encounter clients and their close networks professionally and create a safe interactive relationship • rely on active listening and understand the significance of a dialogical approach in a cooperation relationship with a client and their network • recognise defence mechanisms and draw on their knowledge of such mechanisms in an interactive relationship with a client • diversely take into account the effects of language, culture and world view in interactive situations • take into account the effects of facial expressions, gestures and their own actions in an interactive situation
Good 4	
Excellent 5	<ul style="list-style-type: none"> • encounter clients and their close networks professionally and create a safe and trustful interactive relationship • naturally rely on active listening and understand the significance of a dialogical approach in a cooperation relationship with a client and their network • recognise defence mechanisms and draw on their knowledge of such mechanisms in an interactive relationship with a client and their close network • diversely take into account the effects of language, culture and world view in interactive situations, justifying their actions • take into account the effects of facial expressions, gestures and their own actions in an interactive situation.

Students use the methods, tools and materials of mental health and substance abuse welfare work in work with clients.

Students

Satisfactory 1	<ul style="list-style-type: none"> • use evidence-based knowledge of mental health and substance abuse problems, their treatment and rehabilitation in their work with clients of varying ages and with different backgrounds • support clients in crises, drawing on their knowledge and the team's competence related to helping people in crisis • guide clients in daily activities and everyday life management, taking into account clients' functional capacity and right to self-determination • provide pharmaceutical treatment safely for mental health and substance abuse clients and take its special features into account • support clients' participation and capacities of acting in social relationships and communities • activate clients in physical activity and outdoor exercise
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • diversely use evidence-based knowledge of mental health and substance abuse problems, their treatment and rehabilitation in their work with clients of varying ages and with different backgrounds • support clients in crises, drawing on their knowledge and the team's competence related to helping people in crisis, and work together with their team • guide and motivate clients in daily activities and everyday life management, taking into account clients' functional capacity and right to self-determination • provide pharmaceutical treatment safely for mental health and substance abuse clients and take its special features into account • actively support clients' participation and capacities of acting in social relationships and communities • activate clients in physical activity and outdoor exercise in ways that the clients enjoy
Good 4	
Excellent 5	<ul style="list-style-type: none"> • diversely and actively use evidence-based knowledge of mental health and substance abuse problems, their treatment and rehabilitation in their work with clients of varying ages and with different backgrounds • support clients in crises, drawing on their knowledge and the team's competence related to helping people in crisis, and work in multidisciplinary cooperation with their team • guide and motivate clients in daily activities and everyday life management in a manner that is meaningful for the client, taking into account clients' functional capacity and right to self-determination • provide pharmaceutical treatment safely for mental health and substance abuse clients and take its special features into account • actively support clients' participation and capacities of acting in social relationships and communities, drawing on clients' and their own resources • activate clients in physical activity and outdoor exercise in ways that the clients enjoy, encouraging them to find new options.

Students guide clients in using services.

Students

Satisfactory 1	<ul style="list-style-type: none"> • provide clients with information about mental health and substance abuse services, drawing on this information as team members • as team members, guide clients in accessing services, making decisions and using services, taking into account clients' needs, preferences and right to self-determination
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • provide clients with information about mental health and substance abuse services, drawing on this information • guide and support clients in accessing services, making decisions and using services, taking into account clients' needs, preferences and right to self-determination
Good 4	
Excellent 5	<ul style="list-style-type: none"> • provide clients with diverse information about mental health and substance abuse services, drawing on this information • guide, support and motivate clients in accessing services, making decisions and using services, taking into account clients' needs, preferences and right to self-determination.

Students maintain and improve their wellbeing at work and occupational safety.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • comply with instructions and regulations on wellbeing at work and occupational safety, preventing risk factors caused by their work as team members • see to their and their clients' safety in threatening situations • recognise key stress factors of the work and use guidance to promote their wellbeing at work and professional competence
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • comply with instructions and regulations on wellbeing at work and occupational safety, preventing risk factors caused by their work • see to their and their clients' safety in threatening situations and anticipate situations involving threat, violence and crises • recognise key stress factors of the work and actively use guidance to promote their wellbeing at work and professional competence
Good 4	
Excellent 5	<ul style="list-style-type: none"> • comply with instructions and regulations on wellbeing at work and occupational safety, prevent risk factors caused by their work, and justify their actions • see to their and their clients' safety in threatening situations and anticipate situations involving threat, violence and crises, justifying their actions • recognise key stress factors of the work and actively use guidance to promote their wellbeing at work and professional competence, and build up wellbeing at work in the work community.

Students assess and develop their work.

Students

Satisfactory 1	<ul style="list-style-type: none"> • assess their actions and develop their work based on feedback received by them • evaluate their attitudes, values and competence in work with mental health and substance abuse welfare clients and follow ethical principles • assess their skills related to professional interaction relations • work as team members, consult other experts and work in multiprofessional cooperation • follow the development of the social and health care field and make topical information available for the work community
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • assess their actions and develop their work drawing on self-assessment and the feedback received by them • actively evaluate their attitudes, values and competence in work with mental health and substance abuse welfare clients and follow ethical principles • assess their professional competence associated with interactive relations and modify their actions if necessary • work actively as team members, consult other experts and work in multiprofessional cooperation • diversely follow the development of the social and health care field and make topical information available for the work community as well as for clients and their close networks
Good 4	
Excellent 5	<ul style="list-style-type: none"> • diversely assess their actions and develop their work drawing on self-assessment and the feedback received by them • actively evaluate their attitudes, values and competence in work with mental health and substance abuse welfare clients and follow ethical principles, developing their activities • assess and develop their professional competence associated with interactive relations and justify the practices chosen by them • work actively as team members, consult extensively other experts and work in multiprofessional cooperation • diversely follow the development of the social and health care field and make topical information available for the work community as well as for clients and their close networks, drawing on this information in their actions.

Methods of demonstrating competence

Students demonstrate their competence in practical tasks where they promote a client's mental wellbeing, mental health and abstinence from substance abuse while working in an education sector or health and social care environment or in the client's home, performing a practical nurse's tasks. To the extent that the vocational competence required in the unit cannot be assessed on the basis of the demonstration, the competence demonstration is to be supplemented in other ways on an individual basis.

2.10. Taking samples and client service in practical nursing, 15 Competence point (106243)

Competence requirements

Students know how to

- promote client wellbeing when taking samples
- plan a practical nurse's work when taking samples and serving clients
- use interaction skills in work with clients
- use the working methods, tools and materials of the vocational field when taking samples and serving clients
- guide clients in using services
- maintain and promote safety as well as their work ability and wellbeing at work
- assess and develop their work.

Assessment

Students promote client wellbeing when taking samples.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • as team members, create a calm atmosphere and work safely • comply with the underlying values, statutes, regulations and operating principles of the social and health care field • are aware of the workplace's self-monitoring plan and carry out self-monitoring as team members • comply with the principles of sustainable development and are aware of cost effects and quality criteria as team members
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • create a calm atmosphere and work safely • comply with the underlying values, statutes, regulations and operating principles of the social and health care field and justify their actions by them • carry out self-monitoring and have familiarised themselves with the workplace's self-monitoring plan • comply with the principles of sustainable development and are aware of cost effects and quality criteria of procedures
Good 4	
Excellent 5	<ul style="list-style-type: none"> • create a calm atmosphere, listen to clients and work safely • comply with the underlying values, statutes, regulations and operating principles of the social and health care field and justify their actions diversely by these statutes and principles • familiarise themselves with the workplace's self-monitoring plan from a practical nurse's perspective, work in compliance with self-monitoring regulations, and propose improvements • work to promote the implementation of sustainable development principles, justify their actions, and work with cost-awareness and in compliance with quality criteria.

Students plan a practical nurse's work when taking samples and serving clients.

Planning the work	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • plan their work with a client-oriented approach in a practical nurse's area of responsibility, taking the laboratory's quality system into account as team members • work systematically and in a goal-oriented manner, following instructions and as team members • comply with work instructions, working times and agreements
Satisfactory 2	

Good 3	<ul style="list-style-type: none"> plan their work with a client-oriented approach in a practical nurse's area of responsibility, taking the laboratory's quality system into account work systematically and in a goal-oriented manner following instructions, and modify their actions flexibly as indicated by daily situations comply with work instructions, working times and agreements
Good 4	
Excellent 5	<ul style="list-style-type: none"> independently and with a client-oriented approach, plan the work and tasks in a practical nurse's area of responsibility, taking into account the laboratory's quality system, and work actively in a multiprofessional team work systematically, appropriately and in a goal-oriented manner following instructions, and adeptly coordinate their work with other activities of the workplace comply with work instructions, working times and agreements.

Students use interaction skills in work with clients.

Students	
Satisfactory 1	<ul style="list-style-type: none"> interact with clients appropriately and in a friendly manner, guiding clients in different stages of the procedure interact with clients professionally work as members of a multiprofessional team work together with the client network as team members use communication methods and tools that support and compensate for speech in interaction with clients use plain language, modifying their expression as necessary
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> interact with clients appropriately, individually and encouragingly, guiding clients in different stages of the procedure interact with clients professionally and promote their wellbeing by means of interaction work actively and responsibly as members of a multiprofessional team, taking into consideration some of the other team members' tasks and areas of responsibility work together with the client network use communication methods and tools that support and compensate for speech in interaction with clients use plain language and modify their expression to match clients' communication skills
Good 4	
Excellent 5	<ul style="list-style-type: none"> interact with clients appropriately, individually and encouragingly, creating a safe atmosphere, and guide clients in different stages of the procedure work with clients professionally and promote their wellbeing by means of interaction individually and with initiative work actively and responsibly as members of a multiprofessional team and with stakeholders work appropriately in a crisis and take into consideration other team members' tasks and areas of responsibility work together with the client network flexibly

	<ul style="list-style-type: none"> • use communication methods and tools that support and compensate for speech in interaction with clients in different situations • use plain language naturally and modify their expression to match clients' communication skills, encouraging clients in self-expression.
--	--

Students use the working methods, tools and materials of the vocational field when taking samples and serving clients.

Drawing on evidence-based knowledge when taking samples	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • draw on their evidence-based knowledge of promoting health and wellbeing, the human body's structure and functions, vital functions, illnesses and their treatment in their work • draw on their knowledge of occupational safety when working with clients of varying ages and from different backgrounds in a practical nurse's area of responsibility • draw on their knowledge of the laboratory testing process, laboratory service system and service providers in their work
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • justify their actions by their evidence-based knowledge of promoting health and wellbeing, the human body's structure and functions, vital functions, illnesses and their treatment • justify their actions by their knowledge of occupational safety when working with clients of varying ages and with different backgrounds in a practical nurse's area of responsibility • justify their actions by their knowledge of the laboratory testing process, laboratory service system and service providers
Good 4	
Excellent 5	<ul style="list-style-type: none"> • diversely justify their actions by their evidence-based knowledge of promoting health and wellbeing, the human body's structure and functions, vital functions, illnesses and their treatment • diversely justify their actions by their knowledge of occupational safety when working with clients of varying ages and with different backgrounds in a practical nurse's area of responsibility • diversely justify their actions by their knowledge of the laboratory testing process, laboratory service system and service providers.

Taking samples	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • safely take key laboratory tests following the work unit's instructions in the client's home • take samples following the workplace's hygiene practices and aseptic work order • monitor clients' condition and safety in connection with the procedure and ensure the continuity of treatment as team members
Satisfactory 2	

Good 3	<ul style="list-style-type: none"> • safely and with a client-oriented approach, take key laboratory tests following the work unit's instructions in the client's home • take samples observing statutes, hygiene practices and an aseptic work order, working to prevent the spread of infections • monitor clients' condition in connection with the procedure and ensure the continuity of treatment
Good 4	
Excellent 5	<ul style="list-style-type: none"> • safely, adeptly and independently and with a client-oriented approach, take key laboratory tests following the work unit's instructions in the client's home • take samples observing statutes, hygiene practices and an aseptic work order, working to prevent the spread of infections, and justify their decisions • monitor clients' condition in connection with the procedure, work with a client-oriented approach in unexpected situations, and independently ensure the continuity of treatment.

Using methods and instruments and instrument care	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • use key working methods, instruments and materials associated with their work with a client-oriented approach as team members • care for the instruments needed for sample-taking and check the availability of materials as team members
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • use key working methods, instruments and materials associated with their work independently and with a client-oriented approach at work • care for instruments needed for sample-taking and check the availability of materials independently
Good 4	
Excellent 5	<ul style="list-style-type: none"> • independently and with a client-oriented approach select the most suitable working methods, instruments and materials for their work and use them adeptly in varying situations at work • top up and care for the instruments needed for sample-taking and look after the care environment responsibly and as required by the situation, and assess the cleaning needs after special situations.

Using information systems and record-keeping	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • use client information systems • as team members, use the work unit's ICT tools in a practical nurse's area of responsibility following the unit's instructions and observe data protection when communicating • record sample-taking, following operating instructions as team members
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • use client information systems • use the work unit's ICT tools in a practical nurse's area of responsibility appropriately following the unit's instructions, and observe data protection when communicating

	<ul style="list-style-type: none"> record sample-taking following operating instructions
Good 4	
Excellent 5	<ul style="list-style-type: none"> use client information systems adeptly use ICT tools in caring for clients use the work unit's ICT tools in a practical nurse's area of responsibility appropriately following instructions, and observe data protection when communicating record sample-taking following operating instructions, justifying their actions.

Students guide clients in using services.

Students	
Satisfactory 1	<ul style="list-style-type: none"> are familiar with the service system associated with sample-taking in a practical nurse's area of responsibility are familiar with clients' critical paths and service chains and draw on this knowledge in their work in clients' homes, guide clients and their close networks in using services and draw on the expertise of a multidisciplinary network make use of the service and payment system of social and health care in their work and draw on their knowledge as team members when guiding clients as team members, guide clients in using electronic services
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> are familiar with the service system associated with sample-taking in a practical nurse's area of responsibility and update their competence related to the service system are familiar with clients' critical paths and service chains and draw on this knowledge in their work in clients' homes, guide clients and their close networks in using services, suggesting alternatives, and draw on the expertise of a multidisciplinary network make use of the service and payment system of social and health care in their work and draw on their knowledge when guiding clients guide clients in using electronic services
Good 4	
Excellent 5	<ul style="list-style-type: none"> are familiar with the service system associated with sample-taking in a practical nurse's area of responsibility, update their competence related to the service system, and justify their actions are familiar with clients' critical paths and service chains and draw on this knowledge in their work in clients' homes, guide clients and their close networks in using services, suggesting alternatives, and draw on the expertise of a multidisciplinary network make use of the service and payment system of social and health care in their work and draw on their knowledge individually when guiding clients independently guide clients in using electronic services.

Students maintain and promote safety as well as their work ability and wellbeing at work.

Students

Satisfactory 1	<ul style="list-style-type: none"> • comply with the workplace's instructions on wellbeing at work and occupational safety and with electrical and fire safety regulations, prevent health hazards caused by the work, and inform clients and their team about the hazards • wear an appropriate work clothing and comply with the workplace's hygiene instructions and aseptic work order • comply with the principles of ergonomics and prevent accidents and injuries caused by the work • as team members, encounter clients with challenging behaviours • comply with the work unit's safety instructions and protect themselves if necessary
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • comply with the workplace's instructions on wellbeing at work and occupational safety and with electrical and fire safety regulations, prevent health hazards caused by the work, and inform clients and their team about the hazards with initiative • wear an appropriate work clothing, comply with the workplace's hygiene instructions and aseptic work order, and prevent health hazards and harms • comply with the principles of ergonomics in varying situations and prevent accidents and injuries caused by the work • encounter clients with challenging behaviours • comply with the work unit's safety instructions and protect themselves if necessary
Good 4	
Excellent 5	<ul style="list-style-type: none"> • comply with the workplace's instructions on wellbeing at work and occupational safety and with electrical and fire safety regulations, prevent health hazards caused by the work, and actively inform clients and their team about the hazards • wear an appropriate work clothing, comply with the workplace's hygiene instructions and aseptic work order, and develop aseptic practices in their area of responsibility • comply with the principles of ergonomics in varying situations, taking advantage of clients' resources and aids, and improve ergonomics in the working environment • anticipate challenging situations and encounter clients with challenging behaviours professionally • comply with the work unit's safety instructions and protect themselves if necessary.

Students assess and develop their work.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • realistically evaluate their work and competence • maintain and develop the knowledge and skills required in their occupation • give and receive feedback and modify their activities if necessary
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • evaluate their work and competence realistically and recognise their strengths and areas of development • justify their work-related decisions by professional knowledge and maintain their knowledge

	<ul style="list-style-type: none"> • give and receive feedback and understand the significance of feedback given to them for developing their work
Good 4	
Excellent 5	<ul style="list-style-type: none"> • evaluate their work and competence realistically, recognise their strengths and areas of development, and ask for guidance if necessary • justify their work-related decisions by professional knowledge and maintain their knowledge • give and receive feedback and understand the significance of feedback given to them for developing their work • make realistic development proposals.

Methods of demonstrating competence

Students demonstrate their competence in practical tasks where they work in sample-taking and client service environments or in a client's home as practical nurses. To the extent that the vocational competence required in the unit cannot be assessed on the basis of the demonstration, the competence demonstration is to be supplemented in other ways on an individual basis.

2.11. Working in terminal care, 15 Competence point (106246)

Competence requirements

Students know how to

- enhance the wellbeing and quality of life of terminal care clients
- plan, deliver and evaluate holistic care for people approaching death
- interact with people in terminal care and their close ones
- use the working methods, tools and materials of the terminal care field, enhancing the wellbeing of a person in terminal care
- support and guide the close ones of a person in terminal care
- maintain and promote safety as well as their work ability and wellbeing at work
- assess and develop their activities.

Assessment

Students enhance the wellbeing and quality of life of terminal care clients.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • comply with key up-to-date statutes on the care of dying patients in their area of responsibility • take into account recommendations for terminal care and evidence-based knowledge in their work, follow them, and safeguard the quality of life of terminal care clients • work in compliance with regulations and quality recommendations applicable to self-monitoring
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • systematically comply with key up-to-date statutes on the care of dying patients in their area of responsibility • take into account recommendations for terminal care and evidence-based knowledge in their work, follow them, and safeguard the quality of life of terminal care clients

	<ul style="list-style-type: none"> work in compliance with regulations and quality recommendations applicable to self-monitoring
Good 4	
Excellent 5	<ul style="list-style-type: none"> systematically comply with key up-to-date statutes on the care of dying patients in their area of responsibility and justify their actions by them take into account recommendations for terminal care and evidence-based knowledge in their work, follow them, and safeguard the quality of life of terminal care clients work in compliance with regulations and quality recommendations applicable to self-monitoring.

Students plan, deliver and evaluate holistic care for clients approaching death.

Participating in a terminal care discussion and drawing up a terminal care plan	
Students	
Satisfactory 1	<ul style="list-style-type: none"> support the participation of dying clients and their close ones in terminal care discussions take into account and carefully familiarise themselves with a dying client's living will provide dying clients and their families and friends with professional information about nursing and the service system to support decisions made by them with their team, keep the physician making a terminal care decision informed provide a dying client and their close ones with reliable and up-to-date information in their area of responsibility, ensure that all those participating in care know about the decision, the terminal care plan and the possible living will
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> expertly support the participation of dying clients and their close ones in terminal care discussions and maintain an open atmosphere in the discussions take into account and carefully familiarise themselves with a dying client's living will and, if necessary, guide a dying client and their close ones in drawing up a living will provide dying clients and their close ones with professional information about nursing and the service system to support decisions made by them keep the physician making a terminal care decision informed in their area of responsibility provide a dying client and their close ones with reliable and up-to-date information and discuss their preferences with them naturally and respectfully in their area of responsibility, ensure that all those participating in care know about the decision, the terminal care plan and the possible living will
Good 4	
Excellent 5	<ul style="list-style-type: none"> provide expert and correctly timed support for the participation of dying clients and their close ones in terminal care discussions and maintain an open and trustful atmosphere in the discussions

	<ul style="list-style-type: none"> • take into account and carefully familiarise themselves with a dying client's living will and, if necessary, guide and support a dying client and their close ones in drawing up a living will • provide dying clients and their close ones with professional information about nursing and the service system to support decisions made by them and support them if necessary • independently keep the physician making a terminal care decision informed in their area of responsibility • provide a dying client and their close ones with reliable and up-to-date information and discuss their preferences, support measures and options with them naturally and respectfully • in their area of responsibility, ensure that all those participating in care know about the decision, the terminal care plan and the possible living will.
--	--

Following a terminal care plan or living will	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • respect the uniqueness and need to be heard and prepare for death of a person who is approaching death • pay attention to realising a dying person's right to self-determination in the planning of care • participate in planning the nursing of a person approaching death, drawing on the client's life history and social, cultural, psychological and spiritual needs • encourage a dying person to express their needs for closeness, aesthetics, sexuality and touch • follow the terminal care plan, evaluate its implementation, and bring up any needs related to a person's care • report on and record observations regarding person's condition without putting client safety at risk
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • respect the uniqueness and need to be heard and prepare for death of a person who is approaching death • pay attention to and look after realising a dying person's right to self-determination in the planning of care • participate in planning the nursing of a person approaching death, drawing on the client's life history and social, cultural, psychological and spiritual needs • encourage a dying person to express their needs for closeness, aesthetics, sexuality and touch, understand the importance of these aspects when planning their work, and justify their significance as part of holistic care • follow the terminal care plan, evaluate its implementation, and bring up any needs to change it related to a person's holistic care • report on and record professionally observations regarding person's condition without putting client safety at risk
Good 4	
Excellent 5	<ul style="list-style-type: none"> • respect the uniqueness and need to be heard and prepare for death of a person who is approaching death • pay attention to and look after realising a dying person's right to self-determination in the planning of holistic care • participate in planning the nursing of a client approaching death, drawing on the person's life history and social, cultural, psychological and spiritual needs

	<ul style="list-style-type: none"> • encourage a dying person to express their needs for closeness, aesthetics, sexuality and touch, understand the importance of these aspects when planning their work, and justify their significance as part of holistic care • follow the terminal care plan, evaluate its implementation, and bring up any needs to change it related to a person's holistic care, drawing on the competence of different actors in their working environment • report on and professionally, actively and diversely record observations regarding persons' condition together with clients and their close ones without putting client safety at risk.
--	--

Students interact with people in terminal care and the their close ones

Students	
Satisfactory 1	<ul style="list-style-type: none"> • encounter dying people with appreciation, are present in interactive situations, and encourage a dying person to express their feelings • discuss their life and approaching death with appreciation with a dying person • understand experiences of suffering and anxiety associated with the ending of life as part of dying • listen to and hear a dying person • use their presence, encouragement, hope, joy and humour in interactive situations • support a dying person and their close ones in grieving • use communication methods that support and compensate for speech and modify their expression if necessary
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • encounter dying people genuinely and with appreciation, are present in interactive situations, and encourage a dying people as well as their close ones to express their feelings • discuss their life and approaching death with appreciation and empathy with a dying person • understand experiences of suffering and anxiety associated with the ending of life as part of dying and are able to accept them • listen to and hear a dying person and their close ones • actively use their presence, encouragement, hope, joy and humour in interactive situations • support a dying person and their close ones in grieving as indicated by their needs • fluently use communication methods that support and compensate for speech and modify their expression if necessary
Good 4	
Excellent 5	<ul style="list-style-type: none"> • encounter dying people genuinely and with appreciation, are present in interactive situations, show understanding, encourage a dying person as well as their close ones to express their feelings, and discuss them naturally • discuss their life and approaching death as well as questions related to the meaning of life with appreciation and empathy with a dying person • understand experiences of suffering and anxiety associated with the ending of life as part of dying and are able to accept and alleviate them

	<ul style="list-style-type: none"> • listen to and hear a dying person and their close ones, understanding the role of silence as part of an encounter • actively and diversely use their presence, encouragement, hope, joy and humour in interactive situations • support a dying person and their close ones in grieving as indicated by their needs, justifying their actions • fluently and diversely use communication methods that support and compensate for speech and modify their expression if necessary.
--	---

Students use the working methods, tools and materials of the terminal care field, enhancing the wellbeing of a person in terminal care

Providing holistic care for a dying person	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • provide palliative care, taking into account a dying person's needs and special features of illnesses • provide good postural care as well as oral and skin care • look after a dying person's nutrition and hydration, taking client's preferences into account • take care of a dying person's secretory functions appropriately • look after comprehensive pain management • look after pharmaceutical treatment as indicated by their area of responsibility • provide non-pharmacological palliative care • observe some signs of approaching death and inform their team of them appropriately
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • provide holistic palliative care, taking into account a dying person's needs and special features of illnesses • provide good postural care as well as oral and skin care and understand their importance for a dying person's wellbeing • look after a dying person's nutrition and hydration, taking client's personal wishes and preferences into account • take care of a dying person's secretory functions appropriately • provide comprehensive pain management, bringing up different options • look after comprehensive pharmaceutical treatment as indicated by their area of responsibility • provide non-pharmacological palliative care, bringing up different forms of psychosocial support • reliably observe signs of approaching death and pass on information about them appropriately
Good 4	
Excellent 5	<ul style="list-style-type: none"> • provide holistic palliative care, taking into account a dying person's needs and special features of illnesses, justifying their actions • provide good postural care as well as oral and skin care and understand their importance for a dying person's wellbeing, justifying their actions • look after a dying person's nutrition and hydration, taking client's personal wishes and preferences into account, justifying their importance • take care of a dying person's secretory functions appropriately, justifying their actions

	<ul style="list-style-type: none"> • provide comprehensive pain management, bringing up different options and justifying their actions diversely • look after comprehensive pharmaceutical treatment as indicated by their area of responsibility, justifying their actions • provide non-pharmacological palliative care, bringing up different forms of psychosocial support and justifying their actions • reliably observe signs of approaching death and pass on information about them appropriately.
--	---

Caring for a deceased person	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • as a person dies, follow the care environment's instructions and practices as team members • comply with the deceased person's living will, observing cultural customs and practices as team members • inform the close ones of the deceased as agreed • as team members, care for the deceased person with dignity and following good practices, enabling close ones to participate in taking care of the deceased person • participate in a concluding discussion with close ones as team members
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • as a person dies, follow the care environment's instructions and practices • comply with the deceased person's living will, observing cultural customs and practices • inform the close ones of the deceased as agreed • care for the deceased person with dignity and following good practices, enabling close ones to participate in taking care of the deceased person • participate in a concluding discussion with close ones, evaluating the care
Good 4	
Excellent 5	<ul style="list-style-type: none"> • as a person dies, follow the care environment's instructions and practices • comply with the deceased person's living will, observing cultural customs and practices and enabling the participation of close ones • inform the close ones of the deceased as agreed • care for the deceased person with dignity, individually and following good practices, enabling close ones to participate in taking care of the deceased person • participate in a concluding discussion with close ones, evaluating the care and looking to future.

Students support and guide the close ones of a person in terminal care

Students	
Satisfactory 1	<ul style="list-style-type: none"> • when encountering close ones, take into account their background, age and culture • assess close ones' resources during the care process of a dying person • enable close ones to participate in providing basic care

	<ul style="list-style-type: none"> • support close ones' needs in their process of letting go and after death • guide close ones in processing their grief • support close ones in understanding the uniqueness of death • as team members, encounter close ones displaying a challenging reaction • together with a multiprofessional team, find out about the forms of support and services needed by close ones • support close ones in saying their final good-byes and understand the importance of saying good-bye • guide close ones in managing practical matters related to a death
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • when encountering close ones, take into account their background, age and culture individually • take into account and assess close ones' resources during the care process of a dying person • enable close ones to participate in providing basic care and guide them in it • support close ones' needs and feelings in their process of letting go and after death • guide close ones in processing their grief and seeking help from crisis groups and bereavement support groups if necessary • support close ones in understanding the uniqueness of death • encounter close ones displaying a challenging reaction • together with a multiprofessional team, find out about the forms of support and services needed by close ones and guide them to these services • guide and support close ones in managing practical matters related to a death
Good 4	
Excellent 5	<ul style="list-style-type: none"> • when encountering close ones, take into account their background, age and culture individually and comprehensively • take into account and assess close ones' resources during the care process of a dying person and support them • enable close ones to participate in providing basic care and guide them in it actively • recognise and support close ones' needs and feelings in their process of letting go and after death • guide and encourage close ones in processing their grief and seeking help from crisis groups and bereavement support groups if necessary • support close ones in understanding the uniqueness of death • encounter close ones displaying a challenging reaction and behave professionally in these situations • together with a multiprofessional team, find out about the forms of support and services needed by close ones and guide them to these services, justifying their actions • guide and actively support close ones in managing practical matters related to a death.

Students maintain and promote safety as well as their work ability and wellbeing at work.

Paying attention to wellbeing at work and occupational safety	
Students	

Satisfactory 1	<ul style="list-style-type: none"> are familiar with the work unit's safety plan and practices for reporting hazardous situations and act as required by the situation comply with instructions and regulations on wellbeing at work and occupational safety and with electrical and fire safety regulations take responsibility for their wellbeing at work, occupational safety and work ability, process professionally their personal feelings about caring for a dying person, and use peer support and work guidance in their work
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> are familiar with the work unit's safety plan and practices for reporting hazardous situations and act as required by the situation comply with instructions and regulations on wellbeing at work and occupational safety and with electrical and fire safety regulations take responsibility for their own wellbeing at work, occupational safety and work ability and prevent potential harms process professionally their personal feelings about caring for a dying person, and make use of peer support and work guidance actively in their work
Good 4	
Excellent 5	<ul style="list-style-type: none"> are familiar with the work unit's safety plan and practices for reporting hazardous situations and act as required by the situation, preventing risks comply with instructions and regulations on wellbeing at work and occupational safety and with electrical and fire safety regulations actively take responsibility for their wellbeing at work, occupational safety and work ability and prevent potential harms process professionally their personal feelings about caring for a dying client, make use of peer support and work guidance actively in their work, and justify their importance for their coping.

Addressing client safety	
Students	
Satisfactory 1	<ul style="list-style-type: none"> recognise the impacts of a dying person's fear, pain and anxiety on person's behaviour and safety and the safety of the environment pay attention to client safety in their work follow the principles of aseptic working methods
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> recognise the impacts of a dying person's fear, pain and anxiety on person's behaviour and safety and the safety of the environment, and bring the matter up in their team pay attention to client safety in their work and justify their actions follow the principles of aseptic working methods
Good 4	
Excellent 5	<ul style="list-style-type: none"> recognise the impacts of a dying person's fear, pain and anxiety on person's behaviour and safety and the safety of the

	<p>environment, and strive to prevent challenging situations from occurring</p> <ul style="list-style-type: none"> • pay extensive attention to client safety in their work and justify their actions • follow the principles of aseptic working methods
--	--

Students assess and develop their activities.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • assess their competence • maintain the knowledge and skills related to working in terminal care required by their occupation • recognise some of their strengths and areas of development and assess their suitability for caring for dying people • participate in work community development as team members
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • realistically assess their competence • maintain and develop the knowledge and skills related to working in terminal care required by their occupation • recognise their strengths and areas of development and realistically consider their suitability for caring for dying people • participate in work community development and show an ability to support their colleagues
Good 4	
Excellent 5	<ul style="list-style-type: none"> • assess their competence realistically and diversely • actively and diversely maintain and improve the knowledge and skills related to working in terminal care required in their occupation and share the knowledge they have acquired with their team • recognise their strengths and areas of development and are motivated to develop themselves and their competence, realistically considering their suitability for caring for dying people • participate in work community development and show an ability and willingness to support their colleagues.

Methods of demonstrating competence

The students demonstrate their competence in practical tasks by working in a practical nurse's tasks in an environment that provides terminal care. To the extent that the vocational competence required in the unit cannot be assessed on the basis of the demonstration, the competence demonstration is to be supplemented in other ways on an individual basis.

2.12. Oral health care for different client groups, 15 Competence point (106248)

Competence requirements

Students know how to

- promote clients' wellbeing and oral health
- plan their tasks and work with clients
- use interaction skills in work with clients
- use the working methods, instruments and products of oral health care
- guide clients in using oral health care services

- maintain and promote safety as well as their work ability and wellbeing at work
- assess and develop their work.

Assessment

Students promote clients' wellbeing and oral health.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • comply with key recommendations and operating instructions related to oral health care work • support clients' to take initiative in oral self-care • work to support clients' wellbeing and health knowledge • comply with key up-to-date statutes in their area of responsibility
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • comply with recommendations and operating instructions related to oral health care work • encourage clients' to take initiative in oral self-care • work to strengthen clients' wellbeing and health knowledge • comply with key up-to-date statutes in their area of responsibility, justifying their actions
Good 4	
Excellent 5	<ul style="list-style-type: none"> • comply with recommendations and operating instructions related to oral health care work and justify their work • recognise clients' resources and support clients in taking initiative in oral self-care, drawing on clients' resources • strengthen and build up clients' wellbeing and health knowledge • comply with key up-to-date statutes in their area of responsibility, justifying their actions diversely.

Students plan their tasks and work with clients.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • plan their work, taking the care and service plan into account • work in cooperation with clients • document observations related to clients' oral health, oral health care habits and self-care instructions as team members • draw up an oral self-care plan for a client as team members • comply with data protection and confidentiality in their work
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • plan their work, taking the care and service plan and client needs into account • work in cooperation with clients, their close ones and a multidisciplinary network • document observations related to clients' oral health, oral health care habits and self-care instructions • draw up an oral self-care plan for a client in cooperation with the client • comply with data protection and confidentiality in their work
Good 4	
Excellent 5	<ul style="list-style-type: none"> • plan their work taking the care and service plans and client needs into account, and modify their actions as a client's care and service plan changes

	<ul style="list-style-type: none"> • work in cooperation with clients, their close ones and a multidisciplinary network and develop their work • document observations related to clients' oral health, oral health care habits and self-care instructions and draw on this information when planning care work • draw up an oral self-care plan for a client in cooperation with the client and monitor the plan's impacts on client welfare • comply with data protection and confidentiality in their work.
--	--

Students use interaction skills in work with clients.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • work and behave professionally in interactive situations • use communication methods and tools that support and compensate for speech and plain language • understand the effects of age, language, culture and world views on encountering clients
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • work professionally in interactive situations and notice the effects of their behaviour when dealing with clients • adeptly use communication methods and tools that support and compensate for speech and plain language • take into account the effects of a client's age, language, culture and world views when encountering them
Good 4	
Excellent 5	<ul style="list-style-type: none"> • work professionally in interactive situations, notice clients individually and modify their communication as required in the situation • adeptly and diversely use communication methods and tools that support and compensate for speech and plain language • take into account the effects of a client's age, language, culture and world views when encountering them, justifying their actions.

Students use the working methods, instruments and products of oral health care.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • recognise a healthy mouth and some of the most common oral diseases • know about the impacts of systemic diseases on oral health and the effects of oral diseases on clients' wellbeing • know some of the effects of pharmaceuticals and intoxicants on oral health • are familiar with some factors that promote oral health • select equipment and products needed for oral hygiene • provide oral health care for clients as part of their daily work • if necessary, help clients with oral hygiene • make use of aids intended for oral self-care in their work • recognise different treatment solutions in a client's mouth and know some options of caring for oral hygiene • follow the principles of sustainable development
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • recognise a healthy mouth and the most common oral diseases • know about the impacts of systemic diseases on oral health and the effects of oral diseases on clients' wellbeing

	<ul style="list-style-type: none"> • know the effects of pharmaceuticals and intoxicants on oral health • are familiar with factors that promote oral health • select correct equipment and products needed for oral hygiene in cooperation with clients • provide oral health care for clients as part of their daily work • if necessary, guide and help clients with oral hygiene • if necessary, inform close ones, close networks and their team of a client's oral self-care • select some aids intended for oral self-care together with clients • recognise different treatment solutions in a client's mouth and are familiar with some of the different options of caring for oral hygiene • follow the principles of sustainable development, use them to justify their actions, and work with cost awareness
Good 4	
Excellent 5	<ul style="list-style-type: none"> • recognise a healthy mouth and the most common oral diseases and draw on this knowledge in their work • draw on their knowledge of the impacts of systemic diseases on oral health and the effects of oral diseases on clients' wellbeing in their work • draw on their knowledge of the effects of pharmaceuticals and intoxicants on a client's oral health in their work • are familiar with factors that promote oral health and draw on this knowledge in their work • select correct equipment and products needed for oral hygiene in cooperation with clients and change the operating plan if necessary • provide oral health care for clients as part of their daily work and modify the operating plan if necessary • if necessary, individually guide and help clients with oral hygiene and encourage clients to take initiative in their oral care • if necessary, inform and guide close ones, close networks and their team of a client's oral self-care • select aids intended for oral self-care together with clients and guide clients in their use • evaluate the realisation of a client's oral self-care and modify the plan together with the client if necessary • promote the implementation of sustainable development principles, justify their actions and work with cost-awareness.

Students guide clients in using oral health care services.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • are familiar with the oral health care service network • guide clients in accessing oral health care services as team members
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • make use of the oral health care service network in their work • guide clients and their close networks in accessing oral health care services
Good 4	
Excellent 5	<ul style="list-style-type: none"> • make use of the oral health care service network in their work • assess clients' need for care as team members

	<ul style="list-style-type: none"> • guide clients and their close networks in accessing oral health care services.
--	--

Students maintain and promote safety as well as their work ability and wellbeing at work.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • follow instructions on hygiene and aseptic practices in their work • follow the principles of ergonomics and modify their actions based on feedback received by them • work professionally when encountering clients with challenging behaviours
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • follow instructions on hygiene and aseptic practices in their work and justify their actions • follow the principles of ergonomics and justify their actions by the principles of work ergonomics • encounter professionally clients with challenging behaviours and pay attention to the workplace's safety practices
Good 4	
Excellent 5	<ul style="list-style-type: none"> • follow instructions on hygiene and aseptic practices in their work, justify their actions by evidence-based knowledge, and modify their actions if necessary • follow the principles of ergonomics, assess their actions in terms of ergonomics and modify them to reduce strain, finding alternative courses of actions • encounter professionally clients with challenging behaviours, pay attention to the workplace's safety practices, and inform the care network of the challenges.

Students assess and develop their work.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • realistically evaluate their work and competence • maintain and develop their oral health care knowledge and skills • give and receive feedback and modify their activities if necessary
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • evaluate their work and competence realistically and recognise their strengths and needs of development • justify their decisions related to oral health care by professional knowledge • give and receive feedback and understand the significance of feedback given to them for developing their work
Good 4	
Excellent 5	<ul style="list-style-type: none"> • evaluate their work and competence realistically, recognise their strengths and needs of development, and ask for guidance if necessary • justify their decisions related to oral health care by professional knowledge and maintain their knowledge • give and receive feedback and understand the significance of feedback given to them for developing their work • make realistic development proposals.

Methods of demonstrating competence

Students demonstrate their competence in practical tasks, in which they promote clients' oral health in an education or health and social care environment or in the client's home in a practical nurse's tasks. To the extent that the vocational competence required in the unit cannot be assessed, the competence demonstration is to be supplemented in other ways.

2.13. Action-based methods in promoting wellbeing, 15 Competence point (106252)

Competence requirements

Students know how to

- promote clients' wellbeing using action-based methods and the natural environment
- plan their work
- use interaction skills in work with clients
- use action-based methods, equipment and materials to promote clients' wellbeing
- guide clients in participating in art, cultural and nature services
- maintain and promote safety as well as their work ability and wellbeing at work
- assess and develop their work.

Assessment

Students promote clients' wellbeing using action-based methods and the natural environment.

Students	
Satisfactory 1	<ul style="list-style-type: none">• use suitable arts, natural environments and physical activity with a resource-oriented approach when working with different clients• follow the principles of sustainable development• promote clients' creativity by encouraging
Satisfactory 2	
Good 3	<ul style="list-style-type: none">• use suitable arts, natural environments and physical activity diversely and with a resource-oriented approach when working with different clients• follow the principles of sustainable development and justify their actions• promote creativity by encouraging a permissive atmosphere and inspiring clients to act
Good 4	
Excellent 5	<ul style="list-style-type: none">• use suitable arts, natural environments and physical activity diversely and with a resource-oriented approach when working with different clients, justifying their actions• follow the principles of sustainable development, justify their actions and propose improvements• promote creativity by encouraging a permissive atmosphere and inspiring clients to act in a variety of ways.

Students plan their work.

Students

Satisfactory 1	<ul style="list-style-type: none"> • plan their work with their team, drawing on their knowledge of arts-based methods, the natural environment and physical activity • work in cooperation with a multiprofessional team • set goals for their work • plan, carry out and evaluate activities as indicated by the client group • take into account clients' individuality in their plans • assess and document changes in functional capacity and effects on wellbeing
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • plan their work, drawing on their knowledge of arts-based methods, the natural environment and physical activity • work in cooperation with a multiprofessional team, encouraging the team in the use of methods that promote participation • set goals for their work with a client-oriented approach • plan, carry out and evaluate the activities diversely as indicated by the client group • flexibly take into account clients' individuality in their plans • assess and document changes in functional capacity and effects on wellbeing together with clients
Good 4	
Excellent 5	<ul style="list-style-type: none"> • plan their work, drawing on their knowledge of arts-based methods, the natural environment and physical activity, justifying their actions • work in cooperation with a multiprofessional team, diversely encouraging the team in the use of methods that promote participation • set goals for their work flexibly and with a client-oriented approach • plan, carry out and evaluate activities diversely and flexibly as indicated by the client group • flexibly take into account clients' individuality in their plans and justify their actions • assess and document changes in functional capacity and effects on wellbeing together with clients and their close ones.

Students use interaction skills in work with clients.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • communicate appropriately in interactive situations, creating an atmosphere that permits creativity • work as instructors in ordinary situations, and analyse and process their personal emotions • guide individuals by means of interaction, using plain language and communication methods that support and compensate for speech • use their presence, encouragement, and humour in interactive situations • guide clients of varying ages in self-expression • comply with their workplace's instructions on communication • work and communicate responsibly as members of a multidisciplinary team and network
Satisfactory 2	

Good 3	<ul style="list-style-type: none"> • communicate appropriately and professionally in interactive situations, creating an atmosphere that permits creativity and is inspiring • work as instructors in new and changing situations, and analyse and process their personal emotions • guide individuals and groups by means of interaction, using plain language and communication methods that support and compensate for speech • use their presence, encouragement, and humour in interactive situations • guide clients of varying ages in self-expression, taking their life stage into account • comply with their workplace's instructions on communication • work and communicate responsibly as members of a multidisciplinary team and network
Good 4	
Excellent 5	<ul style="list-style-type: none"> • communicate appropriately and professionally in interactive situations, creating an atmosphere that permits creativity and is inspiring and encouraging • work as instructors in new and changing situations, and analyse and process their personal emotions, justifying their actions • guide individuals and groups by means of interaction, using plain language and communication methods that support and compensate for speech and modifying their interaction as required by the situation • use their presence, encouragement, and humour in interactive situations • guide clients of varying ages in self-expression, taking their life stage and personalities into account • comply with their workplace's instructions on communication • work and communicate responsibly as members of a multidisciplinary team and network.

Students use action-based methods, equipment and materials to promote clients' wellbeing.

Making use of natural and local environments in guiding clients	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • draw on their knowledge of the opportunities offered by local and natural environments and materials as well as animal-assisted methods in their work with their team • encourage clients in getting to know, experimenting with and exploring the opportunities offered by the nature and environment • motivate clients and groups in outdoor exercise and spending time in nature as part of daily activities, taking accessibility into account • make use of the nature and environment and animal-assisted methods when guiding clients and groups, and enable aesthetic experiences • use relaxation methods in the natural and local environment • take everyman's rights into account in their activities
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • draw on their experiential knowledge of the opportunities offered by local and natural environments and materials as well as animal-assisted methods in their work

	<ul style="list-style-type: none"> • encourage clients and groups in getting to know, experimenting with and exploring individually the opportunities offered by the nature and environment • motivate clients and groups in nature experiences, outdoor exercise and spending time in nature as part of daily activities, taking accessibility into account • diversely make use of the nature and environment and animal-assisted methods when guiding clients and groups, and enable aesthetic experiences • make use of diverse relaxation methods in the nature and environment • take into account the effects of their activities on the nature and environment • take everyman's rights into account in their activities
Good 4	
Excellent 5	<ul style="list-style-type: none"> • draw diversely on their experiential knowledge of the opportunities offered by local and natural environments and materials as well as animal-assisted methods in their work, justifying their actions • encourage clients and groups in getting to know, experimenting with and exploring individually and diversely the opportunities offered by the nature and environment • motivate clients and groups in different nature experiences, outdoor exercise and spending time in nature as part of daily activities, taking accessibility into account • diversely make of use the nature and environment as well as animal-assisted methods when guiding clients and groups and enable aesthetic experiences, justifying their actions • use diverse relaxation methods creatively in the nature and environment • take into account the effects of their activities on the nature and environment, justifying their actions • take everyman's rights into account in their activities.

Action-based methods in guiding clients	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • encounter clients as agents of their own lives and assist clients in living a life of their own choosing • as team members, select guidance methods suitable for clients and groups of varying ages and with different levels of functional capacity, taking the group's developmental phases into account • work with an enabling and participatory approach when leading activities • with their team, support clients' social interaction during the activities • inspire individuals to act, give encouraging feedback during activities and, with their team, encourage clients to explore and experiment with different forms of expression • draw on their knowledge of arts-based methods, equipment and materials when guiding clients and groups • guide clients to act and make choices individually and independently of their gender • contribute to maintaining an accepting and safe operating environment where diversity is respected • with their team, pace the activities when providing guidance

Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • encounter clients as agents of their own lives and assist clients in having a good quality of life and living a life of their own choosing • select guidance methods suitable for clients and groups of varying ages and with different levels of functional capacity, taking the group's developmental phases into account and justifying their actions • work diversely with an enabling and participatory approach when leading activities • promote clients' social interaction during the activities • inspire individuals to act, give encouraging feedback during activities and encourage clients to explore and experiment with different forms of expression • draw diversely on their evidence-based knowledge of arts-based methods, equipment and materials when guiding clients and groups • guide clients to act and make choices individually and independently of their gender, supporting clients in assuming responsibility for the activities • contribute to maintaining an accepting and safe operating environment where diversity is respected, justifying their actions • encounter clients individually and with appreciation and create an unhurried atmosphere • pace the activities when providing guidance in changing situations
Good 4	
Excellent 5	<ul style="list-style-type: none"> • encounter clients as agents of their own lives and diversely promote clients' possibilities of having a good quality of life and living a life of their own choosing • select guidance methods suitable for clients and groups of varying ages and with different levels of functional capacity, taking the group's developmental phases into account and justifying their actions diversely • work diversely and creatively with an enabling and participatory approach when leading activities • promote clients' social interaction during the activities by different means • inspire individuals to act, give encouraging feedback during activities and encourage clients to explore and experiment with different forms of expression, justifying their actions • draw diversely on their evidence-based knowledge of arts-based methods, equipment and materials when guiding clients and groups • guide clients creatively to act and make choices individually and independently of their gender, supporting clients in assuming responsibility for the activities • contribute to maintaining and promote an accepting and safe operating environment where diversity is respected, justifying their actions diversely • encounter clients individually and with appreciation and create an unhurried atmosphere • pace the activities creatively when providing guidance in changing situations.

Students guide clients in participating in art, cultural and nature services.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • inform clients and their close networks of art, cultural and nature services and animal-assisted activities • guide clients and groups in using art, cultural and nature services and animal-assisted activities and in familiarising themselves with cultural heritage • promote clients' participation in hobbies and activities of their social networks • make art, cultural and nature activities accessible to clients, offering experiences of empowerment
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • inform clients and their close networks of different art, cultural and nature services and animal-assisted activities • guide clients and groups in using diversely art, cultural and nature services and animal-assisted activities and in familiarising themselves with cultural heritage • promote clients' participation in hobbies and activities of their social networks, encouraging them to find activities that bring them pleasure • make different art, cultural and nature activities accessible to clients, offering experiences of empowerment
Good 4	
Excellent 5	<ul style="list-style-type: none"> • inform clients and their close networks diversely and appropriately of art, cultural and nature services and animal-assisted activities • guide clients and groups individually and appropriately in using art, cultural and nature services and animal-assisted activities and in familiarising themselves with cultural heritage • promote clients' participation in hobbies and activities of their social networks, encouraging them diversely to find activities that bring them pleasure • make different art, cultural and nature activities accessible to clients, offering experiences of empowerment and justifying their actions.

Students maintain and promote safety as well as their work ability and wellbeing at work.

Paying attention to wellbeing at work and occupational safety	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • are familiar with the unit's safety plan and act as required by the situation with their team • comply with instructions and regulations on wellbeing at work and occupational safety • take responsibility for their wellbeing at work, occupational safety and work ability
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • are familiar with the unit's safety plan and act as required by the situation • comply with instructions and regulations on wellbeing at work and occupational safety • take responsibility for their own wellbeing, safety at work and work ability and prevent potential harms

Good 4	
Excellent 5	<ul style="list-style-type: none"> • are familiar with the unit's safety plan and act as required by the situation, preventing risks • comply with instructions and regulations on wellbeing at work and occupational safety • actively take responsibility for their wellbeing at work, occupational safety and work ability and prevent potential harms.

Addressing client safety	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • recognise the effects of their behaviour on the safety of clients and the environment in their work • pay attention to client safety in their work • create a safe atmosphere • work safely, following the principles of ergonomics
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • recognise the effects of their behaviour on the safety of clients and the environment in their work • pay attention to client safety in their work and justify their actions • create a safe and encouraging atmosphere • work safely, following the principles of ergonomics
Good 4	
Excellent 5	<ul style="list-style-type: none"> • recognise the effects of their behaviour on the safety of clients and the environment in their work and strive to prevent the occurrence of challenging situations • pay attention to client safety in their work and justify their actions diversely • create a safe, encouraging and inspiring atmosphere • work safely, following the principles of ergonomics and justifying their actions.

Students assess and develop their work.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • assess their competence • recognise some of their strengths and development needs • maintain the knowledge and skills related to action-based methods required by their occupation
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • realistically assess their competence • recognise their strengths and development areas and assess their competence realistically • maintain and develop the knowledge and skills related to action-based methods required by their occupation • encourage creativity in the work community
Good 4	
Excellent 5	<ul style="list-style-type: none"> • assess their competence realistically and diversely • recognise their strengths and development areas, assess their competence realistically, and develop their activities

- actively and diversely maintain and develop the knowledge and skills related to action-based methods required by their occupation
- make realistic development proposals
- encourage and enable creativity in the work community.

Methods of demonstrating competence

Students demonstrate their competence in practical tasks, in which they promote clients' wellbeing through action-based methods in an education or health and social care environment or in the client's home, performing a practical nurse's tasks. To the extent that the vocational competence required in the unit cannot be assessed on the basis of the demonstration, the competence demonstration is to be supplemented in other ways on an individual basis.

2.14. Working as a top expert, 15 Competence point (400010)

Competence requirements

Students know how to

- assess and develop their competence and their working environment
- work in tasks requiring top expertise in their vocational field
- take into account the quality requirements of top-class production, products or services
- work in the networks of the vocational field and in cooperation with the customer.

Assessment

Students assess and develop their competence and working environment.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • assess the success of their work and their competence • develop their competence and working methods • draw up individual development plans for themselves • adapt to changes and work persistently in tasks that require top expertise • develop their work environment together with others • work naturally as part of the team and adapt to their work community
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • realistically assess the success of their work and their own competence, justifying their assessment • actively develop their competence and working methods • draw up individual development plans for themselves that support their growth into top experts in the vocational field • adapt to changes rapidly and work persistently in tasks requiring top expertise, developing their work • in cooperation with others, support the development of the working environment to the level required by top expertise • work actively as part of the team and adapt well to the work community
Good 4	

Excellent 5	<ul style="list-style-type: none"> • realistically assess the success of their work and their own competence, justifying their assessment and defining their development needs • actively develop their competence and working methods to cope with challenging tasks • actively renew their own competence to support their development into top experts in the vocational field • anticipate changes in order to adapt to them more easily and work persistently in tasks requiring top expertise, developing themselves in tasks requiring top expertise • evaluate their working environment, propose ways to develop it and give feedback • work in the team as top experts and actively share their expertise with others.
-------------	--

Students work in tasks requiring top expertise in the vocational field.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • use working methods, tools and materials with initiative • work carefully • showing initiative, find and use knowledge needed in the work and ask for advice if necessary • work cost-effectively and productively, taking into account the time and other resources that are available • promote permanent customer relationships in their work • follow workplace rules and observe working hours • work responsibly and comply with the principles of occupational ethics in the field • take responsibility for the occupational safety of their activities and comply with occupational safety regulations and instructions • ensure the safety of customers and other users according to instructions • work ergonomically and keep their work environment tidy throughout the work process
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • with initiative, select working methods, tools and materials and use them in changing situations • work carefully, creatively and innovatively • showing initiative, find and apply knowledge needed in the work and are able to solve problems together with others • show initiative in working cost-effectively and productively, taking into account the time and other resources that are available and promoting the profitability of the company or organisation • actively promote the continuity of the operations and permanent customer relationships • follow workplace rules and observe working hours • act responsibly and with initiative, comply with the principles of vocational ethics in the field • take responsibility for the occupational safety of their activities, notice and report risks associated with their work, and comply with occupational safety regulations and instructions • independently ensure the safety of customers and other users • work ergonomically and keep their work environment tidy throughout the work process, also in challenging work situations
Good 4	

Excellent 5	<ul style="list-style-type: none"> • boldly select working methods, tools and materials, also new ones, and use them adeptly in changing situations • work systematically, accurately and confidently as well as creatively and innovatively • independently find and apply knowledge needed in the work in varying situations, justify their solutions by the information they have acquired • work with an entrepreneurial attitude, cost-effectively and taking into account the time and other resources that are available, promoting the profitability of the enterprise or organisation • independently promote the continuity of the operations and permanent customer relationships • follow workplace rules and observe working hours • are proud of their occupation and their competence, act responsibly and develop their work following the principles of vocational ethics in their field • take responsibility for the occupational safety of their own and the team's activities, comply with occupational safety regulations and instructions, and observe and report any risks associated with their work • work actively to ensure the safety of customers and other users in changing situations • work ergonomically and keep their work environment tidy throughout the work process, also in challenging work situations, and participate in developing the working conditions.
-------------	--

Students take into account the quality requirements of top-class production, products and services.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • notice deviations • cope with the most typical problems by drawing on learning materials and guide book • set goals and draw up work plans and schedules that are realistic and viable, taking high quality requirements into account • work in accordance with the company's or organisation's quality and sustainable development objectives
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • negotiate and seek solutions to deviations • independently cope with problems • set goals and draw up work plans and schedules that are realistic and viable in changing conditions, taking high quality requirements into account • work actively to operate according to the quality and sustainable development targets of the company or organisation and notice areas requiring development
Good 4	
Excellent 5	<ul style="list-style-type: none"> • negotiate and find solutions to deviations and adapt activities according to agreed solutions • independently cope with problems and are able to justify their choices • set their goals and plan their work independently, with realistic schedules and practicable work stages in changing conditions, taking into account high quality requirements, and are able to change the plan if necessary

	<ul style="list-style-type: none"> are committed to the quality and sustainable development targets of the company or organisation and develop practices for achieving these targets.
--	--

Students work in the networks of the sector and in cooperation with the customer.

Students	
Satisfactory 1	<ul style="list-style-type: none"> communicate in their mother tongue with customers and members of the work community and tolerably well in at least one foreign language know the main national networks in the sector and familiarise themselves with the actors in their vocational field
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> communicate in their mother tongue with customers and members of the work community and in at least one foreign language know the main national and international networks in the sector and familiarise themselves with the actors in their vocational field
Good 4	
Excellent 5	<ul style="list-style-type: none"> fluently communicate in their mother tongue with customers and members of the work community and in at least one foreign language know the main national and international networks in the sector and know how to take advantage of them in their work.

Methods of demonstrating competence

The students demonstrate their competence by working in tasks requiring top expertise in their vocational field. The skills may also be demonstrated in national and international competitions. To the extent that the vocational competence required in the unit cannot be assessed on the basis of the demonstration, the competence demonstration is to be supplemented in other ways on an individual basis.

2.15. Workplace instructor training, 5 Competence point (400011)

Competence requirements

Students know how to

- familiarise themselves with the different forms of providing vocational education and training and with vocational qualifications
- act as contact persons between the education provider and the workplace
- guide other students in training organised in the workplace and in other acquisition of competence
- give feedback on the improvement of competence.

Assessment

Students familiarise themselves with the forms of providing vocational education and training and with vocational qualifications.

Students	
Satisfactory 1	<ul style="list-style-type: none"> define the most common forms of providing vocational education and training know some vocational qualifications in their vocational field with guidance, familiarise themselves with the qualification requirements of their vocational field with guidance, recognise the link between tasks completed in the workplace and the qualification requirements in their vocational field
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> comprehensively define the division of work between the education provider and the workplace in the provision of vocational education and training in the workplace, communicate information about the provision of vocational education and training together with the education provider
Good 4	
Excellent 5	<ul style="list-style-type: none"> systematically obtain information about the parties involved in the provision of vocational education and training define the division of work between the education provider and the workplace in vocational education and training from diverse points of view in the workplace, communicate information on the provision of vocational education and training diversely together with the education provider.

Students act as contact persons between the education provider and the workplace.

Students	
Satisfactory 1	<ul style="list-style-type: none"> with guidance, identify opportunities for implementing training and demonstrations organised at the workplace with guidance, discuss organising training and demonstrations at the workplace with another student, employees, the workplace instructor and the assessor work with different students and employees
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> identify opportunities for implementing training and demonstrations organised at the workplace responsibly discuss organising training and demonstrations at the workplace with another student, employees, the workplace instructor and the assessor work with different students and employees
Good 4	
Excellent 5	<ul style="list-style-type: none"> responsibly identify opportunities for organising training and demonstrations at the workplace independently and responsibly discuss organising training and demonstrations at the workplace with another student, employees, the workplace instructor and the assessor work flexibly with different students and employees.

Students guide other students in training provided at the workplace and in other acquisition of competence.

Students	
Satisfactory 1	<ul style="list-style-type: none"> familiarise themselves with the student's personal competence development plan describe key matters related to the student's occupational safety and to instructions and practices of the workplace guide the student in achieving the objectives of competence acquisition evaluate their own guidance competence
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> familiarise themselves with the student's personal competence development plan and with the other objectives and content of competence acquisition familiarise the student with occupational safety and with the instructions and practices of the workplace interactively encourage the student to achieve the objectives of competence acquisition based on the feedback received, evaluate their own guidance competence and determine their development needs
Good 4	
Excellent 5	<ul style="list-style-type: none"> comprehensively familiarise themselves with the student's personal competence development plan and with the other objectives and content of competence acquisition familiarise the student comprehensively with occupational safety and with the instructions and practices of the workplace help the student to achieve the objectives set for competence acquisition evaluate their own guidance competence diversely and improve it based on the feedback received.

Students give feedback on the development of competence.

Students	
Satisfactory 1	<ul style="list-style-type: none"> discuss the development of competence with the student with guidance, compare the competence acquired by the student to the set objectives give feedback on the development of competence to the student pay attention to students needing special support and students representing different languages and cultures when giving feedback
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> familiarise themselves with the student's objectives in acquiring competence and the contents of training provided at the workplace compare the competence acquired by the student to the objectives set for it give feedback on the development of competence to the student during the training provided at the workplace responsibly pay attention to students needing special support and students representing different languages and cultures when giving feedback
Good 4	

Excellent 5	<ul style="list-style-type: none"> familiarise themselves with the student's objectives in acquiring competence and the contents of training provided at the workplace and in other competence acquisition compare the competence acquired by the student diversely to the objectives set for it give feedback on the development of competence to the student during the training provided at the workplace and other competence acquisition pay attention to students needing special support and students representing different languages and cultures in an interactive and responsible manner when giving feedback.
-------------	---

Methods of demonstrating competence

The students demonstrate their competence by preparing for familiarisation, guidance and feedback situations of practical work. To the extent that the vocational competence required in the unit cannot be assessed on the basis of the demonstration, the competence demonstration is to be supplemented in other ways on an individual basis.

2.16. Working in a company, 15 Competence point (400009)

Competence requirements

Students know how to

- plan business activities for a company
- build cooperation networks that promote the business activities
- conduct business
- evaluate and develop the company's operation.

Assessment

Students plan the company's business activities.

Students	
Satisfactory 1	<ul style="list-style-type: none"> obtain information needed to plan the various aspects of the company's business activities take advantage of information on services that support business set strategic goals for the company recognise risks related to business
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> specify the strategic goals for the company and draw up a customer-oriented action plan to reach them draw up budgets and a financial plan with awareness of the entrepreneur's position recognise the main risks related to business
Good 4	
Excellent 5	<ul style="list-style-type: none"> proactively specify and justify strategic goals for the company, specify a customer-oriented plan for them and implement the plan in order to achieve the goals independently draw up budgets and a financial plan with awareness of the entrepreneur's position identify and assess the risks related to the business.

Students build cooperation networks that promote the business activities.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • specify partners that are essential to the company's operation • plan cooperation with essential partners
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • alone or as a member of a team, acquire a partner that is essential to the company's operation • agree on the form of cooperation with the partner they have found • conclude a cooperation agreement when necessary, taking into account the responsibilities and obligations
Good 4	
Excellent 5	<ul style="list-style-type: none"> • acquire partners alone or as a member of the team and agree on the forms of cooperation • conclude cooperation agreements taking into consideration the responsibilities and obligations.

Students conduct business.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • conduct business alone or as members of the community • manage the agreed sub-sector of business activities • solve problems related to the company's operation with a customer-oriented approach, but need some support • observe the legislation applying to the sector
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • conduct business alone or as members of the community • manage the agreed sub-sector of business activities independently • solve problems related to the company's operation with a customer-oriented approach • observe the legislation applying to the sector
Good 4	
Excellent 5	<ul style="list-style-type: none"> • conduct business alone or as members of the community • manage different sub-sectors of business activities independently, demonstrating flexibility and good time management in their activities • solve problems related to the company's operation with a customer-oriented approach, ensuring customer satisfaction • observe the legislation applying to the sector.

Students evaluate and develop the company's operation.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • assess their own activities as part of the overall operation of the company • evaluate the company's operation alone or as members of the team
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • assess their activities and set objectives to their activities according to the company's objectives

	<ul style="list-style-type: none"> • alone or as members of the team, make proposals for developing the company's operation, taking into account customers' and stakeholders' expectations and the quality and cost targets
Good 4	
Excellent 5	<ul style="list-style-type: none"> • assess their activities in the company in relation to the company's strategic goals • actively make justified proposals, choices and decisions to develop the business in line with the strategic goals.

Methods of demonstrating competence

The students demonstrate their competence by performing practical work tasks related to conducting business. To the extent that the vocational competence required in the unit cannot be assessed on the basis of the demonstration, the demonstration of competence is to be supplemented in other ways on an individual basis.

2.17. Planning a business, 15 Competence point (400008)

Competence requirements

Students know how to

- assess their strengths and competence
- look for and generate ideas for business opportunities
- develop a business idea and draw up a business plan for it
- network with stakeholders
- prepare the documents associated with setting up a company.

Assessment

Students assess their strengths and competence.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • identify some of their strengths in acting as an entrepreneur • highlight their competences
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • identify their strengths in acting as an entrepreneur • present their competence that is relevant to business
Good 4	
Excellent 5	<ul style="list-style-type: none"> • highlight their strengths and the opportunities to use them as an entrepreneur • assess their competence and their development needs.

Students look for and generate ideas for business opportunities.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • based on their own strengths, explore what kind of business opportunities can be found • explore the companies and customers operating in their chosen professional sector, requiring guidance from time to time

Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • explore the companies and customers operating in their chosen professional sector • based on that, assess business opportunities
Good 4	
Excellent 5	<ul style="list-style-type: none"> • independently assess what kind of innovative business opportunities can be found in the markets • present one or more business ideas or business opportunities.

Students develop a business idea and draw up a business plan for it.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • investigate the development prospects of the markets and the competitive situation • create a viable business idea • present a plan for the company's activities, but need some guidance • determine the financial resources required for launching the business operations • take into account the legislation applying to the sector when planning
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • investigate and anticipate the prospects for development in the markets and the competitive situation • based on the business idea, present a plan for the administration and resourcing of the different activities • calculate costs related to business activities and plan the financing • take into account the legislation applying to the sector when planning
Good 4	
Excellent 5	<ul style="list-style-type: none"> • anticipate and analyse the development prospects in the markets and the competitive situation • based on the business idea, present a realistic and justified plan for the administration and resourcing of the different activities • draw up the budgets and the financial plan • produce a risk management analysis and a security plan for the company • take into account the legislation applying to the sector when planning.

Students network with stakeholders.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • identify stakeholders related to their business • present the company's operating model to one of the stakeholder groups
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • select stakeholders that are essential to their activities • present the company's operating model to an important stakeholder group in an illustrative and attractive manner
Good 4	

Excellent 5	<ul style="list-style-type: none"> • take initiative in the cooperation with chosen stakeholders • present the company's operating model in an illustrative manner and justify it to selected stakeholders.
-------------	---

Students draw up the documents associated with setting up a company.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • with guidance, select a company form for the enterprise • with guidance, draw up the documents required in setting up a company
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • select a suitable company form • find out what documents are associated with setting up a company and draw them up
Good 4	
Excellent 5	<ul style="list-style-type: none"> • independently select a company form and justify their choice • draw up the documents associated with setting up a company and other required contract documents independently.

Methods of demonstrating competence

The students demonstrate their competence in practical work tasks alone or with a group by drawing up a business plan for the business idea they have created. To the extent that the vocational competence required in the unit cannot be assessed on the basis of the demonstration, the demonstration of competence is to be supplemented in other ways on an individual basis.

2.18. Working in podiatric care, 40 Competence point (106232)

Competence requirements

Students know how to

- work in compliance with the statutes, regulations and operating principles applicable to social and health care field and podiatric care recommendations
- plan their work and work cooperatively as members of the work community and professional network
- plan, carry out and assess podiatric care provided for clients
- interact with clients, clients' assistants and health care personnel in special issues of podiatric care
- use the working methods, tools and materials of the field in the health care and pharmaceutical treatment of feet and legs
- assess and develop their podiatric care work.

Assessment

Students work in compliance with the statutes, regulations and operating principles applicable to social and health care field and podiatric care recommendations.

Students

Satisfactory 1	<ul style="list-style-type: none"> • comply with the legislation, provisions, regulations and ethical principles of the social and health care field in recurring situations • work in podiatric care, drawing on evidence-based knowledge • take into account quality criteria for podiatric care • follow the principles of sustainable development
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • comply with the legislation, provisions, regulations and ethical principles of social and health care, justifying their actions • work in podiatric care, applying evidence-based knowledge • work in podiatric care in compliance with quality criteria for podiatric care • follow the principles of sustainable development and justify their actions
Good 4	
Excellent 5	<ul style="list-style-type: none"> • comply with the legislation, provisions, regulations and ethical principles of the social and health care field, justifying their actions diversely • work in and develop podiatric care, applying evidence-based knowledge and justifying their actions • work in and develop podiatric care in compliance with quality criteria for podiatric care • follow the principles of sustainable development, justify their actions and propose improvements.

Students plan their work and work cooperatively as members of the work community and professional network.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • plan their daily tasks, taking the workplace's other plans into account • work professionally when dealing with clients and with health care personnel • draw on the expertise of a multiprofessional team in special questions of podiatric care
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • plan their daily and weekly tasks, taking the workplace's other plans into account • work professionally when dealing with clients and with health care personnel • with a client-oriented approach, draw on the expertise of a multiprofessional team in special questions of podiatric care
Good 4	
Excellent 5	<ul style="list-style-type: none"> • plan their daily and weekly tasks, taking the workplace's other plans into account, and modify their activities as required by the situation • work professionally when dealing with clients and with health care personnel • diversely and with a client-oriented approach, draw on the expertise of a multiprofessional team in special questions of podiatric care.

Students plan, carry out and evaluate podiatric care provided for clients.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • assess and recognise clients' key podiatric care needs • assess the urgency of the care and support needs and, as team members, guide clients in accessing services • draw up a written care plan together with a client and follow the plan • keep records of provided care • draw up a podiatric self-care plan for a client • inform their team of a client's condition • use client information systems as team members, taking information security and confidentiality provisions into account
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • assess and recognise clients' podiatric care needs • assess the urgency of the care and support needs and guide clients in accessing services • draw up a written care plan together with a client and follow the plan comprehensively • keep records of provided care • draw up a podiatric self-care plan together with a client • inform their team of changes in the condition of a client's feet and legs • use client information systems, taking information security and confidentiality provisions into account
Good 4	
Excellent 5	<ul style="list-style-type: none"> • assess and recognise clients' podiatric care needs with a client-oriented approach • assess the care and support needs and their urgency and guide and advise clients and their close ones in accessing care or services • draw up a written podiatric care plan together with a client, and follow and evaluate the plan comprehensively • keep records of provided care • draw up a podiatric self-care plan together with a client and guide the client in implementing it • inform their team of changes associated with a client's state of health • use client information systems, taking information security and confidentiality provisions into account.

Students interact with clients, clients' assistants and health care personnel in special issues of podiatric care.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • pay attention to the effects of their behaviour and non-verbal expression in interactive situations • use plain language and methods that support and compensate for speech in interactive situations • pay attention to information security and confidentiality in interactive situations • pay attention to clients' cultural, religious and ethical customs in interactive situations • work in podiatric care within a practical nurse's area of responsibility • recognise clients' needs for social and health care and rehabilitation services

Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • understand the effects of their behaviour and non-verbal expression in interactive situations • use plain language and methods that support and compensate for speech in different interactive situations with a client-oriented approach • follow information security and confidentiality instructions in interactive situations • take into account clients' cultural, religious and ethical customs in interactive situations • work as experts in podiatric care within a practical nurse's area of responsibility • recognise clients' needs for social and health care and rehabilitation services and guide them in using the services
Good 4	
Excellent 5	<ul style="list-style-type: none"> • recognise the effects of their behaviour and non-verbal expression in interactive situations and modify their behaviour as appropriate with each client • use plain language and methods that support and compensate for speech in different interactive situations with a client-oriented approach, modifying their expression according to a client's communication skills • serve clients responsibly in different interactive situations, taking information security and confidentiality into account • act in interactive situations with clients from different cultures and seek information about multiculturalism • work as experts within a practical nurse's area of responsibility in changing podiatric care situations • recognise clients' needs for social and health care and rehabilitation services and advise them in using the services.

Students use the working methods, tools and materials of the field in the health care and pharmaceutical treatment of feet and legs.

Working aseptically	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • see to the hygiene of clients' care environments, ensuring that the spread of microbes is prevented • prepare a well-functioning care facility following instructions • take care of their personal hygiene, wear protective clothing and ensure cleanliness • care for leg ulcers following instructions and an aseptic work order • care for the equipment and instruments used in podiatric health care
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • see to the hygiene of clients' care environments, ensuring that the spread of microbes is prevented, and justify their actions • prepare a well-functioning care facility, taking clients' functional capacity into account in the preparations • take care of their personal hygiene, wear protective clothing and ensure cleanliness • care for leg ulcers, following an aseptic work order

	<ul style="list-style-type: none"> care for the equipment and instruments used in podiatric health care and inform their team about problems related to user safety
Good 4	
Excellent 5	<ul style="list-style-type: none"> see to the hygiene of clients' care environments, ensuring that the spread of microbes is prevented, and justify their actions diversely prepare a well-functioning leg ulcer care facility, taking clients' needs and functional capacity into account in the preparations take care of their personal hygiene, wear protective clothing and ensure cleanliness care for leg ulcers, following an aseptic work order care for the equipment and instruments used in podiatric health care, inform their team about problems related to user safety, and contact a service organisation if necessary.

Resource-oriented work approach	
Students	
Satisfactory 1	<ul style="list-style-type: none"> recognise changes in clients' functional capacity guide clients or clients' close ones in carrying out podiatric self-care
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> recognise changes in and promote clients' functional capacity guide and advise clients or clients' close ones in carrying out podiatric self-care
Good 4	
Excellent 5	<ul style="list-style-type: none"> diversely recognise changes in and promote clients' functional capacity guide, advise and motivate clients or clients' close ones in carrying out podiatric self-care.

Recognising changes in feet and legs	
Students	
Satisfactory 1	<ul style="list-style-type: none"> examine clients' skin condition and circulation in lower extremities as well as pain experienced by clients examine and recognise changes in the condition of clients' feet and legs take into account some effects of illnesses on podiatric health discuss changes in the condition of a client's feet and legs with podiatric care experts
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> examine and recognise clients' skin condition and circulation in lower extremities as well as pain experienced by clients using different methods, examine changes in the condition of a client's feet and legs and recognise podiatric care challenges take into account the effects of illnesses on podiatric health and functional capacity discuss changes in the condition of a client's feet and legs and special issues with podiatric care experts
Good 4	

Excellent 5	<ul style="list-style-type: none"> • with a client-oriented approach, examine and recognise clients' skin condition and circulation in lower extremities as well as pain experienced by clients • using different methods, examine changes in the condition of a client's feet and legs and recognise podiatric care challenges, justifying their actions • take into account the effects of illnesses on podiatric health and functional capacity, drawing on evidence-based knowledge and guiding clients in prevention of problems • discuss changes in the condition of a client's feet and legs and special issues with podiatric care experts, bringing up different alternatives.
-------------	--

Treating changes in feet and legs	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • as indicated by their area of responsibility, treat health-related changes in feet and legs, following care instructions and ensuring pain management • treat a leg ulcer using wound care products and drawing on evidence-based knowledge • select a suitable ready-made cushioning product and recognise the need for aids
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • as indicated by their area of responsibility, treat health-related changes in feet and legs with a client-oriented approach, following care instructions and ensuring pain management • treat a leg ulcer using wound care products and drawing on evidence-based knowledge, and justify their actions with evidence-based knowledge • make use of ready-made cushioning products in their work as well as design and prepare a suitable individual cushioning product, taking the client's functional capacity into account • recognise the need for aids and guide clients in purchasing and using them
Good 4	
Excellent 5	<ul style="list-style-type: none"> • as indicated by their area of responsibility, treat health-related changes in feet and legs with a client-oriented approach, following care instructions and ensuring pain management, and justify their actions • treat a leg ulcer using wound care products and justify their actions diversely with evidence-based knowledge • make use of ready-made cushioning products in their work as well as design and prepare a suitable individual cushioning product, taking its effectiveness and aesthetic aspects as well as the client's functional capacity into account • recognise the need for aids and guide clients in purchasing and using them, and take into account their significance for promoting functional capacity.

Providing pharmaceutical treatment	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • work safely and as indicated by their area of responsibility, following the unit's and clients' pharmaceutical treatment plans

	<ul style="list-style-type: none"> • are familiar with the operating principles of the most common pharmaceutical databases and draw on these principles in their work • handle, dispense and administer pharmaceuticals to the client aseptically, safely and without errors • calculate dosages and unit conversions without errors • guide clients following the work unit's instructions in interpreting an electronic prescription and its period of validity as well as using, storing and disposing of pharmaceuticals, and are familiar with the most common pharmaceutical treatments used in podiatric care • treat a leg ulcer with externally applied pharmaceuticals and take into account the effects of a client's pharmaceutical treatment on their functional capacity • with their team, guide clients in the use of externally applied pharmaceutical treatments • observe any incorrect pharmaceuticals use and pass on information about their observations
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • work safely and as indicated by their area of responsibility, following the unit's and clients' pharmaceutical treatment plans • use the most common pharmaceutical databases, understand their operating principles and use them in their work • handle, dispense and administer pharmaceuticals to the client aseptically, safely and without errors • calculate dosages and unit conversions without errors • guide clients and their close networks following the work unit's instructions in interpreting an electronic prescription and its period of validity as well as using, storing and disposing of pharmaceuticals, and provide guidance in the most common pharmaceutical treatments used in podiatric care • treat a leg ulcer with externally applied pharmaceuticals and take into account the effects of a client's pharmaceutical treatment on their functional capacity diversely and justifying their actions • guide clients in the use of externally applied pharmaceutical treatments • observe any incorrect pharmaceuticals use and pass on information about their observations
Good 4	
Excellent 5	<ul style="list-style-type: none"> • work safely and as indicated by their area of responsibility, following the unit's and clients' pharmaceutical treatment plans • use adeptly pharmaceutical databases, understand their operating principles and use them actively in their work • handle, dispense and administer pharmaceuticals to the client aseptically, safely and without errors • calculate dosages and unit conversions without errors • actively guide clients and their close networks following the work unit's instructions in interpreting an electronic prescription and its period of validity as well as using, storing and disposing of pharmaceuticals, and provide diverse guidance in the most common pharmaceutical treatments used in podiatric care • treat a leg ulcer with externally applied pharmaceuticals and take into account diversely the effects of a client's pharmaceutical treatment on their functional capacity, justifying their actions diversely • guide clients in using externally applied pharmaceuticals and observing the effects of pharmaceuticals

	<ul style="list-style-type: none"> observe any incorrect pharmaceuticals use and pass on information about their observations.
--	---

Addressing client safety	
Students	
Satisfactory 1	<ul style="list-style-type: none"> pay attention to client safety in their work
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> pay extensive attention to client safety in their work and justify their actions
Good 4	
Excellent 5	<ul style="list-style-type: none"> pay extensive attention to client safety in their work, justifying their actions, and propose improvements.

Students assess and develop their activities in podiatric care.

Students	
Satisfactory 1	<ul style="list-style-type: none"> assess their podiatric care work and competence maintain the knowledge and skills required in podiatric health care receive feedback and change their activities as required make choices and decisions related to their work and solve problems as team members draw on evidence-based information in their work and search for it in reliable sources
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> assess their podiatric care work and competence realistically maintain and develop the knowledge and skills required in podiatric health care receive and give feedback and change their activities as required recognise their strengths and development areas and seek for guidance if necessary make choices and decisions related to their work and solve problems justify the decisions related to their work by theoretical knowledge and search for information in reliable sources
Good 4	
Excellent 5	<ul style="list-style-type: none"> assess their podiatric care work and competence realistically and diversely actively maintain and develop the knowledge and skills required in podiatric health care receive and give feedback and change their activities as required and make realistic development proposals diversely recognise their strengths and development areas and seek for guidance if necessary make choices and decisions related to their work independently and solve problems justify the decisions related to their work diversely by theoretical knowledge and search for information in reliable sources.

Methods of demonstrating competence

The students demonstrate their competence in practical tasks where they work in an environment that provides podiatric care, performing a practical nurse's tasks. To the extent that the vocational competence required in the unit cannot be assessed on the basis of the demonstration, the competence demonstration is to be supplemented in other ways on an individual basis.

2.19. Working in podiatric health promotion, 35 Competence point (106230)

Competence requirements

Students know how to

- work in compliance with the statutes, operating principles and values applicable to the social and health care field and a practical nurse's ethical instructions
- plan their work and work cooperatively as members of the work community and professional network
- plan, carry out and assess podiatric care provided for clients
- interact with podiatric care clients of varying ages
- use the working methods, tools and materials of the field in podiatric care
- provide guidance in using services
- maintain and promote safety as well as their work ability and wellbeing at work
- assess and develop their activities
- evaluate their possibilities of working as podiatric care entrepreneurs.

Assessment

Students work in compliance with the statutes, operating principles and values applicable to the social and health care field and a practical nurse's ethical instructions.

Students	
Satisfactory 1	<ul style="list-style-type: none">• comply with the legislation, regulations and operating principles of the social and health care field• work responsibly, observing the underpinning values of the field and complying with concluded agreements and ethical principles relevant to their occupation• comply with data protection, confidentiality and the principles of the Administrative Procedure Act and the Act on the Openness of Government Activities• work in compliance with regulations and quality recommendations applicable to self-monitoring• follow the principles of sustainable development
Satisfactory 2	
Good 3	<ul style="list-style-type: none">• comply with the legislation, regulations and operating principles of the social and health care field, justifying their actions• work responsibly, observing the underpinning values of the field and complying with concluded agreements and ethical principles relevant to their occupation, justifying their actions• comply with data protection, confidentiality and the principles of the Administrative Procedure Act and the Act on the Openness of Government Activities• work in compliance with regulations and quality recommendations applicable to self-monitoring

	<ul style="list-style-type: none"> • follow the principles of sustainable development and justify their actions
Good 4	
Excellent 5	<ul style="list-style-type: none"> • comply with the legislation, regulations and operating principles of the social and health care field, justifying their actions diversely • work responsibly, observing the underpinning values of the field and complying with concluded agreements and ethical principles relevant to their occupation, justifying their actions diversely • comply with data protection, confidentiality and the principles of the Administrative Procedure Act and the Act on the Openness of Government Activities • work in compliance with regulations and quality recommendations applicable to self-monitoring and propose improvements • follow the principles of sustainable development, justify their actions and propose improvements.

Students plan their work and work cooperatively as members of the work community and professional network.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • plan their work with a client-oriented approach with the team • plan their daily tasks, taking into account the workplace's other plans • make choices and decisions related to their work • follow the work community's rules and operating principles • communicate and act in a professional and appropriate manner • have problem-solving skills • are familiar with the tasks of different professional groups and work as members of a multiprofessional team • contribute to maintaining a good work atmosphere • are familiar with their workplace's instructions on the employees' communication, use of social media and image marketing and observe netiquette
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • plan their work with a client-oriented approach • plan their daily and weekly tasks, taking the workplace's other plans into account • make choices and decisions related to their work and justify their actions • follow the work community's rules and operating principles • communicate and act in a professional and appropriate manner • have problem-solving skills and bring up alternative solutions • are familiar with the tasks of different professional groups and work cooperatively as members of a multiprofessional team • make a positive contribution to the social atmosphere of their work community • are familiar with their workplace's instructions on the employees' communication, use of social media and image marketing and observe netiquette
Good 4	
Excellent 5	<ul style="list-style-type: none"> • plan their work with a client-oriented approach and comprehensively

	<ul style="list-style-type: none"> • plan their daily and weekly tasks, taking the workplace's other plans into account, and modify their activities as required by the situation • make choices and decisions related to their work and justify their actions diversely • follow the work community's rules and operating principles and propose improvements • communicate and act professionally and appropriately and inform the work community of any changes • have problem-solving skills and find different alternative solutions to situations • are familiar with the tasks of different professional groups and work cooperatively and actively as members of a multiprofessional team • make a positive contribution to the social atmosphere of their work community • are familiar with their workplace's instructions on the employees' communication, use of social media and image marketing and observe netiquette.

Good 4	
Excellent 5	<ul style="list-style-type: none"> • are familiar with the service system as indicated by their area of responsibility and update their competence related to the service system • are familiar with clients' critical paths and service chains and draw on this knowledge in their work • support clients and their close networks in using services and propose alternatives to clients in an appropriate way • guide clients in using electronic services.

Students maintain and promote safety as well as their work ability and wellbeing at work.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • are familiar with the workplace's safety plan and practices for reporting hazardous situations • comply with instructions and regulations on wellbeing at work and occupational safety • work following the principles of ergonomics, justifying their actions • recognise clients' resources and let clients do themselves everything that their functional capacity and condition allow • use transfer and mobility aids safely • recognise stress and risk factors in their field and modify their actions with reference to these factors • take responsibility for their wellbeing at work, occupational safety and work ability • recognise clients with challenging behaviours in their work • following instructions, take faulty equipment and devices for a service
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • are familiar with the workplace's safety plan and practices for reporting hazardous situations and act as required by the situation • comply with instructions and regulations on wellbeing at work and occupational safety • work following the principles of ergonomics, justifying their actions • diversely recognise clients' resources and let clients do themselves everything that their functional capacity and condition allow • use transfer and mobility aids safely and adeptly • recognise stress and risk factors in their field and develop their work with reference to these factors • take responsibility for their wellbeing at work, occupational safety and work ability • recognise clients with challenging behaviours in their work and strive to prevent the occurrence of challenging situations • following instructions, take faulty equipment and devices for a service
Good 4	
Excellent 5	<ul style="list-style-type: none"> • are familiar with the workplace's safety plan and practices for reporting hazardous situations and act as required by the situation • comply with instructions and regulations concerning wellbeing at work and occupational safety and apply this information in changing conditions • work following the principles of ergonomics, justifying their actions • recognise clients' resources and let clients themselves do everything their functional capacity and condition allow, taking changing situations into account • use transfer and mobility aids safely, adeptly and appropriately, justifying their actions • recognise key stress and risk factors in their field and develop their work and the work unit's working methods • take responsibility for their wellbeing at work, occupational safety and work ability

	<ul style="list-style-type: none"> • recognise clients with challenging behaviours in their work, strive to prevent the occurrence of challenging situations, and see to their personal safety • following instructions, take faulty equipment and devices for a service.
--	---

Students assess and develop their activities.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • assess their work and competence • recognise their strengths and development areas • receive and give feedback and change their activities as required • make choices and decisions related to their work and solve problems as team members • maintain and develop their podiatric care knowledge and skills • draw on evidence-based information in their work and search for it in reliable sources
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • assess their work and competence realistically • recognise their strengths and development areas and set goals for their professional growth • give and receive feedback and develop their work based on it • make choices and decisions related to their work independently and solve problems • maintain and develop the knowledge and skills required in podiatric care work • justify decisions related to their work with evidence-based knowledge and search for it in reliable sources
Good 4	
Excellent 5	<ul style="list-style-type: none"> • assess their work and competence realistically and diversely • recognise their strengths and development areas and set goals for their professional growth, justifying their actions diversely • give and receive feedback and actively develop their work based on it • make choices and independent decisions related to their work and solve problems • actively maintain and improve the knowledge and skills required in podiatric care work • justify extensively their work-related decisions by evidence-based knowledge.

Students evaluate their possibilities of working as podiatric care entrepreneurs.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • plan the productisation of their competence • work responsibly and understand the effect of their work on the activities of the workplace and the quality of the services in daily work with clients • work to promote the achievement of goals • assess their possibilities of working as podiatric care entrepreneurs
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • plan and find out about possibilities of productising their competence in their work

	<ul style="list-style-type: none"> • work responsibly and pay attention to the effect of their work on the activities of the workplace and the quality of services in daily work with clients • work to promote the achievement of objectives and scale their work according to the goals • assess their possibilities of working as podiatric care entrepreneurs
Good 4	
Excellent 5	<ul style="list-style-type: none"> • actively plan and develop their capacities to work as entrepreneurs and realistically assess the possibilities of productising their competence • work responsibly, pay attention to the effect of their work on the activities of the workplace and the quality of services in daily work with clients, and modify their actions flexibly as required by the situation • work to promote diversely the achievement of objectives and scale their work according to the goals • assess their possibilities of working as podiatric care entrepreneurs.

Methods of demonstrating competence

The students demonstrate their competence by promoting clients' podiatric health in practical tasks where they work as practical nurses in a podiatric care environment. To the extent that the vocational competence required in the unit cannot be assessed on the basis of the demonstration, the competence demonstration is to be supplemented in other ways on an individual basis.

2.20. Promoting a child's growth, wellbeing and learning, 40 Competence point (106237)

Competence requirements

Students know how to

- work in compliance with the statutes, regulations, operating principles, values and ethical principles applicable to early childhood education and care
- plan their work and act in multidisciplinary cooperation
- implement pedagogical activities and promote participation in early childhood education and care
- interact with children and their guardians
- promote children's health, safety and wellbeing
- use the working methods, tools and materials of early childhood education and care
- develop children's emotional skills and ability to do things together
- promote children's linguistic development and thinking and problem-solving skills
- encourage children to play and be physically active
- promote children's cultural, world view-related and ethical thinking
- maintain and promote safety as well as their work ability and wellbeing at work
- assess and develop their work.

Assessment

Students work in compliance with the statutes, regulations, operating principles, values and ethical principles applicable to early childhood education and care.

Students

Satisfactory 1	<ul style="list-style-type: none"> • comply with legislation on early childhood education and care and the National core curriculum for early childhood education and care • observe the work unit's values and operating principles • appreciate children in their work • follow the principles of equity and equality • encounter children individually and take their opinions into account • comply with data protection and secrecy obligation • take into account a child's best interests and comply with the reporting obligation under the Child Welfare Act • follow the principles of sustainable development
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • comply with legislation on early childhood education and care and the National core curriculum for early childhood education and care • observe the work unit's values and operating principles • take into account the intrinsic value of childhood and show appreciation for children • follow the principles of equity and equality, promoting an atmosphere where diversity is respected • encounter children individually and take their opinions into account, giving children opportunities to influence matters that concern them • comply with data protection and secrecy obligation • take into account a child's best interests and comply with the reporting obligation under the Child Welfare Act • follow the principles of sustainable development and justify their actions
Good 4	
Excellent 5	<ul style="list-style-type: none"> • comply with legislation on early childhood education and care and the National core curriculum for early childhood education and care • observe the work unit's values and operating principles • take into account the intrinsic value of childhood and show appreciation for children, seeing the uniqueness of each child • follow the principles of equity and equality, promoting an operating culture where diversity is respected in their work community • comply with data protection and secrecy obligation • take into account a child's best interests and comply with the reporting obligation under the Child Welfare Act • follow the principles of sustainable development, justify their actions and propose improvements.

Students plan their work and act in multidisciplinary cooperation.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • work as indicated by their occupation's job description, the work unit's tasks and their areas of responsibility • work in multidisciplinary cooperation as team members • plan their tasks in cooperation with their team
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • work as indicated by their occupation's job description, the work unit's tasks and their areas of responsibility and are familiar with

	<p>the tasks and areas of responsibility of different professional groups in their work unit</p> <ul style="list-style-type: none"> • work responsibly in multidisciplinary cooperation as team members and draw on the team's competence • plan their tasks in cooperation with their team, taking a child group's needs into account
Good 4	
Excellent 5	<ul style="list-style-type: none"> • work as indicated by their occupation's job description, the work unit's tasks and their areas of responsibility and are familiar with the multidisciplinary network of early childhood education and care • work responsibly in multidisciplinary cooperation with their teams and networks, draw on the team's competence and bring up their personal views • plan their tasks in cooperation with their team, taking a child group's needs into account and anticipating situations.

Students implement pedagogical activities and promote participation in early childhood education and care.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • observe children and child groups, drawing on their knowledge of children's growth, development and learning as well as individual support needs • follow a child's early childhood education and care plan and recommendations that guide early childhood education and care • pay attention to children's initiatives in daily activities and the planning of activities • plan and implement activities aiming to promote children's growth, development and learning • together with children and the team, ensure that the operating environment supports growth, development and learning
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • observe children and child groups, drawing diversely on their knowledge of children's growth, development and learning as well as individual support needs • in a goal-oriented and methodically manner, follow a child's early childhood education and care plan and recommendations that guide early childhood education and care • pay attention to children's initiatives in daily activities and the planning of activities and support children in expressing their views • plan and implement goal-oriented activities aiming to promote children's growth, development and learning • plan and build an operating environment that supports growth, development and learning together with children and the team
Good 4	
Excellent 5	<ul style="list-style-type: none"> • observe children and child groups, drawing diversely on their knowledge of children's growth, development and learning as well as individual support needs, justifying their decisions by their knowledge of developmental psychology and pedagogy • in a goal-oriented and methodically manner, follow a child's early childhood education and care plan and recommendations that guide early childhood education and care, justifying their actions

	<ul style="list-style-type: none"> • pay attention to children's and guardians' initiatives in daily activities and the planning of activities, and support children in expressing their views • plan and implement goal-oriented and diverse activities aiming to promote children's growth, development and learning • plan and build an operating environment that supports growth, development and learning together with children and the team, taking different learners into account.
--	---

Students interact with children and their guardians.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • encounter children and guardians appreciatively and work together with them • act professionally in interactive situations • are present and available for the children • set an example of positive interaction • recognise children's gestures and body language, adapting their expression to them • use communication methods and tools that support and compensate for speech and plain language in recurring daily situations • work with families responsibly and equally, taking information security and confidentiality into account • use ICT to support interaction and comply with the workplace's instructions on communication and social media use
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • encounter children and guardians appreciatively and work together with them, paying attention to participation • act professionally in interactive situations, creating a positive interactive relationship • enable children to have positive experiences of being heard and seen and help children express themselves • recognise their personal manner of interacting and set an example of positive interaction • recognise children's gestures and body language, adapting their expression to them, and take children's level of development into account • use communication methods and tools that support and compensate for speech and plain language • work with families responsibly and equally, taking information security and confidentiality into account • use ICT appropriately for the situation to support interaction and comply with the workplace's instructions on communication and social media use
Good 4	
Excellent 5	<ul style="list-style-type: none"> • encounter children and guardians appreciatively and work together with them, promoting their participation • act professionally in interactive situations, taking into account children's and guardians' feelings and the situation, and create a positive interactive relationship • enable children to have positive experiences of being heard and seen and help children express themselves in a variety of ways • recognise their personal manner of interacting and set an example of positive interaction in varying situations

	<ul style="list-style-type: none"> • recognise children's gestures and body language, adapting their expression to them, and take children's level of development, language proficiency and support needs into account • use communication methods and tools that support and compensate for speech and plain language, promoting interaction • work with families responsibly and equally, taking information security and confidentiality into account • use ICT diversely and appropriately for the situation to support interaction and comply with the workplace's instructions on communication and social media use.
--	---

Students promote children's health, safety and wellbeing.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • see to children's basic needs and personal hygiene • support and guide children in everyday skills and taking care of themselves • ensure that children have an opportunity to rest and help them calm themselves • with the team, ensure that the day is structured and contribute to maintaining an unhurried atmosphere • see to children's safety and guide children to recognise some factors affecting physical, psychological and social safety • offer children sufficient food, taking into account nutrition recommendations, special diets, religious and ethical diets and oral health • guide children in table manners and familiarise them with food cultures • recognise some of children's needs for early support and follow the work unit's instructions • know the most common childhood illnesses and infectious diseases, recognise their symptoms and prevent the spread of infections • are familiar with the pharmaceutical treatment plan for early childhood education and care and follow it
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • see to children's basic needs and personal hygiene, appreciating children • support and guide children in everyday skills and taking care of themselves, addressing individual needs • guide children in calming themselves, relaxing and resting, understanding the importance of rest for children's development • with their team, ensure that the day has a clear structure and contribute to creating an unhurried atmosphere • see to children's safety and guide children to recognise factors affecting physical, psychological and social safety • guide children in having sufficient, versatile and health-enhancing meals, taking into account nutrition recommendations, special diets, religious and ethical diets and oral health • guide children in table manners and familiarise them diversely with food cultures • recognise some of children's needs for early support and follow the work unit's instructions • know the most common childhood illnesses and infectious diseases, recognise their symptoms and prevent the spread of infections, working in coepration with guardians

	<ul style="list-style-type: none"> are familiar with the pharmaceutical treatment plan for early childhood education and care and follow it

Students maintain and promote safety as well as their work ability and wellbeing at work.

Students	
Satisfactory 1	<ul style="list-style-type: none"> follow occupational safety instructions act professionally in challenging situations with clients follow the work unit's instructions in any situations involving violence and threat and look after their and their clients' safety prevent children's accidents and administer first aid follow hygiene instructions comply with the principles of ergonomics and prevent accidents and injuries caused by the work recognise and address key strain and risk factors of their work and modify their activities based on feedback they receive contribute to maintaining a good work atmosphere
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> comply with occupational safety instructions and prevent safety risks act professionally and with anticipation in challenging situations with clients follow the work unit's instructions in any situations involving violence and threat and look after their and their clients' safety prevent children's accidents and administer first aid follow hygiene instructions comply with the principles of ergonomics and prevent accidents and injuries caused by the work, developing their working methods recognise and address strain and risk factors in their work and develop their working methods maintain and promote a good work atmosphere
Good 4	
Excellent 5	<ul style="list-style-type: none"> comply with occupational safety instructions, prevent safety risks and promote occupational safety act professionally and with anticipation in challenging situations with clients, justifying their actions follow the work unit's instructions in any situations involving violence and threat and look after their and their clients' safety prevent children's accidents and administer first aid follow hygiene instructions comply with the principles of ergonomics in varying situations and prevent accidents and injuries caused by the work, developing their working methods recognise and address strain and risk factors in their work and develop their work and working methods, justifying their actions contribute to maintaining and promoting a good work atmosphere and doing things together.

Students assess and develop their work.

Students	
Satisfactory 1	<ul style="list-style-type: none"> assess their professional development and set targets for their professional growth

	<ul style="list-style-type: none"> • recognise their strengths and areas of development and make use of them in their work • receive feedback and modify their activities based on the feedback received by them • maintain the knowledge and skills required in their occupation
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • assess their professional development diversely and set targets for their professional growth • recognise their strengths and areas of development realistically and make use of them in their work • develop their activities based on feedback they receive and give constructive feedback in their work community • maintain the knowledge and skills required in their occupation and justify their work-related decisions by their professional knowledge
Good 4	
Excellent 5	<ul style="list-style-type: none"> • assess their professional development diversely and set targets for their professional growth, justifying their actions • recognise their strengths and areas of development realistically and diversely, and make use of them in their work with justifications • develop their activities based on feedback they receive, give constructive feedback, and propose improvements in their work community, justifying their actions • maintain the knowledge and skills required in their occupation and justify their work-related decisions diversely by their professional knowledge.

Methods of demonstrating competence

Students demonstrate their competence in practical tasks in an early childhood education and care environment, where they work in tasks related to promoting children's growth, wellbeing and learning. To the extent that the vocational competence required in the unit cannot be assessed on the basis of the demonstration, the competence demonstration is to be supplemented in other ways on an individual basis.

2.21. Promoting the health and wellbeing of a child, young person and family, 35 Competence point (106238)

Competence requirements

Students know how to

- work in compliance with the statutes, regulations and values of the social and health care field and ethical principles applicable to a practical nurse's work
- plan their work and act in multidisciplinary cooperation
- plan, carry out and evaluate work aiming to promote clients' health and wellbeing
- interact with children, young people, families and their close networks
- guide and support children's and young people's growth, development and learning as well as parenting using the working methods, equipment and materials of the field
- provide guidance and assistance in daily activities using the working methods, equipment and materials of the field
- guide and assist children, young people and families in need of support using the working methods, equipment and materials of the field

- maintain and promote safety as well as their work ability and wellbeing at work
- assess and develop their work
- assess their possibilities of working as welfare sector entrepreneurs.

Assessment

Students work in compliance with the statutes, regulations and values of the social and health care field and ethical principles applicable to a practical nurse's work.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • respect clients' fundamental and human rights and follow the Convention on the Rights of the Child in their work • comply with the statutes and regulations applicable to the fields of education and social and health care and the principles of the Administrative Procedure Act and the Act on the Openness of Government Activities • follow the values of their occupation and a practical nurse's ethical instructions • comply with data protection and secrecy obligation • work in compliance with regulations and quality recommendations applicable to self-monitoring • follow the principles of sustainable development
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • respect clients' fundamental and human rights and follow the Convention on the Rights of the Child in their work • comply with the statutes and regulations applicable to the fields of education and social and health care and the principles of the Administrative Procedure Act and the Act on the Openness of Government Activities, justifying their actions • follow the values of their occupation and a practical nurse's ethical instructions, justifying their actions • comply with data protection and secrecy obligation • work in compliance with regulations and quality recommendations applicable to self-monitoring and justify their actions • follow the principles of sustainable development and justify their actions
Good 4	
Excellent 5	<ul style="list-style-type: none"> • respect clients' fundamental and human rights and follow the Convention on the Rights of the Child in their work • comply with the statutes and regulations applicable to the fields of education and social and health care and the principles of the Administrative Procedure Act and the Act on the Openness of Government Activities, justifying their actions diversely • follow the values of their occupation and a practical nurse's ethical instructions, justifying their actions diversely • comply with data protection and secrecy obligation • work in compliance with regulations and quality recommendations applicable to self-monitoring, justify their actions, and propose improvements • follow the principles of sustainable development, justify their actions and propose improvements.

Students plan their work and act in multidisciplinary cooperation.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • plan their daily tasks and schedules in cooperation with their team as indicated by clients' needs and circumstances • make choices and decisions related to their work as team members • are familiar with some of the tasks and areas of responsibility of different professional groups and work in multidisciplinary cooperation • comply with the workplace's instructions on communication and social media use
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • plan their daily tasks and schedules in cooperation with their team flexibly and as indicated by clients' needs and circumstances • make choices and decisions related to their work and solve problems as team members • are familiar with some of the tasks and areas of responsibility of different professional groups and work responsibly and actively in multidisciplinary cooperation • comply with the workplace's instructions on communication and social media use
Good 4	
Excellent 5	<ul style="list-style-type: none"> • plan their daily tasks and schedules in cooperation with their team flexibly and as indicated by clients' needs and circumstances, taking into account the situation as a whole • make independent choices and decisions related to their work and solve problems as team members • are familiar with some of the tasks and areas of responsibility of different professional groups and work responsibly and actively in multidisciplinary cooperation, making development proposals • comply with the workplace's instructions on communication and social media use.

Students plan, carry out and evaluate work aiming to promote clients' health and wellbeing.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • recognise clients' needs for treatment and support as well as resources and assess the urgency of these needs as team members • set goals and plan the work together with clients, following the work unit's practices • follow the plan for client work, draw on their knowledge of the methods and instruments of care, rehabilitation and family work, and use a resource-oriented work approach • observe clients' situations and take clients' resources and state of health into account in their work • record and document work with clients, complying with the work unit's instructions and legislation • evaluate the realisation of the plan following the work unit's instructions
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • recognise clients' needs for treatment and support as well as resources and assess the urgency of the needs

	<ul style="list-style-type: none"> • set goals and plan the work together with clients, following the work unit's practices, and use evidence-based methods • follow the plan for client work and use the methods and instruments of care, rehabilitation and family work with a resource-oriented work approach • observe and hear clients and adapt their actions to the situation and clients' resources and state of health • record and document work with clients, complying with the work unit's instructions and legislation • evaluate the realisation of the plan following the work unit's instructions and in cooperation with clients
Good 4	
Excellent 5	<ul style="list-style-type: none"> • recognise clients' needs for treatment and support as well as resources and assess the urgency of these needs, justifying their actions • set goals and plan the work together with clients, following the work unit's practices, and use evidence-based methods, justifying their actions • follow the plan for client work and use the methods and instruments of care, rehabilitation and family work diversely with a resource-oriented work approach, justifying their choices • observe a client's situation diversely, hear the client and adapt their actions to the situation and the client's resources and state of health • record and document work with clients, complying with the work unit's instructions and legislation • evaluate the realisation of the plan diversely following the work unit's instructions and in cooperation with clients.

Students interact with children, young people, families and their close networks.

Professional interaction	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • encounter clients and their close networks appreciatively, respecting clients' privacy and right to self-determination • respect the diversity of families • work professionally in challenging interactive situations, following the work unit's instructions • bring up difficult issues with clients, discuss them professionally, and draw on their team's support and competence • use plain language and methods that support and compensate for speech, adapting their expression to clients' communication skills • encounter clients without predetermined gender expectations
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • encounter clients and their close networks appreciatively, respecting consistently clients' privacy and right to self-determination • respect the diversity of families, drawing on their knowledge of the diversity of families and family cultures • work professionally in challenging interactive situations, following the work unit's instructions and promoting the establishment of a cooperative relationship • bring up difficult issues with clients, discuss them professionally, and draw on their team's support and competence

	<ul style="list-style-type: none"> • use plain language and methods that support and compensate for speech, adapting their expression to clients' communication skills and supporting clients' possibilities for self-expression • work with gender awareness, encountering clients as individuals without predetermined gender expectations
Good 4	
Excellent 5	<ul style="list-style-type: none"> • encounter clients and their close networks appreciatively, respecting consistently clients' privacy and right to self-determination and justifying their actions • respect the diversity of families, justifying their actions by their knowledge of the diversity of families and family cultures • work professionally in and anticipate challenging interactive situations, follow the work unit's instructions, and promote the establishment of a cooperative relationship and trust • bring up difficult issues with clients, discuss them professionally, and draw on their team's support and competence • use plain language and methods that support and compensate for speech, adapting their expression to clients' communication skills and supporting clients' possibilities for self-expression diversely • work with gender awareness, encountering clients as individuals without predetermined gender expectations, and promote equality.

Using language skills in client service/ Field-specific language proficiency of Finnish speakers	
Students

Good 4	
Excellent 5	<ul style="list-style-type: none"> • actively plan and develop their capacities to work as entrepreneurs and realistically assess the possibilities of productising their competence • work responsibly, pay attention to the effect of their work on the activities of the workplace and the quality of services in daily work with clients, and modify their actions flexibly as required by the situation • work to promote the achievement of objectives and scale their work according to the objectives • assess their possibilities of working as wellbeing sector entrepreneurs.

Methods of demonstrating competence

Students demonstrate their competence in practical tasks where they work in operating environments that aim to promote children's, young people's and families' health and wellbeing in a practical nurse's tasks. To the extent that the vocational competence required in the unit cannot be assessed on the basis of the demonstration, the competence demonstration is to be supplemented in other ways on an individual basis.

2.22. Working in mental health and substance abuse welfare services, 40 Competence point (106241)

Competence requirements

Students know how to

- work in compliance with the statutes and instructions applicable to the social and health care field and the principles of sustainable development
- plan their work and work together with their teams and networks
- plan, carry out and evaluate the promotion of clients' health and wellbeing together with clients
- use professional interaction skills in mental health and substance abuse welfare work
- use the working methods, tools and materials of the field in mental health and substance abuse welfare work and in pharmaceutical treatment

- guide clients in using services
- maintain and promote safety as well as their work ability and wellbeing at work
- assess and develop their activities.

Assessment

Students work in compliance with the statutes and instructions applicable to the social and health care field and the principles of sustainable development.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • comply with the legislation, regulations and operating principles of the social and health care field • work responsibly, observing the underpinning values of the field and complying with concluded agreements and ethical principles relevant to their occupation • know some of the special features of mental health and substance abuse welfare work from the perspective of right to self-determination, involuntary treatment and child welfare • make use of the service system of social and health care in their work, know about client fees, and draw on their knowledge as team members when guiding clients • comply with data protection, confidentiality and the principles of the Administrative Procedure Act and the Act on the Openness of Government Activities • draw on their knowledge of the workplace's different self-monitoring plans in their work and carry out self-monitoring in their unit under guidance • work in compliance with self-monitoring regulations, the workplace's operating principles and quality recommendations as team members • follow the principles of sustainable development
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • comply with the legislation, regulations and operating principles of the social and health care field, justifying their actions • work responsibly, observing the underpinning values of the field and complying with concluded agreements and ethical principles relevant to their occupation, justifying their actions • know some of the special features of mental health and substance abuse welfare work from the perspective of right to self-determination, involuntary treatment and child welfare • make use of the service system of social and health care in their work, know about client fees, and draw on their knowledge when guiding clients • comply with data protection, confidentiality and the principles of the Administrative Procedure Act and the Act on the Openness of Government Activities • carry out self-monitoring and have familiarised themselves with the different self-monitoring plans of the workplace • work in compliance with self-monitoring regulations, the workplace's operating principles and quality recommendations • follow the principles of sustainable development and justify their actions
Good 4	
Excellent 5	<ul style="list-style-type: none"> • comply with the legislation, regulations and operating principles of the social and health care field, justifying their actions diversely

	<ul style="list-style-type: none"> • work responsibly, observing the underpinning values of the field and complying with concluded agreements and ethical principles relevant to their occupation, justifying their actions diversely • know some of the special features of mental health and substance abuse work from the perspective of right to self-determination, involuntary treatment and child welfare and comply with them • make use of the service system of social and health care in their work, know about client fees, and draw on their knowledge individually when guiding clients • comply with data protection, confidentiality and the principles of the Administrative Procedure Act and the Act on the Openness of Government Activities • familiarise themselves actively with self-monitoring plans in the workplace from the perspective of a practical nurse's work • work in compliance with self-monitoring regulations, the workplace's operating principles and quality recommendations, and propose improvements • follow the principles of sustainable development, diversely justify their actions and propose improvements.

	<ul style="list-style-type: none"> • make independent decisions in their area of responsibility as members of a multiprofessional team and propose improvements • actively maintain and develop the knowledge and skills required in their occupation.
--	--

Methods of demonstrating competence

The students demonstrate their competence in practical tasks where they work in an environment that provides mental health and substance abuse care, performing a practical nurse's tasks. To the extent that the vocational competence required in the unit cannot be assessed on the basis of the demonstration, the competence demonstration is to be supplemented in other ways on an individual basis.

2.23. Working with clients and in networks in mental health and substance abuse welfare services, 35 Competence point (106239)

Competence requirements

Students know how to

- work in compliance with the statutes, operating principles, values and ethical principles applicable to social and health care field
- plan their work and work in cooperation with clients and their close and multiprofessional networks
- use interaction skills in work with clients
- work in preventive and rehabilitating work in different operating environments
- use the working methods, tools and materials of the field in work with clients and in networks as well as in pharmaceutical treatment
- promote mental health and substance abuse welfare clients' functional capacity and coping with daily activities
- provide guidance in using services
- maintain and promote safety as well as their work ability and wellbeing at work
- assess their possibilities of working as welfare sector entrepreneurs
- assess and develop their activities.

Assessment

Students work in compliance with the statutes, operating principles, values and ethical principles applicable to the social and health care field.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • work in compliance with social and health care field legislation as well as instructions and principles related to preventive and rehabilitating mental health and substance abuse welfare work as team members • are familiar with the workplace's quality recommendations, operating principles and self-monitoring plan and comply with them as team members • follow the values of their occupation and a practical nurse's ethical principles • know some of the principles of legal anticipation and use them in their work • respect clients' agency

	<ul style="list-style-type: none"> • follow the principles of sustainable development and guide clients in observing sustainable development in daily life
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • work in compliance with social and health care field legislation as well as instructions and principles related to preventive and rehabilitating mental health and substance abuse welfare work • are familiar with the workplace's quality recommendations, operating principles and self-monitoring plan and comply with them • follow the values of their occupation and a practical nurse's ethical principles • know some of the principles of legal anticipation and use them in their work • respect clients' agency and promote their awareness of their rights • follow the principles of sustainable development and guide clients in observing sustainable development in daily life, justifying their actions
Good 4	
Excellent 5	<ul style="list-style-type: none"> • work in compliance with social and health care field legislation as well as instructions and principles related to preventive and rehabilitating mental health and substance abuse welfare work, justifying their actions • are familiar with the workplace's quality recommendations, operating principles and self-monitoring plan, comply with them, and apply them in their work • follow the values of their occupation and a practical nurse's ethical principles • know some of the principles of legal anticipation and use them in their work • respect clients' agency and actively promote their awareness of their rights • follow the principles of sustainable development and guide clients in observing sustainable development in daily life, justifying their actions diversely and making development proposals.

Students plan their work and work in cooperation with clients and their close and multiprofessional networks.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • plan their daily and weekly tasks, paying attention to clients' individual needs • work as members of a multiprofessional team and network • make choices and decisions related to their work and solve problems within the limits of a practical nurse's area of responsibility in familiar situations at work • express themselves comprehensibly and are willing to serve clients • draw up a plan and implement and evaluate it together with the client • record different stages of the client work process, taking into account client safety and information security • assess the urgency of care or support needs and, as team members, guide clients in accessing services • serve clients responsibly in different situations, also over the telephone and by using electronic means of communication

Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • plan their daily and weekly tasks flexibly, paying attention to clients' individual needs • work responsibly as members of a multiprofessional team and network and are familiar with some of the tasks and areas of responsibility of different professional groups • make decisions related to their work within the limits of a practical nurse's area of responsibility, solve problems and seek additional information to support their decisions • express themselves comprehensibly and serve clients responsibly in different situations • draw up a plan and implement and evaluate it together with the client and their close network • record different stages of the client work process comprehensively, taking into account client safety and information security • assess the urgency of care or support needs and guide clients in accessing services • serve clients responsibly in different situations, also over the telephone and by using electronic means of communication
Good 4	
Excellent 5	<ul style="list-style-type: none"> • plan their daily and weekly tasks flexibly, paying attention to clients' and their close networks' individual needs • work actively and responsibly as members of a multiprofessional team and network and are familiar with the tasks and areas of responsibility of different professional groups • make decisions related to their work within the limits of a practical nurse's area of responsibility and solve problems, justifying their actions by their professional knowledge • express themselves comprehensibly and serve clients responsibly in different situations • draw up an individual plan and implement and evaluate it together with the client and their close network • record different stages of the client work process comprehensively, taking into account client safety and information security • assess care or support needs and their urgency and independently guide and advise clients and their close ones in accessing care or services • serve clients responsibly in different situations, also over the telephone and by using electronic means of communication.

Students use interaction skills in work with clients.

Promoting a cooperation and care relationship	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • recognise phenomena associated with a cooperation and care relationship and use them as team members • encounter clients professionally and create a safe interactive relationship • create an equal cooperation relationship with clients as team members • pay attention to factors related to establishing and maintaining trust and regulate their distance • take into account the significance of transference and countertransference as well as resistance and defences in an interactive relationship

	<ul style="list-style-type: none"> • use active listening in an interactive relationship • understand the importance of a dialogical approach in a cooperation relationship with a client and a network • conclude a cooperation and care relationship responsibly as team members
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • recognise phenomena associated with a cooperation and care relationship and use them professionally • encounter clients professionally and create a safe interactive relationship • create an equal cooperation relationship with clients • pay attention to the factors related to establishing and maintaining trust and regulate their distance professionally • take into account the significance of transference and countertransference as well as resistance and defences in an interactive relationship and care process • use active listening in an interactive relationship with clients and their close networks • maintain a dialogical approach in a cooperation relationship with clients and networks • conclude a cooperation and care relationship responsibly
Good 4	
Excellent 5	<ul style="list-style-type: none"> • recognise the phenomena associated with a cooperation and care relationship and use them professionally • encounter clients professionally and create a safe interactive relationship • create an equal cooperation relationship with clients and their close networks • pay attention to the factors related to establishing and maintaining trust and regulate their distance, justifying their actions with their knowledge • take into account the significance of transference and countertransference as well as resistance and defences in an interactive relationship, a care process and when working with a network • use active listening diversely in an interactive relationship with clients and their close networks • actively maintain a dialogical approach in a cooperation relationship with clients and networks • conclude a cooperation and care relationship professionally and responsibly.

Working with cultural awareness	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • work with clients from different cultures • take clients' religious, spiritual and ethical needs into account in their work • pay attention to clients' sexual and reproductive health • take into account clients' sexual diversity • work with gender awareness
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • work with clients from different cultures and seek information about multiculturalism • take clients' religious, spiritual and ethical needs into account diversely in their work

	<ul style="list-style-type: none"> • pay attention to clients' sexual and reproductive health • take into account clients' sexual diversity • work with gender awareness, encountering clients as individuals without predetermined gender expectations
Good 4	
Excellent 5	<ul style="list-style-type: none"> • work with clients from different cultures and actively seek information about multiculturalism • take clients' religious, spiritual and ethical needs into account diversely in their work, justifying their actions • pay attention to clients' sexual and reproductive health • take into account clients' sexual diversity • work with gender awareness, encountering clients as individuals without predetermined gender expectations, and promote gender equality.

Students work in preventive and rehabilitating work in different operating environments.

Promoting clients' mental wellbeing, mental health and abstinence from substance abuse	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • support clients' positive mental health and recovery orientation, taking into account clients of varying ages and with different backgrounds • recognise some forms of risk behaviour and its harms • are familiar with emergency and mobile services and direct clients to them as team members
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • support clients' positive mental health and recovery orientation, diversely taking into account clients of varying ages and with different backgrounds • recognise risk behaviour and its harms • are familiar with emergency care and mobile services and direct clients to them independently
Good 4	
Excellent 5	<ul style="list-style-type: none"> • support clients' positive mental health and recovery orientation, diversely and individually taking into account clients of varying ages and with different backgrounds • recognise risk behaviour and its harms, and bring risk behaviour up in discussions • are familiar with emergency care and mobile services and direct clients to them independently and appropriately.

Strengthening mental health and substance abuse welfare clients' position and participation.	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • enable clients to make choices in their daily lives • respect clients' privacy and choices • listen to clients' opinions and promote their opportunities of exerting influence and participation in their own lives • motivate clients in doing things together • make use of experience experts and peer support in their work with clients

Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • enable clients to make choices in their daily lives and offer them different alternatives • respect clients' privacy and choices • listen to clients' opinions and promote their opportunities of exerting influence and participation in their own lives and local communities • motivate clients in doing things together and strengthen clients' feeling of belonging to a group or community • actively make use of experience experts and peer support in their work with clients
Good 4	
Excellent 5	<ul style="list-style-type: none"> • enable clients to make choices in their daily lives and offer them different options diversely • respect clients' privacy and choices • listen to clients' opinions and promote their opportunities of exerting influence and participation in their own lives, local communities and society • actively motivate clients in doing things together and strengthen clients' feeling of belonging to a group or community • use experience experts and peer support in their work with clients and draw on the experts' competence.

Students use the working methods, tools and materials of the field in work with clients and in networks as well as in pharmaceutical treatment.

Following evidence-based knowledge, recommendations and methods	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • recognise key mental health and substance abuse problems and illnesses in clients of varying ages and with different backgrounds and draw on this knowledge in their work with clients • are familiar with key preventive, therapeutic and rehabilitating methods of mental health and substance abuse welfare work as well as evidence-based recommendations and use them in their work with clients • promote mental health and substance abuse welfare clients' health and life management and prevent safety risks as team members • plan and use key preventive, therapeutic and rehabilitating individual and group work methods of mental health and substance abuse welfare work
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • recognise mental health and substance abuse problems and illnesses in clients of varying ages and with different backgrounds and actively draw on this knowledge in their work with clients • are familiar with preventive, therapeutic and rehabilitating methods of mental health and substance abuse welfare work as well as evidence-based recommendations and use them diversely in their work with clients • promote mental health and substance abuse welfare clients' health and life management and prevent safety risks

	<ul style="list-style-type: none"> plan and use preventive, therapeutic and rehabilitating individual and group work methods of mental health and substance abuse welfare work appropriately
Good 4	
Excellent 5	<ul style="list-style-type: none"> recognise mental health and substance abuse problems and illnesses in clients of varying ages and with different backgrounds and actively draw on this knowledge diversely in their work with clients are familiar with the methods of mental health and substance abuse welfare work as well as evidence-based recommendations and use them diversely and with a resource-oriented approach in their work with clients actively promote mental health and substance abuse welfare clients' health and life management and prevent safety risks plan and use diversely preventive, therapeutic and rehabilitating individual and group work methods of mental health and substance abuse welfare work appropriately.

Recognising crises in mental health and substance abuse welfare work	
Students	
Satisfactory 1	<ul style="list-style-type: none"> recognise some psychological crises and their different phases and use some crisis working methods with the team draw on their knowledge of the effects of crises and traumas in mental health and substance abuse welfare work as team members
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> recognise different psychological crises and their different phases and use varying crisis working methods with the team draw on their knowledge of the effects of crises and traumas in mental health and substance abuse work
Good 4	
Excellent 5	<ul style="list-style-type: none"> diversely recognise different psychological crises and their different phases and use varying crisis working methods as team members with a client-oriented approach comprehensively draw on their knowledge of the effects of crises and traumas in mental health and substance abuse welfare work.

Providing pharmaceutical treatment	
Students	
Satisfactory 1	<ul style="list-style-type: none"> work safely and as indicated by their area of responsibility, following the unit's and clients' pharmaceutical treatment plans are familiar with the operating principles of the most common pharmaceutical databases and draw on these principles in their work in their area of responsibility handle, dispense and administer pharmaceuticals to the client aseptically, safely and without errors calculate dosages and unit conversions without errors guide clients in interpreting an electronic prescription and understanding its period of validity as well as using, storing and disposing of pharmaceuticals, and know the pharmaceutical treatment of the most common mental health and substance abuse disorders

	<ul style="list-style-type: none"> • know and monitor the actions and interactions of the most common pharmaceuticals used in mental health and substance abuse work as well as polypharmacy, recognise the most common adverse and side effects, pay attention to possible drug abuse phenomena, and inform their teams about such phenomena orally • work safely and as indicated by their area of responsibility, implementing the unit's and clients' pharmaceutical treatment plans • motivate clients following individual pharmaceutical treatment plans • take into account and, as team members, justify the effects of failing to take medicines on clients
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • work safely and as indicated by their area of responsibility, following the unit's and clients' pharmaceutical treatment plans • master the operating principles of the most common pharmaceutical databases and draw on these principles in their work in their area of responsibility • handle, dispense and administer pharmaceuticals to the client aseptically, safely and without errors • calculate dosages and unit conversions without errors • guide clients in interpreting an electronic prescription and understanding its period of validity as well as using, storing and disposing of pharmaceuticals, and know the pharmaceutical treatment of the most common mental health and substance abuse disorders • know and monitor the actions and interactions of the most common pharmaceuticals used in mental health and substance abuse work as well as polypharmacy, recognise the most common adverse and side effects, pay attention to possible drug abuse phenomena, inform their teams about such phenomena orally in writing, and work to prevent them • recognise potential risks that have a bearing on a client's pharmaceutical treatment, inform their team of them and prevent risks • use motivating methods when guiding clients and their close networks in implementing an individual pharmacological treatment plan • take into account and justify the effects of failing to take medicines on clients
Good 4	
Excellent 5	<ul style="list-style-type: none"> • work safely and as indicated by their area of responsibility, following the unit's and clients' pharmaceutical treatment plans • master the operating principles of the most common pharmaceutical databases and draw on these principles in their work in their area of responsibility • handle, dispense and administer pharmaceuticals to the client aseptically, safely and without errors • calculate dosages and unit conversions without errors • guide clients in interpreting an electronic prescription and understanding its period of validity as well as using, storing and disposing of pharmaceuticals, and know the pharmaceutical treatment of the most common mental health and substance abuse disorders • know and monitor the actions and interactions of the most common pharmaceuticals used in mental health and substance abuse work as well as polypharmacy, recognise the most

	<p>common adverse and side effects, pay attention to possible drug abuse phenomena, inform their teams about such phenomena orally in writing, and work to prevent them</p> <ul style="list-style-type: none"> • recognise potential risks that have a bearing on a client's pharmaceutical treatment, inform their team of them and prevent risks • use motivating methods when guiding clients and their close networks in implementing an individual pharmacological treatment plan, justifying its significance for clients • take into account and justify the effects of failing to take medicines on clients and motivate clients in pharmaceutical care.
--	---

Students promote mental health and substance abuse welfare clients' functional capacity and coping with daily activities.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • assist clients in daily activities and everyday life management, taking clients' functional capacity into account • guide and motivate clients in promoting and maintaining their functional capacity • guide and assist clients in oral care and basic care • guide clients in home care, nutrition, and purchasing and preparing food • use action-based methods and take advantage of the opportunities provided by art, culture and physical activity for promoting participation
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • guide and encourage clients with a resource-oriented approach in their daily activities and everyday life management, taking clients' functional capacity into account • guide and motivate clients with a resource-oriented approach in promoting and maintaining their functional capacity • guide and assist clients in oral care and basic care and motivate them in self-care • guide clients in home care, nutrition, and purchasing and preparing food, encouraging them to take initiative • use diverse action-based methods and take advantage of the opportunities provided by art, culture and physical activity to promote participation
Good 4	
Excellent 5	<ul style="list-style-type: none"> • guide and encourage clients appropriately and with a resource-oriented approach in their daily activities and independent everyday life management, taking clients' functional capacity into account • guide and motivate clients with a resource-oriented approach in promoting and maintaining their functional capacity and life management • guide and assist clients diversely in oral care and basic care and motivate them in self-care • guide clients in home care, nutrition, and purchasing and preparing food, encouraging them to take initiative and addressing clients' preferences • use diverse and appropriately action-based methods and take advantage of the opportunities provided by art, culture and physical activity to promote participation.

Students guide clients in using services.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • recognise their operating unit's basic task and work accordingly • are familiar with clients' critical paths and service chains and draw on this knowledge in their work • are familiar with the models for organising combined services and support clients in using services • guide clients and their close networks in accessing the services they need
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • know their operating unit's basic task as part of the organisation and service system and work accordingly • are familiar with clients' critical paths and service chains and draw on this knowledge in their work • are familiar with the models of organising integrated services and motivate and support clients and their close networks in selecting and using services • motivate and guide clients and their close networks in accessing the services they need
Good 4	
Excellent 5	<ul style="list-style-type: none"> • know their operating unit's basic task as part of the organisation and the comprehensive service system and work accordingly • are familiar with clients' critical paths and service chains and draw on this knowledge in their work • are familiar with the models of organising integrated services and motivate and support clients and their close networks in selecting and using services appropriately • motivate and guide clients and their close networks in accessing the services they need and offer alternatives.

Students maintain and promote safety as well as their work ability and wellbeing at work.

Addressing client safety	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • together with clients, anticipate factors that threaten their health and wellbeing and undermine their safety as team members • recognise ethically challenging situations and know how to resolve them as team members • promote clients' initiative and participation, taking their close networks and surroundings into account • as team members, promote clients' ability to make decisions on matters concerning them as agents of their own lives • promote clients' life skills, health and safety skills
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • together with clients, anticipate factors that threaten their health and wellbeing and undermine their safety • work professionally in ethically challenging situations • promote clients' initiative and participation, taking their close networks and surroundings into account • promote clients' ability to make decisions on matters concerning them as agents of their own lives • promote clients' life skills, health and safety skills

Good 4	
Excellent 5	<ul style="list-style-type: none"> • together with clients, anticipate and prevent factors that threaten their wellbeing and undermine their safety, and make proposals for improving safety • work professionally in ethically challenging situations and apply different solution alternatives • together with clients, promote clients' initiative and participation, taking their close networks and surroundings into account • actively promote clients' ability to make decisions on matters concerning them as agents of their own lives • promote clients' life skills, health and safety skills diversely, taking their close networks and surroundings into account and making development proposals.

Maintaining workplace wellbeing and safety	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • are familiar with the workplace's safety plan and practices for reporting hazardous situations and act as required by them • comply with instructions and regulations on wellbeing at work and occupational safety • contribute to maintaining a good work atmosphere and understand its impact on client satisfaction
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • are familiar with the workplace's safety plan and practices for reporting hazardous situations and act as required by them, preventing risks • comply with instructions and regulations on wellbeing at work and occupational safety • contribute to maintaining and promoting a good work atmosphere and understand its impact on client satisfaction
Good 4	
Excellent 5	<ul style="list-style-type: none"> • are familiar with the workplace's safety plan and practices for reporting hazardous situations and act as required by them, preventing risks and justifying their actions • comply with instructions and regulations on wellbeing at work and occupational safety • contribute to maintaining and promoting a good work atmosphere, understand its impact on client satisfaction and propose improvements.

Students assess their possibilities of working as wellbeing sector entrepreneurs.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • plan the productisation of their competence under guidance • work responsibly and understand the effect of their work on the activities of the workplace and the quality of services in daily work with clients • work to promote the achievement of objectives • assess their possibilities of working as wellbeing sector entrepreneurs
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • plan and find out about possibilities of productising their competence in their work

	<ul style="list-style-type: none"> • work responsibly and pay attention to the effect of their work on the activities of the workplace and the quality of services in daily work with clients • work to promote the achievement of objectives and scale their work according to the objectives • assess their possibilities of working as wellbeing sector entrepreneurs
Good 4	
Excellent 5	<ul style="list-style-type: none"> • actively plan and develop their capacities to work as entrepreneurs and realistically assess the possibilities of productising their competence • work responsibly, pay attention to the effect of their work on the activities of the workplace and the quality of services in daily work with clients, and modify their actions flexibly as required by the situation • work to promote diversely the achievement of objectives and scale their work according to the objectives • assess their possibilities of working as wellbeing sector entrepreneurs.

Students assess and develop their activities.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • assess their strengths and development areas and modify their activities according to the feedback they receive • justify their decisions by professional knowledge • make decisions in their area of responsibility as members of a multiprofessional team • maintain the knowledge and skills required by their occupation and use work guidance in their work and professional growth
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • assess their strengths and development areas and develop their activities according to the feedback they receive • justify their decisions diversely by professional knowledge • make independent decisions in their area of responsibility as members of a multiprofessional team • maintain and develop the knowledge and skills required by their occupation and use work guidance in their work and professional growth
Good 4	
Excellent 5	<ul style="list-style-type: none"> • assess their strengths and development areas and actively develop their activities, using the feedback they receive • justify their decisions diversely by professional knowledge and apply them in different situations • make independent decisions in their area of responsibility as members of a multiprofessional team and propose improvements • actively maintain and develop the knowledge and skills required by their occupation and use work guidance in their work and professional growth.

Methods of demonstrating competence

Students demonstrate their competence in practical tasks where they work in an environment that provides mental health and substance abuse care or in clients' homes, performing a practical

nurse's tasks. To the extent that the vocational competence required in the unit cannot be assessed on the basis of the demonstration, the competence demonstration is to be supplemented in other ways on an individual basis.

2.24. Nursing, 35 Competence point (106247)

Competence requirements

Students know how to

- work in compliance with the statutes, operating principles, values and ethical principles applicable to the social and health care field
- plan their work in nursing and work together with a team and a network
- plan, carry out and evaluate nursing and care received by clients
- interact with clients
- use the working methods, equipment and materials of the professional field in nursing
- carry out pharmaceutical treatment
- provide guidance in using services
- maintain and promote safety as well as their work ability and wellbeing at work
- assess and develop their activities.

Assessment

Students work in compliance with the legislation, operating principles, values and ethical principles applicable to the social and health care field.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • comply with the legislation, regulations and operating principles of the social and health care field • observe the underpinning values of the field and comply with concluded agreements and ethical principles relevant to their occupation • comply with data protection, secrecy obligation and the principles of the Administrative Procedure Act and the Act on the Openness of Government Activities • familiarise themselves with the workplace's self-monitoring plan from a practical nurse's perspective and work in compliance with self-monitoring regulations • follow the principles of sustainable development • sort wastes, recycle materials and use disposable products appropriately • treat clients fairly and equally
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • comply with the legislation, regulations and operating principles of the social and health care field, justifying their actions • work responsibly, observing the underpinning values of the field and complying with concluded agreements and ethical principles relevant to their occupation, justifying their actions • comply with data protection, secrecy obligation and the principles of the Administrative Procedure Act and the Act on the Openness of Government Activities • actively familiarise themselves with the workplace's self-monitoring plan from a practical nurse's perspective and work in compliance with self-monitoring regulations • follow the principles of sustainable development and justify their actions

	<ul style="list-style-type: none"> • use disposable products appropriately, taking into account cost-efficiency and the volume of accumulated waste • sort wastes and recycle and reuse materials, taking the environmental impacts of activities into account • treat clients fairly and equally
Good 4	
Excellent 5	<ul style="list-style-type: none"> • comply with the legislation, regulations and operating principles of the social and health care field, justifying their actions diversely • work responsibly, observing the underpinning values of the field and complying with concluded agreements and ethical principles relevant to their occupation, justifying their actions diversely • comply with data protection, secrecy obligation and the principles of the Administrative Procedure Act and the Act on the Openness of Government Activities • actively familiarise themselves with the workplace's self-monitoring plan from a practical nurse's perspective, work in compliance with self-monitoring regulations, and propose improvements • follow the principles of sustainable development, justify their actions and propose improvements • select and use disposable products appropriately and cost-effectively, and take care of appropriate sorting of wastes • recycle and reuse materials, taking into account the environmental impacts of the activities and life cycle thinking of supplies • treat clients fairly and equally.

Students plan their work in nursing and work together with a team and a network.

Working systematically	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • plan and set goals for their work as team members • plan their work with a client-oriented approach • plan their daily tasks as team members • make choices and decisions related to their work as team members
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • plan and set goals for their work, taking clients' needs into account together with clients • plan their work with a client-oriented approach, taking clients' close networks into account • plan their daily tasks and take into account any other plans for the workplace's activities • plan their work as members of a multiprofessional team in a practical nurse's area of responsibility and seek guidance if necessary • make choices and decisions related to their work
Good 4	
Excellent 5	<ul style="list-style-type: none"> • set goals for their work with a needs-based approach together with clients and plan their work on this basis • plan their work with a client-oriented approach, taking clients' close networks into account, justify their actions and propose alternative courses of action

	<ul style="list-style-type: none"> • plan their daily and weekly tasks and take into account any other plans for the workplace's activities, modifying their plans if necessary • plan their work as members of a multiprofessional team in a practical nurse's area of responsibility and seek guidance if necessary • make choices and decisions related to their work and justify their actions diversely.
--	--

Working as a team member	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • are familiar with the tasks of different professional groups and work as members of a multiprofessional team • solve problems as work community members • act cooperatively and responsibly as work community members • follow the work community's rules and operating principles • look for support in their work and use consultations • comply with the workplace's instructions on the employees' communication, use of social media and image marketing and observe netiquette
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • are familiar with the tasks of different professional groups and work actively as members of a multiprofessional team • solve problems and bring up different alternative courses of action • act cooperatively and responsibly as work community members • follow the work community's rules and operating principles • actively look for support in their work and use consultations • comply with the workplace's instructions on the employees' communication, use of social media and image marketing and observe netiquette
Good 4	
Excellent 5	<ul style="list-style-type: none"> • are familiar with the tasks of different professional groups and work actively and flexibly as members of a multiprofessional team • solve problems and bring up different alternative courses of action, justifying their actions • act in a cooperative and responsibly as work community members and make alternative development proposals • follow the work community's rules and operating principles • actively look for support in their work, make use of consultations and encourage the work community to draw on support • comply with the workplace's instructions on the employees' communication, use of social media and image marketing and observe netiquette.

Students plan, carry out and evaluate nursing and care received by clients.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • observe a client's situation, paying attention to their needs • participate in drawing up a plan for promoting a client's nursing and care, using the Finnish Care Classification • carry out and evaluate the plan together as team members

	<ul style="list-style-type: none"> • use client and patient information systems following the work unit's instructions as team members, taking information security and secrecy obligation provisions into account • record the different stages of the care process as team members and seek for help if necessary • as team members, look after client documents and ensure that the clients' and employees' legal protection is realised
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • observe a client's situation diversely, paying attention to their needs • together with a client, participate in drawing up a plan for promoting the client's nursing and care, using the Finnish Care Classification • carry out and evaluate the plan • use client and patient information systems following the work unit's instructions, taking information security and secrecy obligation provisions into account • records different stages of the care process and inform their team of a client's condition orally and in writing • look after client documents and ensure that clients' and employees' legal protection is realised
Good 4	
Excellent 5	<ul style="list-style-type: none"> • observe a client's situation comprehensively, paying attention to their needs • together with a client and their close ones, participate in drawing up a plan for promoting the client's nursing and care, using the Finnish Care Classification • carry out and evaluate a plan made for a client negotiating with their team, the client and the client's network • independently use client and patient information systems following the work unit's instructions, taking information security and secrecy obligation provisions into account • independently and with a client-oriented approach, records different stages of the care process and inform their team of essential aspects of a client's condition orally and in writing • look after client documents, ensuring that the clients' and employees' legal protection is realised, and justify their actions.

Students interact with clients.

Professional interaction	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • act professionally in interactive situations • pay attention to the effects of their behaviour in interactive situations • are present in interactive situations with clients and their close networks • use communication methods and tools that support and compensate for speech in interaction with clients • use plain language, modifying their expression as necessary • as team members, listen to some of the clients' opinions and preferences, supporting their participation and enhancing the meaningfulness of their lives • use information and communication technology in their work as team members

Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • act professionally and naturally in interactive situations • pay attention to the effects of their behaviour in interactive situations • maintain an active and caring presence in interactive situations with clients and their close networks • adeptly use communication methods and tools that support and compensate for speech in interaction with clients • use plain language and modify their expression to match clients' communication skills • listen to some of the clients' opinions and preferences, supporting their participation and enhancing the meaningfulness of their lives • use information and communication technology in their work
Good 4	
Excellent 5	<ul style="list-style-type: none"> • act professionally, naturally and responsibly in changing interactive situations • pay attention to the effects of their behaviour in interactive situations • maintain an active and caring presence in interactive situations with clients and their close networks, creating a feeling of security • adeptly and diversely use communication methods and tools that support and compensate for speech in interaction with clients • use plain language naturally and modify their expression to match clients' communication skills, encouraging clients in self-expression • listen to clients' opinions and preferences, supporting their participation and enhancing the meaningfulness of their lives • pay attention to clients' families and friends and networks of social wellbeing • use information and communication technology in their work diversely, justifying their actions.

Using language skills in client service/ Field-specific language proficiency of Finnish speakers	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • serve customers in Finnish and manage the service situation tolerably well in Swedish and in one foreign language
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • serve customers in Finnish and manage the service situation in Swedish and in one foreign language
Good 4	
Excellent 5	<ul style="list-style-type: none"> • serve customers in Finnish and manage the services situation flexibly in the second national language and in one foreign language.

Using language skills in client service/ Field-specific language proficiency of Swedish speakers	
Students	

Satisfactory 1	<ul style="list-style-type: none"> serve customers in Swedish and Finnish and manage the service situation tolerably well in one foreign language
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> serve customers in Swedish and Finnish and manage the service situation in one foreign language
Good 4	
Excellent 5	<ul style="list-style-type: none"> serve customers in Swedish and Finnish and manage the service situation flexibly in one foreign language.

Using language skills in client service/ Field-specific language proficiency of speakers of other languages	
Students	
Satisfactory 1	<ul style="list-style-type: none"> manage the service situation in Finnish or Swedish and manage it tolerably well in one other language
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> manage the service situation in Finnish and Swedish and in one foreign language
Good 4	
Excellent 5	<ul style="list-style-type: none"> serve customers in Finnish and Swedish and manage the service situation flexibly in one foreign language.

Using language skills in client service/Field-specific language proficiency in education and training provided in a foreign language	
Students	
Satisfactory 1	<ul style="list-style-type: none"> manage the service situation in Finnish or Swedish in addition to the language of instruction and are able to help clients forward in one other language in the service situation
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> manage the service situation in Finnish or Swedish in addition to the language of instruction and in one other language
Good 4	
Excellent 5	<ul style="list-style-type: none"> serve customers in Finnish or Swedish in addition to the language of instruction and manage the service situation flexibly in one other language.

Students use the working methods, tools and materials of the professional field in nursing.

Nursing and providing care for clients	
Students	
Satisfactory 1	<ul style="list-style-type: none"> work in nursing with a client-oriented and needs-based approach as team members support, guide and motivate clients in managing daily activities with a resource-oriented approach in recurring situations at work following the team's instructions, nurse clients with the most common illnesses in internal medicine, surgical and neurological field, infections, cancers, eye and skin diseases

	<p>as well as memory disorders and draw on evidence-based knowledge of illnesses in their work</p> <ul style="list-style-type: none"> • following the team's instructions, provide care for people suffering from mental health and substance abuse disorders and promote their functional capacity • are familiar with the changes caused by diseases and ageing in the normal structure and functions of the human body • pay attention to clients' sexual and reproductive health and diversity of sexual orientation • nurse clients with gynaecological and urological illnesses as team members • work as team members in advanced life support
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • work in nursing with a client-oriented and needs-based approach and in multiprofessional cooperation • support, guide and motivate clients in managing daily activities with a resource-oriented approach • nurse clients with the most common illnesses in internal medicine, surgical and neurological field, infections, cancers, eye and skin diseases as well as memory disorders, justifying their actions by evidence-based knowledge in their work • provide care for people suffering from mental health and substance abuse disorders and promote their functional capacity with a resource-oriented approach • draw on evidence-based knowledge of the changes caused by diseases and ageing in the normal structure and functions of the human body in their work • pay attention to clients' sexual and reproductive health and diversity of sexual orientation • nurse clients with gynaecological and urological illnesses • work as team members in advanced life support
Good 4	
Excellent 5	<ul style="list-style-type: none"> • actively work in nursing with a client-oriented and needs-based approach and in multiprofessional cooperation • support, guide and motivate clients in managing daily activities with a resource-oriented approach in changing situations • independently nurse clients with the most common illnesses in internal medicine, surgical and neurological field, infections, cancers, eye and skin diseases as well as memory disorders, justifying their actions by evidence-based knowledge of illnesses in their work • provide individual care for people suffering from mental health and substance abuse disorders and promote their functional capacity with a resource-oriented approach • draw diversely on evidence-based knowledge of the changes caused by diseases and ageing in the normal structure and functions of the human body in their work • pay individual attention to clients' sexual and reproductive health and diversity of sexual orientation • nurse clients with gynaecological and urological illnesses • work as team members in advanced life support.

Using the methodology of nursing	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • observe clients' vital functions and functional capacity and pass this information on in the agreed manner

	<ul style="list-style-type: none"> • follow aseptic principles and draw on their knowledge of aseptic practices in their work • recognise the effects of microbes on human health • as team members, nurse clients with infectious diseases, isolates client as indicated by their circumstances, and justify their actions • prepare for, assist in and carry out procedures (measurements of vital functions, including blood pressure, heart rate monitoring, respiratory rate, blood sugar, oxygen saturation and temperature; catheterisation, removal of mucus by suction, giving oxygen to clients, ECG testing and monitoring, preparations for a sterile procedure, tube feeding, removal of stitches and wound care) as team members • take point-of-care samples as team members, drawing on their knowledge of basic laboratory testing in their work • prepare clients for examinations, procedures and surgery as team members
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • observe clients' vital functions and functional capacity, record their observations and pass this information on in the agreed manner • follow aseptic principles, justifying their actions • know the effects of microbes on human health and justify their actions • nurse clients with infectious diseases, isolates client as indicated by their circumstances, and justify their actions • prepare for, assist in and carry out procedures independently (measurements of vital functions, including blood pressure, heart rate monitoring, respiratory rate, blood sugar, oxygen saturation and temperature; catheterisation, removal of mucus by suction, giving oxygen to clients, ECG testing and monitoring, preparations for a sterile procedure, tube feeding, removal of stitches and wound care) • take point-of-care samples, drawing on their knowledge of basic laboratory testing in their work • prepare clients for examinations, procedures or surgery
Good 4	
Excellent 5	<ul style="list-style-type: none"> • observe clients' vital functions and functional capacity, record their observations and pass this information on in the agreed manner • follow aseptic principles, justifying their actions diversely • know the effects of microbes on human health and justify their actions diversely • nurse clients with infectious diseases, isolates client as indicated by their circumstances, and know how work to organise work aiming to prevent infections • prepare for, assist in and carry out procedures independently (measurements of vital functions, including blood pressure, heart rate monitoring, respiratory rate, blood sugar, oxygen saturation and temperature; catheterisation, removal of mucus by suction, giving oxygen to clients, ECG testing and monitoring, preparations for a sterile procedure, tube feeding, removal of stitches and wound care), justifying their actions • take point-of-care samples, drawing on their evidence-based knowledge of basic laboratory testing in their work • prepare clients for examinations, procedures or surgery independently.

Taking care of clients' wellbeing in nursing	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • recognise and pay attention to the effects of illnesses on clients' nutritional treatment and monitor clients' nutritional state • recognise and pay attention to the effects of illnesses on oral health • recognise and pay attention to the effects of illnesses on podiatric health • take care of pain management, using some pain relief methods • support clients' mental health and encourage abstinence from substance abuse • with their team, pay attention to the effects of illnesses on clients' need for sleep and rest • take into account the importance of physical activity in the treatment of different illnesses as team members • provide terminal care and care for dying clients as team members
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • recognise and pay attention to the effects of illnesses on clients' nutritional treatment as well as assess and monitor clients' nutritional state • recognise and pay attention to the effects of illnesses on oral health and recognise challenges of basic oral health care • recognise and pay attention to the effects of illnesses on podiatric health and recognise challenges of podiatric care • take care of pain management, using different pain relief methods • support clients' mental health and encourage and support abstinence from substance abuse • pay attention to the effects of illnesses on clients' need for sleep and rest and guide clients in issues related to sleep and rest • take into account the importance of physical activity in the treatment of different illnesses • provide individual terminal care and care for dying clients
Good 4	
Excellent 5	<ul style="list-style-type: none"> • recognise and pay attention to the effects of illnesses on clients' nutritional treatment as well as assess and monitor clients' nutritional state, justifying their actions • recognise and take into account the effects of illnesses on oral health, recognise some of the challenges in basic oral health care and work together with specialists • recognise and pay attention to the effects of illnesses on podiatric health, recognise some of the challenges of podiatric care and work together with specialists • take care of pain management, using different pain relief methods and anticipating and pay attention to changes in clients' condition and functional capacity • guide clients in promoting their mental health and encourage and support abstinence from substance abuse • pay attention to the effects of illnesses on clients' need for sleep and rest, guide clients in issues related to sleep, and rest and offer different treatment options for lack of sleep and rest • take into account the importance of physical activity in the treatment of different illnesses, guiding clients • provide individual terminal care and care for dying clients, justifying their actions.

Students provide pharmaceutical treatment.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • work safely and as indicated by their area of responsibility, following the unit's and clients' pharmaceutical treatment plans • are familiar with the operating principles of the most common pharmaceutical databases and draw on these principles in their work • handle, dispense and administer pharmaceuticals to the client aseptically, safely and without errors • calculate dosages and unit conversions without errors • guide clients following the work unit's instructions in interpreting an electronic prescription and its period of validity as well as using, storing and disposing of pharmaceuticals, and are familiar with the pharmaceutical treatment of the most common illnesses in internal medicine, surgical and neurological field, infections, cancers, eye and skin diseases as well as memory disorders • know and observe the actions and interactions of the most common pharmaceuticals used for illnesses in internal medicine, surgical and neurological field, infections, cancers, eye and skin diseases and memory disorders as well as polypharmacy, recognise the most common adverse and side effects, pay attention to possible drug abuse phenomena and inform their teams about such phenomena
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • work safely and as indicated by their area of responsibility, following the unit's and clients' pharmaceutical treatment plans • use the most common pharmaceutical databases, understand their operating principles and make use of them in their work • handle, dispense and administer pharmaceuticals to the client aseptically, safely and without errors • calculate dosages and unit conversions without errors • guide clients and their close networks following the work unit's instructions in interpreting an electronic prescription and its period of validity as well as using, storing and disposing of pharmaceuticals, and are familiar with the pharmaceutical treatment of the most common illnesses in internal medicine, surgical and neurological field, infections, cancers, eye and skin diseases as well as memory disorders • know and observe the actions and interactions of the most common pharmaceuticals used for illnesses in internal medicine, surgical and neurological field, infections, cancers, eye and skin diseases and memory disorders as well as polypharmacy, recognise the most common adverse and side effects, pay attention to possible drug abuse phenomena, inform their teams about such phenomena, and prevent them
Good 4

Students guide clients in using services.

Students	
Satisfactory 1	<ul style="list-style-type: none"> are familiar with clients' care and service chains inform clients and their close networks about social and health services as well as benefits guide clients in using electronic services as team members, participate in fulfilling the duty of providing guidance, making contact and reporting in social and health care work in multidisciplinary cooperation to ensure the continuity of a client's treatment
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> are familiar with clients' care and service chains inform clients and their close networks appropriately about social and health services as well as benefits guide clients in using electronic services as team members, participate in fulfilling the duty of providing guidance, making contact and reporting in social and health care work in multidisciplinary cooperation appropriately to ensure the continuity of a client's treatment
Good 4	
Excellent 5	<ul style="list-style-type: none"> are familiar with clients' care and service chains inform clients and their close networks about social and health services as well as benefits appropriately and with a client-oriented approach guide clients in using electronic services as team members, participate in fulfilling the duty of providing guidance, making contact and reporting in social and health care appropriately and with a client-oriented approach, work in multidisciplinary cooperation to ensure the continuity of a client's treatment.

Students maintain and promote safety as well as their work ability and wellbeing at work.

Maintaining wellbeing at work and occupational safety	
Students	

Satisfactory 1	<ul style="list-style-type: none"> • are familiar with the workplace's safety plan and practices for reporting hazardous situations and act as required by the situation • comply with the unit's regulations and instructions on wellbeing at work and occupational safety • take responsibility for their wellbeing at work, occupational safety and work ability • contribute to the wellbeing of their work community and understand that its atmosphere affects client satisfaction • follow instructions related to ergonomics when transferring and caring for clients • recognise clients' resources when transferring and caring for them • use aids when transferring and caring for clients • recognise clients' resources when transferring and caring for them • recognise physical and psychological strain and risk factors associated with their work • maintain their work ability and coping at work
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • are familiar with the workplace's safety plan and practices for reporting hazardous situations and act as required by the situation • comply with the unit's regulations and instructions on wellbeing at work and occupational safety • take responsibility for their wellbeing at work, occupational safety and work ability • contribute to the wellbeing of their work community and understand that its atmosphere affects client satisfaction • apply instructions related to ergonomics when transferring and caring for clients and actively pay attention to work posture • activate clients' resources when transferring and caring for them • adeptly use aids when transferring and caring for clients • recognise physical and psychological strain and risk factors associated with their work and prevent them • actively maintain their work ability and coping at work
Good 4	
Excellent 5	<ul style="list-style-type: none"> • are familiar with the workplace's safety plan and practices for reporting hazardous situations and act as required by the situation • comply with the unit's regulations and instructions on wellbeing at work and occupational safety • take responsibility for their wellbeing at work, occupational safety and work ability • contribute to the wellbeing of their work community and understand that its atmosphere affects client satisfaction • apply and justify instructions related to ergonomics when transferring and caring for clients, actively pay attention to good work posture, and justify factors that affect their work posture • apply and justify the use of aids in different situations when transferring and caring for clients • use, recognise and activate clients' resources when transferring and caring for them and use natural movement patterns and work postures • recognise physical and psychological strain and risk factors associated with their work, prevent them and propose improvements

	<ul style="list-style-type: none"> actively maintain their work ability and coping at work, justifying factors that affect work posture.
--	---

Addressing client safety	
Students	
Satisfactory 1	<ul style="list-style-type: none"> pay attention to client safety and prevention of accidents in nursing follow the principles of aseptic working methods recognise clients with challenging behaviours and the threat of domestic violence in their work, guide clients in accessing help, and inform their team as team members, guide clients and their close ones in accessing their rights
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> extensively pay attention to client safety and prevention of accidents in their nursing work and justify their actions follow the principles of aseptic working methods recognise clients with challenging behaviours and the threat of domestic violence in their work, guide clients in accessing help, and inform their team guide clients and their close ones in accessing their rights
Good 4	
Excellent 5	<ul style="list-style-type: none"> extensively pay attention to client safety and prevention of accidents in their nursing work, justifying their actions, and propose improvements follow the principles of aseptic working methods recognise clients with challenging behaviours and the threat of domestic violence in their work, strive to prevent the occurrence of challenging situations, guide clients in accessing help, and bring the matter up in their team guide clients and their close ones in accessing their rights.

Students assess and develop their activities.

Students	
Satisfactory 1	<ul style="list-style-type: none"> assess their competence recognise their strengths and development areas receive and give feedback and use the feedback they receive in their activities maintain the knowledge and skills required in their occupation use their evidence-based knowledge in their work and search for information in reliable sources
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> realistically assess their competence realistically recognise their strengths and development areas and take advantage of their strengths receive and give feedback and develop their activities based on it maintain the knowledge and skills required in their occupation and justify their work-related decisions by their professional knowledge draw on their evidence-based knowledge in their work and search for information in reliable sources

Good 4	
Excellent 5	<ul style="list-style-type: none"> • assess their competence realistically and diversely • realistically and diversely recognise their strengths and development areas and are motivated to improve their activities • receive and give feedback and actively develop their activities based on it • maintain the knowledge and skills required in their occupation and justify their work-related decisions diversely by their professional knowledge • draw on their evidence-based knowledge and justify their actions by it, seeking information in reliable sources.

Methods of demonstrating competence

Students demonstrate their competence in practical tasks where they work in nursing environments, performing a practical nurse's tasks. To the extent that the vocational competence required in the unit cannot be assessed on the basis of the demonstration, the competence demonstration is to be supplemented in other ways on an individual basis.

2.25. Patient immobilisation, 15 Competence point (106229)

Competence requirements

Students know how to

- promote client wellbeing through immobilisation
- plan their work as members of a multiprofessional work community
- use interaction skills in work with clients
- use the working methods, instruments and products of patient immobilisation and carry out patient immobilisation
- guide clients and their close networks in using immobilisation services
- maintain and promote safety as well as their work ability and wellbeing at work
- assess and develop their work.

Assessment

Students promote client wellbeing through immobilisation.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • comply with the underlying values, statutes, regulations and ethical operating principles of the social and health care field • work with a client-oriented approach, pay attention to clients' wellbeing during immobilisation, and create a safe atmosphere while caring for clients • comply with data protection and secrecy obligation in their work • comply with the work unit's quality recommendations and regulations on immobilisation • follow the principles of sustainable development and work with cost awareness with their team
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • comply with the underlying values, statutes, regulations and ethical operating principles of the social and health care field and justify their actions by them

	<ul style="list-style-type: none"> • work with a client-oriented approach, pay attention to clients' wellbeing during immobilisation, and create a safe atmosphere while caring for clients using different means • comply with data protection and secrecy obligation in their work • comply with the work unit's quality recommendations and regulations on immobilisation • follow the principles of sustainable development, use them to justify their actions, and work with cost awareness
Good 4	
Excellent 5	<ul style="list-style-type: none"> • comply with the underlying values, statutes, regulations and ethical operating principles of the social and health care field and justify their actions diversely by them • work with a client-oriented approach, pay attention to clients' wellbeing during immobilisation, create a safe atmosphere while caring for clients using different means, and justify their actions • comply with data protection and secrecy obligation in their work • comply with the work unit's quality recommendations and regulations on immobilisation • strive to promote the implementation of sustainable development principles, justify their actions and work with cost-awareness.

Students plan their work as members of a multiprofessional work community.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • plan their daily tasks and schedules as indicated by clients' needs and circumstances with their team, paying attention to the work unit's other plans • draw on their evidence-based knowledge of patient immobilisation in the planning their work and recognise and assess clients' needs for immobilisation as team members • make choices and decisions related to their work and solve problems with their team • with their team, work in cooperation with clients and their close networks • work with a multiprofessional team in compliance with the referrals given to them and participate in clients' treatment processes as team members
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • plan their daily tasks and schedules as indicated by clients' needs and circumstances, understanding their work as a whole and working flexibly in daily situations • diversely draw on their evidence-based knowledge of patient immobilisation in the planning their work and recognise and assess diversely clients' needs for immobilisation • make choices and decisions related to their work, solve problems justifying their actions, and understand clients' treatment processes as a whole • work in cooperation with clients, their close networks and a multiprofessional work community • work responsibly in a multiprofessional team in compliance with referrals given to them and as indicated by clients' treatment processes
Good 4	

Excellent 5	<ul style="list-style-type: none"> plan and prioritise their daily tasks and schedules as indicated by clients' needs and circumstances, understanding their work as a whole and working flexibly in changing situations apply their evidence-based knowledge of patient immobilisation in the planning of their work, and recognise and assess diversely clients' needs for immobilisation make choices and decisions related to their work, justify their actions by their evidence-based knowledge, and understand clients' treatment processes as a whole work in cooperation with clients, their close networks and a multidisciplinary network, developing their work work responsibly and appropriately in a multiprofessional team in compliance with referrals given to them and as indicated by the treatment process.
-------------	---

Students use interaction skills in work with clients.

Students	
Satisfactory 1	<ul style="list-style-type: none"> act professionally in interactive situations take notice of clients' communication skills in their interaction with their team, guide clients and their close networks responsibly and professionally, taking into account information security and confidentiality
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> act professionally and with a client-oriented approach in interactive situations adapt their interaction to clients' communication skills guide clients and their close networks responsibly, individually, professionally and encouragingly, paying attention to activities that promote self-care as well as information security and confidentiality
Good 4	
Excellent 5	<ul style="list-style-type: none"> act actively, professionally and with a client-oriented approach in interactive situations adapt their interaction to clients' communication skills and pay attention to clients' situations and feelings guide clients and their close networks with a client-oriented approach, professionally and responsibly, motivating clients in activities that promote self-care and paying attention to information security and confidentiality.

Students use the working methods, equipment and products of patient immobilisation and carry out patient immobilisation.

Assessing the need and preparing for immobilisation	
Students	
Satisfactory 1	<ul style="list-style-type: none"> with their team, assess clients' needs for immobilisation, drawing on their knowledge of the causal mechanisms of bone fractures and tendon injuries in clients of varying ages and fracture types as team members, prepare clients for immobilisation
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> with a client-oriented approach, assess clients' needs for immobilisation, drawing on their knowledge of the causal

	<p>mechanisms of bone fractures and tendon injuries in clients of varying ages and fracture types</p> <ul style="list-style-type: none"> • prepare clients for immobilisation
Good 4	
Excellent 5	<ul style="list-style-type: none"> • with a client-oriented approach, assess clients' needs for immobilisation, justifying diversely their actions by their knowledge of the causal mechanisms of bone fractures and tendon injuries in clients of varying ages and fracture types • prepare clients for immobilisation, justifying their actions by their knowledge of patient immobilisation work.

Preparing the working environment and selecting treatment materials and equipment

Students	
Satisfactory 1	<ul style="list-style-type: none"> • prepare the treatment facility and set out the equipment required to treat a fracture as well as the necessary splint materials • as team members, select the necessary splint materials, drawing on their knowledge of applying plaster casts, different splinting techniques and the materials to be used
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • prepare the treatment facility and set out the equipment required to treat a fracture as well as the necessary splint materials, taking sustainable development into account in their work • select the necessary splint materials, diversely drawing on their knowledge of applying plaster casts, different splinting techniques and the materials to be used
Good 4	
Excellent 5	<ul style="list-style-type: none"> • prepare the facilities for patient immobilisation and set out the equipment required to treat a fracture, paying attention to cost-efficiency and sustainable development in their work • select the necessary splint materials with justifications, diversely drawing on their knowledge of applying plaster casts, different support techniques, and the materials to be used and their properties.

Maintaining the working and care environment and equipment

Students	
Satisfactory 1	<ul style="list-style-type: none"> • keep the working and care environment tidy • see to the availability of sufficient equipment, ordering and topping up materials, and disposing of waste with their team, following the principles of sustainable development • maintain for the equipment needed in patient immobilisation as team members
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • keep the working and care environment tidy responsibly • see to the availability of sufficient equipment, ordering and topping up of supplies, and disposing of waste following the work unit's instructions and the principles of sustainable development • maintain for the equipment needed in patient immobilisation

Good 4	
Excellent 5	<ul style="list-style-type: none"> • keep the working and care environment tidy responsibly, justifying their actions by patient immobilisation work • see to the availability of sufficient equipment, ordering and topping up of supplies, and disposing of waste following the work unit's instructions, and work cost-efficiently and in compliance with the principles of sustainable development • maintain the equipment needed in patient immobilisation and inform their team of problems related to user safety.

Immobilising patients and assisting in patient immobilisation	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • splint fractures not requiring repositioning in upper and lower extremities based on an immobilisation referral and radiological findings with their team • with their team, splint safely the most common fractures not requiring repositioning in upper extremities, drawing on their knowledge of immobilising fingers, palms, wrists, forearms, elbows and upper arms among other things • as team members, assist in repositioning injuries in fingers, palms, wrists, forearms, elbows and upper arms • with their team, splint safely the most common fractures not requiring repositioning in lower extremities, drawing on their knowledge of immobilising injuries in feet, ankles, lower legs, knees and thighs among other things • as team members, assist in repositioning injuries in feet, ankles, lower legs, knees and thighs • splint fractures in the manner they require, with a client-oriented approach, using splints that have correct anatomical dimensions and angles, following the principle of three-point support • check the functioning of the splinted extremity with their team • use plaster saws and scissors safely and correctly for removing casts • monitor skin condition, notice treatment-related skin problems, and work aseptically in wound care with their team • as team members, participate in monitoring clients' condition and pain during and after the procedure • care for patients and guide them in using pharmacological and non-pharmacological pain management methods • guide clients in immobilisation work and ensure the continuity of treatment with their team • record their observations and the implementation of treatment and inform their team of their observations
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • splint fractures not requiring repositioning in upper and lower extremities based on an immobilisation referral and radiological findings • splint safely the most common fractures not requiring repositioning in upper extremities, drawing on their knowledge of immobilising fingers, palms, wrists, forearms, elbows and upper arms among other things • as team members, assist in repositioning injuries in fingers, palms, wrists, forearms, elbows and upper arms • splint safely the most common fractures not requiring repositioning in lower extremities, drawing on their knowledge

	<p>of immobilising injuries in feet, ankles, lower legs, knees and thighs among other things</p> <ul style="list-style-type: none"> • as team members, assist in repositioning injuries in feet, ankles, lower legs, knees and thighs • splint fractures in the manner they require, with a client-oriented approach, using splints that have correct anatomical dimensions and angles, following the principle of three-point support • check the functioning of the splinted extremity • use plaster saws and scissors safely and correctly for removing casts • monitor skin condition, notice treatment-related skin problems and work aseptically in wound care, enabling skin care during further treatment • monitor clients' condition and pain during and after the procedure • care for patients and guide them in using pharmacological and non-pharmacological pain management methods, monitoring the effects of pain management • guide clients and their close networks in immobilisation and ensure the continuity of treatment • record their observations and the implementation of treatment diversely and inform their team of their observations
Good 4	
Excellent 5	<ul style="list-style-type: none"> • splint fractures not requiring repositioning in upper and lower extremities based on an immobilisation referral and radiological findings • splint safely and with a client-oriented approach the most common fractures not requiring repositioning in upper extremities, drawing on their knowledge of immobilising fingers, palms, wrists, forearms, elbows and upper arms among other things • as team members, assist in repositioning injuries in fingers, palms, wrists, forearms, elbows and upper arms • splint safely the most common fractures not requiring repositioning in lower extremities, drawing on their knowledge of immobilising injuries in feet, ankles, lower legs, knees and thighs among other things • as team members, assist in repositioning injuries in feet, ankles, lower legs, knees and thighs • splint fractures in the manner they require, with a client-oriented approach, using splints that have correct anatomical dimensions and angles, following the principle of three-point support and justifying their actions • check the functioning of the splinted extremity • use plaster saws and scissors safely and correctly for removing casts • monitor skin condition, notice treatment-related skin problems and work aseptically in wound care, enabling skin care during further treatment and justifying their actions • monitor clients' condition and pain comprehensively during and after the procedure • care for clients and guide them diversely in using pharmacological and non-pharmacological pain management methods, monitoring the effects of pain management • guide clients and their close networks in immobilisation and ensure the continuity of treatment, justifying their actions by their knowledge of patient immobilisation

	<ul style="list-style-type: none"> record their observations and the implementation of treatment diversely and inform their team of their observations.
--	--

Providing guidance in care, using aids, orthoses and rest orthoses, and guiding clients in their use	
Students	
Satisfactory 1	<ul style="list-style-type: none"> with their team, give further treatment and home care instructions to clients and their close networks as team members, guide clients in coping with their daily activities and in health behaviour as team members, assess fracture patients' needs for aids and adjust a ready-made orthosis to fit, drawing on their knowledge of anatomy and physiology guide clients with using and adjusting orthoses, rest orthoses and aids use aid services in their work and guide clients and their close networks in using aid services with their team
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> give further treatment and home care instructions to clients and their close networks, drawing on their knowledge of anatomy and physiology guide clients in coping with their daily activities and in health behaviour assess fracture patients' needs for aids and adjust a ready-made orthosis to fit, drawing on their knowledge of anatomy and physiology guide clients with using and adjusting orthoses, rest orthoses and aids, taking their points of use into account use aid services in their work and guide clients and their close networks in using aid services
Good 4	
Excellent 5	<ul style="list-style-type: none"> give further treatment and home care instructions to clients and their close networks, drawing diversely on their knowledge of anatomy and physiology guide diversely clients in coping with their daily activities and in health behaviour assess fracture patients' needs for aids and adjust a ready-made orthosis to fit, drawing diversely on their knowledge of anatomy and physiology guide clients with using and adjusting orthoses, rest orthoses and aids, taking their features and points of use into account, and motivate and guide clients in their use use aid services flexibly in their work and guide clients and their close networks individually in using aids.

Students guide clients and their close networks in using immobilisation services.

Students	
Satisfactory 1	<ul style="list-style-type: none"> are familiar with clients' critical paths and service chains guide clients and their close networks in using services
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> are familiar with clients' critical paths and service chains and draw on this knowledge in their work

	<ul style="list-style-type: none"> • guide clients and their close networks in using services and propose alternatives to clients
Good 4	
Excellent 5	<ul style="list-style-type: none"> • are familiar with clients' critical paths and service chains and draw on this knowledge in their work • guide clients and their close networks in using services and propose alternatives to clients.

Students maintain and promote safety as well as their work ability and wellbeing at work.

Paying attention to wellbeing at work and occupational safety	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • are familiar with the unit's safety plan and practices for reporting hazardous situations and act as required by them • comply with instructions and regulations on wellbeing at work and occupational safety as well as electrical, radiation and fire safety regulations and safety data sheets, wear an appropriate work clothing and use the required personal protective equipment • recognise psychological and physical strain and risk factors in their work and modify their activities based on feedback they receive • follow the principles of ergonomics, using the body's natural movement patterns when working in patient immobilisation • take responsibility for their wellbeing at work, occupational safety and work ability
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • are familiar with the unit's safety plan and practices for reporting hazardous situations and act as required by them • comply with instructions and regulations on wellbeing at work and occupational safety as well as electrical, radiation and fire safety regulations and safety data sheets, wear an appropriate work clothing and use the required personal protective equipment • recognise psychological and physical strain and risk factors in their work, modify their activities based on feedback they receive and develop their working methods • follow the principles of ergonomics, using the body's natural movement patterns when working in patient immobilisation • take responsibility for their own wellbeing, safety at work and work ability and work to prevent potential harms
Good 4	
Excellent 5	<ul style="list-style-type: none"> • are familiar with the unit's safety plan and practices for reporting hazardous situations and act as required by them, preventing risks • comply with instructions and regulations on wellbeing at work and occupational safety as well as electrical, radiation and fire safety regulations and safety data sheets, and wear an appropriate work clothing and use the required personal protective equipment • recognise psychological and physical strain and risk factors in their work, modify their activities based on feedback they receive and develop their work and working methods, justifying their actions

	<ul style="list-style-type: none"> • follow the principles of ergonomics, using the body's natural movement patterns when working in patient immobilisation • actively take responsibility for their wellbeing at work, occupational safety and work ability and prevent potential harms.
--	---

Addressing client safety	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • ensure client safety in patient immobilisation • protect clients from radiation following the work unit's instructions • follow the principles of aseptic working methods • recognise clients' resources in patient immobilisation
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • ensure client safety in patient immobilisation, justifying their actions • protect clients from radiation following the work unit's instructions • follow the principles of aseptic working methods • draw on clients' resources in patient immobilisation
Good 4	
Excellent 5	<ul style="list-style-type: none"> • ensure client safety in patient immobilisation, justifying their actions diversely and making development proposals • protect clients from radiation following the work unit's instructions • follow the principles of aseptic working methods with justifications • activate clients' resources in patient immobilisation.

Students assess and develop their work.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • recognise some of their strengths and development needs in patient immobilisation • receive and give feedback and make use of the feedback they receive in their activities • in problem situations, ask for guidance showing initiative • maintain the knowledge and skills related to working in patient immobilisation required by their occupation • as team members, recognise some of the effects of their work on the quality of patient immobilisation experienced by clients
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • recognise their strengths and development needs in patient immobilisation • receive and give feedback and develop their activities based on it • work safely in changing and unclear situations and ask for guidance with initiative • maintain the knowledge and skills required in their occupation and justify their work-related decisions diversely by their professional knowledge • recognise some of the effects of their work on the quality of patient immobilisation experienced by clients

Good 4	
Excellent 5	<ul style="list-style-type: none"> • realistically and diversely recognise their strengths and development areas in patient immobilisation and are motivated to improve their activities • receive and give feedback and actively develop their activities based on it • work safely in changing and unclear situations, ask for guidance with initiative, propose alternative solutions and justify their decisions professionally • actively maintain and develop the knowledge and skills in patient immobilisation required by their occupation and justify their work-related decisions diversely by their professional knowledge • recognise some of the effects of their work on the quality of patient immobilisation experienced by clients and modify their actions based on their observations.

Methods of demonstrating competence

Students demonstrate their competence in practical tasks in which they work in environments where patients are immobilised, performing a practical nurse's/emergency practical nurse's tasks. To the extent that the vocational competence required in the unit cannot be assessed on the basis of the demonstration, the competence demonstration is to be supplemented in other ways on an individual basis, for example as a simulation.

2.26. Working in perioperative nursing, 15 Competence point (106245)

Competence requirements

Students know how to

- work to promote clients' wellbeing in perioperative nursing
- plan their work in perioperative nursing
- use interaction skills in work with clients
- use the working methods, tools and materials of the vocational field in perioperative nursing
- maintain and promote safety as well as their work ability and wellbeing at work
- assess and develop their work.

Assessment

Students work to promote clients' wellbeing in perioperative nursing.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • as team members, create a calm atmosphere and work safely • comply with the underlying values, statutes, regulations and operating principles of the social and health care field • comply with a self-monitoring plan as team members • comply with the principles of sustainable development and are aware of cost effects and quality criteria
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • create a calm atmosphere and work safely

	<ul style="list-style-type: none"> • comply with the underlying values, statutes, regulations and operating principles of the social and health care field and justify their actions by them • carry out self-monitoring and have familiarised themselves with the workplace's self-monitoring plan • comply with the principles of sustainable development and work with cost awareness and meeting quality criteria
Good 4	
Excellent 5	<ul style="list-style-type: none"> • create a calm atmosphere, listen to clients and work safely • comply with the underlying values, statutes, regulations and operating principles of the social and health care field and justify their actions diversely by these statutes and principles • familiarise themselves with the workplace's self-monitoring plan from a practical nurse's perspective, work in compliance with a self-monitoring plan, and propose improvements • work to promote the implementation of sustainable development principles, justify their actions, and work with cost-awareness and in compliance with quality criteria.

Students plan their work in perioperative nursing.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • perceive their work as a whole and work as team members in daily repeated situations of the perioperative nursing process, recognising the limits of their competence • plan their work with a client-oriented approach as team members and justify their actions by their evidence-based knowledge • work methodically and in a goal-oriented manner, following instructions and as team members • comply with work instructions, working times and agreements • as team members, ensure the continuity of care
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • perceive their work as a whole and work flexibly in daily repeated situations of the perioperative nursing process, recognising the potential and limits of their competence • plan their work with a client-oriented approach and justify their actions by their evidence-based knowledge • work methodically and in a goal-oriented manner following instructions, and modify their actions flexibly as indicated by daily situations • comply with work instructions, working times and agreements • ensure the continuity of care
Good 4	
Excellent 5	<ul style="list-style-type: none"> • perceive their work as a whole and work appropriately and flexibly in changing situations in different stages of the perioperative nursing process, recognising the potential and limits of their competence • plan their work independently and with a client-oriented approach and justify diversely their actions by their evidence-based knowledge • work methodically, appropriately and in a goal-oriented manner following instructions and coordinate their work with other activities • comply with work instructions, working times and agreements

- ensure the continuity of care responsibly.

Students use interaction skills in work with clients.

Professional interaction	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • interact with clients appropriately and in a friendly manner, guiding clients in different stages of the procedure • act professionally in interactive situations and recognise some of clients' feelings about procedures • use communication methods and tools that support and compensate for speech in interaction with clients • use plain language, modifying their expression as necessary • as team members, use the work unit's ICT tools in a practical nurse's area of responsibility following the unit's instructions and observe data protection when communicating • work as members of a multiprofessional team in the work community, following approved operating principles
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • interact with perioperative clients and guide them in different phases of the procedure appropriately, individually and encouragingly • act professionally in interactive situations and recognise clients' different feelings about anaesthesia and procedures • use communication methods and tools that support and compensate for speech in interaction with clients • use plain language and modify their expression to match clients' communication skills • use the work unit's ICT tools appropriately in their area of responsibility following the unit's instructions and observe data protection when communicating • work actively and responsibly as members of a multiprofessional group or team in the work community, following approved operating principles
Good 4	
Excellent 5	<ul style="list-style-type: none"> • interact with clients and guide them in different phases of the procedure appropriately, individually and encouragingly and creating a feeling of safety • act naturally and professionally in interactive situations, paying individual attention in their work to clients' different feelings about anaesthesia and procedures and support clients' coping • use communication methods and tools that support and compensate for speech in interaction with clients in different situations • use plain language naturally and modify their expression to match clients' communication skills, encouraging clients in self-expression • use the work unit's ICT tools appropriately in their area of responsibility following the unit's instructions and observe data protection when communicating • work actively and responsibly as members of a multiprofessional team and with stakeholders • follow approved operating principles in the work community and act appropriately in conflicts • encounter clients professionally and promote their wellbeing by means of interaction individually and with initiative.

Students use the working methods, tools and materials of the vocational field in perioperative nursing.

Managing the knowledge that guides nursing in perioperative nursing work and environments	
Students	
Satisfactory 1	<ul style="list-style-type: none"> comply with the operating unit's instructions in different stages of the perioperative nursing process, drawing on evidence-based knowledge protect themselves and clients, drawing on their knowledge of the effects and adverse effects of radiation
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> comply with the operating unit's instructions in different stages of the perioperative nursing process, justifying their actions by their evidence-based knowledge protect themselves and the clients, justifying their actions by their knowledge of the effects and adverse effects of radiation
Good 4	
Excellent 5	<ul style="list-style-type: none"> work in different stages of the perioperative nursing process in their area of responsibility and as team members, justifying their actions by evidence-based knowledge protect themselves and the clients, justifying diversely their actions by their knowledge of the effects and adverse effects of radiation.

Working in the perioperative nursing process, team and environment	
Students	
Satisfactory 1	<ul style="list-style-type: none"> work in a multiprofessional team in their area of responsibility understand the significance of surgical diagnoses and procedures for their work plan and provide safely the basic care needed by clients within the limits of their area of responsibility and following the operating unit's instructions care for instruments and the nursing environment as indicated by their area of responsibility, inform their team about clients' care and record client care
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> work in a multiprofessional team in their area of responsibility understand the significance of surgical diagnoses and procedures for their work and justify their actions plan and provide safely the basic care needed by clients within the limits of their area of responsibility check, top up, clean and care for instruments and the nursing environment independently as indicated by their area of responsibility, inform their team orally and in writing of clients' care and care plan
Good 4	
Excellent 5	<ul style="list-style-type: none"> work in a multiprofessional team in their area of responsibility understand the significance of surgical diagnoses and procedures for their work and justify their actions diversely

	<ul style="list-style-type: none"> • plan, provide and evaluate the basic care needed by clients independently, safely and within the limits of their area of responsibility, passing on information about the client's condition • evaluate the care provided for a client and act appropriately as required by the situation, justifying their actions • look after topping up, cleaning and caring for instruments and the nursing environment responsibly and as required by the situation, and assess the cleaning needs after special situations • independently inform their team orally and in writing of clients' care and care plan.
--	--

Using perioperative nursing methods and instruments, devices and transfer aids	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • know the operating principles of the most common equipment and devices used in perioperative nursing and use them safely with the team • set out the instruments and equipment needed for a procedure as team members • use different patient transfer techniques and aids in cooperation with the perioperative team • use, clean and service equipment • assist in creating a sterile environment and work aseptically in surgery • use a C arm in compliance with instructions issued on radiation protection
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • know the operating principles of the equipment and devices used in perioperative nursing and use them safely • set out the instruments and equipment needed for a procedure • use safely different patient transfer techniques and appropriate aids associated with them in cooperation with the perioperative team • use, clean and service equipment • assist in creating a sterile environment and work aseptically in surgery, justifying their actions • use a C arm in compliance with instructions issued on radiation protection
Good 4	
Excellent 5	<ul style="list-style-type: none"> • know the operating principles of the equipment and devices used in perioperative nursing, set them up ready to use, and use them safely • independently set out the instruments and equipment needed for a procedure, justifying their actions • use safely different patient transfer techniques and aids in cooperation with the perioperative team and are prepared for changing situations • use, clean and service equipment • assist in creating a sterile environment and work aseptically in surgery, justifying their actions diversely • use a C arm in compliance with instructions issued on radiation protection.

Planning, implementing and evaluating patient positioning in surgery
Students

Satisfactory 1	<ul style="list-style-type: none"> • take into account the significance of different purity classes when planning patient positioning • set out the operating table and equipment as indicated by the client's treatment needs • pay attention to the significance of patient positioning for the safe treatment of clients and position patients safely together with the perioperative team • as team members, pay attention to the body's structure and functions when positioning patients • pay attention to their personal ergonomics when positioning a patient • evaluate the positioning of patients before and after procedures
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • take into account the significance of different purity classes when planning patient positioning and justify their actions by them • together with the perioperative team, prepare the operating tables and equipment as indicated by the client's treatment needs • position clients appropriately and safely for the planned procedure together with the perioperative team • pay attention to the body's structure and functions when positioning patients • pay attention to their personal ergonomics when positioning a patient, justifying their actions • evaluate and justify the positioning of patients before and after procedures
Good 4	
Excellent 5	<ul style="list-style-type: none"> • take into account the significance of different purity classes when planning patient positioning and justify their actions by them diversely • use the operating table and the supports, cushions and aids needed for positioning a patient with a client-oriented approach and appropriately • position clients appropriately and safely for the planned procedure together with the perioperative team, justifying their actions • apply their underpinning knowledge of the body's structure and functions to prevent the harms of patient positioning for clients to be treated • pay attention to their personal ergonomics when positioning a patient, justifying their actions diversely • diversely evaluate and justify the positioning of patients before and after procedures.

Students maintain and promote safety as well as their work ability and wellbeing at work.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • comply with instructions on wellbeing at work and occupational safety and regulations on gas, electrical, radiation and fire safety • use appropriate personal protective devices • prevent health hazards and harms caused by the work • contribute to maintaining a good work atmosphere in the workplace

	<ul style="list-style-type: none"> • use equipment following their instructions for use and safety instructions, taking equipment safety into account, and prevent hazardous situations related to equipment safety • work as team members in a hazardous situation and report faulty devices and hazardous situations • recognise gas labels and handle gas equipment safely • working in cooperation with other team members, follow the principles of ergonomics when transferring clients • take client safety into account in their activities • draw on their knowledge of different contamination routes, protect themselves and protect clients from contamination • look after their work ability, safety, occupational wellbeing and health
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • comply with instructions on wellbeing at work and occupational safety and regulations on gas, electrical, radiation and fire safety, justifying their actions • use appropriate personal protective devices • prevent health hazards and harms caused by the work, justifying their actions • actively contribute to maintaining a good work atmosphere in the workplace • use equipment following their instructions for use and safety instructions, taking equipment safety into account, and prevent hazardous situations related to equipment safety, justifying their actions • act appropriately in a hazardous situation and report faulty devices and hazardous situations • recognise gas labels and handle gas equipment safely • follow the principles of ergonomics in perioperative nursing and take client safety into account, justifying their decisions • take contamination risks into account in perioperative nursing, protect themselves, and protect clients from contamination appropriately • look after their work ability and safety and promote their occupational wellbeing and health.
Good 4	
Excellent 5	<ul style="list-style-type: none"> • comply with instructions on wellbeing at work and occupational safety and regulations on gas, electrical, radiation and fire safety, justifying their actions diversely • use appropriate personal protective devices • prevent health hazards and harms caused by the work • actively maintain a good atmosphere in the workplace and recognise factors that have a negative effect on it • use equipment following their use and safety instructions, taking equipment safety into account, and prevent hazardous situations related to equipment safety, justifying their actions diversely • act appropriately in a hazardous situation and report faulty devices and hazardous situations, justifying their actions • recognise gas labels and handle gas equipment safely • follow the principles of ergonomics in perioperative nursing environment, drawing on clients' resources and using aids • take into consideration the other team members and client safety, and justify their decisions diversely • protect themselves and clients from contamination appropriately in a perioperative nursing environment, justifying the importance of protection

- | | |
|--|---|
| | <ul style="list-style-type: none"> • take care of their work ability and safety, promote their occupational wellbeing and health, and justify the importance of these aspects. |
|--|---|

Students assess and develop their work.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • realistically evaluate their work and competence • maintain and develop the knowledge and skills required in their occupation • give and receive feedback and modify their activities if necessary
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • recognise their strengths and development needs • justify their work-related decisions by professional knowledge and maintain their competence • give and receive feedback and understand the significance of feedback given to them for developing their work
Good 4	
Excellent 5	<ul style="list-style-type: none"> • recognise their strengths and development needs and seek guidance if necessary • justify their work-related decisions by professional knowledge and maintain their competence • give and receive feedback and understand the significance of feedback given to them for developing their work • make realistic development proposals.

Methods of demonstrating competence

Students demonstrate their competence in practical tasks where they work in perioperative nursing environments, performing a practical nurse's tasks. To the extent that the vocational competence required for the qualification cannot be assessed on the basis of the demonstration, the competence demonstration is to be supplemented in other ways on an individual basis.

2.27. Working in oral health care, 40 Competence point (106249)

Competence requirements

Students know how to

- work in compliance with the statutes, operating principles, values and ethical principles applicable to the social and health care field
- plan their work and work together with their teams and networks
- plan, carry out and evaluate client care
- interact with clients
- use the instruments and materials of the field in oral health care
- use the working methods of the field in oral health care and provide pharmaceutical treatment
- provide guidance in using services
- maintain and promote safety as well as their work ability and wellbeing at work
- assess and develop their activities.

Assessment

Students work in compliance with the legislation, operating principles, values and ethical principles applicable to the social and health care field.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • comply with the legislation, regulations and operating principles of the social and health care field • observe the underpinning values of the field and comply with concluded agreements and ethical principles relevant to their occupation • comply with data protection, secrecy obligation and the principles of the Administrative Procedure Act and the Act on the Openness of Government Activities • follow the workplace's sustainable development instructions
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • comply with the legislation, regulations and operating principles of the social and health care field, justifying their actions • observe the underpinning values of the field and comply with concluded agreements and ethical principles relevant to their occupation, justifying their actions • comply with data protection, secrecy obligation and the principles of the Administrative Procedure Act and the Act on the Openness of Government Activities • follow the workplace's sustainable development instructions and justify their actions
Good 4	
Excellent 5	<ul style="list-style-type: none"> • comply with the legislation, regulations and operating principles of the social and health care field, justifying their actions diversely • observe the underpinning values of the field and comply with concluded agreements and ethical principles relevant to their occupation, justifying their actions diversely • comply with data protection, secrecy obligation and the principles of the Administrative Procedure Act and the Act on the Openness of Government Activities • follow the workplace's sustainable development instructions and make justified development proposals to realise sustainable development.

Self-monitoring in the workplace	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • follow the workplace's self-monitoring plan, working in cooperation with their team
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • follow the workplace's self-monitoring plan and justify its importance for their work
Good 4	
Excellent 5	<ul style="list-style-type: none"> • follow the workplace's self-monitoring plan and justify their actions by the legislation governing it • make justified development proposals aiming to improve the workplace's self-monitoring.

Students plan their work and cooperate with their teams and networks.

Students	
Satisfactory 1	<ul style="list-style-type: none"> plan their daily and weekly tasks with the team are familiar with the tasks and areas of responsibility of different professional groups work as members of a multiprofessional team and network
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> plan their daily and weekly tasks independently and modify their actions if necessary are familiar with the tasks and areas of responsibility of different professional groups work in cooperation with a multiprofessional team and network
Good 4	
Excellent 5	<ul style="list-style-type: none"> plan and organise their daily and weekly tasks independently and modify their actions adeptly if necessary take other planned activities in the workplace into account in their plans are familiar with the tasks and areas of responsibility of different professional groups work in cooperation with a multiprofessional team and network and make justified development ideas available for the team.

Acting as a work community member	
Students	
Satisfactory 1	<ul style="list-style-type: none"> follow the work community's rules, instructions and operating principles communicate and act in a professional and appropriate manner comply with the workplace's instructions on the employees' communication and social media use and comply with netiquette solve problems as work community members work cooperatively with the work community
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> follow the work community's rules, instructions and operating principles communicate and act in a professional and appropriate manner comply with the workplace's instructions on the employees' communication, use of social media and image marketing and observe netiquette solve problems and bring up different alternative courses of action work cooperatively and responsibly with the work community
Good 4	
Excellent 5	<ul style="list-style-type: none"> follow the work community's rules, instructions and operating principles communicate and act professionally and appropriately and inform the work community of any changes comply with the workplace's instructions on the employees' communication, use of social media and image marketing and observe netiquette solve problems and bring up different alternative courses of action, justifying their actions

- work cooperatively and responsibly with the work community.

Students plan, carry out and evaluate client care.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • inform themselves about clients' oral health status using anamnestic information and clinical examination methods as team members • record the clients' most common care information in the patient information system without errors • use a care plan in providing care as team members • evaluate the provision of care as team members
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • inform themselves about clients' oral health status using anamnestic information and clinical examination methods as team members, justifying their actions • record the clients' care information in the patient information system without errors and interpret them • use a care plan in providing care and modify their actions when the care plan changes • evaluate the provision of care
Good 4	
Excellent 5	<ul style="list-style-type: none"> • inform themselves about clients' oral health status using anamnestic information and clinical examination methods as team members, justifying their actions diversely • record the clients' care information in the patient information system without errors and use the information adeptly in planning care • use a care plan in providing care and modify their actions adeptly when the care plan changes • evaluate the provision of care and develop their work.

Students interact with clients.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • work and behave professionally in interactive situations • pay attention to the effects of their behaviour in interactive situations • understand the effects of age, language, culture and world views on encountering clients • guide clients in oral care, working together with clients, their close networks and the care team • use communication methods and tools that support or compensate for speech and plain language as team members • use communication devices and the social and health care sector information network for tasks relevant to their professional field
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • work and behave professionally in interactive situations • pay attention to the effects of their behaviour in interactive situations • understand the effects of age, language, culture and world views on encountering clients in their work • guide clients diversely in oral care, working together with clients, their close networks and the care team

	<ul style="list-style-type: none"> • listen to, have discussions with and work together with clients, clients' close networks and the team • use communication methods and tools that support and compensate for speech and plain language • use communication devices and the social and health care sector information network adeptly for tasks relevant to their professional field
Good 4	
Excellent 5	<ul style="list-style-type: none"> • work and behave professionally, also in challenging interactive situations • pay attention to the effects of their behaviour in interactive situations • understand the effects of age, language, culture and world views on encountering clients in their work • guide clients diversely and individually in oral care, working together with clients, their close networks and the care team • listen to, have discussions with and work together with clients, clients' close networks and the care team • use communication methods and tools suitable for the situation that support and compensate for speech and plain language • apply and use communication devices and the social and health care sector information network adeptly in tasks relevant to their professional field.

Students use the instruments and materials of the field in oral health care.

Using instruments and materials	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • use and maintain for the most common oral health care instruments, equipment and machines, working in cooperation with the other team members • handle, store and keep materials used in their work in compliance with regulations and instructions, working in cooperation with the other team members • process and sort waste materials as well as hazardous and problem wastes in compliance with regulations • work with cost awareness
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • use and maintain for the most common oral health care instruments, equipment and machines following instructions • handle, store and keep materials used in their work in compliance with regulations and instructions • process and sort waste materials as well as hazardous and problem wastes in compliance with regulations • work with cost awareness and justify their work with quality factors
Good 4	
Excellent 5	<ul style="list-style-type: none"> • independently use and maintain for the most common oral health care instruments, equipment and machines following instructions • handle, store and keep materials used in their work in compliance with regulations and instructions and familiarise themselves with purchasing instruments and materials

	<ul style="list-style-type: none"> process and sort waste materials as well as hazardous and problem wastes in compliance with regulations, proposing development areas if necessary work with cost awareness and justify their work with the principles of sustainable development and quality factors.
--	--

Maintaining the care environment in readiness	
Students	
Satisfactory 1	<ul style="list-style-type: none"> work in tasks related to the care environment's daily readiness working in cooperation with their team, carry out periodic tasks related to the care environment's readiness working in cooperation with their team, observe the workplace's practices in maintaining readiness
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> independently work in tasks related to the care environment's daily readiness carry out periodic tasks related to the care environment's readiness as agreed carry out tasks related to material purchases and maintaining readiness in other respects as agreed in the workplace
Good 4	
Excellent 5	<ul style="list-style-type: none"> work adeptly in changing situations in tasks related to daily readiness independently carry out periodic tasks related to the care environment's readiness as agreed carry out tasks related to material purchases and maintaining readiness in other respects as agreed in the workplace make justified proposals for changes related to readiness.

Students use the working methods of the field in oral health care and provide pharmaceutical treatment.

Using radiological examination methods	
Students	
Satisfactory 1	<ul style="list-style-type: none"> participate in radiological procedures in compliance with legislation and statutes know how to protect the client and the care team while taking X-rays guide clients before and after imaging procedures together with the care team know how to handle image discs and use other imaging methods, working in cooperation with the care team justify their actions by their knowledge of medical uses of radiation draw on their knowledge of some typical imaging methods used in oral health care in their work
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> participate in radiological procedures in compliance with legislation and statutes know how to protect the client and the care team while taking X-rays, justifying their actions guide clients before and after imaging procedures

	<ul style="list-style-type: none"> • know how to handle image discs, use other imaging methods and work correctly and independently • justify their actions by their knowledge of medical uses of radiation • draw on their knowledge of typical imaging methods used in oral health care in their work
Good 4	
Excellent 5	<ul style="list-style-type: none"> • participate in radiological procedures in compliance with legislation and statutes • know how to protect the client and the care team while taking X-rays, justifying their actions diversely • independently guide clients before and after imaging procedures if necessary • know how to handle image discs, use other imaging methods and work correctly and independently • justify their actions by their knowledge of medical uses of radiation • draw on their knowledge of typical imaging methods used in oral health care in their work and justify their uses.

Providing pharmaceutical treatment	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • work safely and as indicated by their area of responsibility, following the unit's and clients' pharmaceutical treatment plans • are familiar with the operating principles of the most common pharmaceutical databases and draw on these principles in their work • handle, dispense and administer pharmaceuticals to the client aseptically, safely and without errors • calculate dosages and unit conversions without errors • guide clients following the work unit's instructions in interpreting an electronic prescription and its period of validity as well as using, storing and disposing of pharmaceuticals, and are familiar with the most common pharmaceutical treatments used in oral health care • follow instructions when assembling and disassembling anaesthetic syringes and justify their actions by their knowledge • monitor clients after an anaesthetic or pharmaceutical has been administered for potential complications • recognise the symptoms of potential complications and follow the instructions issued to them
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • work safely and as indicated by their area of responsibility, following the unit's and clients' pharmaceutical treatment plans • use the most common pharmaceutical databases, understand their operating principles and make use of them in their work • handle, dispense and administer pharmaceuticals to the client aseptically, safely and without errors • calculate dosages and unit conversions without errors • guide clients and their close networks following the working unit's instructions in interpreting an electronic prescription and its period of validity as well as using, storing and disposing of pharmaceuticals, and master the most common pharmaceutical treatments used in oral health care • follow instructions when assembling and disassembling anaesthetic syringes and justify their actions by their knowledge

	<ul style="list-style-type: none"> • recognise the symptoms of potential complications and follow the instructions issued to them • guide and advise clients in interpreting an electronic prescription and understanding its period of validity • are aware of and justify practices related to handling, storing and disposing of pharmaceuticals
Good 4	
Excellent 5	<ul style="list-style-type: none"> • work safely and as indicated by their area of responsibility, following the unit's and clients' pharmaceutical treatment plans • use pharmaceutical databases, understand their operating principles and make use of them actively in their work • handle, dispense and administer pharmaceuticals to the client aseptically, safely and without errors • calculate dosages and unit conversions without errors • actively guide clients and clients' close networks following the work unit's instructions in interpreting an electronic prescription and its period of validity as well as using, storing and disposing of pharmaceuticals, and master diversely the pharmaceutical treatments in oral health care • follow instructions when assembling and disassembling anaesthetic syringes and justify their actions by their knowledge • monitor clients after an anaesthetic or pharmaceutical has been administered for potential complications • recognise the symptoms of potential complications and follow the instructions issued to them.

Working in primary dental care	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • draw on their knowledge of the most common oral illnesses and their causal mechanisms in their work • master the most common methods of filling cavities, teeth extraction, pulp care and treating gum diseases, and understand the importance of this knowledge in their work • set out the correct instruments and materials for primary dental care procedures • mainly master the procedure of primary dental care procedures • work with cost awareness • provide clients with instructions after treatment • are aware of tooth morphology and the anatomy and physiology of the head, and understand the importance of this knowledge for their work • master the common professional terminology of dentistry
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • know the most common oral illnesses and their causal mechanisms and draw on this knowledge in their work • master the methods of filling cavities, teeth extraction, pulp care and treating gum diseases and can justify their work by this knowledge • set out the correct instruments and materials for primary dental care procedures • master the procedure of primary dental care procedures, also in changing situations • work adeptly and anticipate the next stage in procedures • work with cost awareness and justify their actions • provide clients with instructions after treatment

	<ul style="list-style-type: none"> are aware of tooth morphology and the anatomy and physiology of the head, and justify the importance of this knowledge for their work if necessary master the professional terminology of dentistry
Good 4	
Excellent 5	<ul style="list-style-type: none"> know the most common oral illnesses and their causal mechanisms and draw on this knowledge in their work adeptly master the methods of filling cavities, teeth extraction, pulp care and treating gum diseases and can justify their work extensively by this knowledge set out the correct instruments and materials for primary care procedures and justify their choices master the procedure of basic dental care procedures and modify their actions adeptly in changing situations work in procedures adeptly, in a timely manner and anticipating the next stage, also in changing situations work with cost awareness and justify their actions with quality factors provide clients with instructions after treatment, taking clients' individual needs into account are knowledgeable about tooth morphology and the anatomy and physiology of the head, draw on this knowledge in their work, and justify their work by their knowledge master the professional terminology of dentistry extensively.

Working in specialised dental care	
Students	
Satisfactory 1	<ul style="list-style-type: none"> are familiar with ordinary treatment methods related to surgical treatment, prosthesis use, occlusion physiology and orthodontics as well as the principles of treatment master the procedures related to surgical treatment, prosthesis use, occlusion physiology and orthodontics and understand the importance of this knowledge for their work draw in their work on their knowledge of tooth morphology, the anatomy and physiology of the head and occlusion physiology, and understand the importance of this knowledge in specialised treatments set out the correct instruments and materials for specialised dental care procedures mainly master the procedure of specialised dental care procedures work with cost awareness provide clients with self-care instructions
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> are familiar with ordinary treatment methods related to surgical treatment, prosthesis use, occlusion physiology and orthodontics as well as the principles of treatment and can justify their work by their knowledge master the procedures related to surgical treatment, prosthesis use, occlusion physiology and orthodontics and justify their work with this knowledge draw in their work on their knowledge of tooth morphology, the anatomy and physiology of the head and occlusion physiology, and can justify their work by this knowledge set out the correct instruments and materials for specialised dental care procedures

	<ul style="list-style-type: none"> • master the procedure of specialised dental care procedures • work with cost awareness and justify their actions • provide clients with self-care instructions and guide them in self-care
Good 4	
Excellent 5	<ul style="list-style-type: none"> • are familiar with ordinary treatment methods related to surgical treatment, prosthesis use, occlusion physiology and orthodontics as well as the principles of treatment and draw on this knowledge in their work • master the procedures related to surgical treatment, prosthesis use, occlusion physiology and orthodontics and justify their work with this knowledge • draw in their work on their knowledge of tooth morphology, the anatomy and physiology of the head and occlusion physiology, and can justify their work by this knowledge • set out the correct instruments and materials for specialised dental care procedures and justify their choices • master the procedure of specialised dental care procedures • anticipate and work in a timely manner • work with cost awareness, justify their actions and suggest justified alternative courses of action • provide clients with self-care instructions and guide them in self-care, taking clients' individual needs into consideration.

Working aseptically	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • work as team members in instrument care and follow the maintenance process • are aware of the importance of self-monitoring in instrument care and can name a few quality control methods • follow aseptic working methods in different care situations • follow aseptic working methods when preparing the treatment facility for the next patient • draw on their underpinning knowledge of preventing infections, up-to-date hygiene practices and statutes in their work
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • work in instrument care and follow the maintenance process • know and justify the importance of self-monitoring in instrument care • use quality control methods • follow aseptic working methods in different care situations • follow aseptic working methods when preparing the treatment facility for the next patient • justify their work by their underpinning knowledge of preventing infections, up-to-date hygiene practices and statutes
Good 4	
Excellent 5	<ul style="list-style-type: none"> • work independently in instrument care and follow the maintenance process • know and justify diversely the importance of self-monitoring in instrument care • use quality control methods and make justified development proposals • follow aseptic working methods in different care situations, also mastering changing situations

	<ul style="list-style-type: none"> • follow aseptic working methods when preparing the treatment facility for the next patient • justify their work by their underpinning knowledge of preventing infections, up-to-date hygiene practices and statutes • bring up justified alternative courses of action.
--	--

Students guide clients in using services.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • are familiar with the service system as indicated by their area of responsibility • are familiar with clients' critical paths and service chains and draw on this knowledge in their work • guide clients and their close networks in accessing services • work responsibly as team members based on the division of duties • in cooperation with others, assess the urgency of care needs and guide clients to oral health care services • make use of the service and payment system of social and health care in their work and use their knowledge as team members when guiding clients • work as team members when guiding clients in using electronic services
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • are familiar with the service system as indicated by their area of responsibility and update their competence related to the service system • are familiar with clients' critical paths and service chains and draw on this knowledge in their work • guide clients and their close networks in accessing services and propose alternatives • work responsibly as team members based on the division of duties • assess the urgency of care needs and guide clients in accessing oral health care services as team members • make use of the service and payment system of social and health care in their work and use their knowledge when guiding clients • guide clients in using electronic services
Good 4	
Excellent 5	<ul style="list-style-type: none"> • are familiar with the service system as indicated by their area of responsibility and update their competence related to the service system • are familiar with clients' critical paths and service chains and draw on this knowledge in their work • support clients and their close networks in using services and propose alternatives to clients in an appropriate way • work responsibly as team members based on the division of duties and make justified development proposals • assess the urgency of care needs, guide clients in accessing oral health care services as team members independently, and suggest different options to clients • make use of the service and payment system of social and health care in their work and use their knowledge individually when guiding clients • work independently when guiding clients in using electronic services.

Students maintain and promote safety as well as their work ability and wellbeing at work.

Addressing wellbeing at work and occupational safety	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • comply with instructions and regulations on wellbeing at work and occupational safety and are familiar with the workplace's safety plan • are familiar with practices for reporting hazardous situations and act as required by the situation as team members • know and follow the instructions for needlestick injuries • recognise strain and risk factors in their field and modify their activities based on feedback they receive • maintain their work ability and coping at work • make use of health-enhancing physical activity and prevent occupational accidents and injuries
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • comply with instructions and regulations on wellbeing at work and occupational safety and prevent harms caused by their work • are familiar with the safety plan of the workplace • are familiar with practices for reporting hazardous situations and act as required by the instructions • know and follow the instructions for needlestick injuries • pay attention to strain and risk factors affecting the musculoskeletal system in their work and modify their actions to reduce the strain and risks • maintain their work ability and coping at work • maintain and contribute to a good work atmosphere • make use of health-enhancing physical activity and prevent occupational accidents and injuries
Good 4	
Excellent 5	<ul style="list-style-type: none"> • comply with instructions and regulations on wellbeing at work and occupational safety, preventing strain and risk factors caused by their work • are familiar with the safety plan of the workplace • are familiar with practices for reporting hazardous situations and act as required by the instructions • know and follow the instructions for needlestick injuries • assess their actions and modify them to reduce strain and risks, finding justified optional courses of action • maintain their work ability and coping at work • maintain and contribute to a good work atmosphere and doing things together • make use of health-enhancing physical activity and prevent occupational accidents and injuries.

Addressing client safety	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • act professionally as team members when encountering clients with challenging behaviours • follow the workplace's safety practices in cooperation with their team • master information security and secrecy obligation related to handling patient documents

	<ul style="list-style-type: none"> • pay attention to statutes on preventing infectious diseases in their work and work together with their teams, avoiding the spread of infections • take care of client safety • recognise typical oral health care situations requiring first aid and administer first aid in them
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • encounter clients with challenging behaviours professionally • follow the workplace's safety practices • master information security and secrecy obligation related to handling patient documents and comply with confidentiality instructions • pay attention to and take into account in their work the legislation on prevention of communicable diseases and prevent the spread of infections • take care of client safety and justify their actions • recognise typical oral health care situations requiring first aid and administer first aid in them
Good 4	
Excellent 5	<ul style="list-style-type: none"> • encounter clients with challenging behaviours professionally and follow the workplace's instructions • follow the workplace's safety practices, justifying their actions • master information security and secrecy obligation related to handling patient documents and follow them in their work • pay attention to and take into account in their work the legislation on prevention of communicable diseases and prevent the spread of infections • take care of client safety and justify their actions, bringing up development proposals • recognise typical oral health care situations requiring first aid and administer first aid in them.

Students assess and develop their activities.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • maintain and develop the knowledge and skills required in their occupation • draw on professional knowledge in their work and seek it in reliable sources • receive feedback and modify their activities following instructions issued to them • recognise their strengths and development needs • make choices and decisions related to their work and seek guidance with initiative when encountering problems
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • maintain and develop the knowledge and skills required in their occupation • justify the decisions related to their work by professional knowledge and seek information in reliable sources • receive and give feedback and use the feedback they receive to modify their activities if required • assess and recognise their strengths and development areas and seek for guidance if necessary • make choices and decisions related to their work independently and solve problems

Good 4	
Excellent 5	<ul style="list-style-type: none"> actively maintain and improve the knowledge and skills required in their occupation justify the decisions related to their work diversely by professional knowledge and seek information in reliable sources receive and give feedback and change their activities if required make realistic development proposals recognise their strengths, competence, and development needs and set goals for their professional development make choices and decisions related to their work independently and solve problems.

Methods of demonstrating competence

Students demonstrate their competence in practical tasks where they work as practical nurses in oral health care environments. To the extent that the vocational competence required in the unit cannot be assessed on the basis of the demonstration, the competence demonstration is to be supplemented in other ways on an individual basis.

2.28. Working in oral health promotion, 35 Competence point (106250)

Competence requirements

Students know how to

- draw on their knowledge of oral health and illnesses
- plan their work and work together with a multiprofessional team and network
- plan, carry out and evaluate the promotion of clients' oral health
- use the instruments, materials and products of the field to promote oral health
- use the working methods of the field to promote oral health
- assess and develop their activities in oral health promotion
- assess their possibilities of working as welfare sector entrepreneurs.

Assessment

Students draw on their knowledge of oral health and illnesses.

Students	
Satisfactory 1	<ul style="list-style-type: none"> recognise the developmental phases and some developmental disorders of teeth recognise some signs of a healthy mouth recognise normal occlusion in cooperation with their team master the underpinning knowledge that is in key role for oral health concerning nutrition, xylitol and fluorine, and partly draw on it in their work have knowledge of oral hygiene and oral care instruments and products, and partly draw on this knowledge in their work
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> recognise the developmental phases and ordinary developmental disorders of teeth recognise a healthy mouth and the signs of a healthy mouth recognise normal occlusion and the signs of normal occlusion

	<ul style="list-style-type: none"> draw on the underpinning knowledge that is in key role for oral health concerning nutrition, xylitol and fluorine draw on their knowledge of oral hygiene and oral care instruments and products in their work
Good 4	
Excellent 5	<ul style="list-style-type: none"> draw on their knowledge of the developmental phases and ordinary developmental disorders of teeth and justify their work with their underpinning knowledge related to the development and developmental disorders of teeth recognise a healthy mouth and the signs of a health mouth draw in their work on their knowledge of normal occlusion and the most common abnormalities of occlusion, justifying their work with the underpinning knowledge related to occlusion and abnormalities of occlusion master and draw on in their work diverse underpinning knowledge playing a key role in their work of nutrition, xylitol and fluorine, justifying their importance for oral health in different situations at work draw on the underpinning knowledge that is in key role for their work of oral hygiene and oral care instruments and products, justifying their work with their underpinning knowledge of oral health care.

Paying attention to oral illnesses and factors affecting them	
Students	
Satisfactory 1	<ul style="list-style-type: none"> recognise some of the most common oral illnesses and some of their causal factors recognise the connection between a systemic illness and oral health with their team recognise the connection between oral health and a systemic illness with their team recognise the effects of pharmaceuticals on oral health with their team know about the effects of substance abuse on oral health
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> recognise some of the most common oral illnesses and some of their causal factors recognise the connection between a systemic illness and oral health recognise the connection between oral health and a systemic illness recognise the effects of pharmaceuticals on oral health know about the effects of substance abuse on oral health and name some treatment options
Good 4	
Excellent 5	<ul style="list-style-type: none"> draw on their knowledge of the most common oral illnesses and factors causing them in their work draw on their knowledge of the connection between a systemic illness and oral health in their work draw on their knowledge of the connection between oral health and systemic illnesses in their work draw on their knowledge of the effects of pharmaceuticals on oral health

	<ul style="list-style-type: none"> • know about the effects of substance abuse on oral health, know different treatment options, and guide clients in accessing services.

• assess their possibilities of working as entrepreneurs. |
|--|---|

Methods of demonstrating competence

Students demonstrate their competence in practical oral health promotion duties by working in a practical nurse's tasks in oral health care environments. To the extent that the vocational competence specified for the unit cannot be assessed on the basis of the demonstration, the competence demonstration is to be supplemented in other ways on an individual basis, for example as a simulation.

2.29. Promoting participation in care for persons with disabilities, 35 Competence point (106244)

Competence requirements

Students know how to

- work in compliance with the statutes, operating principles and values applicable to the fields of education and social and health care and a practical nurse's ethical instructions
- plan their work and work in cooperation as members in a team and a network
- plan, implement and evaluate activities that promote participation
- interact with disabled clients and their close ones
- support clients' possibilities of communicating and expressing themselves
- promote clients' possibilities of influencing matters relevant to their lives
- promote participation and doing things together using the working methods, tools and materials of the field
- provide guidance in using services
- maintain and promote safety as well as their work ability and wellbeing at work
- assess and develop their activities.

Assessment

Students work in compliance with the statutes, operating principles and values applicable to the fields of education and social and health care and a practical nurse's ethical instructions.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • respect clients' fundamental and human rights • comply with the statutes and regulations applicable to the fields of education and social and health care • are familiar with the underlying values of working with persons with disabilities and observe the values of their occupation and a practical nurse's ethical instructions • comply with data protection, secrecy obligation and the principles of the Administrative Procedure Act and the Act on the Openness of Government Activities • work in compliance with regulations and quality recommendations applicable to self-monitoring • follow the principles of sustainable development
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • respect clients' fundamental and human rights • comply with the statutes and regulations applicable to the fields of education and social and health care

	<ul style="list-style-type: none"> • are familiar with the underlying values of working with persons with disabilities and observe the values of their occupation and a practical nurse's ethical instructions, justifying their actions • comply with data protection, secrecy obligation and the principles of the Administrative Procedure Act and the Act on the Openness of Government Activities • work in compliance with regulations and quality recommendations applicable to self-monitoring and justify their actions • follow the principles of sustainable development and justify their actions
Good 4	
Excellent 5	<ul style="list-style-type: none"> • respect clients' fundamental and human rights • comply with the statutes and regulations applicable to the fields of education and social and health care • are familiar with the underlying values of working with persons with disabilities and follow the values of their occupation and a practical nurse's ethical instructions, justifying their actions diversely • comply with data protection, secrecy obligation and the principles of the Administrative Procedure Act and the Act on the Openness of Government Activities • work in compliance with regulations and quality recommendations applicable to self-monitoring, justify their actions, and propose improvements • follow the principles of sustainable development, justify their actions and propose improvements.

Students plan their work and work in cooperation as members in a team and network.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • plan their daily tasks in cooperation with their team • make choices and decisions related to their work in cooperation with a team • work as members of multiprofessional teams and networks, following plans and complying with agreements • communicate professionally in the team and network • follow the workplace's instructions on the employees' communication, use of social media and image marketing
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • plan their tasks as indicated by clients' needs and circumstances • make choices and decisions related to their work and solve problems responsibly as team members • are familiar with some of the tasks and areas of responsibility of different professional groups and work responsibly as multiprofessional team and network members • communicate professionally and responsibly in the team and network • follow the workplace's instructions on the employees' communication, use of social media and image marketing
Good 4	
Excellent 5	<ul style="list-style-type: none"> • plan their tasks flexibly as indicated by clients' needs and circumstances and anticipate future activities in cooperation with the team and network

	<ul style="list-style-type: none"> • make choices and decisions related to their work and solve problems cooperatively and responsibly as team members • are diversely familiar with the tasks and areas of responsibility of different professional groups and work actively as multiprofessional team and network members • communicate professionally, actively and with initiative in the team and network • follow the workplace's instructions on the employees' communication, use of social media and image marketing.
--	--

Students plan, carry out and evaluate activities that promote participation.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • inform themselves about clients' resources, support needs and interests • set goals and plan activities together with clients • in the plans and activities, pay attention to clients' interests and habits and draw on their knowledge of participation • evaluate goal achievement together with clients
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • inform themselves about clients' resources, support needs and interests making use of different methods • set goals and plan activities together with clients and their close networks • plan and implement activities that promote participation with a client-oriented approach, drawing on their knowledge of participation • evaluate goal achievement together with clients and their close networks
Good 4	
Excellent 5	<ul style="list-style-type: none"> • inform themselves comprehensively about clients' resources, support needs and interests making use of different methods diversely • set goals and plan activities together with clients and their close networks, ensuring clients' participation through different means • plan and implement activities that promote participation with a client-oriented approach, drawing diversely on their knowledge of participation • evaluate goal achievement using different methods together with clients and their close networks.

Students interact with clients with disabilities and their close ones.

Professional interaction	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • work in professional interaction with clients and their close ones • notice clients' initiatives in interaction and respond to them • pay attention to gestures and body language in interactive situations • understand the effects of disabilities on clients' behaviour and adapt their expression • make use of plain language and express themselves clearly • to support interaction, use the possibilities provided by ICT appropriate for the situation

	<ul style="list-style-type: none"> • pay attention to the effects of language and culture on interaction and seek information about multiculturalism • encounter clients without predetermined gender expectations
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • work professionally and with initiative in interaction with clients and their close ones • notice even the smallest attempts to interact made by clients and respond to them • pay attention to gestures and body language in interactive situations • understand the effects of disabilities on clients' behaviour and adapt their expression to clients' communication skills • use plain language and express themselves clearly • to support interaction, use flexibly the possibilities provided by ICT appropriate for the situation • pay attention to the effects of language and culture on interaction and seek information about multiculturalism and ideas about people with disabilities in different cultures • work with gender sensitivity
Good 4	
Excellent 5	<ul style="list-style-type: none"> • work professionally and with initiative in interaction with clients and their close ones as required by the situation • notice even the smallest attempts to interact made by clients and respond to them, making sure they have understood the client • pay attention to gestures and body language in interactive situations • understand the effects of disabilities on clients' behaviour and adapt their expression individually to clients' communication skills • use plain language fluently and express themselves clearly • to support interaction, use diversely the possibilities provided by ICT appropriate for the situation • draw on their knowledge of multiculturalism and ideas about people with disabilities in different cultures in interaction, applying this knowledge to clients' individual situations • work with gender sensitivity and promote equality.

Using language skills in client service/ Field-specific language proficiency of Finnish speakers	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • serve customers in Finnish and manage the service situation tolerably well in Swedish and in one foreign language

Students promote participation and doing things together using the working methods, tools and materials of the field.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • encourage interactive situations and guide doing things together, drawing on their knowledge of leading groups and participation • guide action in social situations and use the possibilities offered by the surroundings

	<ul style="list-style-type: none"> • use creative and action-based methods to promote clients' participation • safeguard clients' mobility and opportunities for sensory, art and cultural experiences, drawing on their knowledge of clients' rights and methods that promote functional capacity • encourage clients to try new things • guide clients in civic participation, active citizenship and implementing their rights
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • encourage interactive situations and guide doing things together, reinforcing clients' membership in a group or community and drawing on their knowledge of leading groups and participation • guide action in social situations and, with a client-oriented approach, enable participation in different social situations, using the possibilities offered by the surroundings • use creative and action-based methods with a client-oriented approach to promote clients' participation • with a client-oriented approach, safeguard clients' mobility and opportunities for sensory, art and cultural experiences, drawing on their knowledge of clients' rights and methods that promote functional capacity • encourage and support clients in trying new things and discovering their abilities and interests • with a client-oriented approach, guide clients in civic participation, active citizenship and implementing their rights
Good 4	
Excellent 5	<ul style="list-style-type: none"> • in a goal-oriented manner, encourage interactive situations and guide doing things together, reinforcing clients' membership in a group or community and drawing on their knowledge of leading groups and participation • guide action in social situations with a goal-oriented approach and enable participation in different social situations according to clients' preferences and needs • use creative and action-based methods with a client-oriented approach and diversely to promote clients' participation • diversely and with a client-oriented approach, safeguard clients' mobility and opportunities for sensory, art and cultural experiences, drawing on their knowledge of clients' rights and methods that promote functional capacity • encourage and support clients in trying new things and discovering their abilities and interests, and support them in building a positive self-image • enhance clients' possibilities for civic participation, active citizenship and implementing their rights.

Students guide clients in using services.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • guide and support clients and their close ones in obtaining information about rights, benefits and services • guide and support clients and their close ones in accessing services, drawing on their knowledge of social, health, education, and employment services and third-sector services • guide and support clients in managing their affairs

	<ul style="list-style-type: none"> • as team members, participate in fulfilling the duty of providing guidance, making contact and reporting in social and health care • draw on multidisciplinary cooperation when directing clients to services
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • recognise service needs, and guide and support clients and their close ones in obtaining information about rights, benefits and services • guide and support clients and their close ones in making choices related to and accessing services, drawing on their knowledge of social, health, education, and employment services and third-sector services • guide and support clients in managing their affairs, taking clients' individual needs and resources into account • as team members, participate in fulfilling the duty of providing guidance, making contact and reporting in social and health care • draw on multidisciplinary cooperation when directing clients to services and guide clients in making use of experience experts and peer support
Good 4	
Excellent 5	<ul style="list-style-type: none"> • recognise diversely service needs, and guide and support clients and their close ones in obtaining information about rights, benefits and services • guide and support clients and their close ones in making choices related to and accessing services, drawing on their knowledge of social, health, education, and employment services and third-sector services with a client-oriented approach • with a client-oriented approach, guide and support clients in managing their affairs, paying attention to and building up clients' resources • as team members, participate in fulfilling the duty of providing guidance, making contact and reporting in social and health care • actively draw on multidisciplinary cooperation when directing clients to services, and guide clients in using experience experts and peer support.

Students maintain and promote safety as well as their work ability and wellbeing at work.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • follow occupational safety instructions • recognise safety risks and see to clients' safety • follow the principles of ergonomics • look after hygiene and work following aseptic principles • recognise key stress and risk factors and take them into account in their work • recognise feelings evoked by their work and seek peer support and guidance • contribute to maintaining a good work atmosphere
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • follow occupational safety instructions • recognise safety risks diversely and see to clients' safety • follow the principles of ergonomics, justifying their actions

	<ul style="list-style-type: none"> • look after hygiene and work following aseptic principles, justifying their actions • develop their work, addressing its key strain and risk factors • process professionally the feelings evoked by the work and make use of peer support and work guidance • contribute to maintaining and promoting to a good work atmosphere
Good 4	
Excellent 5	<ul style="list-style-type: none"> • follow occupational safety instructions • recognise safety risks diversely and see to clients' safety, justifying their decisions • follow the principles of ergonomics, justifying their actions and developing their work • look after hygiene and work following aseptic principles, justifying their actions diversely • develop their work, addressing its key strain and risk factors and justifying their actions • process professionally the feelings evoked by the work, making use of peer support and work guidance and justifying their importance for their coping • maintain and promote actively promote a good work atmosphere.

Students assess and develop their activities.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • assess their activities, recognise their strengths and development areas and set goals for their professional growth • receive feedback and modify their activities based on the feedback received by them • maintain and develop the knowledge and skills required in their occupation
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • assess their activities diversely, recognise their strengths and development areas and set goals for their professional growth • develop their activities based on feedback and the requirements of the work • maintain and develop the knowledge and skills required in their occupation and justify their work-related decisions by their professional knowledge
Good 4	
Excellent 5	<ul style="list-style-type: none"> • assess their activities diversely, recognise their strengths and development areas and set goals for their professional growth, justifying their actions • develop their activities based on feedback and the requirements of the work, justifying their actions • maintain and develop the knowledge and skills required in their occupation and justify their work-related decisions diversely by their professional knowledge.

Methods of demonstrating competence

Students demonstrate their competence in a practical nurse's task, in which they promote participation in care for persons with disabilities in environments where persons with disabilities live, study, work, are cared for or rehabilitated, or use services. To the extent that the vocational

competence required in the unit cannot be assessed on the basis of the demonstration, the competence demonstration is to be supplemented in other ways on an individual basis.

2.30. Maintaining and promoting functional capacity in care for persons with disabilities, 40 Competence point (106254)

Competence requirements

Students know how to

- work in compliance with the statutes, regulations and values applicable to the fields of education and social and health care and a practical nurse's ethical instructions
- plan their work and work together with a team and a network
- plan, carry out and evaluate the maintenance and promotion of disabled clients' functional capacity
- interact with disabled clients and their close ones
- use the working methods, tools and materials of the professional field in maintaining and promoting the functional capacity of disabled clients and in pharmaceutical care
- maintain and promote safety as well as their work ability and wellbeing at work
- assess their possibilities of working as welfare sector entrepreneurs
- assess and develop their activities.

Assessment

Students work in compliance with the statutes, regulations and values applicable to the fields of education and social and health care and a practical nurse's ethical instructions.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • respect clients' fundamental and human rights • comply with the statutes and regulations applicable to the fields of education and social and health care • observe the values of their occupation and follow a practical nurse's ethical instructions • comply with data protection, secrecy obligation and the principles of the Administrative Procedure Act and the Act on the Openness of Government Activities • work in compliance with regulations and quality recommendations applicable to self-monitoring • follow the principles of sustainable development
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • respect clients' fundamental and human rights • comply with the statutes and regulations applicable to the fields of education and social and health care, justifying their actions • observe the values of their occupation and follow a practical nurse's ethical instructions, justifying their actions • comply with data protection, secrecy obligation and the principles of the Administrative Procedure Act and the Act on the Openness of Government Activities • work in compliance with regulations and quality recommendations applicable to self-monitoring and justify their actions • follow the principles of sustainable development and justify their actions

Good 4	
Excellent 5	<ul style="list-style-type: none"> • respect clients' fundamental and human rights • comply with the statutes and regulations applicable to the fields of education and social and health care, justifying their actions diversely • observe the values of their occupation and follow a practical nurse's ethical instructions, justifying their actions diversely • comply with data protection, secrecy obligation and the principles of the Administrative Procedure Act and the Act on the Openness of Government Activities • work in compliance with regulations and quality recommendations applicable to self-monitoring, justify their actions, and propose improvements • follow the principles of sustainable development, justify their actions and propose improvements.

Students plan their work and work as team and network members.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • plan their daily tasks in cooperation with their team • make choices and decisions related to their work in cooperation their team • work as members of multiprofessional teams and networks, following plans and complying with agreements • communicate professionally in the team and network • follow the workplace's instructions on the employees' communication, use of social media and image marketing
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • plan their tasks as indicated by clients' needs and circumstances in cooperation with their team • make choices and decisions related to their work and solve problems in cooperation with their team • are familiar with some of the tasks and areas of responsibility of different professional groups and work responsibly as multiprofessional team and network members • communicate professionally and in a goal-oriented manner in the team and network • follow the workplace's instructions on the employees' communication, use of social media and image marketing
Good 4	
Excellent 5	<ul style="list-style-type: none"> • plan their tasks flexibly as indicated by clients' needs and circumstances and anticipate future activities in cooperation with the team and network • make choices and decisions related to their work and solve problems cooperation with their team, justifying their actions • are diversely familiar with the tasks and areas of responsibility of different professional groups and work actively as multiprofessional team and network members • communicate professionally and in a goal-oriented manner in the team and network, justifying their views • follow the workplace's instructions on the employees' communication, use of social media and image marketing.

Students plan, carry out and evaluate the maintenance and promotion of disabled clients' functional capacity.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • inform themselves about clients' functional capacity and support needs, drawing on their knowledge of different forms of disabilities, additional secondary disabilities and illnesses related to a disability • use some information collection method to describe a disabled client's functional capacity • are familiar with the process of drawing up client plans and participate in planning within a practical nurse's area of responsibility, working in cooperation with clients, their close networks and the team • work in line with a client plan's goals • report on and record observations regarding clients' condition and functional capacity comprehensively with a client-oriented approach and without putting client safety at risk • evaluate plan realisation and modify their activities based on the feedback received by them
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • inform themselves about clients' functional capacity and support needs, drawing on their knowledge of different forms of disabilities, additional secondary disabilities and illnesses related to a disability and a client's life course • use different information collection methods to describe a disabled client's functional capacity • are familiar with the process of drawing up client plans and participate actively in planning within a practical nurse's area of responsibility, working in cooperation with clients, their close networks and the team and supporting clients' and their close networks' participation • work in line with a client plan's goals and communicate their observations to the team and network • adeptly report on and record observations regarding clients' condition and functional capacity with a client-oriented approach and without putting client safety at risk • evaluate plan realisation together with clients, their close networks and the team and modify their activities based on the evaluation
Good 4	
Excellent 5	<ul style="list-style-type: none"> • inform themselves diversely about clients' functional capacity and support needs, drawing on their knowledge of different forms of disabilities, additional secondary disabilities and illnesses related to a disability and a client's life course • use different information collection methods diversely to describe a disabled client's functional capacity • are familiar with the process of drawing up client plans and participate in it within a practical nurse's area of responsibility, working in cooperation with clients, their close networks and the team and supporting diversely clients' and their close networks' participation • work actively and flexibly in line with a client plan's goals and communicate their observations to the team and network • report on and record observations regarding clients' condition and functional capacity actively and diversely with a client-oriented approach and without risking client safety • evaluate plan realisation comprehensively together with clients, their close networks and the team and modify their activities based on the evaluation.

Students interact with clients with disabilities and their close ones.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • encounter clients and their close networks appreciatively, listen and show interest, and respond to clients' initiatives in interaction • observe clients' facial expressions, gestures and body language • pay attention to the effects of their gestures and body language in interaction • observe clients' interaction skills and adapt their expression, drawing on their knowledge of the effects that disabilities have on interaction and communication skills • give clients time, space and support for expressing themselves and make sure that they are understood by clients • use plain language and methods that support and compensate for speech
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • encounter clients and their close networks appreciatively, listen and show interest, and respond appropriately to clients' different initiatives in interaction • observe clients' facial expressions, gestures and body language and interpret clients' body language as team members • pay attention to the effects of their gestures and body language in interaction and develop their non-verbal communication skills • observe clients' interaction skills and adapt their expression to clients' communication skills, drawing on their knowledge of the effects that disabilities have on interaction and communication skills • give clients time, space and support for expressing themselves and make sure that they are understood by clients using different methods • use plain language and communication methods that support and compensate for speech and guide clients and their close networks in their use
Good 4	
Excellent 5	<ul style="list-style-type: none"> • encounter clients and their close networks appreciatively, listen and show interest, and respond appropriately to clients' different initiatives in interaction, creating opportunities for continuing the interaction • observe clients' facial expressions, gestures and body language and interpret clients' body language with the team, showing sensitivity in interpreting messages • make use of gestures and body language with awareness and in a goal-oriented manner in their communication, justifying their actions by their knowledge of communication and interaction skills development • observe clients' interaction skills and adapt their expression to clients' communication skills, justifying their actions by their knowledge of the effects that disabilities have on interaction and communication skills • safeguard clients' right to express themselves in different situations and make sure by different means that they are understood by clients • use adeptly plain language and communication methods that support and compensate for speech and guide clients and their close networks in their use.

Students use the working methods, tools and materials of the professional field in maintaining and promoting the functional capacity of disabled clients and in pharmaceutical treatment.

Providing guidance in daily activities and home care	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • guide and support clients of varying ages in daily activities and home care tasks, paying attention to clients' functional capacity • work with a resource-oriented approach • take into account clients' cultural, religious and ethical customs in their work • support clients in learning new things and improving their skills and guide clients to use their skills in daily life
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • guide and support clients of varying ages individually in daily activities and home care tasks, paying attention to clients' functional capacity • work with a resource-oriented approach and strengthen clients' active agency • take into account clients' cultural, religious and ethical customs individually in their work • support clients individually in learning new things and improving their skills and guide clients to use their skills in daily life
Good 4	
Excellent 5	<ul style="list-style-type: none"> • guide and support clients of varying ages individually in daily activities and home care tasks, paying attention to clients' opinions, habits and functional capacity • work with a resource-oriented approach and strengthen clients' active agency in all everyday situations • take into account clients' cultural, religious and ethical customs comprehensively in their work, justifying their actions • support clients individually and diversely in learning new things and improving their skills and guide clients to use their skills in daily life.

Providing guidance in using and maintaining aids	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • are familiar with different aids and the process of purchasing them • observe the accessibility of surroundings and need for aids • guide clients in using and maintaining aids • support clients in using ICT and exploiting technology
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • are diversely familiar with different aids and the process of purchasing them • observe the accessibility of surroundings and discuss the functionality of the surroundings and need for aids with clients and their close ones • guide clients in using and maintaining aids and inform the team about any needs for changes • motivate and guide clients in using ICT and exploiting technology
Good 4	

Excellent 5	<ul style="list-style-type: none"> • are diversely familiar with different aids and the process of purchasing them, and apply this knowledge individually when working with clients • with a client-oriented approach, observe the accessibility of surroundings and discuss the functionality of the surroundings and need for aids with clients and their close ones • guide clients individually in using and maintaining aids and actively inform the team about their observations and any needs for changes • actively motivate and guide clients in using ICT and exploiting technology.
-------------	---

Providing pharmaceutical treatment	
Student	
Satisfactory 1	<ul style="list-style-type: none"> • work safely and as indicated by their area of responsibility, following the unit's and clients' pharmaceutical treatment plans • are familiar with the operating principles of the most common pharmaceutical databases and make use of these principles in their work • handle, dispense and administer pharmaceuticals to the client safely and without errors • pay attention to individual special issues related to administering pharmaceuticals • calculate dosages and unit conversions without errors • guide clients and their close networks following the work unit's instructions in interpreting an electronic prescription and its period of validity as well as using, storing and disposing of pharmaceuticals, and are familiar with the most common pharmaceutical treatments used in work with disabled clients • know and monitor the actions and interactions of the most common pharmaceuticals used by clients as well as polypharmacy, recognise the most common adverse and side effects, pay attention to possible drug abuse phenomena, and inform their teams about such phenomena orally
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • work safely and as indicated by their area of responsibility, following the unit's and clients' pharmaceutical treatment plans • use the most common pharmaceutical databases, understand their operating principles and make use of them in their work • handle, dispense and administer pharmaceuticals to the client safely and without errors • pay attention to individual special issues related to administering pharmaceuticals • calculate dosages and unit conversions without errors • guide clients and their close networks following the work unit's instructions in interpreting an electronic prescription and its period of validity as well as using, storing and disposing of pharmaceuticals, and are familiar with the pharmaceutical treatments used in work with disabled clients • know and monitor the actions and interactions of the most common pharmaceuticals used by clients as well as polypharmacy, recognise the most common adverse and side effects, pay attention to possible drug abuse phenomena, inform their teams about such phenomena and prevent them

Students maintain and promote safety as well as their work ability and wellbeing at work.

Paying attention to wellbeing at work and occupational safety	
Students	
Satisfactory 1	<ul style="list-style-type: none"> are familiar with the workplace's safety plan and practices for reporting hazardous situations and act as required by them comply with instructions and regulations on wellbeing at work and occupational safety contribute to the wellbeing of their work community and understand the effects of the atmosphere on client satisfaction
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> are familiar with the workplace's safety plan and practices for reporting hazardous situations and act as required by them, preventing risks comply with instructions and regulations on wellbeing at work and occupational safety contribute to maintaining a good atmosphere in the work community, are willing to promote it, and understand the effects of the work community's atmosphere on client satisfaction
Good 4	
Excellent 5	<ul style="list-style-type: none"> are familiar with the workplace's safety plan and practices for reporting hazardous situations and act as required by them, preventing risks and justifying their actions comply with instructions and regulations on wellbeing at work and occupational safety contribute to maintaining a good atmosphere in the work community, are willing to promote it, bring up development proposals, and understand the effects of the work community's atmosphere on client satisfaction.

Working aseptically and ergonomically	
Students	
Satisfactory 1	<ul style="list-style-type: none"> follow the principles of aseptic and ergonomic working methods recognise situations that cause physical and mental strain in their work use the body's natural movement patterns and control their body when assisting clients with mobility and transfers recognise clients' resources when transferring them

	<ul style="list-style-type: none"> • use aids safely when transferring clients
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • follow the principles of aseptic and ergonomic working methods • recognise factors that cause physical and psychological strain in their work and strive to prevent them • use the body's natural movement patterns appropriately and control their body when assisting clients with mobility and transfers • recognise and draw on clients' resources when transferring them • use aids safely and adeptly when transferring clients
Good 4	
Excellent 5	<ul style="list-style-type: none"> • follow the principles of aseptic and ergonomic working methods • recognise factors that cause physical and mental strain in their work and reduce them, justifying their actions • actively use the body's natural movement patterns and control their body when assisting clients with mobility and transfers • activate clients' resources when transferring them • use aids safely and adeptly when transferring clients and justify their actions.

Students assess their possibilities of working as wellbeing sector entrepreneurs.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • plan the productisation of their expertise • work responsibly and understand the effect of their work on the activities of the workplace and the quality of the services in daily work with customers • work to promote the achievement of objectives • assess their possibilities of working as entrepreneurs
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • plan and find out about possibilities of productising their competence in their work • work responsibly and pay attention to the effect of their work on the activities of the workplace and the quality of services in daily work with clients • work to promote the achievement of objectives and scale their work according to the objectives • assess their possibilities of working as entrepreneurs
Good 4	
Excellent 5	<ul style="list-style-type: none"> • actively plan and develop their capacities to work as entrepreneurs and realistically assess the possibilities of productising their competence • work responsibly, pay attention to the effect of their work on the activities of the workplace and the quality of services in daily work with clients, and modify their actions flexibly as required by the situation • work to promote diversely the achievement of objectives and scale their work according to the objectives • assess their possibilities of working as entrepreneurs.

Students assess and develop their activities.

Students

Satisfactory 1	<ul style="list-style-type: none"> • evaluate their learning and competence • recognise some of their strengths and development needs • maintain and develop the knowledge and skills required in their occupation • receive and give feedback appropriately and make use of the feedback they receive in their activities • use evidence-based knowledge in their work and search for information in reliable sources
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • assess their learning and competence realistically • recognise their strengths and development areas • maintain and develop the knowledge and skills required in their occupation • receive and give feedback appropriately, develop their activities on the basis of the feedback they receive and ask for guidance as necessary • use evidence-based knowledge in their work, justifying their actions by their knowledge, and seek information in reliable sources
Good 4	
Excellent 5	<ul style="list-style-type: none"> • assess their learning and competence realistically and diversely • recognise their strengths and development areas and are motivated to develop themselves and their competence • maintain and develop the knowledge and skills required in their occupation • receive and give feedback appropriately, develop their work actively and ask for guidance as necessary • use evidence-based knowledge in their work, justifying their actions by their knowledge diversely, and actively seek information in reliable sources.

Methods of demonstrating competence

Students demonstrate their competence in a practical nurse's task where they maintain and promote disabled clients' functional capacity in environments in which persons with disabilities live, study, work, are cared for or rehabilitated, or use services. To the extent that the vocational competence required in the unit cannot be assessed on the basis of the demonstration, the competence demonstration is to be supplemented in other ways on an individual basis.

2.31. Promotion of health, safety and wellbeing, 25 Competence point (106251)

Competence requirements

Students know how to

- work in compliance with the statutes, operating principles, values and ethical instructions applicable to the social and health care field
- plan their work and work together with a team
- plan, carry out and evaluate client care regarding the promotion of health, safety and wellbeing
- interact with clients
- use the working methods, tools and materials of the professional field to promote clients' health, safety and wellbeing
- provide information about services

- maintain safety as well as their work ability and wellbeing at work
- assess and develop their activities
- assess their possibilities of working as welfare sector entrepreneurs.

Assessment

Students work in compliance with the statutes, operating principles, values and ethical instructions applicable to the social and health care field.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • comply with the statutes applicable to the social and health care field, the unit's values, ethical principles, operating instructions and key values that direct care work with their team • work safely with their team, following the operating principles and recommendations relevant to the client group • comply with data protection and secrecy obligation in their work • familiarise themselves with different self-monitoring plans in the workplace and carry out self-monitoring in the unit with their team • follow the principles of sustainable development
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • comply with the statutes applicable to the social and health care field, the unit's values, ethical principles, operating instructions and key values that direct care work • work safely following the operating principles and recommendations relevant to the client group • comply with data protection and secrecy obligation in their work • familiarise themselves with different self-monitoring plans in the workplace and carry out self-monitoring in the unit • follow the principles of sustainable development and justify their actions
Good 4	
Excellent 5	<ul style="list-style-type: none"> • comply with the statutes applicable to the social and health care field, the unit's values, ethical principles, operating instructions and key values that direct care work, justifying their actions • work safely following the operating principles and recommendations relevant to the client group, justifying their actions by these principles and recommendations • comply with data protection and secrecy obligation in their work • actively familiarise themselves with different self-monitoring plans in the workplace and carry out self-monitoring in the unit • follow the principles of sustainable development, justify their actions and propose improvements.

Students plan their work and work together with their team.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • plan their daily tasks in cooperation with their team • as team members, recognise the needs that clients of varying ages and with different backgrounds have related to health, safety and wellbeing • work with a service-minded and client-oriented approach • work reliably as team members and follow the team's rules and operating principles

	<ul style="list-style-type: none"> • observe working hours, agreements and other workplace practices • comply with their workplace's instructions on communication
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • plan their daily tasks taking into account the workplace's weekly work plans • independently recognise the needs that clients of varying ages and with different backgrounds have related to health, safety and wellbeing • work naturally and with a service-minded and client-oriented approach • work reliably as team members and follow the team's rules and operating principles responsibly • observe working hours, agreements and other workplace practices • comply with their workplace's instructions on communication
Good 4	
Excellent 5	<ul style="list-style-type: none"> • plan their daily and weekly tasks, taking into account any other plans for the workplace's activities • diversely and independently recognise the needs that clients of varying ages and with different backgrounds have related to health, safety and wellbeing, finding realistic solution alternatives for them • work naturally, with a service-minded and client-oriented approach and appropriately in different situations • work responsibly, flexibly and with initiative as team members, following common operating principles • observe working hours, agreements and other workplace practices • comply with their workplace's instructions on communication.

Students plan, carry out and evaluate client care regarding the promotion of health, safety and wellbeing.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • recognise clients' resources and needs and make use of them when planning the work with the team • plan goals for their activities together with clients, their close networks and the team and follow the plan in their work with the team • as team members, participate in drawing up plans for clients to promote their health, safety and wellbeing together with clients • implement the plans together with their team • with their team, record their observations in a client-specific plan, using the Finnish Care Classification • evaluate the implementation of a client-specific plan • pass on information about their observations orally and in writing, paying attention to information security • use the client information systems of their work community and social and health care databases
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • recognise clients' resources and needs, making use of different information collection methods • independently plan goals for their activities together with clients, their close networks and the team and follow the plan in their work with the team

	<ul style="list-style-type: none"> • as team members, draw up plans aiming to promote their health, safety and wellbeing together with the clients and the team • implement the plan with justifications • record observations in a client-specific plan, using the Finnish Care Classification • evaluate the implementation of a client-oriented plan realistically • appropriately pass on information about their observations orally and in writing, paying attention to information security • adeptly use the client information systems of their work communities and social and health care databases
Good 4	
Excellent 5	<ul style="list-style-type: none"> • recognise clients' resources and needs diversely, making use of different information collection methods • independently and diversely plan goals for their activities together with clients, their close networks and the team and follow the plan in their work actively and flexibly with the team • draw up a plan aiming to promote a client's health, safety and wellbeing together with the client and propose changes in it as necessary • implement the plan flexibly and with justifications • independently record observations in a client-specific plan, using the Finnish Care Classification • evaluate the implementation of a client-oriented plan realistically and comprehensively • adeptly and appropriately pass on information about their observations orally and in writing, paying attention to information security • adeptly and diversely use the client information systems of their work community and social and health care databases.

Students interact with clients.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • listen to and observe clients and discuss clients' needs with them • encounter clients and their close networks professionally, appreciatively and respectfully • respect people of varying ages and those who communicate differently or have different cultural backgrounds and beliefs, and pay attention to the diversity of clients' sexuality • use interaction, touch and presence to improve clients' condition • understand clients' and their close networks' messages and respond to them • express themselves comprehensibly both orally and in writing, using plain language if necessary • use communication methods and tools that support and compensate for speech • to support interaction, use some possibilities provided by ICT appropriate for the situation
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • listen to and observe clients and discuss clients' needs with them, paying attention to clients' life situations • encounter clients and their close networks professionally, appreciatively, individually, genuinely and with understanding

	<ul style="list-style-type: none"> • respect people of varying ages and those who communicate differently or have different cultural backgrounds and beliefs, and pay attention to the diversity of clients' sexuality • use their interaction skills, touch and presence flexibly to improve clients' condition • understand clients' and their close networks' messages and respond to them with a client-oriented approach • express themselves comprehensibly and clearly, both orally and in writing, using plain language if necessary • use communication methods and tools that support and compensate for speech • to support interaction, use flexibly the possibilities provided by ICT appropriate for the situation
Good 4	
Excellent 5	<ul style="list-style-type: none"> • listen to and observe clients and naturally discuss clients' needs with them, paying attention to clients' life situations diversely • encounter clients and their close networks professionally, appreciatively, individually, genuinely, with understanding and creating a feeling of safety • respect people of varying ages and those who communicate differently or have different cultural backgrounds and beliefs, and pay attention to the diversity of clients' sexuality • use their interaction skills, touch and presence diversely and flexibly to improve clients' condition in different situations when providing care • understand clients' and their close networks' messages and respond to them professionally and with a client-oriented approach • express themselves comprehensibly and clearly, both orally and in writing, using plain language if necessary • use communication methods and tools that support and compensate for speech • to support interaction, use flexibly and diversely the possibilities provided by ICT appropriate for the situation.

Students use the working methods, tools and materials of the professional field to promote clients' health, safety and wellbeing.

Providing care and attention	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • recognise and prevent clients' public health risks and accidents as team members • promote clients' physical and mental health, safety and wellbeing with their team • provide care and attention and look after clients' basic needs with their team • follow the principles of aseptic working methods • take basic measurements • as team members, observe and assess the normal vital functions of people of different ages, observe changes and inform their team • use information collection methods to inform themselves of how clients cope with daily activities, record their observations and pass on information as agreed • handle food and foodstuffs in compliance with food hygiene requirements, taking clients' nutritional needs into account
Satisfactory 2	

Good 3	<ul style="list-style-type: none"> • recognise and prevent clients' public health risks and accidents • promote the physical and mental health, safety and wellbeing of different clients of varying ages • provide care and attention with a client-oriented and needs-based approach and, with justifications, guide, encourage and assist clients in looking after their basic needs • follow the principles of aseptic working methods • take basic measurements with justifications, paying attention to changes in measurement results caused by illnesses • use different methods to observe and assess the normal vital functions of people of different ages, observe changes and inform their team appropriately • use versatile information collection methods to inform themselves of how clients cope with daily activities, record their observations and pass on information diversely • handle food and foodstuffs in compliance with food hygiene requirements, taking clients' nutritional needs into account
Good 4	
Excellent 5	<ul style="list-style-type: none"> • recognise and prevent clients' public health risks and accidents and guide clients in preventing them • diversely promote the physical and mental health, safety and wellbeing of different clients of varying ages • provide care and attention with a client-oriented and needs-based approach as multiprofessional team members and guide, encouraging and assisting clients in looking after their basic needs, justifying their assistance by evidence-based knowledge • provide care and attention with a client-oriented and needs-based approach as multiprofessional team members and guide, encouraging and assisting clients in looking after their basic needs, justifying their assistance by evidence-based knowledge • follow the principles of aseptic working methods • take basic measurements with justifications, paying attention to changes in measurement results caused by illnesses, and take into account potential sources of error affecting the results • use, evaluate and interpret different methods of observing and assessing the normal vital functions of people of different ages, observe changes and inform their team appropriately and with justifications • independently and using diverse information collection methods, inform themselves of how clients cope with daily activities, record their observations and pass on information consistently • handle food and foodstuffs in compliance with food hygiene requirements, taking clients' nutritional needs into account diversely.

Using technology and aids in supporting clients' participation

Students

Satisfactory 1	<ul style="list-style-type: none"> • see to the safety of clients and operating environments, and anticipate potential safety risks and hazardous situations in their work • make use of technology that supports wellbeing and functional capacity • are familiar with the structure and bodily functions of a healthy person and the principles of assisting clients with mobility • guide clients in using aids
----------------	--

	<ul style="list-style-type: none"> • enable clients to participate in suitable physical and outdoor activity • activate clients, using action-based methods • guide, encourage and assist clients in being active
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • see to the safety of clients and operating environments, and anticipate potential safety risks and hazardous situations in their work • guide clients in the use and maintenance of technology that supports wellbeing and functional capacity and take advantage of the possibilities provided by wellbeing technology in their work • are familiar with the structure and bodily functions of a healthy person and the principles of assisting clients with mobility • guide clients in the use and maintenance of aids • guide clients to suitable physical activity and enable them to participate in outdoor activity as part of care and attention • activate clients, using action-based methods diversely • guide clients and encourage them to be active, supporting participation
Good 4	
Excellent 5	<ul style="list-style-type: none"> • see to the safety of clients and operating environments, and anticipate any safety risks and hazardous situations in their work • guide clients diversely in the use and maintenance of technology that supports wellbeing and functional capacity, identifying and obtaining the technology needed by a client • are familiar with the structure and bodily functions of a healthy person and the principles of assisting clients with mobility • guide clients diversely in the use and maintenance of aids and prevent hazardous situations associated with the aids • actively offer clients opportunities for suitable physical and outdoor activity and realise them as part of the care and attention • activate clients, using action-based methods diversely and creatively • guide, encourage and assist clients diversely to be active and support participation, taking clients' close networks into consideration.

Students provide information about services.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • obtain information about services needed by clients • with their team, provide clients and their close networks with information about the services and benefits in the field of social and health care • as team members, support clients' health, safety and wellbeing by guiding them to use the services they need • as team members, participate in fulfilling the duty of providing guidance, making contact and reporting in social and health care
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • with justifications, obtain information about services needed by clients, taking advantage of clients' close networks

	<ul style="list-style-type: none"> • provide clients and their close networks with information about services and benefits in the field of social and health care • support clients' health, safety and wellbeing by guiding them to use the services they need • as team members, participate in fulfilling the duty of providing guidance, making contact and reporting in social and health care
Good 4	
Excellent 5	<ul style="list-style-type: none"> • comprehensively and with justifications, obtain information about services needed by clients, working in cooperation with clients' close networks and taking clients' life situations into consideration • provide clients and their close networks with diverse information about services and benefits in the field of social and health care • work to promote clients' health, safety and wellbeing and guide them to use diversely the services they need • as team members, participate in fulfilling the duty of providing guidance, making contact and reporting in social and health care.

Students maintain safety as well as their functional capacity and wellbeing at work.

Maintaining client safety	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • as team members, work in compliance with statutes and operating principles relevant to wellbeing at work and occupational safety, following the work unit's safety plan • follow hygiene instructions and the principles of aseptic working methods • pay attention to legislation on the prevention of communicable diseases and prevent the spread of infections • with their team, see to clients' safety, and functional capacity and safety in their environments • with their team, maintain equipment and the care environment and contribute to keeping the working environment tidy and topping up the necessary materials • work following the principles of ergonomics and use different techniques for transferring clients safely, taking advantage of the client's functional capacity • recognise the effects of their activities on ensuring client safety
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • work in compliance with statutes and operating principles related to wellbeing at work and occupational safety, complying with the work unit's safety plan and practices for reporting hazardous situations, and act as required by them • follow hygiene instructions and the principles of aseptic working methods • pay attention to legislation on the prevention of communicable diseases and prevent the spread of infections • see to clients' safety and functional capacity and safety in their environments • maintain equipment and the care environment and contribute to keeping the working environment tidy and topping up the necessary materials

	<ul style="list-style-type: none"> • work following the principles of ergonomics and use different techniques for transferring clients safely and appropriately, taking advantage of the client's functional capacity • recognise and assess the effects of their activities on client safety and the promotion of different clients' health, safety and wellbeing
Good 4	
Excellent 5	<ul style="list-style-type: none"> • work in compliance with statutes and operating principles related to wellbeing at work and occupational safety, complying with the work unit's safety plan and practices for reporting hazardous situations, and act as required by them, preventing risks • follow hygiene instructions and the principles of aseptic working methods • pay attention to legislation on the prevention of communicable diseases and prevent the spread of infections • independently see to clients' safety and functional capacity and safety in their environments • maintain equipment and the care environment responsibly, and independently keep the working environment tidy and top up the necessary materials • work following the principles of ergonomics and use different techniques for transferring clients safely, appropriately and diversely, taking advantage of the client's functional capacity • recognise and assess the effects of their activities on clients safety and the promotion of different clients' health, safety and wellbeing, contributing to preventing adverse events.

Maintaining wellbeing at work	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • take responsibility for their wellbeing at work, occupational safety and work ability • recognise factors causing psychological strain in their work • recognise clients or their close network members with challenging behaviours in their work and inform their team of such persons • recognise some factors causing physical strain in care work • draw up a goal-oriented exercise programme to maintain and improve their physical fitness (stamina, strength and flexibility) and follow it • follow the principles of ergonomics and take care of their and their clients' safety and functional capacity • understand the importance of ergonomics in preventing musculoskeletal problems
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • take responsibility for their wellbeing at work, occupational safety and work ability and work to prevent potential harms • recognise factors causing psychological strain in their work and the impacts of these factors on their wellbeing at work • recognise clients or their close network members with challenging behaviours in their work, inform their team of such persons, and act as required in the situation • recognise factors causing physical strain in their work and the impacts of these factors on their wellbeing at work

	<ul style="list-style-type: none"> • draw up a goal-oriented exercise programme to maintain and improve their physical fitness (stamina, strength and flexibility), follow it and monitor its effects • follow the principles of ergonomics and take care of their and their clients' safety and functional capacity, paying attention to work-related accidents and injuries • understand the importance of ergonomics in preventing musculoskeletal problems
Good 4	
Excellent 5	<ul style="list-style-type: none"> • actively take responsibility for their wellbeing at work, occupational safety and work ability and work to prevent potential harms • recognise factors causing psychological strain in their work and the impacts of these factors on their wellbeing at work, looking after their coping at work • recognise clients and their close network members with challenging behaviours in their work, act as required by the situation, inform their team and prevent the occurrence of challenging situations • recognise diversely factors causing physical strain in care work and strive to reduce them • draw up a goal-oriented exercise programme to maintain and improve their physical fitness (stamina, strength and flexibility), follow it and monitor its effects, modifying it as necessary • follow the principles of ergonomics in changing situations at work, take care of their and their clients' safety and functional capacity, justify their actions, and prevent work-related accidents and injuries • understand the importance of ergonomics in preventing musculoskeletal problems.

Students assess and develop their activities.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • assess their competence • recognise their strengths and development areas • receive and give feedback and use the feedback they receive in their activities • in problem situations, ask for guidance with initiative • maintain the knowledge, skills and work ability required by their occupation
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • realistically assess their competence • recognise their strengths and development areas realistically • receive and give feedback and actively develop their activities based on feedback they receive • work safely in changing and unclear situations and ask for guidance • maintain and develop the knowledge, skills and work ability required in their occupation and justify their work-related decisions by their professional knowledge
Good 4	
Excellent 5	<ul style="list-style-type: none"> • assess their competence realistically and diversely • realistically and diversely recognise their strengths and development areas and are motivated to improve their activities

	<ul style="list-style-type: none"> • receive and give feedback and actively develop their activities based on feedback they receive • work safely in changing and unclear situations, propose alternative solutions, and justify their decisions professionally • maintain and develop the knowledge, skills and work ability required in their occupation and justify their work-related decisions diversely by their professional knowledge.
--	---

Students assess their possibilities of working as wellbeing sector entrepreneurs.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • assess their possibilities of working as wellbeing sector entrepreneurs • supported by their team, make decisions in their work with an entrepreneurial spirit
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • assess their capabilities to work as entrepreneurs in the wellbeing sector • make decisions in their work with an entrepreneurial spirit
Good 4	
Excellent 5	<ul style="list-style-type: none"> • assess their capabilities to work as entrepreneurs in the wellbeing sector realistically and diversely • make decisions in their work with an entrepreneurial spirit, contributing proposals for improvements in the activities of the workplace's or sector's networks.

Methods of demonstrating competence

Students demonstrate their competence in practical tasks where they promote a client's health, safety and functional capacity while working in a health and social care environment in the tasks of a practical nurse/emergency practical nurse. To the extent that the vocational competence required in the unit cannot be assessed on the basis of the demonstration, the competence demonstration is to be supplemented in other ways on an individual basis.

2.32. Maintaining and promoting functional capacity, 30 Competence point (106253)

Competence requirements

Students know how to

- work in compliance with the statutes, operating principles, values and ethical instructions applicable to work in the social and health care field
- plan their work and work in cooperation with a team
- plan, carry out and evaluate the maintenance and promotion of clients' functional capacity
- interact with clients
- use the working methods, tools and materials of the vocational field to promote clients' functional capacity
- provide information about services
- maintain safety as well as their work ability and wellbeing at work
- assess and develop their activities.

Assessment

Students work in compliance with the legislation, operating principles, values and ethical principles applicable to the social and health care field.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • comply with the statutes applicable to the social and health care field, the unit's values, ethical principles, operating instructions and key values that direct care work • work safely with their team, following the operating principles and recommendations relevant to the client group • comply with data protection and secrecy obligation in their work • familiarise themselves with different self-monitoring plans in the workplace and carry out self-monitoring in the unit with their team • follow the principles of sustainable development
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • comply with the statutes applicable to the social and health care field, the unit's values, ethical principles, operating instructions and key values that direct care work • work safely following the operating principles and recommendations relevant to the client group • comply with data protection and secrecy obligation in their work • familiarise themselves with different self-monitoring plans in the workplace and carry out self-monitoring in the unit • follow the principles of sustainable development and justify their actions
Good 4	
Excellent 5	<ul style="list-style-type: none"> • comply with the statutes applicable to the social and health care field, the unit's values, ethical principles, operating instructions and key values that direct care work • work safely following the operating principles and recommendations relevant to the client group, justifying their actions by these principles and recommendations • comply with data protection and secrecy obligation in their work • actively familiarise themselves with different self-monitoring plans in the workplace and carry out self-monitoring in the unit • follow the principles of sustainable development, justify their actions and propose improvements.

Students plan their work and work in cooperation with their team.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • plan their daily tasks and schedules according to clients' needs and circumstances together with their team • draw on their knowledge of maintaining and promoting functional capacity in planning their work • work responsibly with a multiprofessional team in compliance the referrals given to them and participate in clients' treatment processes as team members
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • plan their daily tasks and schedules in cooperation with their team as indicated by clients' needs and circumstances, taking the unit's weekly work plans into account

	<ul style="list-style-type: none"> draw on their knowledge of maintaining and promoting functional capacity in planning their work and work as indicated by a client's care process in its different stages work responsibly as multiprofessional team members in compliance the referrals given to them
Good 4	
Excellent 5	<ul style="list-style-type: none"> plan their daily and weekly tasks and schedules in cooperation with their team as indicated by clients' needs and circumstances, taking the unit's other operational plans into account draw diversely on their evidence-based knowledge of maintaining and promoting functional capacity in planning their work, understand it and apply it to a client's care process as a whole, justifying their actions work responsibly, flexibly and with initiative as multiprofessional team members in compliance referrals given to them.

Students plan, carry out and evaluate the maintenance and promotion of clients' functional capacity.

Students	
Satisfactory 1	<ul style="list-style-type: none"> recognize clients' resources and needs, plan goals together with clients, their close networks and the team, and follow the plan in their work as team members as team members, participate in drawing up plans to promote and maintain clients' functional capacity together with clients implement the plan with their team with their team, record their observations in a client-specific plan, using the Finnish Care Classification evaluate the implementation of a client-specific plan pass on information about their observations orally and in writing, paying attention to data security use the client information systems of their work community and the social and health care information networks in a practical nurse's area of responsibility
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> recognize diversely clients' resources and needs, plan goals together with clients, their close networks and the team, and follow the plan in their work as team members as team members, draw up client-oriented plans aiming to maintain and promote a client's functional capacity together with the client with justifications, implement the plan as team members record their observations in a client-specific plan, using the Finnish Care Classification evaluate the implementation of a client-oriented plan realistically appropriately pass on information about their observations orally and in writing, paying attention to data security and justifying their actions adeptly use the client information systems of their work community and the social and health care information networks in a practical nurse's area of responsibility
Good 4	
Excellent 5	<ul style="list-style-type: none"> recognize diversely clients' resources and needs, plan goals together with clients, their close networks and the team, and work actively and flexibly as team members following the plan

	<ul style="list-style-type: none"> • as team members, draw up client-oriented and diverse plans aiming to maintain and promote a client's functional capacity together with the client • implement the plan flexibly and with justifications • with justifications, record their observations in a client-specific plan, using the Finnish Care Classification • evaluate the implementation of a client-oriented plan realistically and comprehensively • adeptly and appropriately pass on information about their observations orally and in writing, paying attention to data security and justifying their actions diversely • adeptly use the client information systems of their work community and the social and health care information networks in a practical nurse's area of responsibility.
--	---

Students interact with clients.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • listen to and observe clients and discuss clients' needs with them • encounter clients and their close networks professionally, appreciatively and respectfully • respect people of varying ages and those who communicate differently or have different cultural backgrounds and beliefs, and pay attention to the diversity of clients' sexuality • use interaction, touch and presence to improve clients' condition when caring for clients • use communication methods and tools that support and compensate for speech and plain language • to support interaction, use some possibilities provided by ICT
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • listen to and observe clients and discuss clients' needs with them showing initiative, paying attention to clients' life situations • encounter clients and their close networks professionally, appreciatively, individually, genuinely and with understanding • respect people of varying ages and those who communicate differently or have different cultural backgrounds and beliefs, and pay attention to the diversity of clients' sexuality • use their interaction skills, touch and presence flexibly to improve clients' condition when caring for clients • use communication methods and tools that support and compensate for speech and plain language, paying attention to clients' needs • to support interaction, use flexibly the possibilities provided by ICT appropriate for the situation
Good 4	
Excellent 5	<ul style="list-style-type: none"> • listen to and observe clients and discuss their needs with clients naturally and showing initiative, paying attention to clients' life situations diversely • encounter clients and their close networks professionally, appreciatively, individually, genuinely, with understanding and creating a feeling of safety • respect people of varying ages and those who communicate differently or have different cultural backgrounds and beliefs, and pay attention to the diversity of clients' sexuality

	<ul style="list-style-type: none"> • use their interaction skills, touch and presence diversely and flexibly to improve clients' condition in different situations when providing care • use communication methods and devices that support and compensate for speech and plain language with a client-oriented approach • to support interaction, use flexibly and diversely the possibilities provided by ICT appropriate for the situation.
--	---

Students use the working methods, tools and materials of the vocational field in maintaining and promoting clients' functional capacity and in pharmaceutical treatment.

Assessing clients' functional capacity and treating their illnesses	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • with their team, assess and recognise changes in a client's condition, functional capacity and basic care needs and launch the activities indicated by them, drawing on their knowledge of human body, anatomy and physiology, basic care and functional capacity, memory disorders, chronic diseases as well as mental health and substance abuse disorders • monitor a client's vital functions using different examination methods • plan and provide the basic care needed by a client with their team • safely and with a work approach aiming to promote functional capacity, support and assist clients in coping with their daily activities • evaluate changes in a client's functional capacity and the implementation of basic care with their team • follow the principles of aseptic working methods • start life-saving actions, drawing on their knowledge of human anatomy, physiology and vital functions • recognise clients' suffering and pain and provide pharmacological and non-pharmacological pain management to relieve symptoms • comply with the client's living will • know the principles of terminal care and caring for a dying client and follow them as members of a multiprofessional team
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • assess and recognise changes in a client's condition, functional capacity and basic care needs and launch the activities indicated by them, drawing on their knowledge of human body, anatomy and physiology, basic care and functional capacity, memory disorders, chronic diseases as well as mental health and substance abuse disorders • monitor a client's vital functions using different examination methods • independently plan and provide the basic care needed by a client • safely, diversely and with a work approach aiming to promote functional capacity, support and assist clients in coping with their daily activities • evaluate changes in a client's functional capacity and the implementation of basic care • follow the principles of aseptic working methods • start life-saving actions, drawing on their knowledge of human anatomy, physiology and vital functions

	<ul style="list-style-type: none"> • recognise clients' suffering and pain and provide pharmacological and non-pharmacological pain management to relieve symptoms, monitoring their effects on pain • comply with the client's living will • know the principles of terminal care and caring for a dying client and follow them as members of a multiprofessional team
Good 4	
Excellent 5	<ul style="list-style-type: none"> • assess and recognise changes in a client's condition, functional capacity and basic care needs and launch the activities indicated by them, diversely drawing on their knowledge of human body, anatomy and physiology, basic care and functional capacity, memory disorders, chronic diseases as well as mental health and substance abuse disorders • monitor a client's vital functions using different examination methods • independently plan and provide the basic care needed by a client, modifying their activities as the client's circumstances change • safely, diversely and with a client-oriented work approach that aims to promote functional capacity, support and assist clients in coping with their daily activities • diversely assess changes in a client's functional capacity and the implementation of basic care • follow the principles of aseptic working methods • start life-saving actions, drawing on their knowledge of human anatomy, physiology and vital functions • recognise clients' suffering and pain and provide pain management to relieve symptoms, monitoring its effects on pain and justifying their actions by their evidence-based knowledge • comply with the client's living will • know the principles of terminal care and caring for a dying client and follow them as members of a multiprofessional team.

Making use of technology and aids in maintaining and promoting functional capacity	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • use safely aids that maintain and promote functional capacity, examination methods and equipment, and the possibilities offered by technology as team members • assess potential factors causing errors in measurements and their results • prepare clients for examinations and assist in procedures as team members, working aseptically and safely
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • independently and safely use aids that maintain and promote functional capacity, examination methods and equipment, health care devices and the possibilities offered by technology • assess potential factors causing errors in measurements, take them into account in their work and take corrective action • prepare clients for examinations and assist in procedures as team members, working aseptically and safely and justifying their actions
Good 4	
Excellent 5	<ul style="list-style-type: none"> • independently, diversely and safely use aids that maintain and promote functional capacity, examination methods and

	<p>equipment, health care devices and the possibilities offered by technology diversely</p> <ul style="list-style-type: none"> • recognise potential factors causing errors in measurement results and take corrective action, justifying their actions with evidence-based knowledge • prepare clients for examinations and assist in procedures as team members, working aseptically and safely, justifying their actions diversely.
--	--

Providing pharmaceutical treatment	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • work safely and as indicated by their area of responsibility, following the unit's and clients' pharmaceutical treatment plans • are familiar with the operating principles of the most common pharmaceutical databases and make use of these principles in their work • know the most common groups of medicines and the pharmaceuticals and pharmaceutical forms used to treat memory disorders, chronic diseases and mental health and substance abuse disorders • calculate dosages and unit conversions without errors • handle and dispense pharmaceuticals to the client safely and without errors • following instructions, administer pharmaceuticals through natural routes of administration, subcutaneously, with intramuscular injection and by inhalation • with their team, guide clients and their close networks following the working unit's instructions in interpreting an electronic prescription and its period of validity as well as using, storing and disposing of pharmaceuticals • observe the actions and interactions of the medication in use, as well as polypharmacy, recognise the most common adverse and side effects, pay attention to possible drug abuse phenomena and inform their team about them
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • work safely and as indicated by their area of responsibility, following the unit's and clients' pharmaceutical treatment plans • use the most common pharmaceutical databases, understand their operating principles and make use of them in their work • know the most common groups of medicines and the pharmaceuticals and pharmaceutical forms used to treat memory disorders, chronic diseases and mental health and substance abuse disorders • calculate dosages and unit conversions without errors • handle and dispense pharmaceuticals to the client safely and without errors • following instructions, administer pharmaceuticals through natural routes of administration, subcutaneously, with intramuscular injection and by inhalation • as team members, guide clients and their close networks following the working unit's instructions in interpreting an electronic prescription and its period of validity as well as using, storing and disposing of pharmaceuticals • actively observe the actions and interactions of the medication in use, as well as polypharmacy, recognise the most common adverse and side effects, pay attention to possible drug abuse phenomena and inform their team about them

Good 4	
Excellent 5	<ul style="list-style-type: none"> • work safely and as indicated by their area of responsibility, following the unit's and clients' pharmaceutical treatment plans • use pharmaceutical databases, understand their operating principles and make use of them actively in their work • know the most common groups of medicines and the pharmaceuticals and pharmaceutical forms used to treat memory disorders, chronic diseases and mental health and substance abuse disorders • calculate dosages and unit conversions without errors • handle and dispense pharmaceuticals to the client safely and without errors • following instructions, administer pharmaceuticals through natural routes of administration, subcutaneously, with intramuscular injection and by inhalation • actively guide clients and their close networks following the working unit's instructions in interpreting an electronic prescription and its period of validity as well as using, storing and disposing of pharmaceuticals • actively observe the actions and interactions of the medication in use, as well as polypharmacy, recognise the most common adverse and side effects, pay attention to possible drug abuse phenomena, inform their teams about such phenomena and prevent them.

Students provide information about services.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • inform clients and their close networks about social and health services with their team • are familiar with clients' critical paths and service chains • work in multidisciplinary cooperation to ensure the continuity of a client's treatment with their team
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • inform clients and their close networks appropriately about social and health services • are familiar with clients' critical paths and service chains • with a client-oriented approach, work in multidisciplinary cooperation to ensure the continuity of a client's treatment
Good 4	
Excellent 5	<ul style="list-style-type: none"> • with a client-oriented approach, inform clients and their close networks appropriately about social and health services • are familiar with clients' critical paths and service chains • appropriately and with a client-oriented approach, work in multidisciplinary cooperation to ensure the continuity of a client's treatment.

Students maintain safety as well as their functional capacity and wellbeing at work.

Maintaining client safety	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • as team members, work in compliance with statutes and operating principles related to wellbeing at work and occupational safety, complying with the working unit's safety

	<p>plan and practices for reporting hazardous situations, and act as required by them</p> <ul style="list-style-type: none"> • follow hygiene practices and the principles of aseptic working methods • pay attention to legislation on the prevention of communicable diseases and prevent the spread of infections • as team members, see to the safety and accessibility of the surroundings • with their team, care for equipment and the care environment and contribute to keeping the working environment tidy and topping up the necessary materials • work following the principles of ergonomics and use different techniques for transferring clients safely, taking advantage of the client's functional capacity • recognise the effects of their activities on ensuring client safety
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • work in compliance with statutes and operating principles related to wellbeing at work and occupational safety, complying with the working unit's safety plan and practices for reporting hazardous situations, and act as required by them • follow hygiene practices and the principles of aseptic working methods • pay attention to legislation on the prevention of communicable diseases and prevent the spread of infections • see to the safety and accessibility of the surroundings • care for equipment and the care environment and contribute to keeping the working environment tidy and topping up the necessary materials • work following the principles of ergonomics and use different techniques for transferring clients safely and appropriately, taking advantage of the client's functional capacity • recognise and assess the effects of their actions on client safety in the promotion and maintenance of different clients' functional capacity
Good 4	
Excellent 5	<ul style="list-style-type: none"> • work in compliance with statutes and operating principles related to wellbeing at work and occupational safety, complying with the working unit's safety plan and practices for reporting hazardous situations, and act as required by them, preventing risks • follow hygiene practices and the principles of aseptic working methods • pay attention to legislation on the prevention of communicable diseases and prevent the spread of infections • independently see to the safety and accessibility of the surroundings • responsibly see to the readiness of the care environment and the cleaning, care and topping up of instruments, assess the need for cleaning after special situations, and contribute to keeping the working environment tidy • work following the principles of ergonomics and use different techniques for transferring clients safely, appropriately and diversely, taking advantage of the client's functional capacity • recognise and evaluate the effects of their actions on client safety and contribute to preventing adverse events.

Maintaining wellbeing at work

Students	
Satisfactory 1	<ul style="list-style-type: none"> • take responsibility for their wellbeing at work, occupational safety and work ability • recognise factors causing psychological strain in their work • recognise clients or their close network members with challenging behaviours in their work and inform their team of such persons • recognise factors causing physical strain in their work • draw up a goal-oriented exercise programme to maintain and improve their physical fitness (stamina, strength and flexibility) and follow it • follow the principles of ergonomics and take care of their and their clients' safety and functional capacity • understand the importance of ergonomics in preventing musculoskeletal problems • contribute to the wellbeing of their work community and understand that its atmosphere affects client satisfaction
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • take responsibility for their wellbeing at work, occupational safety and work ability and work to prevent potential harms • recognise factors causing psychological strain in their work and the impacts of such factors on their wellbeing at work • recognise clients or their close network members with challenging behaviours in their work, inform their team of such persons, and act as required in the situation • recognise factors causing physical strain in their work and the impacts of such factors on their wellbeing at work • draw up a goal-oriented exercise programme to maintain and improve their physical fitness (stamina, strength and flexibility), follow it and monitor its effects • follow the principles of ergonomics and take care of their and their clients' safety and functional capacity, paying attention to work-related accidents and injuries • understand the importance of ergonomics in preventing musculoskeletal problems • contribute to the wellbeing of their work community and understand that its atmosphere affects client satisfaction
Good 4	
Excellent 5	<ul style="list-style-type: none"> • actively take responsibility for their wellbeing at work, occupational safety and work ability and work to prevent potential harms • recognise factors causing psychological strain in their work and the impacts of these factors on their wellbeing at work, looking after their coping at work • recognise clients and their close network members with challenging behaviours in their work, act as required by the situation, inform their team and prevent the occurrence of challenging situations • diversely recognise factors that cause physical strain in their work and strive to prevent them • draw up a goal-oriented exercise programme to maintain and improve their physical fitness (stamina, strength and flexibility), follow it and monitor its effects, modifying it as necessary • follow the principles of ergonomics in changing situations at work, take care of their and their clients' safety and functional capacity, justify their actions, and pay attention to work-related accidents and injuries

	<ul style="list-style-type: none"> • understand the importance of ergonomics in preventing musculoskeletal problems • contribute to the wellbeing of their work community and understand that its atmosphere affects client satisfaction
--	--

Students assess and develop their activities.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • assess their competence • recognise their strengths and development areas • receive and give feedback and use the feedback they receive in their activities • in changing and unclear situations, seek guidance with initiative • maintain the knowledge, skills and work ability required by their occupation
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • realistically assess their competence • recognise their strengths and development areas realistically • receive and give feedback and develop their activities based on it • work safely in changing and unclear situations and ask for guidance • maintain and develop the knowledge, skills and work ability required in their occupation, justifying their work-related decisions by their professional knowledge
Good 4	
Excellent 5	<ul style="list-style-type: none"> • assess their competence realistically and diversely • realistically and diversely recognise their strengths and development areas and are motivated to improve their activities • receive and give feedback and actively develop their activities based on it • work safely in changing and unclear situations, propose alternative solutions, and justify their decisions professionally • maintain and develop the knowledge, skills and work ability required in their occupation and justify their work-related decisions diversely by their professional knowledge.

Methods of demonstrating competence

Students demonstrate their competence in practical tasks, where they promote and maintain clients' functional capacity while working in a health and social care environment in the tasks of a practical nurse/emergency practical nurse. To the extent that the vocational competence required in the unit cannot be assessed on the basis of the demonstration, the competence demonstration is to be supplemented in other ways on an individual basis.

2.33. Working in prehospital emergency medical care, 40 Competence point (106225)

Competence requirements

Students know how to

- work in compliance with the statutes, operating principles, values and ethical instructions applicable to the social and health care field
- plan their work and work in cooperation with a multiprofessional work community

- plan, implement and evaluate a client's care in a prehospital emergency medical care service and pass on information about a client's care
- interact with clients and their close networks
- use the working methods, tools and materials of prehospital emergency medical care
- maintain and promote safety as well as their work ability and wellbeing at work in prehospital emergency medical care
- assess and develop their activities
- assess their possibilities of working as welfare sector entrepreneurs.

Assessment

Students work in compliance with the statutes, operating principles, values and ethical instructions applicable to the social and health care field.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • comply with legislation on the social and health care field, regulations, regional prehospital emergency medical care guidelines and operating principles • work in line with the values directing care, the unit's values, ethical principles and operating instructions in daily situations while providing care • comply with data protection, the Act on the Openness of Government Activities and secrecy obligation as required under the statutes • with their team, work in compliance with self-monitoring regulations, the workplace's operating principles and quality recommendations • draw on their knowledge of the prehospital emergency medical care system, provision of prehospital emergency medical care services, and the decision on prehospital emergency service level in their region and cooperation between authorities • follow the principles of sustainable development
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • comply with legislation on the social and health care field, regulations, regional prehospital emergency medical care guidelines and operating principles, justifying their actions • work in line with the values directing care, the unit's values, ethical principles and operating instructions in daily situations while providing care, justifying their actions • comply with data protection, the Act on the Openness of Government Activities and secrecy obligation as required under the statutes • with their team, work in compliance with self-monitoring regulations, the workplace's operating principles and quality recommendations • draw actively on their knowledge of the prehospital emergency medical care system, provision of prehospital emergency medical care services, and the decision on prehospital emergency service level in their region and cooperation between authorities, justifying their actions • follow the principles of sustainable development and justify their actions
Good 4	
Excellent 5	<ul style="list-style-type: none"> • comply with legislation on the social and health care field, regulations, regional prehospital emergency medical care

	<p>guidelines and operating principles, justifying their actions diversely</p> <ul style="list-style-type: none"> • work in line with the values directing care, the unit's values, ethical principles and operating instructions in changing situations while providing care, justifying their actions • comply with data protection, the Act on the Openness of Government Activities and secrecy obligation as required under the statutes • with their team, work in compliance with self-monitoring regulations, the workplace's operating principles and quality recommendations • draw actively on their knowledge of the prehospital emergency medical care system, provision of prehospital emergency medical care services, and the decision on prehospital emergency service level in their region and cooperation between authorities, justifying diversely the decisions they make in their work • follow the principles of sustainable development, justify their actions and propose improvements related to their work.
--	--

Students plan their work and work in cooperation with a multiprofessional work community.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • receive an emergency care mission and assess the need for additional information • use the urgency classes and mission codes of prehospital emergency medical care in situations involving patients • communicate with the Emergency Response Centre, social and health care services and other rescue authorities using the authorities' Virve network and other technical applications • know the stages in which the Emergency Response Centre processes a report • comply with communication instructions for using the Virve network in daily prehospital emergency medical care situations • take the lead in daily situations requiring basic life support, guided by the underpinning theoretical knowledge • with their team, work in situations requiring basic life support with prehospital emergency medical care units and units participating in the client's further care, following theoretical instructions issued for activities and care • draw on their knowledge of the region's prehospital emergency medical care leadership system (including field leadership), units and personnel in situational leadership of prehospital emergency medical care • draw on their knowledge of the organisation of activities and different authorities' operating areas in disasters • comply with the workplace's instructions on the employees' communication, use of social media and image marketing and observe netiquette
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • receive an emergency care mission and assess the need for additional information • use adeptly the urgency classes and mission codes of emergency care in situations involving patients • communicate with the Emergency Response Centre, social and health care services and other rescue authorities using the authorities' Virve network and other technical applications

	<ul style="list-style-type: none"> • know the stages in which the Emergency Response Centre processes a report and how this affects their work • comply with communication instructions for using the Virve network in daily prehospital emergency medical care situations, justifying their actions • take the lead in daily situations requiring basic life support, justifying their actions • work in cooperation with different prehospital emergency medical care units and units participating in the client's further care in situations involving prehospital emergency medical care clients, drawing on their theoretical knowledge • draw on their knowledge of the region's prehospital emergency medical care leadership system (including field leadership), units and personnel in situational leadership of prehospital emergency medical care • draw on their knowledge of the organisation of activities and different authorities' operating areas in disasters • comply with the workplace's instructions on the employees' communication, use of social media and image marketing and observe netiquette
Good 4	
Excellent 5	<ul style="list-style-type: none"> • receive an emergency care mission and assess the need for additional information • use adeptly and with justifications the urgency classes and mission codes of emergency care in situations involving patients • communicate with the Emergency Response Centre, social and health care services and other rescue authorities using the authorities' Virve network and other technical applications • know the stages in which the Emergency Response Centre processes a report and act accordingly • comply with communication instructions for using the Virve network in daily prehospital emergency medical care situations and disasters, justifying their actions • take the lead in daily situations requiring basic life support in their area of responsibility, justifying their actions diversely by evidence-based knowledge • work in cooperation with different prehospital emergency medical care units and units participating in the client's further care in situations involving prehospital emergency medical care clients and justify their actions and anticipate tasks relevant to their area of responsibility in different situations • draw on their knowledge of the region's prehospital emergency medical care leadership system (including field leadership), units and personnel in situational leadership of prehospital emergency medical care • draw on their knowledge of the organisation of activities and different authorities' operating areas in disasters • comply with the workplace's instructions on the employees' communication, use of social media and image marketing and observe netiquette.

Students plan, implement and evaluate a client's care in a prehospital emergency medical care service and pass on information about a client's care.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • systematically carry out a client's initial assessment • plan the basic and prehospital care needed by a client

	<ul style="list-style-type: none"> • with their work partner and if necessary, make a decision on requesting a care advisory following the region's instructions and alert the additional assistance needed in the situation • provide the basic and prehospital care needed by a client • monitor and evaluate a client's status and the care provided for them • record and report on any information and findings essential in terms of the client's status, the provided care and the treatment response in the paramedic report
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • systematically and with justifications, carry out a client's initial assessment • with justifications, plan the basic and prehospital care needed by a client • if necessary, make a decision on requesting a care advisory following the region's instructions and alerting the additional assistance needed in the situation, justifying their actions • provide the basic and prehospital care required by a client's status, taking earlier case history into account • monitor and evaluate the care provided and the client's status, justifying their actions • record and report on clearly in the paramedic report any information essential in terms of the client's status, the provided care, the treatment response, findings and deviant values, justifying their actions
Good 4	
Excellent 5	<ul style="list-style-type: none"> • systematically carry out a client's initial assessment, justifying their actions by their evidence-based knowledge • flexibly plan basic and prehospital care that is justified considering the client's status, taking into account changing situations and drawing on evidence-based knowledge • make justified conclusions on a client's care, requesting the required care advisory following the region's instructions, and on alerting the additional assistance needed as required by the situation, drawing on evidence-based knowledge • with justifications, provide the basic and prehospital care required by a client's status, taking earlier case history and pharmaceutical treatment into account • monitor and evaluate the provided care appropriately and with justifications as required in the situation, drawing on evidence-based knowledge • responsibly and logically record and report on in the paramedic report any information essential in terms of the client's status, the provided care, the treatment response, findings and deviant values, drawing diversely on their evidence-based knowledge.

Students interact with clients and their close networks

Students	
Satisfactory 1	<ul style="list-style-type: none"> • encounter clients and their close networks professionally, respectfully and equally • respect people of varying ages and those who communicate differently or have different cultural backgrounds and beliefs, and pay attention to the diversity of clients' sexuality • use interaction to improve a client's status when caring for them

	<ul style="list-style-type: none"> • adapt their expression to the client's communication skills, using plain language and non-verbal expression in interactive situations, and express themselves clearly and comprehensibly • to support interaction, use the possibilities provided by ICT appropriate for the situation • with their team, guide data protection and confidentiality, taking into account clients of varying ages and their close networks in different prehospital care situations and use the possibility of remote guidance • recognise a situation causing psychological strain and, with their work partner, guide clients or their close networks to psychosocial support, using the available support services • guide clients and their close networks to timely treatment and the correct treatment location, and provide clients with home care instructions in terms of their status does not require transportation
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • encounter clients and their close networks appreciatively, professionally, respectfully, equally and creating a feeling of safety • respect people of varying ages and those who communicate differently or have different cultural backgrounds and beliefs • use interaction in a goal-oriented manner to improve a client's status when caring for them • adapt their expression to the client's communication skills, using plain language flexibly and non-verbal expression in interactive situations, and express themselves comprehensibly, clearly and inspiring confidence • to support interaction, use flexibly the possibilities provided by ICT appropriate for the situation • responsibly and with justifications, guide data protection and confidentiality, taking into account clients of varying ages and their close networks in different prehospital care situations and use the possibility of remote guidance • recognise signs of a situation causing psychological strain and a crisis in the behaviour of a client's or their close networks, and guide them to psychosocial support with justifications • guide clients and their close networks to timely treatment and the correct treatment location, and provide clients with home care instructions essential in terms of the client's status if no transportation is required
Good 4	
Excellent 5	<ul style="list-style-type: none"> • encounter clients and their close networks with a client-oriented approach, appreciatively, professionally, respectfully, equally and creating a feeling of safety • respect people of varying ages and those who communicate differently or have different cultural backgrounds and beliefs • use interaction in a goal-oriented manner to improve a client's status when caring for them and draw on their interaction skills flexibly in different care situations • adapt their expression to the client's communication skills, using plain language flexibly and diversely, pay attention to non-verbal expression in interactive situations, and express themselves comprehensibly, constructively and inspiring confidence • to support interaction, use diversely the possibilities provided by ICT appropriate for the situation • flexibly, responsibly and justifying their actions, guide clients of varying ages and their close networks in data protection and

	<p>confidentiality in different emergency care situations, using the possibility of remote guidance</p> <ul style="list-style-type: none"> • recognise signs of a situation causing psychological strain and a client or their close networks in a crisis, act with justifications as required by the situation, and guide them to psychosocial support • guide clients and their close networks to timely treatment and the correct treatment location, and provide clients with home care instructions essential in terms of the client's status, ensuring client's ability to understand the instructions in situations where no transportation is required.
--	---

Students use the working methods, tools and materials of prehospital care work.

Assessing a client's status	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • assess a client's status following a systematic model, recognising disorders in basic vital functions that require urgent treatment • produce an advanced assessment of the situation, interview a client and evaluate the need for further assistance • recognise lifelessness as well as primary and secondary signs of death • begin chest compressions immediately and continue advanced life support as indicated by their area of responsibility while life support is being provided • carry out systematic examinations indicated by the client's condition • take basic measurements, drawing on their knowledge of chronic diseases, mental health and substance abuse disorders, the human body, anatomy, physiology and functional capacity and taking into account the possibility of false readings from devices • take an ECG correctly and analyse it systematically • using an ECG, recognise the frequency and regularity of the cardiac rhythm, a normal sinus rhythm, ST elevations, extrasystoles, atrial fibrillation, and life-threatening arrhythmia, and ask for a treatment advisory and additional assistance if necessary • with their team, take point-of-care samples and handle samples appropriately • assess, measure and manage a client's pain as team members
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • assess a client's status following a systematic model, recognising disorders in basic vital functions that require urgent treatment • produce an advanced assessment of the situation, interview a client systematically and assess the situation, justifying the need for further assistance and their actions • recognise lifelessness as well as primary and secondary signs of death • begin chest compressions immediately and continue advanced life support as indicated by their area of responsibility while life support is being provided, justifying their actions afterwards • carry out the most essential systematic examinations indicated by the client's condition, justifying their actions

	<ul style="list-style-type: none"> • with justifications, take essential basic measurements indicated by the client's condition, drawing on their knowledge of chronic diseases, mental health and substance abuse disorders, the human body, anatomy, physiology and functional capacity and taking into account the possibility of false readings from devices • take an ECG correctly and analyse it systematically • using an ECG, recognise the frequency and regularity of the cardiac rhythm, a normal sinus rhythm, ST elevations, extrasystoles, atrial fibrillation, and life-threatening arrhythmia and ask for a treatment advisory and additional assistance if necessary • take point-of-care samples and handle samples appropriately • assess, measure and manage a client's pain and justify their actions
Good 4	
Excellent 5	<ul style="list-style-type: none"> • assess a client's status following a systematic model, recognising disorders in basic vital functions that require urgent treatment • produce an advanced status assessment with justifications, systematically and independently, interview a client, make conclusions and justify them by evidence-based knowledge, assessing the need for additional assistance • recognise lifelessness as well as primary and secondary signs of death • begin chest compressions immediately and continue advanced life support as indicated by their area of responsibility while life support is being provided, justifying their actions afterwards by their evidence-based knowledge • systematically take essential test justified by the client's condition, justifying their actions by their evidence-based knowledge • systematically and with justifications, take essential basic measurements indicated by the patient's condition, drawing on their knowledge of chronic diseases, mental health and substance abuse disorders, the human body, anatomy, physiology and functional capacity and taking into account the possibility of false readings from devices, and are able to eliminate sources of error • take an ECG correctly and interpret it systematically • using an ECG, recognise the frequency and regularity of the cardiac rhythm, a normal sinus rhythm, ST elevations, extrasystoles, atrial fibrillation, and life-threatening arrhythmia and ask for a treatment advisory and additional assistance • independently take point-of-care samples and handle samples appropriately and with justifications • assess, measure and manage a client's pain using pharmacological and non-pharmacological methods, justifying their actions.

Pharmaceutical treatment in basic life support	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • administer emergency care pharmaceuticals using natural routes following the operating unit's instructions • monitor the actions and adverse effects of pharmaceuticals • know about some drug abuse phenomena • if necessary, seek additional information about pharmaceutical treatment in reliable sources

	<ul style="list-style-type: none"> • calculate dosages and unit conversions without errors • dose pharmaceuticals correctly and double check them • with their team, find out about pharmaceuticals used by a patient • carry out a peripheral vein cannulation and fluid administration in a vein as well as assist in intraosseous access if necessary • know about some pharmaceuticals used in basic life support, monitor their effects and adverse effects, and pass on information • work aseptically
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • administer emergency care pharmaceuticals using natural routes following the operating unit's instructions • monitor and draw on their knowledge of the effects and adverse effects of pharmaceuticals in their work • pay attention to drug abuse phenomena • if necessary, seek additional information about pharmaceutical treatment in reliable sources • calculate dosages and unit conversions without errors • dose pharmaceuticals correctly and double check them • find out about pharmaceuticals used by a patient and pay attention to the effects of home medication • carry out a peripheral vein cannulation and fluid administration in a vein as well as assist in intraosseous access if necessary • know about some pharmaceuticals used in basic life support, monitor their effects and adverse effects, and pass on information • work aseptically
Good 4	
Excellent 5	<ul style="list-style-type: none"> • administer emergency care pharmaceuticals using natural routes following the operating unit's instructions • monitor and draw on their knowledge of the effects and adverse effects of pharmaceuticals in their work, justifying their actions • justify the significance of drug abuse as a phenomenon in their work diversely • calculate dosages and unit conversions without errors • dose pharmaceuticals correctly and double check them • if necessary, seek additional information about pharmaceutical treatment in reliable sources • find out about pharmaceuticals used by a patient and pay attention to the effects of home medication on the patient's condition and the currently administered pharmaceuticals • carry out a peripheral vein cannulation and fluid administration in a vein as well as assist in intraosseous access if necessary • know about pharmaceuticals used in basic life support, monitor their effects and adverse effects, and pass on information with justifications • work aseptically.

Using and caring for instruments

Students

Satisfactory 1

- use prehospital emergency medical care examination methods and instruments as well as healthcare devices
- use the transfer aids and supports of emergency care safely with a work partner

	<ul style="list-style-type: none"> • see to the everyday tidiness of the unit, top up instruments and check that equipment functions properly, and take care of weekly cleaning • with their team, keep the vehicle in working order and use the technical equipment of a prehospital care unit
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • use prehospital emergency medical care examination methods and instruments as well as healthcare devices appropriately, justifying their actions • use the transfer aids and supports of emergency care safely and appropriately, justifying their actions • see to the everyday tidiness of the unit, top up instruments and check that equipment functions properly, and take care of weekly cleaning • flexibly and as team members, keep the vehicle in working order and use the technical equipment of a prehospital care unit
Good 4	
Excellent 5	<ul style="list-style-type: none"> • use prehospital emergency medical care examination methods and instruments as well as healthcare devices with justifications, appropriately and safely, drawing on their evidence-based knowledge • use the transfer aids and supports of emergency care appropriately, safely and with a patient-oriented approach, justifying their actions • see to the everyday tidiness of the unit, top up instruments and check that equipment functions properly, and take care of weekly cleaning • diversely keep the vehicle in working order and use the technical equipment of a prehospital care unit.

Driving an emergency vehicle	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • have a professional attitude towards driving in emergency missions • draw on their knowledge of the significance of emergency missions in their work and anticipate different weather and traffic conditions that affect driving • take into account the fact that other road users may find it difficult to notice an ambulance on an emergency mission • care for patients safely during transport • see to their and their partner's safety during an emergency mission • drive an emergency vehicle, at least within a closed training area
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • have a professional attitude towards driving in emergency missions • draw on their knowledge of the significance of emergency missions in their work and anticipate different weather and traffic conditions that affect driving • drive an ambulance proportioning it to the prevailing conditions • take into account the fact that other road users may find it difficult to notice an ambulance on an emergency mission • care for patients safely during transport

	<ul style="list-style-type: none"> • see to their and their partner's safety during an emergency mission • drive an emergency vehicle, at least within a closed training area
Good 4	
Excellent 5	<ul style="list-style-type: none"> • have a professional attitude towards driving in emergency missions • draw on their knowledge of the significance of emergency missions in their work and anticipate different weather and traffic conditions that affect driving • take into account the fact that other road users may find it difficult to notice an ambulance on an emergency mission • care for patients safely during transport • see to their and their partner's safety during an emergency mission • drive an ambulance, at least within a closed training area.

Students maintain and promote safety, their work ability and wellbeing at work in emergency care.

Maintaining occupational safety and wellbeing	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • comply with instructions and regulations on wellbeing at work and occupational safety and regulations on radiation, electrical and fire safety • comply with the unit's safety plan and practices for reporting hazardous situations and act as required by them • follow instructions on hygiene and aseptic practices • recognise psychological and physical strain and risk factors in their field and their effects on coping at work, and modify their activities based on feedback they receive • look after their work ability, wellbeing at work, health and physical condition following a goal-oriented exercise plan and prevent health hazards and harms • contribute to maintaining a good work atmosphere • pay attention to the threat of violence in their work • follow instructions issued for prehospital emergency medical care when encountering a violent client • if necessary, protect themselves and others and ask for additional assistance • act as work community members in situations involving a threat of violence • recognise the effects of their activities on ensuring client safety in prehospital emergency medical care work
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • comply with instructions and regulations on wellbeing at work and occupational safety and regulations on radiation, electrical and fire safety, justifying their actions • comply with the unit's safety plan and practices for reporting hazardous situations and act as required by them • follow instructions on hygiene and aseptic practices • recognise psychological and physical strain and risk factors in their field and their effects on coping at work, and develop their work addressing the strain factors

	<ul style="list-style-type: none"> • look after their work ability and physical fitness, promote their wellbeing at work and health, and prevent health hazards and harms by following a goal-oriented exercise programme • contribute to maintaining a good work atmosphere and doing things together • pay attention to the threat of violence in their work and inform the team of any threatening situations they observe • follow instructions issued for prehospital emergency medical care when encountering a violent client • act as work community members in situations involving a threat of violence • if necessary, protect themselves and others and ask for additional assistance • recognise and evaluate the effects of their actions on client safety in emergency medical care work
Good 4	
Excellent 5	<ul style="list-style-type: none"> • comply with instructions and regulations on wellbeing at work and occupational safety and regulations on radiation, electrical and fire safety • comply with the unit's safety plan and practices for reporting hazardous situations and act as required by them • follow instructions on hygiene and aseptic practices • recognise key psychological and physical strain and risk factors in their field, develop their work and the work unit's practices addressing the strain factors, and recognise the impact of these factors on coping at work • look after their work ability, promote their wellbeing at work and health, maintain their physical fitness by following a goal-oriented exercise programme, and justify the significance of their actions. Prevent accidents in their work and guide others in accident prevention • contribute to maintaining and promoting a good work atmosphere and doing things together • pay attention responsibly to the threat of violence in their work and promote the prevention of threatening situations in their team • follow instructions issued for prehospital emergency medical care when encountering a violent client • act as work community members in situations involving a threat of violence • if necessary, protect themselves and others and ask for additional assistance • recognise and evaluate the effects of their actions on client safety in prehospital emergency medical care work and contribute to preventing adverse events.

Working ergonomically	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • recognise their resources and take into account the effects of life situation, sleep, stress and health on functional capacity • recognise situations that cause physical strain in their work • work ergonomically and prevent accidents and injuries caused by the work • use the body's natural movement patterns and control their body when assisting clients with mobility and transfers • use aids safely when transferring clients

Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • recognise their resources and take into account the effects of life situation, sleep, stress and health on functional capacity, justifying their actions • recognise factors that cause physical strain in their work and reduce them • work ergonomically and prevent accidents and injuries caused by the work • use the body's natural movement patterns appropriately and control their body when assisting clients with mobility and transfers • use aids adeptly and safely when transferring clients
Good 4	
Excellent 5	<ul style="list-style-type: none"> • recognise their resources and take into account the effects of life situation, sleep, stress and health on functional capacity, justifying their actions diversely • recognise factors that cause physical strain in their work and reduce them, justifying their actions • work ergonomically and prevent accidents and injuries caused by the work • actively and appropriately use the body's natural movement patterns and control their body when assisting clients with mobility and transfers • use aids safely and adeptly when transferring clients and justify their actions.

Students assess and develop their activities.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • recognise their strengths and development areas • receive and give feedback and use the feedback they receive in their activities • in problem situations, ask for guidance with initiative • maintain the knowledge, skills and work ability required in their occupation, justifying their work-related decisions by their professional knowledge • assess their professional growth and competences • as team members, recognise some of the effects of their work on the quality of emergency care work experienced by clients
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • recognise their strengths and development areas realistically • receive and give feedback and actively develop their activities based on feedback they receive • work safely in changing and unclear situations and ask for guidance • maintain the knowledge, skills and work ability required in their occupation and justify their work-related decisions diversely by their professional knowledge • realistically assess their professional growth and competence • recognise some of the effects of their work on the quality of prehospital emergency medical care work experienced by clients and justify their actions
Good 4	
Excellent 5	<ul style="list-style-type: none"> • realistically and diversely recognise their strengths and development areas and are motivated to improve their activities

	<ul style="list-style-type: none"> • receive and give feedback and actively develop their activities based on feedback they receive • work safely in changing and unclear situations, propose alternative solutions, and justify their decisions professionally • maintain the knowledge, skills and work ability required in their occupation and justify their work-related decisions diversely by their evidence-based knowledge • realistically and diversely assess their professional growth and competence • recognise the effects of their work on the quality of prehospital emergency medical care work experienced by clients, and justify and modify their actions based on their observations
--	---

Students assess their possibilities of working as wellbeing sector entrepreneurs.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • plan the productisation of their competence • work responsibly and understand the effect of their work on the activities of the workplace and the quality of the services in daily work with clients • work to promote the achievement of objectives • assess their possibilities of working as entrepreneurs
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • plan and find out about possibilities of productising their competence in their work • work responsibly and pay attention to the effect of their work on the activities of the workplace and the quality of services in daily work with clients • work to promote the achievement of objectives and scale their work according to the objectives • assess their possibilities of working as entrepreneurs
Good 4	
Excellent 5	<ul style="list-style-type: none"> • actively plan and develop their capacities to work as entrepreneurs and realistically assess the possibilities of productising their competence • work responsibly, pay attention to the effect of their work on the activities of the workplace and the quality of services in daily work with clients, and modify their actions flexibly as required by the situation • work to promote the achievement of objectives and scale their work according to the objectives • assess their possibilities of working as entrepreneurs.

Methods of demonstrating competence

Students demonstrate their competence in practical tasks where they work in prehospital emergency medical care environments in a practical nurse's/emergency practical nurse's tasks. To the extent that the vocational competence required in the unit cannot be assessed on the basis of the demonstration, the competence demonstration is to be supplemented in other ways on an individual basis.

2.34. Working in acute care, 35 Competence point (106224)

Competence requirements

Students know how to

- work in compliance with the statutes, operating principles, values and ethical principles applicable to social and health care field
- plan their work and work in cooperation with a multiprofessional work community
- plan, carry out and evaluate a client's acute care
- interact with clients and their close networks
- use the working methods, tools and materials of acute care
- provide guidance in using services
- maintain and promote safety as well as their work ability and wellbeing at work in acute care environments
- assess and develop their activities.

Assessment

Students work in compliance with the statutes, operating principles, values and ethical principles applicable to the social and health care field.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • comply with the legislation on the social and health care field, regulations and instructions for acute care work • work in the daily situations of acute care in line with the values directing care work, the unit's values, ethical principles and operating instructions • comply with data protection, the Act on the Openness of Government Activities and secrecy obligation as required under the statutes • as team members, work in compliance with self-monitoring regulations, the workplace's operating principles and quality recommendations • follow the principles of sustainable development
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • comply with the legislation on the social and health care field, regulations and instructions for acute care work, justifying their actions • in different stages of the acute care process and in their occupational group's area of responsibility, work in line with the values directing care work, the unit's values, ethical principles and operating instructions in daily situations while providing care, justifying their actions • comply with data protection, the Act on the Openness of Government Activities and secrecy obligation as required under the statutes • work in compliance with self-monitoring regulations, the workplace's operating principles and quality recommendations, justifying their actions • follow the principles of sustainable development and justify their actions
Good 4	

Excellent 5	<ul style="list-style-type: none"> • comply with the legislation on the social and health care field, regulations and instructions for acute care work, justifying their actions diversely • work in the changing situations of acute care in line with the values directing care, the unit's values, ethical principles and operating instructions, justifying their actions diversely • comply with data protection, the Act on the Openness of Government Activities and secrecy obligation as required under the statutes • work in compliance with self-monitoring regulations, the workplace's operating principles and quality recommendations, and propose realistic improvements • follow the principles of sustainable development, justify their actions and propose improvements.
-------------	--

Students plan their work and work in cooperation with a multiprofessional team.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • plan their daily tasks and schedules as indicated by clients' needs and circumstances together with their team • draw on their knowledge of caring for a client who has become ill suddenly in the planning of their work • make choices and decisions related to their work and solve problems with their team • work and communicate with a multiprofessional team in compliance with the referrals given to them and participate in clients' treatment processes as team members • comply with the workplace's instructions on the employees' communication, use of social media and image marketing and observe netiquette
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • plan their daily tasks and schedules as indicated by clients' needs and circumstances, understanding their work as a whole and working flexibly in daily situations • draw diversely on their knowledge of caring for a client who has become ill suddenly in the planning of their work • make choices and decisions related to their work, solve problems justifying their actions, and understand clients' treatment processes as a whole • work and communicate responsibly in a multiprofessional team in compliance with referrals given to them and as indicated by clients' treatment processes • comply with the workplace's instructions on the employees' communication, use of social media and image marketing and observe netiquette
Good 4	
Excellent 5	<ul style="list-style-type: none"> • plan and prioritise their daily tasks and schedules as indicated by clients' needs and situations, understanding their work as a whole and working flexibly in changing situations • apply their evidence-based knowledge of caring for a client who has become ill suddenly to the planning of their work • make choices and decisions related to their work and solve problems, justify their actions with their evidence-based knowledge, and understand clients' treatment processes as a whole

	<ul style="list-style-type: none"> • work and communicate appropriately and responsibly in a multiprofessional team in line with the referrals given to them and the care process • comply with the workplace's instructions on the employees' communication, use of social media and image marketing and observe netiquette.
--	---

Students plan, carry out and evaluate clients' acute care.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • assess the status of a client who has become ill or injured suddenly, drawing on their knowledge of human anatomy, physiology and vital functions • plan and provide the acute care needed by clients as team members • with their team, evaluate the implementation of a client's acute care and act as required in the situation • monitor a client's status and condition and observe changes in their status • record their observations on a client's status and provision of care and report their observations to the team • use the client information systems of their work community and social and health care databases in their area of responsibility
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • assess the status of a client who has become ill or injured suddenly, drawing on their knowledge of human anatomy, physiology and vital functions and changes in them • plan and provide the acute care needed by clients safely and with justifications • evaluate the implementation of a client's acute care and act as required in the situation, justifying their actions • diversely monitor a client's status and condition and observe changes in their status • record adeptly their observations on a client's status and provision of care and report on their observations to the team • use adeptly the client information systems of their work community and social and health care databases in their area of responsibility
Good 4	
Excellent 5	<ul style="list-style-type: none"> • assess systematically the status of a client who has become ill or injured suddenly, drawing on their knowledge of human anatomy, physiology and vital functions and changes in them • plan and provide the acute care needed by clients, drawing on their evidence-based knowledge • evaluate the implementation of a client's acute care and act appropriately as required in the situation, justifying their actions by their evidence-based knowledge • with anticipation, monitor changes in a client's status and condition, drawing on their evidence-based knowledge • adeptly and with justifications, record their observations on a client's status and provision of care and report on their observations to the team • adeptly and diversely use the client information systems of their work community and social and health care databases in their area of responsibility.

Students interact with clients and their close networks.

Professional interaction	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • encounter clients and their close networks appreciatively, professionally, respectfully and equally • respect people of varying ages and those who communicate differently or have different cultural backgrounds and beliefs • use interaction to improve a client's status when caring for them • use communication methods and tools that support and compensate for speech and plain language • to support interaction, assessment of care needs, guidance and remote guidance, use possibilities offered by ICT appropriate for the situation • support a client in a crisis and their close networks with a multiprofessional team • take into account in their work to the various forms in which clients express their sexuality
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • encounter clients and their close networks individually, genuinely, professionally, with understanding and creating a feeling of safety • respect people of varying ages and those who communicate differently or have different cultural backgrounds and beliefs • use interaction in a goal-oriented manner to improve a client's status when caring for them • use communication methods and tools that support and compensate for speech and plain language • to support interaction, assessment of care needs, guidance and remote guidance, use possibilities offered by ICT flexibly and as appropriate for the situation • work with a client in a crisis and their close network, guiding them in accessing psychosocial support with justifications • take into account diversity in the way clients express their sexuality
Good 4	
Excellent 5	<ul style="list-style-type: none"> • encounter clients and their close networks individually, with empathy, respectfully, professionally and creating a feeling of safety • respect people of varying ages and those who communicate differently or have different cultural backgrounds and beliefs • use interaction in a goal-oriented manner to improve a client's status and draw on their interaction skills flexibly in different care situations • use fluently communication methods and tools that support and compensate for speech and plain language • to support interaction, assessment of care needs, guidance and remote guidance, use possibilities offered by ICT appropriate for the situation flexibly and diversely • work with a client in a crisis, their close network and others involved in the events, guiding them in accessing psychosocial support with justifications • take into account the diversity of clients' sexual orientation.

Using language skills in client service/ Field-specific language proficiency of Finnish speakers

Students	
Satisfactory 1	<ul style="list-style-type: none"> serve customers in Finnish and manage the service situation tolerably well in Swedish and in one foreign language
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> serve customers in Finnish and manage the service situation in Swedish and in one foreign language
Good 4	
Excellent 5	<ul style="list-style-type: none"> serve customers in Finnish and manage the services situation flexibly in the second national language and in one foreign language.

Using language skills in client service/ Field-specific language proficiency of Swedish speakers	
Students	
Satisfactory 1	<ul style="list-style-type: none"> serve customers in Swedish and Finnish and manage the service situation tolerably well in one foreign language
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> serve customers in Swedish and Finnish and manage the service situation in one foreign language
Good 4	
Excellent 5	<ul style="list-style-type: none"> serve customers in Swedish and Finnish and manage the service situation flexibly in one foreign language.

Using language skills in client service/ Field-specific language proficiency of speakers of other languages	
Students	
Satisfactory 1	<ul style="list-style-type: none"> manage the service situation in Finnish or Swedish and manage it tolerably well in one other language
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> manage the service situation in Finnish and Swedish and in one foreign language
Good 4	
Excellent 5	<ul style="list-style-type: none"> serve customers in Finnish and Swedish and manage the service situation flexibly in one foreign language.

Using language skills in client service/Field-specific language proficiency in education and training provided in a foreign language	
Students	
Satisfactory 1	<ul style="list-style-type: none"> manage the service situation in Finnish or Swedish in addition to the language of instruction and are able to help clients forward in one other language in the service situation
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> manage the service situation in Finnish or Swedish in addition to the language of instruction and in one other language
Good 4	

Excellent 5	<ul style="list-style-type: none"> serve customers in Finnish or Swedish in addition to the language of instruction and manage the service situation flexibly in one other language.
-------------	---

Students use the working methods, tools and materials of acute care.

Assessing care needs and carrying out tests and procedures in the acute care environment	
Students	
Satisfactory 1	<ul style="list-style-type: none"> assess and recognise the status and urgency of care of a client who has become ill or injured suddenly, using different testing methods and instruments and health care equipment, and draw on their knowledge of human body, anatomy, physiology, basic care and functional capacity, mechanisms of injury, memory disorder and chronic diseases as well as mental health and substance abuse disorders in their work recognise lifelessness and start life-saving actions observe changes in a client's condition and status, recognise signs that indicate weakening as team members, and use different testing methods and instruments as well as health care equipment assess potential factors causing errors in measurements and their results prepare clients and assist in examinations and procedures with their team, working aseptically and safely observe and guide clients during and after a examination or procedure and, with their team, look after the patient during the care process with their team, take point-of-care samples and laboratory tests, take microbiological samples, and handle samples appropriately in these connections guide clients in sampling and, with their team, interpret test results in their area of responsibility with their team, guide clients and their close networks in the different care process stages and give patients instructions for further treatment and home care
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> systematically assess and recognise the status and urgency of care of a client who has become ill or injured suddenly, using different testing methods and instruments and health care equipment, and draw on their knowledge of human body, anatomy, physiology, basic care and functional capacity, mechanisms of injury, memory disorder and chronic diseases as well as mental health and substance abuse disorders in their work recognise lifelessness and start life-saving actions observe diversely changes in a client's condition and status, recognise signs that indicate weakening as team members, and use different testing methods and instruments as well as health care equipment safely assess potential factors causing errors in measurements, take them into account in their work and take corrective action prepare clients and assist in examinations and procedures as team members, working aseptically and safely observe and guide clients during and after a examination and procedure, pay attention to the special requirements associated with a certain procedure carried out and, as indicated by their

	<p>area of responsibility, look after the patient during the care process</p> <ul style="list-style-type: none"> • take point-of-care samples and laboratory tests, take microbiological samples, and handle samples appropriately in these connections • guide clients in sampling and interpret basic test results as team members in their area of responsibility • guide clients and their close networks in the different care process stages and give patients instructions for further treatment and home care
Good 4	
Excellent 5	<ul style="list-style-type: none"> • systematically assess and recognise the status and urgency of care of a client who has become ill or injured suddenly, using different testing methods and instruments and health care equipment, and draw diversely on their knowledge of human body, anatomy, physiology, basic care and functional capacity, mechanisms of injury, memory disorder and chronic diseases as well as mental health and substance abuse disorders in their work • recognise lifelessness and start life-saving actions • observe diversely changes in a client's condition and status, recognise signs that indicate weakening, and use different testing methods and instruments as well as health care equipment safely and appropriately • assess potential factors causing errors in measurements, take them into account in their work and take corrective action, justifying their actions with their evidence-based knowledge • prepare clients and assist independently in examinations and procedures, working aseptically and safely • observe and guide clients during and after a examination or procedure, identify their individual needs, pay attention to the special requirements associated with a certain procedure carried out and, as indicated by their area of responsibility, look after the patient during the care process independently and comprehensively • independently take point-of-care samples and laboratory tests, take microbiological samples, and handle samples appropriately in these connections • guide clients in sampling and interpret test results diversely in their area of responsibility • guide and motivate clients and their close networks adeptly in the different care process stages and independently and comprehensively give patients instructions for further treatment and home care.

Providing basic care in acute care work

Students

Satisfactory 1

- observe clients' basic care needs in an acute care environment
- together with clients, plan and provide the basic care they need in an acute care environment following a care plan
- evaluate the implementation of clients' acute care and their work in an acute care environment
- follow the principles of aseptic work
- recognise clients' suffering and pain and provide pain management to relieve symptoms
- comply with a person's living will

	<ul style="list-style-type: none"> • know the principles of caring for a dying client and follow them with a multiprofessional team
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • actively observe clients' basic care needs in an acute care environment • together with clients, diversely plan and provide the basic care they need in an acute care environment following a care plan • evaluate realistically the implementation of clients' acute care and their work in an acute care environment • follow the principles of aseptic work • recognise clients' suffering and pain and provide pain management to relieve symptoms, drawing on their knowledge of pharmacological and non-pharmacological pain management methods • comply with a person's living will • know the principles of caring for a dying client and follow them as multiprofessional team members
Good 4	
Excellent 5	<ul style="list-style-type: none"> • actively and diversely observe clients' basic care needs in an acute care environment • together with clients, diversely plan and provide the basic care clients need in an acute care environment following a care plan, justifying their actions by their evidence-based knowledge • evaluate realistically and appropriately the implementation of clients' basic care and their work in an acute care environment • follow the principles of aseptic work • recognise clients' suffering and pain and provide pain management to relieve symptoms, drawing on their evidence-based knowledge of pharmacological and non-pharmacological pain management methods • comply with a person's living will • know the principles of caring for a dying client and follow them as multiprofessional team members, justifying their actions.

Providing pharmaceutical treatment in acute care work

Students	
Satisfactory 1	<ul style="list-style-type: none"> • work safely and as indicated by their area of responsibility, following the unit's and clients' pharmaceutical treatment plans • are familiar with the operating principles of the most common pharmaceutical databases and draw on these principles in their work • handle, dispense and administer pharmaceuticals to the client aseptically, safely and without errors and submit an adverse event notification if necessary • calculate dosages and unit conversions without errors • administer pharmaceuticals through natural routes of administration, subcutaneously and with intramuscular injection and by inhalation, carry out vein cannulation and, if necessary, assist in I.O. access and carry out fluid infusion following the work unit's instructions • guide clients and their close networks following the work unit's instructions in interpreting an electronic prescription and its period of validity as well as using, storing and disposing of pharmaceuticals and the pharmaceutical treatments used in the most common acute situations

	<ul style="list-style-type: none"> • know and monitor the actions and interactions of the most common pharmaceuticals used in acute situations as well as polypharmacy, recognise some of the most common adverse and side effects, and pay attention to possible drug abuse phenomena and inform their teams about such phenomena
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • work safely and as indicated by their area of responsibility, following the unit's and clients' pharmaceutical treatment plans • use the most common pharmaceutical databases, understand their operating principles and draw on these principles in their work • handle, dispense and administer pharmaceuticals to the client aseptically, safely and without errors and submit an adverse event notification if necessary • calculate dosages and unit conversions without errors • administer pharmaceuticals through natural routes of administration, subcutaneously and with intramuscular injection and by inhalation, carry out vein cannulation and, if necessary, assist in I.O. access and carry out fluid infusion following the work unit's instructions • actively guide clients and their close networks following the work unit's instructions in interpreting an electronic prescription and its period of validity as well as using, storing and disposing of pharmaceuticals and the pharmaceutical treatments used in the most common acute situations • know and monitor the actions and interactions of the most common pharmaceuticals used in acute situations as well as polypharmacy, recognise the most common adverse and side effects, pay attention to possible drug abuse phenomena, inform their teams about such phenomena and prevent them
Good 4	
Excellent 5	<ul style="list-style-type: none"> • work safely and as indicated by their area of responsibility, following the unit's and clients' pharmaceutical treatment plans • use pharmaceutical databases, understand their operating principles and draw on these principles actively in their work • handle, dispense and administer pharmaceuticals to the client aseptically, safely and without errors and submit an adverse event notification if necessary • calculate dosages and unit conversions without errors • administer pharmaceuticals through natural routes of administration, subcutaneously and with intramuscular injection and by inhalation, carry out vein cannulation and, if necessary, assist in I.O. access and carry out fluid infusion following the work unit's instructions • actively and flexibly guide clients and their families and friends following the work unit's instructions in interpreting an electronic prescription and its period of validity as well as using, storing and disposing of pharmaceuticals and the pharmaceutical treatments used in the most common acute situations • know and actively monitor the actions and interactions of the most common pharmaceuticals used in acute situations as well as polypharmacy, recognise the most common adverse and side effects, pay attention to possible drug abuse phenomena, inform their teams about such phenomena and prevent them.

Patient immobilisation in acute care

Students	
Satisfactory 1	<ul style="list-style-type: none"> • with their team, assess clients' needs for immobilisation, drawing on their knowledge of the causal mechanisms of bone fractures and tendon injuries in clients of varying ages and fracture types • with their team, prepare clients for immobilisation, taking into account the risks of applying a plaster cast • prepare the treatment facility and set out the instruments and equipment required to treat a fracture as well as the necessary splint materials • splint fractures not requiring repositioning in upper and lower extremities based on an immobilisation referral and radiological findings with their team • splint fractures in the manner they require, using splints that have correct anatomical dimensions and angles, drawing on their knowledge of immobilising injuries in fingers, palms, wrists, forearms, elbows and upper arms, feet, ankles, lower legs, knees and thighs among other things • assist in the repositioning of the most common injuries in upper and lower extremities • check the functioning of the splinted extremity with their team • monitor skin condition, notice treatment-related skin problems, and work aseptically in wound care with their team • observe clients' condition and manage clients' pain together with a team • work aseptically, ergonomically and paying attention to client safety and radiation safety • use plaster saws and scissors safely and correctly for removing casts • together with their team, assess fracture patients' needs for aids and adjust a ready-made orthosis to fit, drawing on their knowledge of anatomy and physiology and guide clients in aid and orthosis use • together with their team, give further treatment and home care instructions to clients and their close networks as indicated by the treatment given to each client • care for the working facilities and treatment equipment and top up materials with a team and in line with sustainable development
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • with a client-oriented approach, assess clients' needs for immobilisation as team members, drawing on their knowledge of the causal mechanisms of bone fractures and tendon injuries in clients of varying ages and fracture types • prepare clients for immobilisation, taking into account the risks of applying a plaster cast • carefully prepare the treatment facility and set out the instruments and equipment required to treat a fracture as well as the necessary splint materials, drawing on their knowledge of different materials • splint fractures not requiring repositioning in upper and lower extremities based on an immobilisation referral and radiological findings with their team • splint fractures in the manner they require, with a client-oriented approach, using splints that have correct anatomical dimensions and angles, drawing on their knowledge of immobilising injuries in fingers, palms, wrists, forearms, elbows

	<p>and upper arms, feet, ankles, lower legs, knees and thighs among other things</p> <ul style="list-style-type: none"> • assist in the repositioning of the most common injuries in upper and lower extremities • check the functioning of the splinted extremity as team members • observe clients' condition and manage clients' pain • diversely monitor skin condition, notice treatment-related skin problems and work aseptically in wound care • work aseptically, ergonomically and paying attention to client safety and radiation safety • use plaster saws and scissors safely and correctly for removing casts • as team members, assess fracture patients' needs for aids and adjust a ready-made orthosis to fit, drawing on their knowledge of anatomy and physiology and guide clients in aid and orthosis use, paying attention to the clients' functional capacity • with justifications, give further treatment and home care instructions to clients and their close networks as indicated by the treatment given to each client • care for the working facilities and treatment equipment and top up materials in line with sustainable development

--	---

Students guide clients in using services.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • are familiar with clients' critical paths and service chains • inform clients and their close networks about social and health services • guide clients in using electronic services • work in multidisciplinary cooperation to ensure the continuity of a client's treatment
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • are familiar with clients' critical paths and service chains • inform clients and their close networks appropriately about social and health services • adeptly guide clients in using electronic services • work in multidisciplinary cooperation appropriately to ensure the continuity of a client's treatment
Good 4	
Excellent 5	<ul style="list-style-type: none"> • are familiar with clients' critical paths and service chains • inform clients and their close networks about social and health services appropriately and with a client-oriented approach • adeptly and diversely guide clients in using electronic services • appropriately and with a client-oriented approach, work in multidisciplinary cooperation to ensure the continuity of a client's treatment.

Students maintain and promote safety as well as their work ability and wellbeing at work in acute care environments.

Maintaining wellbeing at work and occupational safety	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • comply with instructions and regulations on wellbeing at work and occupational safety and regulations on radiation, electrical and fire safety • comply with the work unit's safety plan and practices for reporting hazardous situations and act as required by them • recognise psychological and physical strain and risk factors in their work and modify their activities based on feedback they receive • recognise clients or their close ones with challenging behaviour in their work and inform their team of such persons • check that the equipment is in appropriate operating condition, use the equipment safely, maintain for the equipment and care environment as team members, and contribute to keeping the working environment tidy and topping up the necessary materials • take responsibility for their wellbeing at work, occupational safety and work ability

	<ul style="list-style-type: none"> • contribute to the wellbeing of their work community
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • comply with instructions and regulations on wellbeing at work and occupational safety and regulations on radiation, electrical and fire safety • comply with the work unit's safety plan and practices for reporting hazardous situations and act as required by them • recognise psychological and physical strain and risk factors in their work, modify their activities based on feedback they receive and develop their working methods • recognise clients or their close ones with challenging behaviour in their work, inform their team of such persons, and act as required in the situation • check that the equipment is in appropriate operating condition, use the equipment safely, maintain for the equipment and care environment, and contribute to keeping the working environment tidy and topping up the necessary materials • take responsibility for their own wellbeing, safety at work and work ability and prevent potential harms • contribute to the wellbeing of their work community and understand that its atmosphere affects client satisfaction
Good 4	
Excellent 5	<ul style="list-style-type: none"> • comply with instructions and regulations on wellbeing at work and occupational safety and regulations on radiation, electrical and fire safety • comply with the work unit's safety plan and practices for reporting hazardous situations and act as required by them, preventing risks • recognise psychological and physical strain and risk factors in their work, modify their activities based on feedback they receive and develop their work and working methods, justifying their actions • recognise clients or their close ones with challenging behaviour in their work, act as required by the situation and prevent the occurrence of challenging situations • check that the equipment is in appropriate operating condition, use the equipment safely, responsibly ensure that the care environment is ready to use and that the instruments are cleaned and maintained, and assess cleaning needs after special situations • actively take responsibility for their wellbeing at work, occupational safety and work ability and prevent potential harms • contribute to the wellbeing of their work community and client satisfaction.

Addressing client safety	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • take into account client safety when working • see to client safety in compliance with regulations on radiation, electrical and fire safety • follow the principles of aseptic and ergonomic working methods • recognise and draw on clients' resources and natural movement patterns when transferring clients • use transfer aids safely

Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • pay attention to client safety in their work and justify their actions • see to client safety in compliance with regulations on radiation, electrical and fire safety • follow the principles of aseptic and ergonomic working methods • recognise and activate clients' resources when transferring them and use natural movement patterns • use transfer aids safely and adeptly
Good 4	
Excellent 5	<ul style="list-style-type: none"> • extensively pay attention to client safety in their work, justifying their actions, and propose realistic improvements • see to client safety in compliance with regulations on radiation, electrical and fire safety • follow the principles of aseptic and ergonomic working methods • recognise and activate clients' resources diversely when transferring them and use natural movement patterns • use transfer aids safely and adeptly, justifying their actions.

Students assess and develop their activities.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • recognise their strengths and development areas • receive and give feedback and use the feedback they receive in their activities • in problem situations, ask for guidance with initiative • maintain the knowledge, skills and work ability required in their occupation, justifying their work-related decisions by their professional knowledge • evaluate their professional growth and competences • as team members, recognise the effects of their work on the quality of acute care work experienced by clients
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • recognise their strengths and development areas realistically • receive and give feedback and develop their activities based on it • work safely in changing and unclear situations and ask for guidance • maintain the knowledge, skills and work ability required in their occupation and justify their work-related decisions diversely by their professional knowledge • realistically assess their professional growth and competence • recognise the effects of their work on the quality of acute care work experienced by clients
Good 4	
Excellent 5	<ul style="list-style-type: none"> • realistically and diversely recognise their strengths and development areas and are motivated to develop their activities • receive and give feedback and actively develop their activities based on it • work safely in changing and unclear situations, propose alternative solutions, and justify their decisions professionally • maintain the knowledge, skills and work ability required in their occupation and justify their work-related decisions diversely by their evidence-based knowledge

- | | |
|--|---|
| | <ul style="list-style-type: none"> • realistically and diversely assess their professional growth and competence • recognise the effects of their work on the quality of acute care work experienced by clients and modify their actions based on their observations. |
|--|---|

Methods of demonstrating competence

Students demonstrate their competence in practical tasks where they work in acute care environments in a practical nurse's or emergency practical nurse's tasks. To the extent that the vocational competence required in the unit cannot be assessed on the basis of the demonstration, the competence demonstration is to be supplemented in other ways on an individual basis.

2.35. Working in multi-casualty situations and disasters, 15 Competence point (106242)

Competence requirements

Students know how to

- cooperate with authorities in a multiprofessional team
- work in multi-casualty situations and a disaster response organisation
- use the working methods and equipment needed in multi-casualty situations and disasters
- use their interaction and guidance skills
- maintain and promote safety as well as their work ability and wellbeing at work
- assess and develop their work.

Assessment

Students cooperate with authorities in a multiprofessional team.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • work as team members in cooperation with the Emergency Response Centre and are familiar with the legislation that governs its operation, the way in which the Emergency Response Centre carries out risk assessments, the stages of dealing with an emergency call and unit monitoring • as team members, draw on their knowledge of the prehospital emergency medical care system and leadership system in their region • work as team members in prehospital emergency medical care tasks in cooperation with rescue services, drawing on their knowledge of the rescue services' organisation and leadership system • work as team members in prehospital emergency medical care situations led by the police, and know the duties of the police and their own tasks in these situations • draw on their knowledge of tactical prehospital emergency care provided by the police in their work • as team members, draw on their knowledge of social services, duties of the Border Guard and the operating principles, rights and responsibilities of a voluntary rescue service
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • work in cooperation with the Emergency Response Centre and are familiar with the legislation that governs its operation, the

	<p>way in which the Emergency Response Centre carries out risk assessments, the stages of dealing with an emergency call and unit monitoring</p> <ul style="list-style-type: none"> • draw in their work on their knowledge of the prehospital emergency medical care system and leadership system in their region • work in prehospital emergency medical care tasks in cooperation with rescue services, drawing on their knowledge of the rescue services' organisation and leadership system • work in prehospital emergency care situations led by the police, and know the duties of the police and their own tasks in these situations • draw on their knowledge of tactical prehospital emergency care provided by the police in their work and of how it is used in prehospital emergency care situations • draw in their work on their knowledge of social services, duties of the Border Guard and the operating principles, rights and responsibilities of a voluntary rescue service
Good 4	
Excellent 5	<ul style="list-style-type: none"> • work flexibly in cooperation with the Emergency Response Centre and are familiar with the legislation that governs its operation, the way in which the Emergency Response Centre carries out risk assessments, the stages of dealing with an emergency call and unit monitoring • draw in their work diversely on their knowledge of the prehospital emergency medical care system and leadership system in their region • work flexibly in prehospital emergency medical care tasks in cooperation with rescue services, drawing on their knowledge of the rescue services' organisation and leadership system • work flexibly in prehospital emergency care situations led by the police, and know the duties of the police and their own tasks in these situations • draw diversely on their knowledge of tactical prehospital emergency care provided by the police in their work and of how it is used in prehospital emergency care situations • draw diversely in their work on their knowledge of social services, duties of the Border Guard and the operating principles, rights and responsibilities of a voluntary rescue service.

Students work in multi-casualty situations and a disaster response organisation.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • work in multi-casualty and disaster response tasks within their area of responsibility and as ordered, knowing different authorities' areas of responsibility • work in cooperation with the authorities during incidents in normal conditions following the region's plans and, in emergency conditions, draw on their knowledge of the operation of the Ministry of Social Affairs and Health's preparedness unit • work in disaster response, drawing on their knowledge of the line of command and responsibilities for information activities in a disaster • in the early stages of a mission, work as situational leaders of prehospital emergency medical care or the classification, care or transport sector in a multi-casualty situation or disaster

Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • work flexibly in multi-casualty and disaster response tasks within their area of responsibility and as ordered, knowing different authorities' areas of responsibility and justifying their actions • work as required by the situation in cooperation with the authorities during incidents in normal conditions following the region's plans and, in emergency conditions, draw on their knowledge of the operation of the Ministry of Social Affairs and Health's preparedness unit • work in disaster response, drawing on their knowledge of the line of command and responsibilities for information activities in a disaster as appropriate in the situation • in the early stages of a mission, work as situational leaders of prehospital emergency medical care or the classification, care or transport sector in a multi-casualty situation or disaster
Good 4	
Excellent 5	<ul style="list-style-type: none"> • work flexibly and as required by the situation in multi-casualty and disaster response tasks within their area of responsibility and as ordered, knowing different authorities' areas of responsibility, justifying their actions and paying attention to the response process as a whole in their work • work flexibly and as required by the situation in cooperation with the authorities during incidents in normal conditions following the region's plans and, in emergency conditions, draw on their knowledge of the operation of the Ministry of Social Affairs and Health's preparedness unit • work in disaster response, drawing adeptly on their knowledge of the line of command and responsibilities for information activities in a disaster as appropriate in the situation • in the early stages of a mission, work as the situational leader of prehospital emergency medical care or the classification, care or transport sector in a multi-casualty situation or disaster.

Students use the working methods and equipment needed in multi-casualty situations and disasters.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • use the authorities' Virve network following work unit's instructions in situations requiring cooperation with the authorities, and observe data protection when communicating • use Virve call groups and folders following instructions in disasters • produce a situational assessment related to a multi-casualty situation or a disaster and act as required by the situation • use disaster classification cards with their team following instructions • implement the tests and treatments essential for a client's status • use client information systems and ICT, taking information security and secrecy obligation provisions into account • give prior notification of patients transported by the unit to the receiving care institution • safely transport clients to the correct care institution and return immediately to the scene of the accident following instructions
Satisfactory 2	

Good 3	<ul style="list-style-type: none"> • use the authorities' Virve network appropriately in situations requiring cooperation with the authorities, and observe data protection when communicating • use Virve call groups and folders adeptly following instructions in disasters • produce a situational assessment related to a multi-casualty situation or a disaster and work actively as required by the situation • use disaster classification cards following instructions • implement tests and treatments essential for a client's status, justifying their actions • use client information systems and ICT, taking information security and secrecy obligation provisions into account • give consistent prior notification of clients transported by the unit to the receiving care institution • safely transport clients to the correct care institution and return immediately to the scene of the accident following instructions
Good 4	
Excellent 5	<ul style="list-style-type: none"> • work in cooperation with the Emergency Response Centre, use the authorities' Virve network professionally and appropriately in situations requiring cooperation with the authorities, and observe data protection when communicating • use Virve call groups and folders adeptly following instructions in disasters, justifying their actions • produce a situational assessment related to a multi-casualty situation or a disaster and act as required by the situation, justifying their actions • use disaster classification cards following instructions, justifying their actions • implement the tests and treatments essential for a client's status, justifying their decisions diversely • use client information systems and ICT, taking information security and secrecy obligation provisions into account • give consistent and justified prior notification of clients transported by the unit to the receiving care institution • safely transport clients to the correct care institution and return immediately to the scene of the accident following instructions.

Students use their interaction and guidance skills.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • behave professionally in interactive situations • master communication with the authorities in emergency conditions • provide guidance to act in multi-casualty situations and disasters • use plain language and communication methods that support and compensate for speech with their team • recognise symptoms of shock and take them into account in their communication • guide clients, their close networks and others involved in the incident to critical incident stress debriefing
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • behave professionally in interactive situations • master communication with the authorities in emergency conditions, justifying their actions

	<ul style="list-style-type: none"> • provide guidance to act in multi-casualty situations and disasters • adapt their communication to clients' status and needs, using plain language and communication methods that support and compensate for speech • recognise symptoms of shock and adapt their communication to be suitable for a person in a crisis • guide clients, their close networks and others involved in the incident to timely critical incident stress debriefing
Good 4	
Excellent 5	<ul style="list-style-type: none"> • behave professionally in interactive situations • master communication with the authorities in emergency conditions, justifying their actions diversely • provide guidance to act in multi-casualty situations and disasters • adapt their communication to clients' status and needs, using plain language and communication methods that support and compensate for speech with a client-oriented approach • recognise the symptoms of shock and adapt their communication to be suitable for a person in a crisis, taking into account the ability to understand of a person in crisis • appropriately and flexibly guide clients, their close networks and others involved in the incident to critical incident stress debriefing.

Students maintain and promote safety as well as their work ability and wellbeing at work.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • follow the unit's safety plan and practices for reporting hazardous situations and act as required by them • comply with instructions and regulations concerning wellbeing at work and occupational safety and with electrical, radiation and fire safety regulations • wear appropriate work clothing and the required protective equipment and are aware of the risks related to the work unit's activities • recognise physical and psychological strain and risk factors associated with their work and prevent them • look after their work ability, wellbeing at work and health • recognise the effects of their activities on ensuring their own and patient safety • take part in debriefing and seek support in the aftermath of crises
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • follow the unit's safety plan and practices for reporting hazardous situations and act as required by them • comply with instructions and regulations concerning wellbeing at work and occupational safety and with electrical, radiation and fire safety regulations • wear appropriate work clothing and the required protective equipment and prevent the health hazards and harms caused by the work • recognise physical and psychological strain and risk factors associated with their work, prevent them and propose improvements aiming for their prevention • look after their work ability and promote their occupational wellbeing and health diversely

	<ul style="list-style-type: none"> • recognise and evaluate the effects of their actions on their own and client safety • take part in debriefing and seek support in the aftermath of crises with initiative
Good 4	
Excellent 5	<ul style="list-style-type: none"> • follow the unit's safety plan and practices for reporting hazardous situations and act as required by them • comply with instructions and regulations concerning wellbeing at work and occupational safety and with electrical, radiation and fire safety regulations • wear appropriate work clothing and the required protective equipment and prevent the health hazards and harms caused by the work, justifying their actions • recognise physical and psychological strain factors associated with their work, prevent them and propose justified improvements aiming for their prevention • look after their work ability and promote their occupational wellbeing and health diversely, with justifications • recognise and evaluate the effects of their actions on their own and client safety and prevent adverse events • take part in debriefing and seek support in the aftermath of crises actively and with initiative.

Students assess and develop their work.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • assess their learning and competence and request guidance if necessary • receive feedback and develop their activities based on feedback received by them • seek professional knowledge and draw on it in their tasks • as team members, recognise some of the effects of their work on the quality of cooperation with the authorities
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • assess their learning and competence and set themselves development objectives • receive and give feedback appropriately and develop their activities based on feedback they receive • seek professional knowledge and draw on it diversely in their tasks • recognise some of the effects of their work on the quality of cooperation with the authorities
Good 4	
Excellent 5	<ul style="list-style-type: none"> • assess their learning as well as strengths and development needs and set themselves realistic development objectives • receive and give feedback constructively and develop their emergency care competence, justifying their actions • actively seek professional knowledge, draw on it diversely in their tasks, and apply their prior learning to changing situations at work • recognise some of the effects of their work on the quality of cooperation with authorities and modify their actions based on their observations.

Methods of demonstrating competence

Students demonstrate their competence in practical tasks where they work in multi-casualty situations and disasters, performing a practical nurse's/emergency practical nurse's tasks. To the extent that the vocational competence required in the unit cannot be assessed on the basis of the demonstration, the competence demonstration is to be supplemented in other ways on an individual basis. Competence related to disasters may also be demonstrated in a simulation designed in cooperation with workplace experts.

2.36. Communication and interaction competence, 11 Competence point (400012)

Communication and interaction in mother tongue is completed and instructed in Finnish, Swedish or Sámi as the mother tongue, depending on the education provider's language of instruction and the qualification language. According to the student's choice, Communication and interaction in mother tongue may also be completed and instruction in it may be provided using Finnish or Swedish, Roma language or sign language that is the student's second language, or the student's other mother tongue, if this possibility is offered by the education provider.

Communication and interaction in mother tongue, Finnish

Compulsory learning outcomes, 4 Competence point

Students know how to

- act appropriately in different interactive situations
- interpret different texts and obtain and evaluate information from different sources
- produce different texts and express feelings, thoughts, opinions and concepts.

Assessment

Students act appropriately in different interactive situations.	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • communicate in a manner that is appropriate for the interactive situation • express views appropriately in cooperation and group situations • use standard language that is appropriate for the situation when presenting a phenomenon or a matter related to their vocational field • understand the importance of language and interaction competence in their vocational field and in the world of work • evaluate their interaction competence based on feedback received by them
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • communicate fluently in different interactive situations • steer the discussion forwards in cooperation and group situations in a goal-oriented manner • justify their opinions and statements • use standard language as indicated by the situation and the concepts and text types of their vocational field naturally when presenting phenomena or matters related to their vocational field

	<ul style="list-style-type: none"> • through their actions, demonstrate an understanding of the importance of language and interaction competence in their vocational field and in the world of work • evaluate their interaction competence realistically, recognising their strengths and development needs
Good 4	
Excellent 5	<ul style="list-style-type: none"> • communicate convincingly also in demanding interactive situations • act constructively and promote the interaction of the team in cooperation and teamwork situations through their actions • justify their opinions and statements diversely and in a manner that is appropriate for the situation • use standard language as indicated by the situation and the concepts and text types of their vocational field naturally and appropriately when presenting phenomena related to their vocational field and gear their message to the target group • through their actions, demonstrate an understanding of the importance of language and interactive competence in their vocational field, in the world of work and in society • develop their interaction competence based on feedback and self-assessment

Students interpret different texts and obtain and evaluate information from different sources.	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • recognise text types and media used in their vocational field and in the world of work • conclude the meanings of texts mainly independently • seek information in the main information sources in their vocational field and use their multiliteracy in simple tasks for seeking information • take some notes and sum up a few core ideas based on what they hear, read and see • assess the reliability of information sources and information mainly independently • use the information they have obtained • observe copyrights mainly independently • assess their competence in interpreting texts based on the feedback received
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • recognise diverse text types and media used in their vocational field and in the world of work • interpret the main objectives and essential meanings of different texts • seek information in diverse sources in their vocational field, using their multiliteracy • take notes and sum up the core contents based on what they hear, read and see • evaluate the reliability of information sources and information • use the information they have obtained systematically and effortlessly • observe copyrights appropriately • assess their competence in interpreting texts realistically, recognising their strengths and development needs
Good 4	

Excellent 5	<ul style="list-style-type: none"> • know the diverse text types and media used in their vocational field and in the world of work and evaluate their use • interpret the objectives of different texts diversely and evaluate the content and expression of the texts • seek information in diverse and relevant information sources effortlessly, using their multiliteracy • take notes independently and sum up the core contents based on what they hear, read and see • assess with expertise the reliability of information sources and information • diversely and effortlessly use the information they have obtained • observe copyrights and cite appropriately the sources they use • develop their competence in the interpretation of texts on the basis of feedback and self-assessment.
-------------	---

Students produce different texts and express feelings, thoughts, opinions and concepts
Students

Satisfactory 1	<ul style="list-style-type: none"> • set objectives for their expression and plan their expression according to these objectives • produce spoken, written or audio-visual texts using information and communication technologies and their multiliteracy • have partly mastered the practices of written language • produce texts that are typically needed in their vocational field and in the world of work • produce spoken language that is suitable for the situation • assess their competence in producing texts and their expressive skills on the basis of the feedback received
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • set objectives for their expression and communicate in line with these objectives • produce spoken, written or audio-visual texts using information and communication technologies and their multiliteracy and assess the appropriateness of different options • have mostly mastered the practices of written language • produce texts according to the textual practices in their vocational field and in the world of work • plan spoken texts according to the target group and express themselves clearly • assess their competence in producing texts realistically, recognising their strengths and development needs
Good 4	
Excellent 5	<ul style="list-style-type: none"> • set objectives for their expression, communicate in line with these objectives and assess the effectiveness of their communication • produce spoken, written or audio-visual texts using diverse information and communication technologies and their multiliteracy, and assess the appropriateness of different options • have mastered the practices of written language with fluency and modify the expression and structure of the texts they produce • fluently produce texts that comply with the textual practices of their vocational field and the world of work • use clear spoken language that is appropriate for the situation interactively and have mastered polished standard language

- develop their competence in producing texts on the basis of feedback and self-assessment.

Optional learning outcomes, 3 Competence point

Students know how to

- develop their communication and interaction competence
- develop their public speaking and teamwork skills
- interpret and produce different texts
- are familiar with forms and meanings of language and literature.

Assessment

Students know how to develop their communication and interaction competence.	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • express their opinions appropriately and provide convincing arguments for them • take the views of others into account in interaction • demonstrate an understanding of the importance of non-verbal communication and its impacts on how the message is received • assess their communication and interaction competence on the basis of the feedback received
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • behave politely and adaptively in interactive situations in different environments • take the requirements of the recipient, the situation and their vocational field into account in their communication • take the impacts of non-verbal communication into account in their own expression • assess their communication and interaction competence realistically by recognising their strengths and development needs
Good 4	
Excellent 5	<ul style="list-style-type: none"> • maintain interaction while they are speaking, illustrate their speech and put it together logically • take into account the recipient, situation and the requirements of the vocational field and communicate constructively also in conflicting and problem situations • apply the rules of non-verbal communication in their interaction and compare cultural meanings • develop their communication and interaction competence on the basis of feedback and self-assessment

Students develop their public speaking and teamwork skills.	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • deliver both spontaneous and prepared speeches or oral presentations on familiar topics • work cooperatively as part of the team in teamwork situations • follow the meeting and negotiation practices of the world of work but need guidance from time to time

	<ul style="list-style-type: none"> • assess their public speaking and teamwork skills on the basis of the feedback received
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • deliver both spontaneous and prepared presentations, illustrate their presentation and put them together logically • actively steer the team's work forwards and appreciate the views of others • follow the meeting and negotiation practices of the world of work • assess their public speaking and teamwork skills realistically, recognising their strengths and development needs
Good 4	
Excellent 5	<ul style="list-style-type: none"> • deliver both spontaneous and independently prepared presentations, also in challenging situations, illustrate their presentation and put it together logically • recognise the impacts of their actions on the team's operation and encourage other team members to act • have mastered the flexible use of meeting and negotiation practices • assess their public speaking and teamwork skills based on feedback and self-evaluation.

Students interpret and produce different texts.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • familiarise themselves with different text types • know some of the requirements of using text types as indicated by the situation • with guidance, produce and interpret texts on their own and together with others • with guidance, give and receive constructive feedback on the produced texts • assess their competence in interpreting and producing texts on the basis of the feedback received
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • familiarise themselves with different text types and analyse their methods of expression critically • produce and interpret texts alone and together with others • edit texts they have produced on the basis of feedback • give and receive constructive feedback on produced text • assess their competence in interpreting and producing texts realistically by recognising their strengths and development needs
Good 4	
Excellent 5	<ul style="list-style-type: none"> • familiarise themselves with different text types and analyse their methods of expression critically and from diverse viewpoints • produce and interpret diverse texts alone and together with others • give constructive and diverse feedback on texts that have been produced and receive feedback • edit texts they have produced and develop their writing skills based on the feedback received • develop their competence in interpreting and producing texts on the basis of feedback and self-assessment.

Students are familiar with forms and meanings of language and literature	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • are aware of the importance of the diversity of languages, cultures and identities • familiarise themselves with different genres of literature and other art forms • read literary texts • make observations on their reading
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • take into account the diversity of languages, cultures and identities in their interaction • familiarise themselves diversely with different genres of literature and other art forms • read literature and interpret and evaluate literature and other works of art • assess their reading
Good 4	
Excellent 5	<ul style="list-style-type: none"> • diversely apply their competence related to the diversity of languages, cultures and identities • demonstrate diverse knowledge of different genres of literature and other art forms • acquire diverse reading experiences and analyse and evaluate literature and other works of art • assess and develop their reading.

Communication and interaction in mother tongue, Sámi

Compulsory learning outcomes, 4 Competence point

Students know how to

- act appropriately in different interactive situations using Sámi
- interpret different texts and obtain and evaluate information from different sources
- produce different texts and express feelings, thoughts, opinions and concepts in Sámi.

Assessment

Students act appropriately in different interactive situations using Sámi.	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • communicate in a manner that is appropriate for the interactive situation • express views appropriately in cooperation and group situations • use standard language that is appropriate for the situation when presenting a phenomenon or a matter related to their vocational field • understand the importance of language and interaction competence in their vocational field and in the world of work • evaluate their interaction competence based on feedback received by them
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • communicate fluently in different interactive situations

Communication and interaction in mother tongue, sign language

Compulsory learning outcomes, 4 Competence point

Students know how to

- act appropriately in different interactive situations using the Finnish sign language
- interpret different signed texts and obtain and evaluate information from different sources
- produce signed texts in different forms and express feelings, thoughts, opinions and concepts in the Finnish sign language.

Assessment

Students act appropriately in different interactive situations using the Finnish sign language.	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • use the Finnish sign language in familiar communication situations appropriately

	<ul style="list-style-type: none"> • can cope in familiar communication environments, for example with people who can hear • use sign language interpretation in interactive situations • participate in cooperation and group situations and express their opinions appropriately • present a phenomenon or issue related to their vocational field • are aware of the importance of sign language and interaction competence in their vocational field and in the world of work • evaluate their interaction competence based on feedback received by them
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • use the Finnish sign language in communication situations of the field interactively and appropriately • operate in varying professional communication environments, including with sign language users and people who can hear • use sign language interpretation appropriately in different situations • steer a communication situation forwards purposefully • justify their opinions and arguments and work in an ethically sustainable manner in interactive situations • as indicated by the situation, use standard language naturally and the concepts and registers of the field adeptly when presenting phenomena or matters related to their vocational field • understand the importance of sign language and interaction competence in their vocational field and in the world of work • assess their interaction competence realistically, recognising their strengths and development needs
Good 4	
Excellent 5	<ul style="list-style-type: none"> • use the Finnish sign language actively in communication situations of the field and are naturally interactive and convincing in their communication • operate flexibly in different multimodal communication environments • use sign language interpretation adeptly in different situations • participate actively and constructively in a group • promote the interaction of the group through their actions • justify their views and arguments diversely and work in an ethically sustainable manner in interactive situations • direct their message to the target group when presenting phenomena related to their field in standard language and use the concepts and registers of the field flexibly • understand the importance of sign language and interaction competence in their vocational field and more extensively in society for both the individual and the world of work • develop their interaction competence based on feedback and self-assessment.

Students interpret different signed texts and obtain and evaluate information from different sources.

Students

Satisfactory 1

- are familiar with text types used in the world of work
- find information in key sources of their vocational field
- understand the core contents of essential messages in their field in the Finnish sign language

	<ul style="list-style-type: none"> • make conclusions about the meanings of texts and the reliability of different information sources • use the information they have acquired for interpreting texts while communicating • observe copyrights partly independently • assess their competence in interpreting texts based on the feedback received
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • understand the objective of texts that are essential for their vocational competence and interpret the meanings of texts • find information related to their vocational field in versatile sources • understand the main content of essential messages in their field in the Finnish sign language and are able to relate it to their personal experiences • evaluate the reliability of information and information sources • diversely use the information they have acquired for interpreting texts • observe copyrights appropriately • assess their competence in interpreting texts realistically, recognising their strengths and development needs
Good 4	
Excellent 5	<ul style="list-style-type: none"> • interpret the meanings and objectives of texts and are able to evaluate their content and expression • seek information in diverse and relevant information sources • understand the main contents of messages in their field in the Finnish sign language and are able to make comparisons and conclusions on this basis • expertly evaluate the reliability of information and information sources • adeptly use the information they have acquired for interpreting texts • observe copyrights and cite appropriately the sources they use • develop their competence in the interpretation of texts on the basis of feedback and self-assessment.

Students produce signed texts in different forms and express feelings, thoughts, opinions and concepts in the Finnish sign language.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • set objectives for their signed texts and are to some extent able to adapt their expression in order to achieve the objectives • use information and communication technology for producing signed texts and practise their multiliteracy • are familiar with different styles, including narrative, factual and news style, and use signs relevant to their vocational field under guidance • have partly mastered the practices of written language • using a model, produce signed documents, including reports, operating instructions, CVs and other typical texts needed in their vocational field • take notes and sum up the core contents based on what is presented to them and they read and see • assess their competence in producing signed texts based on the feedback received
Satisfactory 2	

Good 3	<ul style="list-style-type: none"> • set objectives for their signed texts and express themselves in keeping with the objectives • use information and communication technology for producing signed texts, are able to evaluate the appropriateness of different options, and practise their multiliteracy • have mastered the general signs and communicate in situations of their field in the Finnish sign language • have mainly mastered the practices of written language and the sequencing of text, and their texts have natural cohesion • prepare signed documents appropriately and produce typical texts following the practices of their field • take notes and sum up information they have acquired • assess their competence in producing signed texts realistically, recognising their strengths and development needs
Good 4	
Excellent 5	<ul style="list-style-type: none"> • set objectives for their signed texts, communicate in line with these objectives and assess the effectiveness of their communication • use information and communication technology and media for producing signed texts and improve their multiliteracy • communicate professionally in the Finnish sign language and are well familiar with the signs relevant to their vocational field • have good command of the practices of written language and constructing text • edit the expression and structure of signed texts produced by them • adeptly produce signed texts in keeping with the practices of their field • prepare signed documents appropriately and are also able to apply document models creatively • develop their competence in producing signed texts on the basis of feedback and self-assessment

Optional learning outcomes, 3 Competence point

Students know how to

- develop their communication and interaction competence and the ways to express of the Finnish sign language
- develop their public speaking and teamwork skills
- interpret and produce different signed texts
- are familiar with forms and meanings of language and literature.

Assessment

Students develop their communication and interaction competence and the ways to express of the Finnish sign language.	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • express their opinion with appropriate and persuasive justifications • take other people's views into account in interaction • understand the importance of non-verbal communication and gestures in interaction and their influence on the way the message is received

	<ul style="list-style-type: none"> • assess their communication and interaction competence on the basis of the feedback received
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • behave politely and adaptively in interactive situations in different language environments • take the requirements of the recipient, the situation and their vocational field into account in their communication • naturally use general signs and signs related to their vocational field • account for the importance of non-verbal communication and gestures and are aware of their impacts in their own expression • assess their communication and interaction competence realistically, recognising their strengths and development needs
Good 4	
Excellent 5	<ul style="list-style-type: none"> • maintain interaction while signing, illustrate their speech and structure it so that its contents are logical • make versatile use of sign language with fluent structures and rich expressions • communicate constructively, also in situations that involve conflicts and problems • apply the rules of non-verbal communication, gestures and non-manual markers in their interaction and also compare meanings between different cultures • develop their communication and interaction competence on the basis of feedback and self-assessment.

Students develop their public speaking and teamwork skills	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • deliver both spontaneous and prepared addresses or presentations on familiar topics • work cooperatively as part of the team in teamwork situations • follow the meeting and negotiation practices of the world of work but need guidance from time to time • assess their public speaking and teamwork skills on the basis of the feedback received
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • when speaking publicly, find it easy to make contact with the audience, and know how to structure their contributions so that they are easy to follow • actively steer the team's work forwards and appreciate the views of others • follow the meeting and negotiation practices of the world of work • assess their public speaking and teamwork skills realistically, recognising their strengths and development needs

Communication and interaction in mother tongue, Finnish for sign language users

Compulsory learning outcomes, 4 Competence point

Students know how to

- communicate in different interactive situations in Finnish
- obtain and interpret information to base their communication on
- express concepts, ideas, feelings, facts and opinions in Finnish.

Assessment

Students communicate in different interactive situations in Finnish.	
Students	
Satisfactory 1	<ul style="list-style-type: none"> act appropriately in each situation in a familiar communication environment use professional Finnish and their other language competence when operating in familiar language environments, for instance with people who can hear, but need guidance from time to time are aware of the significance of Finnish language proficiency in their field
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> communicate interactively and appropriately in different situations under guidance, use professional Finnish and their other linguistic capabilities in varying language environments, for instance with people who can hear, and participate in interactive situations understand the importance of Finnish in their vocational field and in society
Good 4	
Excellent 5	<ul style="list-style-type: none"> are naturally interactive and convincing in their communication communicate actively and constructively in group situations use professional Finnish and their other linguistic capabilities and participate actively in different multimodal interactive situations assess the importance of Finnish in their vocational field and more extensively in society for both the individual and the world of work.

Students obtain and interpret information to base their communication on.	
Students	

Satisfactory 1	<ul style="list-style-type: none"> • understand the gist of general texts and key texts of their field • seek information in key sources for their vocational field in Finnish, partly independently • make conclusions on the reliability of different information sources • use the information they have obtained in their communication observing copyrights, partly independently
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • understand the gist of general texts and key texts in terms of their vocational competence, compare literary, standard and everyday language texts • find information related to their vocational field in versatile sources in Finnish • evaluate the reliability of information and information sources • use the information they have obtained to support their interpretation and own expression • observe copyrights appropriately
Good 4	
Excellent 5	<ul style="list-style-type: none"> • fluently understand both texts intended for a general audience and those related to their vocational field • seek information in diverse and relevant information sources in Finnish • expertly evaluate the reliability of information and information sources • adeptly use the information they have obtained to support their interpretation and own expression • observe copyrights and cite appropriately the sources they use.

Students express concepts, ideas, feelings, facts and opinions in Finnish.	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • set targets for their communication and are to some extent able to adapt their communication in order to achieve the targets • use different means of communication and media to communicate • write key texts in terms of vocational competence and use understandable language but need guidance from time to time • produce documents following a model and common texts needed in their vocational field • assess their language proficiency and literacy in the Finnish language based on feedback and explain how they could improve their competence
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • set objectives for their communication and express themselves in keeping with these objectives • use different means of communication and media to communicate, assess the appropriateness of different options in their use • write texts that are essential for their vocational competence following the basic spelling rules of Finnish • draw up documents appropriately and produce texts that are essential for their vocational field following the textual practices of the field

	<ul style="list-style-type: none"> • assess their expression skills, language use and literacy in Finnish realistically, recognising their strengths and development needs
Good 4	
Excellent 5	<ul style="list-style-type: none"> • set objectives for their expression, communicate in line with these objectives and assess the effectiveness of their communication • use different means of communication and media to communicate, promoting the achievement of their communication-related objectives • fluently write clear and understandable standard Finnish, observing the basic spelling rules • prepare documents appropriately and are also able to apply document models • assess their expression skills, language use and literacy in Finnish realistically, recognising their strengths and development needs • improve their skills based on feedback.

Optional learning outcomes, 3 Competence point

Students know how to

- improve their communication and interaction competence in Finnish
- interpret different text types and are familiar with literature
- develop their skills in producing professional texts in Finnish
- assess the importance of linguistic and cultural identity and compare the ways to express of different modalities, including signed and spoken or written language.

Assessment

Students improve their communication and interaction competence in Finnish.	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • express their opinions and justify them convincingly in familiar communication situations as appropriate for the situation • work cooperatively in work duties, using aids if necessary
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • when communicating, find it easy to make contact with the audience, and structure their contributions so that they are easy to follow • work cooperatively as team members and pass on messages
Good 4	
Excellent 5	<ul style="list-style-type: none"> • maintain interaction, illustrate their presentation and put it together logically • communicate professionally and responsibly in a multimodal communication environment (with both the deaf and people who can hear).

Students interpret different text types and are familiar with literature.	
Students	

Satisfactory 1	<ul style="list-style-type: none"> • use different text types following a model and know some of the requirements of the environments in which the texts are used • familiarise themselves with different literary genres and get experiences of reading
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • correctly comply with the requirements relevant to a text type in the environments in which the texts are used • evaluate the books they read
Good 4	
Excellent 5	<ul style="list-style-type: none"> • comply with the basic norms of language use and explain written texts in sign language • get versatile reading experiences and evaluate the significance of literature.

Students develop their skills in producing professional texts in Finnish.	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • produce professional texts and use the appropriate language
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • produce professional texts and take working life requirements into account in them
Good 4	
Excellent 5	<ul style="list-style-type: none"> • produce fluent and understandable professional texts and develop their skills based on feedback.

Students assess the importance of linguistic and cultural identity and compare the ways to express of different modalities, including signed and spoken or written language.	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • understand the features and properties of different modalities of language • evaluate the significance of written language for sign language users from the perspective of working in a vocational field
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • critically examine different ways to express in communication and language use • evaluate the position of written language in proportion to sign language in society and working life
Good 4	
Excellent 5	<ul style="list-style-type: none"> • compare and make observations on the typical structures of different languages and modalities • compare the importance and position in society of multiliteracy and multimodality both in the world of work and from an individual's perspective.

Communication and interaction in mother tongue, Finnish as a second language

Compulsory learning outcomes, 4 Competence point

Students know how to

- act appropriately in different interactive situations
- interpret different texts and obtain and evaluate information from different sources
- produce different texts and express feelings, thoughts, opinions and concepts.

Assessment

Students act appropriately in different interactive situations.	
Students	
Satisfactory 1	<ul style="list-style-type: none">• to some extent understand communication in situations involving speech in their vocational field• strive to communicate appropriately as indicated by an interactive situation• strive to express their opinions• strive to use standard language when presenting a phenomenon or a matter related to their vocational field• recognise the importance of language and interaction competence in their vocational field and in the world of work• evaluate their interaction competence based on feedback received by them
Satisfactory 2	
Good 3	<ul style="list-style-type: none">• understand communication related to situations involving speech typical of their vocational field• communicate rather fluently in ordinary interactive situations• express their opinions appropriately• use standard language and, to some extent, concepts and text types of their field when presenting phenomena or matters related to their vocational field• understand the importance of language and interaction competence in their vocational field and in society• evaluate their interaction competence realistically, recognising their strengths and development needs
Good 4	
Excellent 5	<ul style="list-style-type: none">• understand versatile types of communication related to situations involving speech in their field• communicate rather fluently in different interactive situations• communicate rather fluently in different interactive situations• use standard language and concepts and text types of their field when presenting phenomena or matters related to their vocational field• by their actions, show that they understand the importance of language and interaction competence in their field and in society for both the individual and the world of work• develop their interaction competence based on feedback and self-assessment

Students interpret different texts and obtain and evaluate information from different sources.	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • identify the most common text types and media used in their field and in the world of work, mainly independently • find information in sources relevant to their field and evaluate the reliability of these sources, mainly independently • take some notes and strive to sum up core ideas based on what they hear, read and see • use their multiliteracy, mainly independently • understand the gist of key texts for their vocational competence • use the information they have acquired for interpreting texts mainly independently • observe copyrights mainly independently • assess their competence in interpreting texts based on the feedback received

Optional learning outcomes, 3 Competence point

Students know how to

- develop their communication and interaction competence
- improve the language proficiency needed in their field
- interpret and produce different texts
- are familiar with forms and meanings of language and literature.

Assessment

Students know how to develop their communication and interaction competence.	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • express their opinions appropriately and strive to justify them • strive to take other people's opinions into consideration in their communication • observe the meanings of non-verbal communication and its impacts on how the message is received • assess their communication and interaction competence on the basis of the feedback received
Satisfactory 2	

Good 3	<ul style="list-style-type: none"> • communicate appropriately and adaptively in different interactive situations • take the recipient and the situation into consideration in their communication • take the impacts of non-verbal communication into account in their own expression • assess their communication and interaction competence realistically by recognising their strengths and development needs
Good 4	
Excellent 5	<ul style="list-style-type: none"> • communicate logically and illustratively in different interactive situations • take other people into consideration when communicating, also in situations that involve conflicts and problems • know how to apply the rules of non-verbal communication in their interaction and compare cultural meanings • strive to develop their communication and interaction competence on the basis of feedback and self-assessment.

Students improve the language proficiency needed in their field.	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • expand their command of concepts of their field and linguistic practices • deliver a prepared speech or oral presentation on a familiar topic • mainly independently follow the meeting and negotiation practices of the world of work and strive to use expressions relevant to the situation • assess their language proficiency related to their field based on feedback received by them
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • have mastered key concepts and linguistic practices of their field • deliver a prepared speech or oral presentation on a topic relevant to their field • follow the meeting and negotiation practices of the world of work and use expressions relevant to the situation • assess their language proficiency related to their field realistically by recognising their strengths and development needs
Good 4	
Excellent 5	<ul style="list-style-type: none"> • use the concepts and linguistic practices of their field diversely • deliver both a spontaneous and a pre-prepared illustrative presentations on a topic relevant to their field • adeptly follow the meeting and negotiation practices of the world of work and use expressions relevant to the situation • develop language proficiency relevant to their field based on feedback and self-assessment.

Students interpret and produce different texts.	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • familiarise themselves with different text types

	<ul style="list-style-type: none"> • know some of the requirements of using text types as indicated by the situation • with guidance, produce and interpret texts alone and together with others • with guidance, give and receive constructive feedback on the produced texts • assess their competence in interpreting and producing texts on the basis of the feedback received
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • familiarise themselves with different text types and analyse the expressions in different text types • produce and interpret texts alone and together with others • edit texts they have produced on the basis of feedback • give and receive feedback on the produced text • assess their competence in interpreting and producing texts realistically by recognising their strengths and development needs
Good 4	
Excellent 5	<ul style="list-style-type: none"> • familiarise themselves with different text types and analyse their methods of expression diversely • produce and interpret diverse texts alone and together with others • give constructive feedback on texts that have been produced and receive feedback • edit texts they have produced and develop their writing skills based on the feedback received • develop their competence in interpreting and producing texts on the basis of feedback and self-assessment.

Students are familiar with forms and meanings of language and literature.	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • recognise the diversity of languages, cultures and identities in interaction • recognise key structures, registers and styles of the language • familiarise themselves with different genres of literature • make observations on their reading
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • are aware of the importance of linguistic and cultural diversity and the diversity of identities in their interaction • diversely recognise structures, registers and styles of the language • read different genres of literature • assess their reading
Good 4	
Excellent 5	<ul style="list-style-type: none"> • apply their competence related to the diversity of languages, cultures and identities in interaction • diversely recognise structures, registers and styles of the language and understand the impact of linguistic choices on texts • read different genres of literature and analyse what they have read • assess and develop their reading.

Communication and interaction in mother tongue, the Roma language

Compulsory learning outcomes, 4 Competence point

Students know how to

- act appropriately in different interactive situations in the Roma language
- interpret different texts and obtain and evaluate information from different sources
- produce different texts and express feelings, thoughts, opinions and concepts in Roma language.

Assessment

Students act appropriately in different interactive situations in the Roma language.	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • communicate in a manner that is appropriate for the interactive situation • express their views appropriately in cooperation and group situations • use standard language that is appropriate for the situation when presenting a phenomenon or a matter related to their vocational field • understand the importance of language and interaction competence in their vocational field and in the world of work • evaluate their interaction competence based on feedback received by them
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • communicate fluently in different interactive situations • steer the discussion forwards in cooperation and group situations in a goal-oriented manner • justify their opinions and statements • use standard language as indicated by the situation and the concepts and text types of their vocational field naturally when presenting phenomena or matters related to their vocational field • through their actions, demonstrate an understanding of the importance of language and interaction competence in their vocational field and in the world of work • evaluate their interaction competence realistically, recognising their strengths and development needs
Good 4	
Excellent 5	<ul style="list-style-type: none"> • communicate convincingly also in demanding interactive situations • act constructively and promote the interaction of the team in cooperation and teamwork situations through their actions • justify their opinions and statements diversely and in a manner that is appropriate for the situation • use standard language as indicated by the situation and the concepts and text types of their vocational field naturally and appropriately when presenting phenomena related to their vocational field and gear their message to the target group • through their actions, demonstrate an understanding of the importance of language and interactive competence in their vocational field, in the world of work and in society

	<ul style="list-style-type: none"> • develop their interaction competence based on feedback and self-assessment
--	--

Students interpret different texts and obtain and evaluate information from different sources.	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • recognise text types and media used in their vocational field and in the world of work • conclude the meanings of texts mainly independently • seek information in the main information sources in their vocational field and use their multiliteracy in simple tasks for seeking information • take some notes and sum up a few core ideas based on what they hear, read and see • assess the reliability of information sources and information mainly independently • use the information they have obtained • observe copyrights mainly independently • assess their competence in interpreting texts based on the feedback received
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • recognise diverse text types and media used in their vocational field and in the world of work • interpret the main objectives and essential meanings of different texts • seek information in diverse sources in their vocational field, using their multiliteracy • take notes and sum up the core contents based on what they hear, read and see • evaluate the reliability of information sources and information • use the information they have obtained systematically and effortlessly • observe copyrights appropriately • assess their competence in interpreting texts realistically, recognising their strengths and development needs
Good 4	
Excellent 5	<ul style="list-style-type: none"> • know the diverse text types and media used in their vocational field and in the world of work and evaluate their use • interpret the objectives of different texts diversely and evaluate the content and expression of the texts • seek information in diverse and relevant information sources effortlessly, using their multiliteracy • take notes independently and sum up the core contents based on what they hear, read and see • assess with expertise the reliability of information sources and information • diversely and effortlessly use the information they have obtained • observe copyrights and cite appropriately the sources they use • develop their competence in the interpretation of texts on the basis of feedback and self-assessment.

Students produce different texts and express feelings, thoughts, opinions and concepts in the Roma language.	
Students	

Satisfactory 1	<ul style="list-style-type: none"> • set objectives for their expression and plan their expression according to these objectives • produce spoken, written or audio-visual texts using information and communication technologies and their multiliteracy • have partly mastered the practices of written language • produce texts that are typically needed in their vocational field and in the world of work • produce spoken language that is suitable for the situation • assess their competence in producing texts and their expressive skills on the basis of the feedback received
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • set objectives for their expression and communicate in line with these objectives • produce spoken, written or audio-visual texts using information and communication technologies and their multiliteracy and assess the appropriateness of different options • have mostly mastered the practices of written language • produce texts according to the textual practices in their vocational field and in the world of work • plan spoken texts according to the target group and express themselves clearly • assess their competence in producing texts realistically, recognising their strengths and development needs
Good 4	
Excellent 5	<ul style="list-style-type: none"> • set objectives for their expression, communicate in line with these objectives and assess the effectiveness of their communication • produce spoken, written or audio-visual texts using diverse information and communication technologies and their multiliteracy, and assess the appropriateness of different options • have mastered the practices of written language with fluency and modify the expression and structure of the texts they produce • fluently produce texts that comply with the textual practices of their vocational field and the world of work • use clear spoken language that is appropriate for the situation interactively and have mastered polished standard language • develop their competence in producing texts on the basis of feedback and self-assessment.

Optional learning outcomes, 3 Competence point

Students know how to

- develop their communication and interaction competence in the Roma language
- develop their public speaking and teamwork skills
- interpret and produce different texts in the Roma language
- are familiar with forms and meanings of language and literature.

Assessment

Students develop their communication and interaction competence in the Roma language.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • express their opinions appropriately and provide convincing arguments for them • take the views of others into account in interaction • demonstrate an understanding of the importance of non-verbal communication and its impacts on how the message is received • assess their communication and interaction competence on the basis of the feedback received
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • behave politely and adaptively in interactive situations in different environments • take the requirements of the recipient, the situation and their vocational field into account in their communication • take the impacts of non-verbal communication into account in their own expression • assess their communication and interaction competence realistically by recognising their strengths and development needs
Good 4	
Excellent 5	<ul style="list-style-type: none"> • maintain interaction while they are speaking, illustrate their speech and put it together logically • take into account the recipient, situation and the requirements of the vocational field and communicate constructively also in conflicting and problem situations • apply the rules of non-verbal communication in their interaction and compare cultural meanings • develop their communication and interaction competence on the basis of feedback and self-assessment.

Students develop their public speaking and teamwork skills.

Students	
Satisfactory 1	<ul style="list-style-type: none"> • deliver both spontaneous and prepared speeches or oral presentations on familiar topics • work cooperatively as part of the team in teamwork situations • follow the meeting and negotiation practices of the world of work but need guidance from time to time • assess their public speaking and teamwork skills on the basis of the feedback received

The second native language, Finnish

Compulsory learning outcomes, 2 Competence point

Students know how to

- make use of the Finnish language in their communication in an interactive way
- understand different types of texts and can write simple texts in Finnish
- search for information from different Finnish language sources and use them in their communication
- understand the importance of knowing Finnish for work.

Assessment

Students use the Finnish language in their communication in an interactive way.	
Students	
Satisfactory 1	<ul style="list-style-type: none"> understand simple instructions and speech at a workplace make him/herself understood in their interaction with clients and colleagues participate in everyday conversation in a Finnish language working environment
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> understand clear instructions and conversation in a normal tempo at a workplace express her/himself clearly and acts effectively in their interaction with customers and colleagues participate in different types of discussions in a Finnish language working environment
Good 4	
Excellent 5	<ul style="list-style-type: none"> understand different types of instructions and discussions at a workplace, even at a rapid pace. express him/herself clearly and acts with flexibility in their interaction with customers and colleagues

	<ul style="list-style-type: none"> participate actively in different types of discussions in a Finnish language working environment
--	--

Students understand different types of texts and can write simple texts in Finnish.	
Students	
Satisfactory 1	<ul style="list-style-type: none"> understand the meaning of different types of texts write short texts and create simple documents after a template
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> understand the meaning and main contents of different types of texts write texts and create effective documents
Good 4	
Excellent 5	<ul style="list-style-type: none"> can understand the meaning of different types of texts write and process texts according to response and independently creates effective documents

Students search for information from different Finnish language sources and use them in their communication.	
Students	
Satisfactory 1	<ul style="list-style-type: none"> search for information from simple sources and use them in their communication.
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> search for information from different sources and use them in a versatile way in their communication.
Good 4	
Excellent 5	<ul style="list-style-type: none"> search for information from different sources, even more complicated ones, and use them in a flexible and critical way in their work.

Students understand the importance of knowing Finnish for work.	
Students	
Satisfactory 1	<ul style="list-style-type: none"> understand the importance of knowing Finnish for work and can make him/herself understood in a Finnish language working environment
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> understand the importance of knowing Finnish for work and function well in a Finnish language working environment
Good 4	
Excellent 5	<ul style="list-style-type: none"> understand the importance of knowing Finnish for work and participate actively in a Finnish language working environment

Optional learning outcomes, 3 Competence point

Students know how to

- discuss and argue in an assured and creative way
- understand and write work-related texts

- be aware of his/her strategies for language learning.

Assessment

Students discuss and argue in an assured and creative way.	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • express and motivate her/his opinions and also consider other people's opinions when discussing • can conduct an oral presentation of a familiar subject in a creative way

Good 3	<ul style="list-style-type: none"> • express and motivate his/her opinions in a convincing way and also consider differing opinions when discussing • can present a subject orally in an understandable and creative way
Good 4	
Excellent 5	<ul style="list-style-type: none"> • express and analyse his/her opinions in a self-critical way and communicate constructively when discussing • can present even more demanding subjects orally in a logical and creative way.

Students understand and write work-related texts.	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • understand the meaning of a work-related text and can also summarize its contents • write short and simple work-related texts
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • understand the meaning and main contents of a work-related text and can tie the information to personal experiences • write professional texts in a clear way
Good 4	
Excellent 5	<ul style="list-style-type: none"> • understand both the meaning and message in a work-related text and analyse the contents of the text • write well-structured professional texts

Students are aware of his/her strategies for language learning.	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • are aware of his/her personal learning strategy
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • are aware of the weak and strong points of his/her learning strategy
Good 4	
Excellent 5	<ul style="list-style-type: none"> • experiment with new learning strategies and learning styles.

Communication and interaction in a foreign language

Compulsory learning outcomes, 3 Competence point

Students know how to

- use a foreign language in different interactive situations
- look for information in different foreign-language sources
- operate in a multilingual and multicultural environment.

Assessment

Students use a foreign language in different interactive situations.	
Students	
Satisfactory 1	<ul style="list-style-type: none">• usually manage interactive situations using the language and understand simple, slow speech• describe themselves and their tasks by answering questions asked in predictable and familiar work situations• produce short messages and texts required in interaction• interpret common vocabulary, messages and instructions related to their activities correctly• strive to assess and develop their proficiency in the language
Satisfactory 2	
Good 3	<ul style="list-style-type: none">• usually manage interactive situations by using the language and understand ordinary speech at a normal tempo• describe themselves and their tasks understandably and participate in the discussion if their communication partner speaks clearly• produce messages and texts needed in interaction• interpret correctly and comply with texts and instructions concerning their activity and its targets and pose further questions• assess and develop their language proficiency
Good 4	
Excellent 5	<ul style="list-style-type: none">• act naturally in interactive situations using the language and understand ordinary speech at a normal tempo• in familiar situations, describe their activities and the related norms and customs as well as ask questions to obtain further instructions related to their activities• fluently produce ordinary messages and texts and fill in different documents• interpret texts, instructions and feedback concerning their activity and its targets• assess and develop their proficiency in the language diversely and on their own initiative.

Students look for information in foreign-language sources.	
Students	
Satisfactory 1	<ul style="list-style-type: none">• with guidance, look for foreign-language material and instructions related to their activities• with guidance, assess and select information based on how appropriate, reliable and up to date it is

Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • look for diverse foreign-language information that is necessary in their activities • assess and select information based on how appropriate, reliable and up to date it is
Good 4	
Excellent 5	<ul style="list-style-type: none"> • independently look for diverse foreign-language information related to their activities, apply their knowledge and skills and justify their decisions on selecting and applying the information • assess and select information diversely and critically based on how appropriate, reliable and up to date it is.

Students operate in a multilingual and multicultural environment.	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • are aware of the importance of the language they study and the culture it represents • strive to encounter people on an equal basis and with a positive attitude
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • act in a multilingual and multicultural environment using the target language • encounter people on an equal basis and with a positive attitude
Good 4	
Excellent 5	<ul style="list-style-type: none"> • flexibly apply their knowledge and skills in a foreign language and culture • encounter people on an equal basis in an exemplary manner and with a positive attitude

Optional learning outcomes, 3 Competence point

Students know how to

- communicate in a foreign language in different situations in the world of work
- operate as an active citizen in foreign-language contexts.

Assessment

Students communicate in a foreign language in different situations in the world of work.	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • describe themselves and their work tasks as well as respond when asked simple questions • manage general language interactive situations in which the most common topics related to work tasks are also discussed • express themselves in a manner required by the situation, but need guidance from time to time
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • describe themselves and the work tasks in the vocational field understandably, participate in a discussion and ask for further instructions related to their work • manage many types of work-related interactive situations

	<ul style="list-style-type: none"> express themselves in a manner required by the situation
Good 4	
Excellent 5	<ul style="list-style-type: none"> describe their workplace, their work and the norms and customs related to it using fairly extensive vocabulary and also find out about similar topics in other countries naturally manage work-related interactive situations, also when more demanding topics are discussed express themselves in a manner required by the situation.

Students operate as active citizens in foreign-language contexts.	
Students	
Satisfactory 1	<ul style="list-style-type: none"> recognise how a foreign language can be used to exert influence on different media act according to their rights and obligations applicable to foreign-language contexts at work and in everyday life, understanding the main principles of decision-making in society strive to take into account key features of different cultures in their activities
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> use a foreign language to exert influence on different media systematically act according to their rights and obligations applicable to foreign-language contexts at work and in everyday life, understanding the main principles of decision-making in society understand and take into account the central features of different cultures in their activities
Good 4	
Excellent 5	<ul style="list-style-type: none"> use a foreign language to exert influence in an argumentative manner and creatively on different media systematically and in an exemplary manner act according to their rights and obligations applicable to foreign-language contexts at work and in everyday life, understanding the main principles of decision-making in society understand and take into account different cultures diversely.

Operating in a digital environment

Compulsory learning outcomes, 2 Competence point

Students know how to

- use the most common ICT devices and make choices related to them
- use digital services and applications.

Assessment

Students use ICT devices and make choices related to them.	
Students	
Satisfactory 1	<ul style="list-style-type: none"> choose appropriate devices according to the purpose of use with some guidance use the most common ICT devices at the level of a citizen's digital competence, with some guidance

Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • choose appropriate devices according to the purpose of use • use the most common ICT devices at the level of a citizen's digital competence
Good 4	
Excellent 5	<ul style="list-style-type: none"> • choose appropriate devices according to different purposes of use • use the most common ICT devices at the level of a citizen's digital competence effortlessly and diversely.

Students use digital services and applications	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • obtain information on appropriate digital services and applications with some guidance • use digital services and applications in their work tasks with some guidance • with some guidance, use and share digital content, observing copyrights • comply with instructions related to data security and data protection • understand the principles of creating their online identity and protecting it
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • obtain information on appropriate digital services and applications • use digital services and applications in their work tasks • use and share digital content in compliance with copyrights • comply with instructions related to data security and data protection • understand the principles of creating their online identity and protecting it
Good 4	
Excellent 5	<ul style="list-style-type: none"> • systematically obtain information about digital services and applications • use digital services and applications effortlessly and diversely in their work tasks • use and share diverse digital content in compliance with copyrights • systematically follow instructions related to data security and data protection • understand the principles of creating their online identity and protecting it.

Optional learning outcomes, 3 Competence point

Students know how to

- use different digital environments and applications in their work tasks
- produce and share digital material in networks related to their vocational field.

Assessment

Students use different digital environments and applications in their work tasks.	
Students	
Satisfactory 1	<ul style="list-style-type: none"> operate in digital environments and networks with some guidance use applications in professional networks, requiring guidance from time to time
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> operate in digital environments and networks use applications when operating in professional networks
Good 4	
Excellent 5	<ul style="list-style-type: none"> operate in digital environments and networks use applications diversely when operating in professional networks.

Students produce and share digital material in networks related to their vocational field.	
Students	
Satisfactory 1	<ul style="list-style-type: none"> produce digital material in professional networks with some guidance share material within the team and comply with instructions concerning copyrights
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> produce digital material in professional networks share material and comply with instructions on copyrights
Good 4	
Excellent 5	<ul style="list-style-type: none"> produce diverse digital material in professional networks share material and comply with instructions on copyrights systematically.

Art and creative expression

Compulsory learning outcomes, 1 Competence point

Students know how to

- recognise the importance of cultures and art for well-being
- express themselves by means of art and creative expression
- express themselves creatively in writing and make use of fictional texts.

Assessment

Students recognise the role cultures and art play in well-being.	
Students	
Satisfactory 1	<ul style="list-style-type: none"> recognise forms of culture and art in their work with guidance, recognise examples of local, national and European art and culture observe the effects of art and culture on well-being
Satisfactory 2	

Good 3	<ul style="list-style-type: none"> • use different forms of culture and art in their work • recognise examples of local, national and European art and culture • recognise the effects of art and culture on well-being
Good 4	
Excellent 5	<ul style="list-style-type: none"> • use a wide range of forms of culture and art diversely in their work • recognise diverse examples of local, national and European art and culture • recognise diverse effects of art and culture on well-being.

Students express themselves by means of art and creative expression.	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • develop their creative expression with some guidance • express themselves by means of art and creative expression independently or in cooperation with others with some guidance
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • develop their creative expression • express themselves by means of art and creative expression independently or in cooperation with others
Good 4	
Excellent 5	<ul style="list-style-type: none"> • develop their creative expression in a goal-oriented manner • express themselves diversely by means of art and creative expression independently or in cooperation with others.

Students express themselves creatively in writing and make use of fictional texts.	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • try creative writing • take advantage of fictional texts when writing • recognise examples from literature to support their work
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • try different ways of creative writing • take advantage of different fictional texts when writing • use literature to support their work
Good 4	
Excellent 5	<ul style="list-style-type: none"> • try diverse ways of creative writing • take advantage of diverse fictional texts when writing • use diverse literature to support their work.

Optional learning outcomes, 3 Competence point

Students know how to

- observe and gather information on the cultural environment and its phenomena
- plan and experiment with the realisation of a piece of work, product or service by means of creative expression

Assessment

Students observe and gather information about the cultural environment and its phenomena.	
Students	
Satisfactory 1	<ul style="list-style-type: none"> observe their cultural environment together with others gather information about the phenomena in their cultural environment to support their work
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> observe their cultural environment gather information about the phenomena in their cultural environment from their chosen point of view to support their work
Good 4	
Excellent 5	<ul style="list-style-type: none"> observe their cultural environment diversely gather information about the phenomena in their cultural environment from their chosen points of view to support their work.

Students design a piece of work, product or service and experiment with realising it using methods of creative expression.	
Students	
Satisfactory 1	<ul style="list-style-type: none"> design a small-scale piece of work, product or service using the methods of creative expression experiment with realising a piece of work, product or service by means of creative expression
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> design a piece of work, product or service using the methods of creative expression experiment with realising a piece of work, product or service by means of creative expression
Good 4	
Excellent 5	<ul style="list-style-type: none"> design a piece of work, product or service using diverse methods of creative expression experiment with realising a piece of work, product or service diversely by means of creative expression.

2.37. Skills in mathematics and natural sciences, 6 Competence point (400013)

-

Mathematics and application of mathematics

Compulsory learning outcomes, 4 Competence point

Students know how to

- perform calculations and unit conversions and apply business mathematics to the extent required in their vocational field and in everyday life
- make observations and draw conclusions about the geometrical properties of figures and bodies

- use logical reasoning, equations and the necessary technical aids to solve mathematical problems
- assess the accuracy and scale of the results and the method used to solve the problem.
- assess their mathematical skills relevant to the vocational field.

Assessment

Students perform calculations and unit conversions and apply business mathematics to the extent required in their vocational field and in everyday life.	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • perform calculations related to their vocational field and everyday life, such as basic arithmetic operations and percentage functions • perform unit conversions • with instructions, perform simple business mathematics calculations related to everyday life and work • observe interdependencies and proportionalities between quantities
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • effortlessly perform calculations related to their vocational field and everyday life, such as basic arithmetic operations and percentage functions • independently perform unit conversions • perform simple business mathematics calculations related to everyday life and work • observe and identify interdependencies and proportionalities between quantities
Good 4	
Excellent 5	<ul style="list-style-type: none"> • apply the necessary arithmetic operations related to their vocational field and everyday life, such as basic arithmetic operations and percentage functions, and assess the level of accuracy of the results • perform unit conversions independently and adeptly • perform business mathematics calculations related to everyday life and work and make justified conclusions based on comparisons • understand the interdependency and proportionality between quantities

Students make observations and draw conclusions about the geometrical properties of figures and bodies.	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • perform the most common surface and volume calculations • solve practical problems with the help of geometry, requiring guidance from time to time
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • effortlessly manage the most common surface and volume calculations • solve practical problems in the vocational field using geometry
Good 4	

Excellent 5	<ul style="list-style-type: none"> • apply surface and volume calculations to work duties and evaluate the results • solve practical problems in their vocational field using geometry.
-------------	---

Students use logical reasoning, equations and the necessary technical aids to solve mathematical problems.	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • solve key mathematical problems related to their vocational field by using basic arithmetic operations • use simple mathematical equations to solve simple mathematical problems, requiring guidance from time to time • use a calculator and other technical aids, such as mathematical software, to solve basic mathematical problems related to work • use tables and diagrams following instructions to solve tasks related to work • handle statistical data sets and interpret key figures, requiring guidance from time to time
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • solve problems related to their vocational field using mathematical methods • use simple mathematical equations to solve simple mathematical problems • effortlessly use a calculator and other aids, such as mathematical software, to solve problems related to their occupational field • use tables and diagrams to solve tasks related to work • independently handle statistical material and interpret key figures
Good 4	
Excellent 5	<ul style="list-style-type: none"> • apply mathematical methods to defining and solving problems related to their vocational field and assess the reliability and level of accuracy of the results • use mathematical equations to solve mathematical problems • make versatile and efficient use of the properties of a calculator and other aids, such as mathematical software, to solve problems related to their vocational field • use tables, diagrams and other statistically produced data to solve mathematical problems related to work • handle statistical data sets and interpret key figures independently and effortlessly.

Students assess the accuracy and scale of the results and the method used to solve the problem.	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • verify the accuracy and scale of the results • evaluate the feasibility of the method used to solve the problem, requiring guidance from time to time
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • verify the accuracy and scale of the results and identify possible sources of errors • systematically evaluate the feasibility of the method used to solve the problem

Good 4	
Excellent 5	<ul style="list-style-type: none"> • verify the accuracy and scale of the results, taking possible sources of errors into account • systematically evaluate the feasibility of the method used to solve the problem and evaluate possible other methods for achieving results.

Students evaluate their mathematical competence related to their vocational field.	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • identify and justify their mathematical strengths and development needs that are important in terms of their vocational field
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • systematically identify and justify their mathematical strengths and development needs that are important in terms of their vocational field
Good 4	
Excellent 5	<ul style="list-style-type: none"> • systematically identify and justify their mathematical strengths and development needs that are important in terms of their vocational field and propose ways to improve mathematical skills.

Optional learning outcomes, 3 Competence point

Students know how to

- solve mathematical problems related to their vocational field by reasoning and with the help of equations and graphs
- obtain, group and interpret mathematical information
- produce statistical data, interpret graphic presentations and calculate probabilities
- assess the accuracy of mathematical solutions and the scale of the result
- apply business mathematics in everyday life and at work as necessary
- assess their mathematical competence.

Assessment

Students solve mathematical problems related to their vocational field by reasoning and with the help of equations and graphs.	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • solve mathematical problems related to their vocational field by reasoning, requiring guidance from time to time • use simple mathematical equations to solve mathematical problems related to their vocational field • use tables and diagrams in sector-specific tasks according to instructions
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • solve mathematical problems related to their vocational field by reasoning

	<ul style="list-style-type: none"> • solve common problems in everyday life and in the world of work mathematically • use tables and diagrams in sector-specific tasks
Good 4	
Excellent 5	<ul style="list-style-type: none"> • solve mathematical problems related to their vocational field independently and systematically by reasoning • model and solve problems related to everyday life and their vocational field mathematically • use equations, tables and diagrams in tasks specific to their vocational field, evaluating their feasibility

Students obtain, group and interpret mathematical information.	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • recognise mathematical information that is central to their vocational field • collect and group graphic information and table data from different sources
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • identify and compare mathematical information related to their vocational field as necessary, using statistics, tables and graphic presentations as sources • collect, group and analyse graphic information and table data from different sources
Good 4	
Excellent 5	<ul style="list-style-type: none"> • identify and evaluate mathematical information related to their vocational field and make conclusions based on it • collect and apply versatile information, using statistics, tables and graphic presentations as sources, and group information for different needs based on them.

Students produce information based on statistical material, interpret graphic presentations and calculate probabilities.	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • with guidance, produce the most common key figures based on statistical data • understand the importance of probability calculation in their work and calculate simple probabilities
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • produce the most common key figures using statistical material related to their vocational field • understand the importance of probability calculation in their work and calculate probabilities
Good 4	
Excellent 5	<ul style="list-style-type: none"> • produce the main key figures independently using statistical data related to their vocational field • understand the importance of probability calculation in their work and calculate probabilities independently

Students assess the accuracy of mathematical solutions and the scale of the result.
--

Students	
Satisfactory 1	<ul style="list-style-type: none"> • verify the accuracy of simple mathematical solutions and have an idea of the scale of the result
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • verify the accuracy of mathematical solutions and infer the scale of the results
Good 4	
Excellent 5	<ul style="list-style-type: none"> • verify the accuracy of multi-stage mathematical solutions and infer the scale of the result.

Students apply business mathematics in everyday life and at work as necessary.	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • draw up simple cost and profitability comparisons
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • draw up cost and profitability comparisons and make conclusions based on the comparisons
Good 4	
Excellent 5	<ul style="list-style-type: none"> • draw up multi-stage cost and profitability comparisons and make justified conclusions based on the comparisons.

Students assess their mathematical skills.	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • identify and justify their strengths and development needs in their mathematical skills
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • systematically identify and evaluate their strengths and development needs in their mathematical skills and justify them
Good 4	
Excellent 5	<ul style="list-style-type: none"> • systematically identify and assess their mathematical skills with justifications and propose ways of improving them.

Physical and chemical phenomena and their application

Compulsory learning outcomes, 2 Competence point

Students know how to

- recognise key concepts in physics and apply them in everyday life and at work
- take into account chemical substances and their properties in their work
- assess their skills in physics and chemistry in their vocational field.

Assessment

Students recognise key concepts in physics and apply them in everyday life and at work.

Students	
Satisfactory 1	<ul style="list-style-type: none"> describe common physical phenomena using the key concepts see the connections between the ordinary properties and quantities related to physical phenomena, but require guidance from time to time with guidance, use their physics competence in their work
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> describe and explain physical phenomena using key concepts see the connections between ordinary properties and quantities related to physical phenomena use their physics competence diversely in their work
Good 4	
Excellent 5	<ul style="list-style-type: none"> describe and explain physical phenomena using key concepts see the connections between the properties and quantities related to physical phenomena apply their physics competence diversely in their work

Students take into account chemical substances and their properties in their work.

Students	
Satisfactory 1	<ul style="list-style-type: none"> describe common chemical phenomena using key concepts take into account the properties and possible environmental risks of the most common chemical substances used in their work handle chemical substances in a manner that does not risk their own safety, the safety of others or the environment
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> describe and explain chemical phenomena using key concepts take into account the properties and possible environmental risks of the chemical substances used in their work handle chemical substances in a manner that does not risk their own safety, the safety of others or the environment
Good 4	
Excellent 5	<ul style="list-style-type: none"> describe and explain chemical phenomena diversely using key concepts take into account the properties and possible environmental risks of the chemical substances used in their work in a responsible manner handle chemical substances in a manner that does not risk their own safety, the safety of others or the environment.

Students assess physics and chemistry competence.

Students	
Satisfactory 1	<ul style="list-style-type: none"> recognise and justify their strengths in physics and chemistry and development needs that are important in their vocational field
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> systematically recognise and justify their strengths in physics and chemistry and development needs that are important in their vocational field

Good 4	
Excellent 5	<ul style="list-style-type: none"> recognise and justify their strengths in physics and chemistry and development needs that are important in their vocational field and propose ways of improving their competence.

Optional learning outcomes, 3 Competence point

Students know how to

- describe and explain phenomena in their vocational field with the help of the concepts and laws of physics
- perform experimental measurements and observations on physical and chemical phenomena related to their vocational field
- handle results of experimental measurements and analyse observations on the physical and chemical phenomena in their vocational field
- assess their physics and chemistry competence.

Assessment

Students describe and explain phenomena in their vocational field with the help of concepts and laws of physics	
Students	
Satisfactory 1	<ul style="list-style-type: none"> describe and explain concepts and laws related to thermophysics, mechanics, waves and electricity in their work, requiring guidance from time to time
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> describe and explain concepts and laws related to thermophysics, mechanics, waves and electricity systematically in their work
Good 4	
Excellent 5	<ul style="list-style-type: none"> describe and explain concepts and laws related to thermophysics, mechanics, waves and electricity independently in their work.

Students conduct experimental measurements and make observations on physical and chemical phenomena related to their vocational field.	
Students	
Satisfactory 1	<ul style="list-style-type: none"> calculate concentrations and quantities of substances, requiring guidance from time to time obtain information from chemical safety data sheets, requiring guidance from time to time conduct measurements and make experimental observations using methods and equipment that are suitable for the vocational field but require guidance from time to time
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> calculate concentrations and quantities of substances obtain information from chemical safety data sheets related to everyday life and their vocational field

	<ul style="list-style-type: none"> independently conduct measurements and make experimental observations using methods and equipment suitable for the vocational field
Good 4	
Excellent 5	<ul style="list-style-type: none"> independently calculate concentrations and quantities of substances obtain information from chemical safety data sheets using diverse sources of information independently plan and conduct measurements and make experimental observations using methods and equipment suitable for the vocational field

Students handle results of experimental measurements and analyse observations on the physical and chemical phenomena in their vocational field.	
Students	
Satisfactory 1	<ul style="list-style-type: none"> present key results using tables and graphic presentations evaluate the reliability of the measurement results, requiring guidance from time to time determine possible error factors and report the result with the necessary accuracy, requiring guidance from time to time
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> present key results using tables and graphic presentations evaluate the reliability of the measurement results systematically define possible error factors and announce the result with sufficient accuracy
Good 4	
Excellent 5	<ul style="list-style-type: none"> present the key results illustrating them clearly with tables and graphic presentations independently evaluate the reliability of the measurement results and make conclusions based them determine possible error factors and report the result with the correct accuracy.

Students assess their physics and chemistry competence.	
Students	
Satisfactory 1	<ul style="list-style-type: none"> recognise and justify their strengths in physics and mathematics and the areas requiring improvement
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> systematically recognise and evaluate their strengths in physics and chemistry and the areas requiring improvement, justifying them
Good 4	
Excellent 5	<ul style="list-style-type: none"> systematically recognise and evaluate their skills in physics and chemistry, justifying them, and propose ways of improving competence.

2.38. Citizenship and working life competence, 9 Competence point (400014)

Operating as a member of society and a citizen

Compulsory learning outcomes, 2 Competence point

Students know how to

- operate as part of Finnish society
- act as a user of society's services and as a consumer
- plan and manage their personal finances and evaluate the associated risks.

Assessment

Students operate as part of Finnish society.	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • follow the principles of equity and equality • know the fundamental rights and responsibilities of the citizen • find out about some ways of civic participation and operate as active citizens
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • follow the principles of equity and equality • know the fundamental rights and responsibilities of the citizen • know different ways of civic participation and operate as active citizens
Good 4	
Excellent 5	<ul style="list-style-type: none"> • act in compliance with and promote the principles of equity and equality • know the fundamental rights and responsibilities of the citizen well • know diverse ways of civic participation and operate as active citizens.

Students act as users and consumers of society's services	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • use the society's services they need • act responsibly, being aware of their rights and obligations as consumers • acquire information on consumer matters they need with some guidance
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • use the society's services they need appropriately • act responsibly, being aware of their rights and obligations as consumers • acquire the information they need on consumer matters
Good 4	
Excellent 5	<ul style="list-style-type: none"> • act as informed users of society's services

	<ul style="list-style-type: none"> • act responsibly, being well aware of their rights and obligations as consumers • actively acquire the information on consumer matters they need.
--	---

Students plan their finances and assess the associated risks.	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • recognise central factors affecting society and their personal financial situation • monitor their income and expenses • plan their purchases and compare different financing options • set personal financial goals • anticipate their financial position in different life situations
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • assess the central factors affecting their personal financial situation • monitor their income and expenses systematically • plan their purchases and compare different financing options • set personal financial goals and monitor their accomplishment • anticipate their financial position in different life situations, recognising the risk factors in different situations
Good 4	
Excellent 5	<ul style="list-style-type: none"> • assess and anticipate factors that affect their personal financial situation • monitor their income and expenses in a goal-oriented and systematic manner • plan purchases and compare different financing options systematically and from diverse points of view • set personal financial goals, monitor their accomplishment and, when necessary, set more specific goals • anticipate their financial position in different life situations, act systematically to achieve the goals and take into account risk factors in different situations.

Optional learning outcomes, 3 Competence point

Students know how to

- engage in civic participation
- estimate the importance of their vocational field in society
- interpret the basic concepts of national economy and recognise its main actors.

Assessment

Students engage in civic participation.	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • seek information about some ways of civic participation and follow decision-making in society • participate in civic activities
Satisfactory 2	

Good 3	<ul style="list-style-type: none"> • seek information on the opportunities to engage in civic participation and follow decision-making in society • participate in activities aimed at civic engagement
Good 4	
Excellent 5	<ul style="list-style-type: none"> • seek diverse information on the opportunities for civic participation and follow decision-making in society • participate in activities aimed at civic engagement in a goal-oriented manner.

Students assess the importance of their vocational field in society.	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • follow societal discussion in the vocational field • estimate the importance of their vocational field in society with some guidance
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • follow and evaluate societal discussion in the vocational field • estimate the importance of their vocational field in society and its future prospects
Good 4	
Excellent 5	<ul style="list-style-type: none"> • follow and evaluate societal discussion in their vocational field, participating in it in some way • estimate and follow the importance of their vocational field in society and its future prospects diversely.

Students interpret the basic concepts of national economy and recognise its main actors	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • follow the news coverage related to the economy • find out how the societal and economic situation is reflected in jobs and employment in their vocational field • give examples of basic concepts of national economy and its key actors
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • follow the news coverage related to the economy and understand the importance of the economy in society • understand how the societal and economic situation is reflected in jobs, employment and the future in their vocational field • know the basic concepts of national economy and recognise its main actors
Good 4	
Excellent 5	<ul style="list-style-type: none"> • actively follow the news coverage related to the economy and understand the importance of the economy in society • understand how the societal and economic situation is reflected in jobs and employment in their vocational field and reflect on the theme from diverse points of view • know the basic concepts of national economy and its key actors and evaluate their significance for the national economy.

Operating in the world of work

Compulsory learning outcomes, 2 Competence point

Students know how to

- analyse the labour market situation and the competence needs in their vocational field
- conclude an employment contract with the employer
- act as part of the work community.

Assessment

Students analyse the labour market situation and the competence needs in their vocational field.	
Students	
Satisfactory 1	<ul style="list-style-type: none">• analyse the labour market situation in their vocational field with some guidance• know some of the main principles of the labour market system• can give examples of professional networks in their vocational field• recognise competences required in tasks in their vocational field with some guidance
Satisfactory 2	
Good 3	<ul style="list-style-type: none">• analyse the labour market situation in their vocational field• know the main principles of the labour market system• know the most important professional networks of their vocational field• recognise competences required in different tasks in their vocational field
Good 4	
Excellent 5	<ul style="list-style-type: none">• analyse the labour market situation in the vocational field from diverse points of view• know and understand the main principles of the labour market system• know the professional networks of their vocational field and participate in their activities• diversely recognise competences required in different tasks.

Students know how to conclude an employment contract with the employer.	
Students	
Satisfactory 1	<ul style="list-style-type: none">• familiarise themselves with the terms of employment and the main labour legislation with some guidance• check the content of the employment contract in cooperation with an expert
Satisfactory 2	
Good 3	<ul style="list-style-type: none">• familiarise themselves with the terms of employment and key labour legislation in their vocational field• check the content of the employment contract, with the help of an expert if necessary
Good 4	

Excellent 5	<ul style="list-style-type: none"> familiarise themselves comprehensively with the terms of employment and key labour legislation in their vocational field check the content of the employment contract independently and discuss the terms of employment with the employer.
-------------	---

Students act as part of the work community.	
Students	
Satisfactory 1	<ul style="list-style-type: none"> comply with the set working hours and agreed practices comply with instructions related to appearance and dress code in their work with some guidance wear appropriate protective clothing in their work and comply with occupational safety instructions work as part of a diverse and multicultural work community
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> comply with the set working hours and agreed practices and act flexibly in different situations comply with instructions related to appearance and dress code in their work wear appropriate protective clothing in their work and comply with occupational safety instructions work naturally as part of a diverse and multicultural work community
Good 4	
Excellent 5	<ul style="list-style-type: none"> comply with the set working hours and agreed practices and act flexibly in different and changing situations comply with instructions related to appearance and dress code, also taking into account special situations wear and take care of the appropriate protective clothing at work and comply with occupational safety instructions work confidently as part of a diverse and multicultural work community, promoting the wellbeing of the community.

Optional learning outcomes, 3 Competence point

Students know how to

- act as members of their work communities
- act in different interactive and group situations in the world of work
- find out about tasks in their vocational field in the national and international labour market.

Assessment

Students act as members of their work communities.	
Students	
Satisfactory 1	<ul style="list-style-type: none"> recognise their role as a member of the work community with some guidance as a rule, work in accordance with the operating culture of the workplace comply with the agreed practices and identify development needs in their own practices
Satisfactory 2	

Good 3	<ul style="list-style-type: none"> • recognise their role as members of the work community • work in accordance with the operating culture of the workplace • comply with the agreed practices and improve their own practices
Good 4	
Excellent 5	<ul style="list-style-type: none"> • recognise their role and the role of others as members of the work community • work in accordance with the operating culture of the workplace, evaluating it and proposing development ideas • comply with the agreed practices and actively improve their own practices.

Students work in different interactive and group situations in the world of work.	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • work in different interactive situations in the world of work • improve their interactive skills according to the feedback received and with some guidance • act in accordance with their work task and the operating culture of the workplace in group situations • use appropriate psychological knowledge to promote their own and the work community's wellbeing with some guidance
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • work constructively in different interactive situations in the world of work • improve their interaction competence according to the feedback received • work in different group situations as indicated by their work task and the operating culture of the workplace • use appropriate psychological knowledge to promote their own and the work community's wellbeing
Good 4	
Excellent 5	<ul style="list-style-type: none"> • work constructively and flexibly in different interactive situations in the world of work, taking others into account • improve their interaction competence actively according to the feedback received • work confidently in different group situations as indicated by their work task and the operating culture of the workplace • use appropriate psychological knowledge to promote and improve their own and the work community's wellbeing.

Students find out about tasks in their vocational field in the national and international labour market.	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • seek information about jobs in their vocational field in the national and international labour market with some guidance • find suitable jobs for themselves in the national and international job market with some guidance
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • independently seek information about jobs in their vocational field in the national and international labour market

	<ul style="list-style-type: none"> • find suitable jobs for themselves in the national and international labour market
Good 4	
Excellent 5	<ul style="list-style-type: none"> • seek information about jobs in their vocational field in the national and international labour market independently and diversely • find suitable jobs for themselves in the national and international labour market.

Study and career planning capabilities

Compulsory learning outcomes, 1 Competence point

Students know how to

- recognise their interests, opportunities and need for support
- make choices concerning their qualification and career
- while studying for the qualification, obtain information about different further education opportunities and the education offered
- while studying for the qualification, prepare themselves for job hunting and presenting their competence.

Assessment

Students recognise their interests, opportunities and need for support.	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • identify their strengths, capabilities and development needs • recognise their interests and opportunities in the vocational field, requiring encouragement • occasionally monitor the progress of their learning and acquisition of competence • evaluate their learning and competences
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • identify and recognise their strengths, capabilities and development needs • independently recognise their interests and their opportunities in the vocational field • on their own initiative, monitor the progress of their learning and acquisition of competence, recognising potential needs for support • regularly evaluate their learning and competence
Good 4	
Excellent 5	<ul style="list-style-type: none"> • diversely identify and independently recognise their strengths, capabilities and development needs • recognise their interests and realistically assess their opportunities in the vocational field • take responsibility for their learning and promoting it • commit themselves to monitoring the progress of their learning and acquisition of competence by documentation and recognise potential needs for support • assess their learning and competence independently and make the necessary changes.

Students make choices concerning their qualification and career.

Students	
Satisfactory 1	<ul style="list-style-type: none"> familiarise themselves with suitable career options, using information sources and electronic guidance services familiarise themselves with the composition of their qualification, the qualification requirements and options that promote finding employment with guidance, monitor the progress of their studies recognise and try different learning environments in acquiring competence
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> identify options that are suitable for them to support their career plan with the help of different information sources and electronic guidance services are familiar with the composition of their qualification, the qualification requirements and options that promote finding employment and advance their career plan monitor the progress of their studies on their own initiative use different learning environments in acquiring competence
Good 4	
Excellent 5	<ul style="list-style-type: none"> find out about their options diversely and independently based on their career plan, using different information sources and electronic guidance services actively are familiar with the composition of their qualification, the qualification requirements and their options, and independently make choices and decisions that promote their career monitor the progress of their studies actively and with commitment use and choose learning environments that support their vocational development.

While completing their qualifications, students obtain information about different options for further studies and about the education offered.

Students	
Satisfactory 1	<ul style="list-style-type: none"> use information sources related to further studies, guidance services and application systems obtain information about different options and opportunities for further studies and draw up their career plans familiarise themselves with the entrance requirements, application procedure and selection criteria for further studies
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> use information sources, guidance services and application systems related to further studies and planning for the future adeptly obtain information about different further study options suitable for them and draw up career plans familiarise themselves diversely with the entrance requirements, application procedure and selection criteria for further studies
Good 4	
Excellent 5	<ul style="list-style-type: none"> independently use information sources, guidance services and application systems related to further studies and planning for the future

	<ul style="list-style-type: none"> actively obtain information about different further study options and use this information for their career plans familiarise themselves actively and on their own initiative with the entrance requirements, application procedure and selection criteria for further studies
--	---

Students prepare for job hunting and presenting their competence while studying.	
Students	
Satisfactory 1	<ul style="list-style-type: none"> familiarise themselves with the opportunities, working environments and career choices provided by different jobs draw up a presentation of their competence for job hunting and practise presenting their competence apply for jobs, but require guidance with the use of application systems and methods from time to time update their career plan to find employment
Satisfactory 2

Entrepreneurship and entrepreneurial activities

Compulsory learning outcomes, 1 Competence point

Students know how to

- promote the company's objectives in their work
- generate a business idea and assess the possibilities of realising it.

Assessment

Students promote the company's objectives in their work.	
Students	
Satisfactory 1	<ul style="list-style-type: none"> recognise the importance of enterprising in society describe the organisation's business model with some guidance

	<ul style="list-style-type: none"> work cost-effectively, recognising the importance of their activities as part of the work community
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> describe the importance of business in society describe the organisation's business model act cost-effectively and in a customer-oriented manner in their tasks, recognising the importance of their activities as part of the work community
Good 4	
Excellent 5	<ul style="list-style-type: none"> describe the importance of business in their vocational field in society and anticipate the future prospects in the field describe the organisation's business model independently take initiative in their tasks and work in a cost-effective and customer-oriented manner, recognising the impacts of their work on the organisation's performance.

Students generate a business idea and assess the possibilities for realising it.	
Students	
Satisfactory 1	<ul style="list-style-type: none"> generate a business idea with some guidance find services and information sources that support setting up a business determine the financial resources required for the business idea describe the networks required to realise the business idea assess their capabilities to work as entrepreneurs
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> generate the business idea from a customer-oriented point of view find key services and information sources that support setting up a business assess the financial and operational resources required by the business idea describe the networks required to realise the business idea assess their capabilities for working as entrepreneurs and identify the risks involved in business
Good 4	
Excellent 5	<ul style="list-style-type: none"> generate a business idea in a customer-oriented manner and assess its practicality take advantage of different channels to find services and information sources that support setting up a business estimate the availability of the financial and operational resources required by the business idea describe the networks required to realise the business idea and assess cooperation opportunities assess their capabilities to work as entrepreneurs realistically, with an awareness of the risks involved in business.

Maintaining ability to work and wellbeing at work

Compulsory learning outcomes, 2 Competence point

Students know how to

- take care of their health and functional capacity

- assess their operating environment and activities in terms of health and safety
- take physical activity to improve their ability to study and work and their wellbeing
- prevent accidents and administer first aid.

Assessment

Students take care of their health and functional capacity.	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • with some guidance, seek information on the health of their age group and the possibilities of promoting their health and functional capacity • draw up a feasible plan to promote their health and wellbeing, taking into account the importance of such matters as physical activity, nutrition, recovery, sleep, mental wellbeing, abstaining from smoking (including all nicotine products) and using intoxicants, sexual health and interpersonal relationships in the daily activities • with some guidance, promote their health and wellbeing according to the plan and evaluate the accomplishment of their goals
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • seek information about the health of their age group and the possibilities of promoting their health and functional capacity • draw up a personal plan for themselves to promote their health and wellbeing, taking diversely into account the importance of such matters as physical activity, nutrition, recovery, sleep, mental wellbeing, abstaining from smoking (including all nicotine products) and using intoxicants, sexual health and interpersonal relationships in maintaining study and work ability • promote their health and wellbeing according to the plan and realistically evaluate the effect of their activities and the accomplishment of their goals
Good 4	
Excellent 5	<ul style="list-style-type: none"> • seek diverse information about health differences in their age group and the possibilities of promoting their health and functional capacity • draw up a diverse plan that can be updated as necessary for themselves to promote their health and wellbeing, taking into account the importance of such matters as physical activity, nutrition, recovery, sleep, mental wellbeing, abstaining from smoking (including all nicotine products) and using intoxicants, sexual health and interpersonal relationships in maintaining study and work ability • actively promote their health and wellbeing and realistically evaluate the realisation of the plan and the accomplishment of their goals, also using feedback received from others in the evaluation.
Students assess their operating environment and activities in terms of health and safety.	
Students	

Satisfactory 1	<ul style="list-style-type: none"> • in cooperation with others, follow the agreed operating instructions that promote safety and health, but require guidance from time to time • take into account in their work the stress factors of their vocational field and the importance of improving ability to work, requiring guidance from time to time • with guidance, find out how ergonomics affects ability to work
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • in cooperation with others, follow the agreed operating instructions that promote safety and health • take into account the stress factors of their vocational field and promote their ability to work • find out how ergonomics affects ability to work
Good 4	
Excellent 5	<ul style="list-style-type: none"> • together with others, follow the agreed operating instructions that promote safety and health and evaluate the needs to develop their practices • take into account the stress factors of their vocational field diversely in their work and promote their ability to work • find out how ergonomics affects ability to work in different working environments.

Students enhance their ability to study and work and their wellbeing with physical activity.	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • seek information about the most common benefits of physical activity and the physical activity required to maintain good health and ability to study and work ability, and take this information into account to some extent in their health and safety promotion plan • practise to some extent their physical qualities and skills in ergonomics required to maintain a good ability to study and work • engage in physical activity in exercise situations, maintaining their ability to study and work
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • seek information about the benefits of physical activity and the physical activity requirements for maintaining good health and ability to study and work, and take this information into account in their health and safety promotion plan • improve their physical qualities and skills in ergonomics required to maintain a good ability to study and work • engage in diverse physical activity in different exercise situations, maintaining their ability to study and work
Good 4	
Excellent 5	<ul style="list-style-type: none"> • diversely seek information about the benefits of physical activity and the physical activity requirements for maintaining good health and ability to study and work, and take this information into account in their health and safety promotion plan, also with reference to their ability to study or work • on their own initiative and diversely, improve their physical qualities and skills in ergonomics required to maintain ability to study and work

	<ul style="list-style-type: none"> engage in diverse physical activity to the best of their ability in all exercise situations, maintaining their ability to study and work
--	--

Students prevent accidents and administer first aid.	
Students	
Satisfactory 1	<ul style="list-style-type: none"> anticipate potential accident risks in exercise situations administer first aid in the most common situations where first aid is required, recognise the limits of their skills and rapidly get further help
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> work to prevent accidents in exercise situations administer first aid and rapidly get further help if necessary
Good 4	
Excellent 5	<ul style="list-style-type: none"> act carefully and prevent accidents in exercise situations administer first aid and seek for timely additional assistance through their actions, prevent additional accidents.

Optional learning outcomes, 3 Competence point

Students know how to

- maintain and improve their ability to work and wellbeing through physical activity
- promote the wellbeing and participation of the educational community and the students.

Assessment

Students maintain and promote their ability to work and wellbeing with physical activity.	
Students	
Satisfactory 1	<ul style="list-style-type: none"> maintain their physical functional capacity and participate in exercise situations following instructions, following the principles of fair play use the basic motor skills needed in physical activity with guidance, monitor their workload and requirements concerning ability to work in relation to their functional capacity
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> maintain their physical functional capacity and actively participate in exercise situations, observing the principles of fair play apply the basic motor skills needed in physical activity in a versatile manner independently monitor their workload and requirements related to ability to work in relation to their functional capacity
Good 4	
Excellent 5	<ul style="list-style-type: none"> monitor, assess and maintain their physical functional capacity and actively participate in exercise situations, promoting the realisation of the principles of fair play apply the basic motor skills needed in physical activity and skills in individual sports in a versatile manner assess and justify their workload and requirements related to ability to work in relation to their functional capacity.

Students promote the wellbeing and participation of the educational community and the students.

Students	
Satisfactory 1	<ul style="list-style-type: none"> work to promote participation as members of a student group and participate in exercise and other events and occasions organised for students
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> actively work to promote well-being as a member of a student group as well as plan and participate in exercise and other events and occasions organised by students
Good 4	
Excellent 5	<ul style="list-style-type: none"> are active members of the student group as well as plan and participate in exercise and other events and occasions organised by students in a manner that promotes well-being and participation.

Promotion of sustainable development

Compulsory learning outcomes, 1 Competence point

Students know how to

- follow the principles of sustainable development
- take into account the principles of life cycle thinking
- consider solutions from ethical points of view.

Assessment

Students know how to follow the principles of sustainable development.

Students	
Satisfactory 1	<ul style="list-style-type: none"> know the main objectives of ecological, financial, social and cultural sustainability in sustainable development understand the limited nature of natural resources and the importance of their sustainable use nationally with the help of experts, recognise key practices for promoting sustainable development
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> know the main objectives of ecological, financial, social and cultural sustainability in sustainable development and their impacts on each other understand the limited nature of natural resources and the importance of their sustainable use at the national level in proportion to the global operating environment and cite examples of this independently recognise key practices for promoting sustainable development
Good 4	
Excellent 5	<ul style="list-style-type: none"> are comprehensively familiar with the central objectives of ecological, financial, social and cultural sustainability in sustainable development and their impacts on each other

	<ul style="list-style-type: none"> • understand the limited nature of natural resources and the importance of their sustainable use at the national level in proportion to the global operating environment and propose areas of application • independently recognise key practices for promoting sustainable development from different points of view.
--	---

Students take into account the principles of life cycle thinking.	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • understand the principle of the circular economy • recognise the energy or material efficiency of a product or a service • determine the life cycle of a product at a general level
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • understand the principle of the circular economy and evaluate its importance • assess the energy and material efficiency of a product or a service • determine the life cycle of a product independently
Good 4	
Excellent 5	<ul style="list-style-type: none"> • understand the principle of the circular economy, evaluate its importance and propose possibilities for development • assess the energy or material efficiency of a product or service, proposing necessary reforms • determine the life cycle of a product, understanding the overall effects.

Students consider solutions from ethical points of view	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • identify some work stages and situations that involve ethical choices • consider the impact of their own decisions from an ethical point of view together with others
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • identify work stages and situations that involve ethical choices • consider the impact of decisions made by them and by others independently from an ethical point of view
Good 4	
Excellent 5	<ul style="list-style-type: none"> • identify diverse work stages and situations that involve ethical choices • consider and analyse the impacts of decisions made by them and by others from different ethical points of view.

Optional learning outcomes, 3 Competence point

Students know how to

- evaluate factors that contribute to sustainable development in their work or in their vocational field
- plan operating methods related to the promotion of sustainable development
- act as promoters of sustainable development in their work or in their vocational field

- assess the success of promoting sustainable development in their work or in their vocational field

Assessment

Students assess factors contributing to sustainable development in their work or in their vocational field.	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • familiarise themselves with the activities of the workplace or the vocational field to the extent that they are able to evaluate them from one of the perspectives of sustainable development (ecological, financial, social or cultural) together with the members of the work community • assess key factors contributing to sustainable development in the workplace or in the vocational field following instructions • together with the members of the work community, decide which of the perspectives of sustainable development should be developed in particular
Satisfactory 2	
Good 3	<ul style="list-style-type: none"> • familiarise themselves with the activities of the workplace or vocational field to the extent that they are able to evaluate them from the perspectives of sustainable development (ecological, financial, social and cultural) independently • assess key factors contributing to sustainable development in the workplace or in the vocational field • decide which of the perspectives of sustainable development should be developed in particular, proposing some initiatives
Good 4	
Excellent 5	<ul style="list-style-type: none"> • familiarise themselves with the activities of the workplace or the vocational field to the extent that they are able to comprehensively evaluate them from the different perspectives of sustainable development (ecological, financial, social and cultural) • comprehensively assess key factors contributing to sustainable development in the workplace or in the vocational field • decide which perspective of sustainable development should be developed in particular, justifying their choice and proposing the necessary initiatives.

Students plan practices related to promoting sustainable development	
Students	
Satisfactory 1	<ul style="list-style-type: none"> • define the objectives of promoting sustainable development and solving problems in cooperation with the members of the work community • follow instructions in choosing measures and practises that promote sustainable development • schedule tasks and determine resources in cooperation with others • participate in defining the required cooperation
